Dr. Peale said Mr. Thomas was a restless man eager always to do more and feeling that there was not enough time in life to do everything he wanted to do.

"He was the most extensive world traveler of his era," Dr. Peale said. "He wanted to go to the moon as the first reporter and newscaster. Instead he went to heaven. We can visualize Lowell there today enthusiastically exploring heaven. Surely, the Heavenly Fa-ther is enjoying his gifted son home at last."

Borrowing from the sign-off that Mr.
Thomas used on his evening broadcast that
ran for nearly 46 years, Dr. Peale concluded
his eulogy with: "We shall miss you here.
Until we meet you over there it is not goodbye, but in your own words, 'So long until tomorrow.'

NEVER KNOWN "TO HURT ANYONE"

Additional prayers were offered by the Rev. Dr. Ralph C. Lankler, the pastor emeritus of Christ Church, near Mr. Thomas' home, where he worshiped regularly when he not traveling.

"In the 47 years I knew him as pastor and friend, I have never known him to intentionally hurt anyone," Dr. Lankler said. "We're able to say the place is better because he lived there."

The service was conducted by the Rev. Thomas D. Bowers, the rector of St. Bartholomew's, who said later that Mr. Thomas "thought of this as his church when he was in New York." Mr. Bowers said the 45-minute service followed the church's regular tradition with prayers and psalms chosen by family. There were readings by the minister and congregation of the 23d, 121st and 139th Psalms.

Robert Merrill, the baritone, sang "Nearer My God to Thee" and the Lord's Prayer. As he sang, Mr. Merrill followed the score closely, squinting through black rimmed halfry, squinting through black rimmed half-glasses. After the service he said: "I was very emotional. I was happy I could finish the Lord's Prayer. I could see Lowell in front of me."

ASKED BY WIFE TO SING

Mr. Merrill said he had been asked to sing at the funeral by Mr. Thomas' wife, Marianna, who called him on Monday to say that Mr. Thomas had requested it in his will

Among those at the funeral were William S. Paley, chairman of the board and a founder of CBS; Richard S. Salant, vice chairman of NBC and former president of CBS News, and Frank Stanton, retired president of CBS News. Fellow broadcasters who attended included Walter Cronkite, Charles Collingwood, Douglas Edwards and Dallas Townsend.

Also attending were former Mayor John V. Lindsay, Louis J. Lefkowitz, former State Attorney General, and Hamilton Fish who is 93 years old and served as United States Rep-93 years old and served as United States Representative from Dutchess County for 25 years. Mr. Fish said that Mr. Thomas "would be really happy that all his friends are here."

Mr. Thomas will be buried in Pawling today after another service at Christ Church there.

THOMAS SAYS LAST "SO LONG UNTIL TOMORROW"

(By Rick Hampson)

PAWLING, N.Y.-Lowell Thomas, the broadcaster-explorer who bid America "So long until tomorrow" from the four corners of the globe for more than a half a century, died of a heart attack Saturday at his home here. He was 89.

Thomas' secretary, who identified herself only as Electra, said Thomas died "peacefully in his sleep." She said he had been in good health and had returned to New York last week from a trip to Colorado where he had given a speech and attended a corporate board meeting.
"When he came back he resumed his usual

work schedule. He was recording 'The Best Years,' a radio series he was doing," she said.

CBS Chairman William Paley said Thomas was a young man 50 years ago when _ met him. And he was a young man when I last

"He represents the early days of radio,"
Paley said. "He was one of the first nationally known broadcasters on radio. I think he paved the way for many people who followed after him. . . The whole industry owes a debt of gratitude (for) the contributions he made to our particular means of communi-

In April, Thomas celebrated his 89th birthday at the annual banquet of The Explorers Club, of which he was honorary president and key patron. The club named its highest award for exploration, "The Lowell," in his

honor

In 1980-a year when he spent his birthday in Moscow—Thomas was among the first group of Lowell recipients. "I bet I spent \$10,000 of my own money on this award just to see myself receive it," he joked. "Now if that isn't bribery, I don't know what is."

The award recognized a career based on interriews with some of the world's most famous and powerful men in some of the world's most remote and desolate places.

It began when Thomas served as chief of a semi-official civilian mission that went to Europe during World War I, with President Woodrow Wilson's approval, to prepare a history of the war.

During a visit to Jerusalem he met T. E. Lawrence, the Englishman who lead Arab tribesmen against the Turks in World War I, and he persuaded British authorities to let him join Lawrence and his army of nomads.

He donned a Bedouin headdress and campaigned with Lawrence. Between battles he obtained the story of Lawrence, so shy that he was almost unknown personally, and filmed scenes of the revolt. The material became the basis of his book "With Lawrence" in Arabia.'

Later he traded his Bedouin headdress for a pith helmet and covered the British army's successful conclusion of its Palestine campaign. Pictures showed him to be the perfect war correspondent, hunched over a notebook and surrounded by a small mountain of camping and reporting equipment.

Thomas married Frances Ryan in 1917, and they had one child, Lowell Thomas Jr. His first wife died in 1975 and he married

Marianna Munn in 1977. Thomas' funeral was

scheduled Wednesday at St. Bartholomew's Church in New York City. Burial was to be near his Dutchess County home on Wednesday or Thursday.

THOMAS NO STRANGER IN ALASKA (By Martha Eliassen)

In the summer of 1914, a restless young journalist bought a movie camera and journeyed to Alaska to capture the wild, untamed northland on film.

It was the beginning of Lowell Thomas' globe-trotting career and he was to return to Alaska many times after his gold rush

expedition.

When not in the state, Thomas kept a close watch on the northland from wherever his wanderings took him.

He was an outspoken advocate of Alaska statehood and later voiced support for the contested capital move as well.

"Alaska was one of his favorite spots since the early days," said Ray Petersen, a longtime Alaska aviator.

Petersen met Thomas in the late 1950s when Northern Consolidated Airlines brought the first Fairchild F-27 propjets to Alaska.

Jets were new to the state, but much more suited to cold weather operation. Petersen

said. Northern made promotional flights to Mount McKinley, and Thomas not only went along for the ride, but featured it in one of his newscasts.

"He was a great booster of Alaska," Petersen said. "He loved Alaska and the mountain

(McKinley)."

But during that first summer in 1914 in the wilds of Interior Alaska, Thomas was just a young adventurer. On his way south to Valdez, Thomas met Bobby Sheldon in Fairbanks. Thomas, faced with a two-week walk or week-long ride in a bouncing buckwas intrigued when Sheldon said his Model T—one of five cars in the Interior at that time—could shorten the trip.

"When Bobby bragged his Model T could cut the time to Valdez in half, I saw the chance for a good story," Thomas later recalled. "So I offered to be passenger No. 1 on the Sheldon Stage Line to Valdez."

The 371-mile, 31/2-day trip included fording bridgeless streams and other hardships

along the Richardson Trail.

"I never believed I would pay anyone \$150 for the privilege of pushing an automobile miles across Alaska," Thomas said.

Later, Sheldon and a partner organized the Richardson Highway Transportation Company, which operated regularly between Fairbanks and Valdez.

Thomas was a friend of the late Bob Reeve, aviator and owner of Reeve-Aleutian Airways, and was often a guest in the Reeve home

Tillie Reeve recalled a trip her husband made with Thomas to Bush pilot Don Sheldon's mountain house at the 6,000-foot level of Mt. McKinley.

Thomas is featured in the introductory section of a film about the famous aviator. "He'll be in our home as long as that film

lasts," Tillie Reeve said.

"It seems as if he was always here and he will always be here," she said.

The Reeve film was produced by Herb Hilscher, a local public relations consultant and another friend of Thomas'.

'Lowell enjoyed Alaska very much," Hilscher said.

Thomas, a member of the exclusive Explorers Club, is credited with sponsoring the membership of Petersen, Reeve, Hilscher and other Alaskans with experience in exploration or world travel.

Hilscher said the Alaska lifestyle appealed to Thomas' adventuresome spirit. He took

the bad with the good.

During a visit to Juneau in 1974, Thomas escaped from the burning Baranof Hotel in the middle of the night.
"A close call," he said of the fire and his

run down six flights of stairs to escape. "But not the closest by far," added the sur-vivor of World War I airplane crashes in the Himalayan Mountains and in Spanish deserts.

Thomas's son, former Lt. Gov. When Lowell Thomas Jr. and his wife, Tay, moved to Alaska in 1960, the world-famous newscaster had one more reason to make frequent visits north.

"But I've always been especially interested in Alaska," he said during a Christmas 1980

The Thomas family was en route to Pawling, N.Y., Saturday, and unavailable for comment.

[From the News-Miner, Aug. 29, 1981] LOWELL THOMAS SR. DIES AT 89

PAWLING, N.Y .- Lowell Thomas, the broadcaster-explorer who bid America "So long until tomorrow" from the four corners of the globe for more than a half a century, died of a heart attack today at his home here.

Thomas's secretary, who identified herself only as Electra, said Thomas died "peacefully,

in his sleep." She said he had been in good health and had returned to New York last week from a trip to Colorado where he had given a speech and attended a corporate board meeting.

When he came back he resumed his usual work schedule. He was recording "The Best Years," a radio series he was doing," she

In 1980-a year when he spent his birthday in Moscow—Thomas was among the first group of Lowell recipients. "I bet I spent \$10,000 of my own money on this award just to see myself receive it," he joked. "Now if that isn't bribery I don't know what is."

The award recognized a career based on interviews with some of the world's most famous and powerful men in some of the world's most remote and desolate places.

It began when Thomas served as chief of a semi-official civilian mission that went to Europe during World War I, with President Woodrow Wilson's approval, to prepare a history of the war.

During a visit to Jerusalem he met T. E. Lawrence, the Englishman who led Arab tribesmen against the Turks in World War and persuaded British authorities to let him join Lawrence and his army of nomads.

He donned a Bedouin headdress and campaigned with Lawrence. Between battles he obtained the story of Lawrence, so shy that he was almost unknown personally, and filmed scenes of the revolt. The material became the basis of his book "With Lawrence in Arabia."

Later he traded his Bedouin headdress for pith helmet and covered the British army's successful conclusion of its Palestine campaign. Pictures showed him to be the perfect war correspondent, hunched over a notebook and surrounded by a small mountain of camping and reporting equipment.

After the war, Thomas continued to travel, visiting pygmy tribes in Africa and hunting tigers with the Prince of Wales-later the Duke of Windsor-in India. He penetrated the interior of Alaska, and later noted that many of his travels were "on the fringe of exploration."

In 1930 he began what was to become the longest running network newscast, on CBS radio, and nine years later he broadcast the first television news program for NBC. For several years, staring in 1935, his was the voice of Movietone newsreels produced by twentieth Century-Fox.

In World War II. Thomas toured both the European and Pacific theaters and broadcast on-the-spot news reports. Toward the end the war he flew over Berlin in a reconnaissance plane, viewing the Nazi capital in

Thomas visited the Himalayan mountain region of Tibet in the autumn of 1949. He met with the Dalai Lama, then Tibet's 15-year-old ruler, in the "forbidden city" of thasa. He received messages on parchment from him to present to President Harry Truman.

During that trip he suffered a broken thigh and had to be carried by litter for 34 days before reaching a place from which he could be flown to Calcutta.

The commentator said he found Tibet the most "anti-communist country in the world," and on October 25, 1950, China began its invasion. Thomas became head of a committee in the United States that raised money and supplies for thousands of Tibetans who fled

Thomas continued lecturing and broadcasting for CBS and wrote more than 50 biographical, travel and adventure books. On May 14, 1976, he quit his nightly radio news show to devote more time to other projects.

In an interview on his 80th birthday, Thomas said, "Looking back from 80 years, I'd say it was rather silly to do so many things—except it's been so much fun."

Thomas married Frances Ryan in 1917, and they had one child, Lowell Thomas Jr. His first wife died in 1975 and he married Marianna Munn in 1977.

[From the New York Times, Aug. 30, 1981] LOWELL THOMAS, A WORLD TRAVELER AND BROADCASTER FOR 45 YEARS, DEAD AT 89

Lowell Thomas, the radio and television broadcaster, author and world traveler, died of a heart attack yesterday morning in his sleep at his home in Pawling, N.Y. He was 89 years old.

For nearly 46 years, Mr. Thomas's calm and reassuring voice had come over the radio every weekday with the same salute to the nation, "Good evening, everybody." What followed was a nicely articulated,

What followed was a nicely articulated, folksy, often bland digest of the day's news events, ending with, "So long until tomorrow."

In 1976, the nightly program that made Mr. Thomas the longest continually operating newscaster in radio was discontinued, but he went on broadcasting and writing and skiing until his death.

A LIFE FULL OF HYPERBOLE

Mr. Thomas, whose life was full of superlatives and hyperbole, remarked in an autoblographical note some years ago: "The voice of Lowell Thomas probably has been heard by more people than any other voice in hisstory—including those of Franklin D. Roosevelt, Winston Churchill, Hitler and Mussolini. His total radio audience on the air has been estimated at 70 billions! Billions—not millions."

"For 17 years he was the voice of Movietone News," Mr. Thomas continued. "Which means that via the screen, he was heard by another 40 or 50 billions. His voice has also been heard on a few thousand single-reel pictures, shorts as well as feature-length films; and untold millions more made his acquaintance through Cinerama and via television."

Although Mr. Thomas called himself a news commentator, he was not an analyst and he did not deliver either pronouncements or messages. From his first broadcast, on Sept. 29, 1930, he presented the news in the manner of a father telling his large family about the great world beyond.

"I am on the air when people are getting ready for dinner or are just having dinner, or are just finishing dinner," he said in 1970, alluding to his 6:45-to-7 o'clock broadcasts. "I never felt it was my responsibility to destroy the digestive system of the American people."

BROADCAST TO A FORMULA

His approach to the news was typified by his first broadcast, a formula that persevered to his last. His lead item in 1930 read:

"A procession of German Fascists was attacked today by Communists in the town of Unterbermsgruen (Conterbearmsgrooen). A hot fight followed in which 29 Fascists were injured, four critically. . . Adolf Hitler, the German Fascist leader, is snorting fire. There are now two Mussolinis in the world, which seems to promise a rousing time. Adolf is one. He has written a book called the German Fascist bible. In this, the belligerent gentleman states that a cardinal policy of his now-powerful German party is the conquest of Russia. That's a tall assignment, Adolf. You just ask Napoleon."

In an age of television, Mr. Thomas might have been expected to fade, but, surprisingly, his audience did not diminish significantly. He had once tried television, but decided it was not his medium. "They want

to hear the news, not see the person who is reading it," he said. "No one wants to see the same fellow on the screen every day, unless he happens to look like Michelangelo's 'David.'"

Cne of Mr. Thomas's strengths was that he did not pretend to be a journalist. "You know, I'm not a journalist, but an entertainer, just as Bob Hope and Bing Crosby are entertainers." he confided some years ago to Fred W. Friendly, then of CBS, the network that first carried Mr. Thomas.

Apart from reading the news—he edited most of his own broadcasts, rarely bothering with occurrences later than 5 o'clock—Mr. Thomas had notable careers as a world traveler, war propagandist, lecturer and author.

One of his feats during World War I was the "discovery" of Col. T. E. Lawrence—Lawrence of Arabia—and Mr. Thomas made use of the enigmatic Briton. He created the legend of Lawrence as "the Prince of Mecca," a title Mr. Thomas conferred himself.

According to Mr. Thomas, he spotted Lawrence among a group of Arab sheiks in Jerusalem in December 1917. "Nor did it take him long to discover that he had stumbled on a story in some ways more astounding than the 'Last Crusade' and the 'Conquest of Jerusalem,'" Mr. Thomas wrote of himself in 1965, adding:

"Lawrence, unknown to the world, was then at the peak of his unusual career. The young Oxford archeologist, who, when war broke out, had been working at the study and excavation of the ancient cities of the Near East, now had become a shelk of the desert. With his understanding of the ways of the desert peoples of the East, he had become first a British agent and then the flery leader arousing the Bedouin to a general revolt against their old tyrant, the Turk. And now he was leading the tribesmen of the sands against the Turkish army, raids which demoralized communications, destroyed detachments and made the Turk tear his beard with rage."

Films of Lawrence—one showing him barefoot in the sand—were taken by Harry Chase, Mr. Thomas's photographer. With them, Mr. Thomas put together "The Last Crusade," a highly romantic account of Lawrence that packed the Century Theater and Madison Square Garden in New York and the Royal Opera House, Covent Garden and the Albert Hall in London in 1919. Lawrence, according to Flora Armitage, a biographer, went to Albert Hall "and was made hot and embarrassed by the spectacle."

Later, Mr. Thomas wrote "With Lawrence of Arabia," a book version of his theatrical presentation. There seems no doubt, according to Lawrence specialists, that Lawrence, with a sense of the sardonic, had fed Mr. Thomas outlandish stories and had willingly posed for pictures, and that Mr. Thomas had swallowed them whole.

Lawrence later repudiated his amanuensis and complained to Robert Graves, the poet, about the "butter of the Lowell Thomas sort that does not keep very well; and its quotation at tenth hand is painful." Mr. Thomas was loath to concede that he might have been gulled and that he, in turn, had misconstrued history for others.

A DASHING FIGURE

Handsome, tall and slim, Mr. Thomas looked the romantic role in which he so often cast himself. He had thick brown curly hair, blue eyes and a pencil mustache. When dressed in riding breeches, he was especially dashing.

And he was all the more a figure larger than life because of his worldwide network of prominent friends, with whom he was on a first-name basis. These included kings, queens, premiers, generals, Presidents of the United States, illustrious explorers and the Dalai Lama of Tibet.

"If I have to have a reincarnation, I would prefer it to be Lowell Thomas above all others," former President Herbert C. Hoover wrote him in 1959, adding:

"It would be an eternal life of adventure, of courage and of public service."

Although Mr. Thomas was rated a con-

Although Mr. Thomas was rated a conservative, he was on amicable terms with President Franklin D. Roosevelt. For several years he was manager of "The Nine Old Men," a softball team that played an annual game with a political team managed by the President.

As much as Mr. Thomas flourished in his adventures—virtually every journey he took was an adventure—and in the legend that he became, he was a dour and unwilling participant in Ralph Edwards's sentimentalized version of his life on a "This Is Your Life" television program in 1959. "This is a sinister conspiracy," he remarked at the time.

BOYHOOD IN COLORADO

Mr. Thomas' life was on the grand scale, full of improbabilities and fulfilled ambitions. Born April 6, 1892, in Woodington, Ohlo, he was the son of Harry and Harriet Wagner Thomas. Soon after his son was born, Harry Thomas received his medical degree and established a practice in Cripple Creek, Colo., a gold camp on the slope of Pikes Peak.

As a boy Lowell peddled newspapers in the town saloon, went to Sunday school under the tutelage of Texas Guinan and read in his father's library. Dr. Thomas, who had a desire to collect knowledge, impressed on his son the importance of learning. He also demanded that the boy acquire an ability to speak clearly and distinctly.

When Lowell was 15, Dr. Thomas moved the family back to Ohio. The youth excelled in high school elocution and attended what is now Valparaiso University, where he obtained a B.S. degree in two years. He returned to Cripple Creek, working briefly in the mines and then as a newspaper reporter and editor.

THE URGE TO TRAVEL

He went on to the University of Denver for a year, receiving B.A. and M.A. degrees. Moving to Chicago, he attended law school at night and reported for The Journal by day. But the urge to travel was strong, and he persuaded a railroad to send him to San Francisco in 1914 in exchange for glowing reports of rail travel and the potential marvels of the forthcoming international exposition in that city. There he bought a movie camera and headed for the Klondike revion of Alaska, where he took movies of life in that wild country.

Mr. Thomas' life as a showman started when he entered Princeton in 1914 as a student and part-time instructor of public speaking. In his spare time he showed his movies of Alaska and lectured about his experiences there. This proved more exhilarating than scholarship, so the following summer he took another filmic trip to Alaska. His material became so popular with audiences that word of it got to Franklin K. Lane. Secretary of the Interior, who wanted Mr. Thomas to promote a "See America" campaign.

The entry of the United States into World War I gave Mr. Thomas the greatest opportunity of his life. He was commissioned unofficially by the Government to go to Europe and then to "tell the American people what we're up against." Having raised funds for the trip from a group of Chicago meatpackers, he and Mr. Chase, his photographer, visited the Western front and then joined Sir Edmund H. H. Allenby in Egypt. It was while he was in the Middle East that he met Lawrence.

After returning to Europe, Mr. Thomas

and Mr. Chase managed to get into Germany, where they observed and photographed the postwar turmoil, a report of which they gave to the American delegation to the Paris Peace Conference.

Back in the United States, Mr. Thomas found that audiences gobbled up his shows— he never called them lectures—on the fighting in the Middle East and on Lawrence. After repeating his success in Britain, Mr. Thomas set off on a tour of the world with his show, which he played before hundreds of audiences.

SWITCHED TO WRITING

Later, Mr. Thomas returned to India, "the greatest human show on earth," and toured the subcontinent, Burma, Malaya and Afghanistan with Francis Yeats-Brown, later the author of "Lives of a Bengal Lancer." Mr. Thomas fashioned two shows from his travels, which he took to Paris and London and then to the United States. When the tour con-cluded, Mr. Thomas decided that he had had enough of such shows (he had given about 3,000 of them) and that he would rather write about his experiences.

As a result, he bought a 500-acre farm on Quaker Hill in Pawling, N.Y. it was the nucleus of what was to become a 3,000-acre estate, reduced to about 1,000 in later years. His first big literary success was "With

Lawrence of Arabia." It was followed by "Be-yond Khyber Pass," about Afghanistan. These made him a millionaire, a standard of wealth below which he never thereafter fell. Another of his popular books was "The First World Flight," a collection of narratives of the participants in the Army's world flight in 1924. He went on to write "Count Luckner, the Sea Devil," "Raiders of the Deep," "The Hero of Vincennes" and ".ndia: Land of the Black Pagoda." His lifetime total exceeded 50. Between books, he traveled the world.

Much of his writing was done in collaboration with Prosper Buranelli, once a feature writer for the old New York World. Mr. Buranelli remained on to help with Mr. Thomas's radio scripts.

A BROADCASTER BY LUCK

Mr. Thomas's radio career started as a matter of luck in 1930. The Literary Digest was about to drop its sponsorship of Floyd Gibbons as its newscaster. Someone at the Columbia Broadcasting System remembered having heard Mr. Thomas give one of his shows, and mentioned his stentorian, yet sonorous voice

He was called to New York, auditioned by William S. Paley, the network's chief, and then by the sponsors. He was hired on the spot, remaining with CBS until 1932, switchto the National Broadcasting Company until 1947, then returning to Columbia. In 1935 he also became the voice of Movietone

Mr. Thomas made a fortune from his radio work. In 1948, for example, he earned \$420,-300, and he seldom received less than \$375,000 a year. His income from other sources was

Mr. Thomas did not let his broadcasts interfere with travels. He was the first to broadcast from an airplane, a helicopter, a ship. He broadcast from London, Paris, Rome, Cairo, the Philippines, India, Iwo Jima, Chongqing. He once said that it had cost him \$1 million of his own money for such remote hookups. At home he broadcast from a special studio on his Quaker Hill estate.

In 1936, he expanded his holdings thereby by purchasing 3,000 acres from the Fred French estate, then parceled it out among some of his friends, among them former Gov. Thomas E. Dewey, the Rev. Dr. Vincent Norman Peale, Dr. Howard Rusk and Elliott Bell, a former Business Week editor.

Mr. Thomas's effervescent personality seemed to fit with his zest for physical activity. He delighted to be on the go, and to exotic places. He broke a leg on one of these trips, but was unfazed.

His conversations about his trips and other matters were studded with names of the

TIGER HUNT WITH DUKE

"The Duke of Windsor is a charming fel-

iow," he once said, quickly continuing:
"We went on a tiger hunt once in India
and we were the only two parties left in Venice when the Germans and Austrians were outside the city gates. I had General Vanderberg working on a special trip for me. Stu Symington was a help, too. Dick Nixon played my golf course here. Last night I had call at 3 a.m. from Finn Ronne in Antactica Wanted to tell me he's naming a mountain range after me down there."

Thomas's enthusiasm for adventure led him into Cinerama, the three-dimensional film process, in 1952. A laboratory experiment for 54 years, it stunned Mr. Thomas when he first saw it. "I knew exactly what to do with it," he said, "because I had the travel history behind me."

"This Is Cinerama" was his first production, giving him the sobriquet of "the grand-father of Cinerama."

Mr. Thomas received many honorary degrees and other awards. He was, for example, fellow of both the American and the Royal Geographical Societies and honorary president of the Explorers Club.

Shortly after Mr. Thomas's nightly radio news program had been taken off the air by CBS on May 14, 1976, he began a 39-week television series for the Public Broadcasting Service called "Lowell Thomas Remembers. The series, which included profiles of outstanding figures in history, ran for three years.

In 1977, the William Morrow Company published the first volume of Mr. Thomas's two-part autobiography, "Good Evening, Everybody," and brought out the second volume, "So Long Until Tomorrow," the next year. In 1977, too, Mr. Thomas's biography of Lieut. Gen. James H. Doolittle, was published.

Two years ago, Mr. Thomas began a daily syndicated radio series, "The Best Years," about the acomplishments of famous people in their later years. It was sponsored by Mutual of Omaha.

Electra Nicks, Mr. Thomas's personal secretary for 47 years, said yesterday that he had recorded 15 of the five-minute programs only four days ago.

Mr. Thomas was also a founder and member of the board of Capital Cities Communications, which owns several broadcasting stations and newspapers, and a director of Golden Nugget, Inc., a gold mining company in Cripple Creek.

Mr. Thomas's first wife, the former Frances Ryan, died in 1975 after 58 years of marriage. In 1977 he married a widow, Marianna Munn, who was then 49 years old. She survives him.

Shortly after his wedding to Mrs. Munn on the Hawaiian island of Maui, Mr. Thomas flew to Washington to receive the Medal of Freedom Award from President Ford. Then he returned to Hawaii to begin a honeymoon that continued around the world.

Mr. Thomas is also survived by his son. Lowell Thomas, Jr., a former Lieutenant Governor of Alaska and author; two grandchildren and a great-granddaughter.

Funeral arrangements have not been completed, but Miss Nicks said Mr. Thomas had requested that he be buried beside his first wife in the churchyard of the Christ Church on Quaker Hill overlooking Pawling.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I mentioned earlier that at some point in the morning I intended to put a unanimous consent request for the scheduling of the

military pay bill on tomorrow beginning at 10:30. Before I do that, may I yield to the distinguished chairman of the Appropriations Committee?

The ACTING PRESIDENT pro tempore. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I thank the leader for yielding.

BIRTHDAY GREETINGS TO A GREAT AMERICAN

Mr. HATFIELD. Mr. President, about 2 hours ago, I made a call to Kansas to wish a great American a happy 94th birthday. I refer to the former Governor and Presidential candidate Alf Landon.

Mrs. Landon said she was very sorry that the Governor could not speak directly to me because he was out horseback riding. I think it is a marvelous example of a man who has lived and is

living a very vital life. Alf Landon was born on September 9. 887, graduated from the University of Kansas, and then became a banker for a short period of time before he became an independent oil producer. In 1912, he supported the Bull Moose Party of Teddy Roosevelt. Later, he became the leader of the Republican liberals of Kansas and served two 2-year terms as Governor of that State before being nominated for President on the Republican ticket of 1936. I happened to be a junior in high school at the time. That was my first major campaign in which I began and ended my career as a gambler. I lost 12

that campaign. I only mention that today because his daughter, Nancy Landon Kassebaum serves as a colleague in this body in a

milkshakes on Alf Landon's defeat in

very distinguished way.

Mr. President, here is a gentleman who came to be respected, honored, and revered by his opponents as well as by his supporters. President Roosevelt appointed him to an international conference in 1938. He has indeed served his country well and I rise to wish him many, many more years of horseback riding, a great American, Alf M. Landon.

The ACTING PRESIDENT pro tempore. The majority leader is recognized. Mr. BAKER. Mr. President, I yield now

to the distinguished Senator from Washington.

THE U.S. NAVY

Mr. GORTON. Mr. President, on the 4th of August, at the beginning of the recess, the distinguished Secretary of the Navy appeared in Seattle, Wash., at the keel laying of a new class of naval vessel, one which is honoring our State. It will be called the U.S.S. Whidbey Island.

At that time, the Secretary of the Navy. John Lehman, gave a thoughtful, impassioned speech about the condition of the Navy of the United States and its immediate future, which was met with great approval by all who heard it.

I ask unanimous consent that the text of that speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD. as follows:

ADDRESS BY HON, JOHN LEHMAN

General Barrow, Mr. Smith, Distinguished Guests, Ladies and Gentlemen, it is certainly my pleasure to be with you here in the Great Northwest.

Since assuming my duties as Secretary of the Navy—and Secretary of the Marine Corps—few events have been more pleasurable than to preside today at the keel laying of the LSD-41, the lead ship of a new amphibious class. Beginning a new class is always an important milestone in the history of the Navy, but the LSD-41 represents much more.

It is the first amphibious ship to be started since the keel was laid for the LHA-5, almost five years ago.

It is the first amphibious ship to be funded

in ten years.

It is designed to carry the air cushion landing craft, or LCAC, which adds a revolutionary dimension to amphibious warfare. As such, it represents a commitment to new technology.

The keel laying of the LSD-41 also signifies the reversal of one of the most senseless conditions in the Navy today. The fact is that the U.S. Marines—that splendidly-trained, superoly-disciplined team, and the most ready righting force round in the world today—are fully prepared to go wherever necessary in the world . . . yet are unable fully to utilize that splendid readiness because we lack sufficient sealiff to get them there.

Let me state my position unequivocally: the amphibious forces will be at the very forefront of the Navy in the decade ahead. The strategic requirements of the decade cry out for amphibious capability-forces with the flexibility and compat power empodied in the Marine Air Ground Task Forces forces capable of safeguarding our vital interests by deterrence, but if deterrence fails, by performing on the battlefield as Marines have always performed. In this regard, the Department of the Navy, in the first months of the Reagan Administration established, in a dramatic break from Carter policies a firm policy to develop sufficient amphibious lift transport simultaneously the assault echelon of a Marine Amphibious Force and a Marine Amphibious Brigade. Thus we shall have the capability to undertake major amphibious operations to secure our maritime security simultaneously in two separate areas of the world.

Finally, and most importantly, this new class represents a large step in the revitalization of our key national asset, the U.S. Navy, and a quantum improvement in our ability to safeguard U.S. interests overseas, through the ability to project power from sea to shore when needed.

This ship class has been a long, hard time coming. Many of you here today are veterans of the Washington skirmishing necessary to bring this ship into being. Your vision and your persistence have triumphed. I congratulate you on that persistence. And I do not speak of triumph in a narrow, bureaucratic sense. I speak of triumph in a national sense, as our country strives to regain its sense of purpose and confidence and builds to restore the unquestioned maritime superiority so vital to our existence.

Clearly, an immense change has taken place in the United States in the past year. We have come to realize that, as leaders of the free world, we have been possessed of a dangerous uncertainty for some time over the utility of committing military force for national purpose. We had forgotten the lessons of two terrible world wars: That strength, not weakness, halts aggressors; that strength is the only real deterrent, weakness an open invitation. Today it is obvious that America has now recalled these important lessons. We are revitalizing. We

are renewing our traditional American character, and we are again becoming strong and filled with resolve.

The clear mandate of the last presidential election was a call for renewed national strength, prestige and self-confidence. This resurgence of demand for national strengthand a Commander in Chief and Congress dedicated to carrying out the will of the people-will inevitably ask the U.S. Marine Corps to shoulder a major burden in any commitment of military force for national purpose, as has always been the case in the past. A Marine Corps of Americans who represent the best in soldierly virtue. A Corps which has held high the concepts of duty and honor, and the qualities of strength and self-confidence, even in the lean years of the recent past. A Corps which, in the face of social and other pressures, changed what needed to be changed, but staunchly maintained a tradition of disciplined excellence and a world-recognized expertise in amphibious warfare-a form of warfare which may be more important to our Nation's future in the years ahead than it has been anytime in history, with the possible exception of the Pacific Campaign in the Second World War.

It is not enough, however, to build ships and recruit men. We must begin with the formulation of the strategy itself. It is a difficult matter, in that we have long focused largely on the technical aspects of our naval problems. Too often, naval strategy was merely a function of the momentum of force structure and modernization. The strongest arguments for new ships were that old ships were old and due to retire. The misuse of systems analysis and computerized war games within the Defense Department had forced a mechanistic fixation on programs. and a knee jerk response to military force problems. That fixation brought forth a generation of military leaders conditioned to think mechanistically, to manage "pro-grams" but disdain military intuition and judgment. On the national level, strategy often focused on areas of immediate concern, despite an increasing array of geopolitical shifts, which should have been accommodated by adjustments in the planned ure of naval forces. It is not necessary to match Soviet force levels on a man-for-man or ship-for-ship basis. Instead, what was and is needed, is a maritime strategy which concentrates superior power at the point of confrontation, and does so with precisely 'tailored" forces.

An important prerequisite in formulating a maritime strategy, is to pay more attention to those military leaders who possess the foresight to recognize the requirements ahead, and the seasoned judgment to grasp its strategic implications. Such clearly foresaw the requirements of amphibious warfare in the decade preceding the Second World War. Fully a decade before that war, Admiral Chester Nimitz and Gen-eral Holland Smith conceived and practiced the strategy of crossing the Central Pacific. There were Marine and Navy officers who ignored the experts' suggestions in the late 1940's that amphibious warfare was anachronistic. Those men knew there would be an "Inchon" in the 1950s. Others, on sighting the helicopter in the fifties, knew it would add a revolutionary dimension amphibious warfare in the sixties and they were correct. These were great and daring thinkers, not unlike those who today recognize the value of VSTOL, the LCAC, the LAV, and the LSD-41 class,-and have the military judgment to grasp the strategic implications of the 1980s and beyond.

Our task in the decade ahead is clearly to deter Soviet aggression, a formidable goal in the wake of unprecedented Soviet military expansion. Our response cannot be in numbers alone. It must be in the ability to concentrate warfighting capability at point-or points-of confrontation. The large number of Soviet options is such that landbased defenses overseas will never be sufficient for our needs, given even the most optimistic budgetary and procurement environments, and assuming that the necessary basing arrangements were politically achievable. Nor is it prudent to assume that a Soviet military confrontation, if it comes, will occur where we are best able to counter it. If history teaches us anything, the reverse will probably be the case. The Soviets must be made to understand-and be shownwe intend to confront them militarily wherever our interests require. If we succeed in doing that, we may never have to use our capability. it is the deterrent value of strong naval forces which we seek, not confronta-

What I propose strategically is not new. Mahan called armed naval capability seaforce. He postulated that a maritime nation should aim at acquiring a superiority in seaforce that enables it to project its seapower to the most distant quarters of the earth. It is from that imperative that Mahan derived the concept of "Command of the Seas" so relevant today.

The perceived capability to concentrate the Nation's naval resources and to project power ashore stabilizes the global environment, according to Mahan, into a condition favorable to that nation possessing command of the seas. Recently, for the first time ever, Soviet naval expansion has threatened to overtake our sea superiority. Obviously, Admiral Gorshkov has carefully read the lessons of Mahan.

Critical to the Soviets perception, is the naval capability to provide presence. This unique naval mission is particularly relevant to a strategy which seeks to influence and deter. Naval presence does not require regional basing, a political irritant in many parts of the world. Naval presence is also a sine qua non in the perception of our allies and the Third World, and has much to do with the way in which they regard Superpower balance.

The world of the eighties is not only a world becoming more interdependent. It is also a world of increased turbulence. Our strategy must include the protection of sources of raw materials and their conveyance to us and our allies, including the protection of our source of vital fossil products and strategic materials.

The Middle East and Southwest Asia will probably dominate the world's stage in the 1980s, as did Europe in the 1940s, Northeast Asia in the 1950s, and Southeast Asia in the 1960s. If we have learned from history, the correct question today should be how best to protect our vital interests in the region, without placing half a million or more ground troops in the area for an indeterminate period of time.

The kind of ground force presence which we have in Europe and Korea will not work in Southwest Asia—or in the Caribbean or Africa for that matter. The U.S. simply does not have sizeable forces in place nor supplies prepositioned. Neither does it possess the host-nation support agreements, nor the binding alliances that we have in Europe and elsewhere.

These combined problems of access and distance compel the U.S. to rely principally on seapower, supplemented by amphibious assault. Its "over the horizon" presence would not be a political liability, nor provide a raison d'etre for increasing instability. Amphibious forces can move ashore without the degree of permanence—and thus risk—associated with other ground forces.

The comparative attractiveness of sea-

based forces for the kinds of tasks required by the situation in Southwest Asia, and elsewhere, has long been recognized. The distinguished British strategist B. H. Liddell Hart, observed in 1960:

"An amphibious force of modern type, operating from the sea and equipped with helicopters, is free from dependente on airfields, beaches, ports, and landbases with all their logistical and political complications: The use of ... any land-based force is a more irrevocable step, since its commitment is more definite and its withdrawal more difficult. A self-contained and sea-based amphibious force, of which the U.S. Marine Corps is the prototype, is the best kind of fire extinguisher, because of its flexibility, reliability, logistic simplicity and relative economy."

Naval presence in Southwest Asia will clearly transmit the desired message, militarily as well as diplomatically. The multifaceted projection capabilities which a balanced naval force of air, surface, subsurface, and amphibious elements brings to any situation may find application in the entire range from diplomatic signalling and crists containment, to on-scene military action.

containment, to on-scene military action.

In the event of a Soviet attack on our vital interests in Southwest Asia, defeat of Soviet naval forces at sea will be absolutely crucial. Lacking secure sea lines of communication, no other military effort—afloat or ashore—can be sustained. The sea is the Soviets' greatest vulnerability-a place where geography greatly disfavors them. As a consequence, that our superiority must be here strongly maintained, enhanced, and exploited. Naval forces will also make a major contribution to the U.S. Air Force's responsibility for air superiority ashore, which must certainly be attained before there can be a successful employment of ground forces in Southwest Asia. The geostrategic realities are such that naval air and surface forces would probably have to provide both security of the seas and the air, working together as never before. Amphibious forces would then be the likely spearhead to secure a lodgement area, followed by the introduction

of other forces, as necessary.

Geographic reality, the growing threat, and our balanced Navy-Marine Corps capability combine together, then, to mandate a strong and effective maritime strategy as the key U.S. national security requirement of the next decade. The effectiveness of such a strategy is unmatched, in that the capability is exercised only at the point of confrontation, whether, it be in Southwest Asia, the Caribbean, Africa, or elsewhere. The unexceeded flexibility and mobility of naval forces enable them rapidly to provide a powerful instrument of U.S. foreign policy in the most distant quarters of the earth.

Continued equipment modernization will be critical in developing this vital instrument to its maximum utility. Several promising programs, all designed to provide substantially increased tactical mobility for the Marines, are uniquely associated with the LSD-41. A new medium helicopter will eventually replace the over-aged tactical assault transport helicopters. Increased numbers of heavy lift helicopters will satisfy the need for more battlefield and ship-to-shore lift. Four of the new landing craft all cushion vehicles will be carried in the well deck of each LSD-41.

These revolutionary craft will enable rapid ship-to-shore operations from standoff positions, and expose about three quarters of the world's littorals to amphibious operations.

I have referred to the partnership of the Navy and the Marines in meeting the amphibious challenges through the years. That partnership always includes, and must rely heavily upon, the experience and know-how of American industry. It is only through the dedicated efforts of the designers, managers,

and workers at this shipyard and others around the country that our plans for a strategy of unquestioned maritime superiority and a thoroughly revitalized amphibious capability can be turned into reality. As the Secretary of the Navy—and, as the Secretary of the Marine Corps—I feel that I can speak for both services in extending heartfelt thanks for your cooperation and your contributions—in the past, today, and into the future.

We are all in this together—with the Navy and Marine Corps Team—as we move forward through this dangerous decade. We are now moving quickly in the right direction, but we still face a time of testing and high risk, the legacy of our past mistakes. Let the historians say in the decades to come, that we did not fall that test.

I recall that Secretary of the Navy James Forrestal, observing from aboard a ship the raising of the flag from the stormed heights of Iwo Jima, turned to General Holland Smith and said: "The raising of that flag on Suribachi means there will be a Marine Corps for the next 500 years."

I hesitate to refute a very distinguished predecessor but that statement isn't true any longer-if it ever was. The future existence of the U.S. Marine Corps simply will not be dependent on an event that took place 36 years in the past, however inspiring that scene may still be. The Corps must justify its existence and its claim to scarce Defense resources not on what it has done in the past, but what it can do now and in the future to smite our enemies and confound their threats to the peace. No one with any real understanding of the complex and challenging requirements of the decade ahead questions the utility of the Corps. Perhaps more before in American history, our Nation will come to realize in the decade ahead just how vitally important the Corps is. And that says a good deal.

The survival of America could well depend on the capability resident in the Marine Alr/ Ground Task Forces and the Navy Team that takes them to the distant quarters of the earth where America's interests lie. The U.S. Marines know well the sacrifices which may be entailed in the commitment of military force for national purpose. And they stand ready to make those sacrifices. All the Corps asks for is sufficient sea lift to do their job; and our Marine Corps is going to get it.

SYMMS FAMILY WINERY TAKES TOP HONORS

Mr. GORTON. Mr. President, on the 17th of August of this year, the very distinguished junior Senator of the State of Idaho (Mr. Symms) appeared in Seattle to chair a hearing on the Federal aid highway system. I had the honor of participating in that hearing with him. Mrs. Gorton and I entertained the Senator and his wife during the course of the next day on Whidbey Island, Wash. The Senator from Idaho brought with him a small house gift of a bottle of wine which was produced at the Symms family vineyards in Idaho. It was a particularly good bottle of wine as far as I was concerned, though I am not much of an expert in the area.

I was particularly delighted, Mr. President, 1 week later, to see a story in the Seattle Times, the title of which is "Idaho Winery Takes Top Honors At 1981 Festival At Science Center." In fact, it was the Symms family vineyard that was the only winery to take two gold medals in the Northwest wine contest for that year. In thanks to that Senator and in congratulation for that dis-

tinguished honor, I should like to have that news story printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the Record, as follows:

[From the Seattle Times, Aug. 25, 1981] IDAHO WINERY TAKES TOP HONORS AT 1981 FESTIVAL AT SCIENCE CENTER

(By Tom Stockley)

Idaho's single winery struck both gold and silver again last night in Seattle at the 1981 wine festival competition of the Pacific Northwest Enological Society at the Pacific Science Center.

Ste. Chapelle Vineyards of Boise, Idaho, captured two gold medals for its two versions of Chardonnay and a silver medal for its 1980 Johannisberg Riesling. It was the only winery to win two gold metals in the annual competition involving wines from Washington, Oregon and Idaho. It also marked the second year in a row that the winery won two gold awards.

The awards were announced during the festival by Gov. John Spellman. A total of 30 awards were presented out of 76 wines entered in the festival.

Judges were slightly more stingy with gold medals this year, giving only five, one less than at last year's event. Besides the Idaho winery, the other three gold medals went to Associated Vintners for its 1980 Valley White, Knudson Erath Winery for a 1979 Pinot Noir and Preston Wine Cellars for a 1980 White Riesling.

Judges for this year's competition were Harry Waugh of London, British wine writer; Alex Bespaloff, East Coast wine writer and author of numerous books; Joseph Heitz, president of Heitz Wine Cellars in the Napa Valley; Walter Schug, wine maker for Joseph Pheips Vineyards in the Napa Valley, and A. Dinsmoor Webb, chairman of the Department of Viticulture and Enology at the University of California at Davis.

Besides the golds going to Ste. Chapelle, the rest of the awards were divided fairly evenly between Washington and Oregon wineries. Sixteen awards went to Washington wineries and 11 to Oregon wineries.

Medal winners were:

Gold: Associated Vintners 1980 Valley White, Knudsen Erath Winery 1979 Vintage Select Pinot Noir, Preston Wine Cellars 1980 Select Harvest White Riesling, Ste. Chapelle Vineyards 1979 Sagemoor Chardonnay and Ste. Chapelle Vineyards 1979 Symms Family Vineyards Chardonnay.

Silver: Alpine Vineyards 1980 Benton County White Riesling, Amity Vineyards 1980 Dry White Riesling (made with a combination of Oregon and Washington grapes), Associated Vintners 1979 Chardonnay, Bingen Wine Cellars 1980 Mont Elise Gamay Beaujolais, Chateau Ste. Michelle 1977 Cabernet Sauvignon, Chateau Ste. Michelle 1980 Semilion Blanc, E.B. Foote Winery 1979 Chardonnay, Hinzerling Vineyards 1980 White Riesling, Knudsen Erath Winery 1979 Yamhill County (Knudson Vineyard) Pinot Noir, Preston Wine Cellars 1978 Meriot, Ste. Chapelle Vineyards 1980 7daho Johannisberg Ries'ing, Sokol Blosser Winery 1980 Washin-ton White Riesling, Sokol Blosser Winery 1978 Yamhill County Pinot Noir and Worden's Washington Winery 1980 Fume Blanc.

Bronze: Amity Vineyards 1980 Gewurztraminer, Amity Vineyards 1979 (Washington/Orecon) Pinot Noir, Bingen Wine Cellars 1979 Mont Elise Gewurztraminer, Chateau Benoit 1980 Sauvignon Blanc, Elk Cove Vineyards 1978 Cabernet Sauvignon, Neuharth Winery 1979 Johannisberg Riesling, Paul Thomas Wines 1980 White Riesling, Preston Wine Cellars 1980 Frime Blanc, Tualatin Vineyards 1980 Early Muscat, Tualatin Vineyards 1978 Pinot Noir and Wor-

den's Washington Winery 1980 Johannisberg Riesling.

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

THE MILITARY PAY BILL

Mr. BAKER. Mr. President, I understand that arrangements for the possible consideration of the military pay bill are being considered at this moment. So, rather than put that request now, I ask unanimous consent that I may reserve any time I have remaining and I yield to the-

Mr. EXON. Reserving the right to object, and I am not sure that I shall, Mr. President, I should like to propound a question to the majority leader-not in the form of criticism, but for my information.

I was informed a couple of weeks ago that the military pay bill was scheduled to come up this day, at this hour. I am here, I am prepared to go ahead as the ranking minority member on the subcommittee. What I have learned since I have returned to the Senate is that all kinds of negotiations are going on. Could the majority leader, in the interest of saving some time-I suspect that I am on his side in this matter.

I have listened with keen interest and appreciation to the rather laborious schedule that the majority leader outlined for us. I know the responsibility for moving all of our important decisions along weighs very heavily on the shoul-ders of the able majority leader. Time, though, is of considerable essence, because it seems to me, if I am able to fathom out all of the news reports that I hear, that indeed, the fat may be out of the frying pan into the fire with regard to a whole series of critically important matters facing this Nation domestically and internationally.

I need not remind the majority leader, Mr. President, that Christmas time is drawing very near. It seems to me that we should get moving on the military pay bill. I am prepared to move on it now. May I ask the majority leader, what is the reason for the delay on this particular bill?

Mr. BAKER, Mr. President, I thank the Senator from Nebraska. As always, he has prefaced his remarks with a statement of understanding and I am grateful for that.

The scheduling of the activities of the Senate to accommodate the maximum number of Senators is always a difficult matter. I suppose the best answer to him is that that is the problem now, to accommodate the greatest number. In doing so, I fear I have inconvenienced him and I have inconvenienced the Senator from Iowa and others. Mr. President, in the present parliamentary situation, since the Department of Justice authorization bill will recur automatically, absent unanimous consent, it would be very difficult to schedule other legislation. It would require unanimous consent to schedule some other bill in place of that.

It appears, then, that while it is true that I had hoped and my staff had indicated to the minority staff that we could proceed to the military pay bill today, the best we can do is tomorrow. There are a number of reasons for that-all of them, I am sure, good reasons.

My answer to my friend is that it requires unanimous consent to schedule this matter in this sequence at this time and I believe Thursday is going to be as good as we can do if, indeed, we succeed in getting a request for Thursday.

Mr. EXON. Reserving the right to obiect further, Mr. President, I thank my friend, the majority leader, for his explanation. As I indicated, I am sure I am on his side in trying to get this moved along.

As I understand the situation, then, as it now stands, we are not going to take up the military pay bill today; we may take it up tomorrow, but that is not certain yet. Is there any indication the majority leader could give me now that if we take up the military pay bill tomor-row, we can dispose of the bill and any amendments thereto with the time agreement that I understood from usually reliable sources would allow us to bring up the bill tomorrow, with the time agreement that I understood had been at least tentatively agreed to, and vote finally, dispose of that matter sometime tomorrow afternoon?

What is the present feeling of the majority leader with regard to that schedule and was I properly informed that a general consensus had been reached to have a final vote on this sometime

tomorrow afternoon?

Mr. BAKER. Mr. President. I must inform my friend that the original unanimous consent that I had reduced to writing and submitted to the minority leader and others had a time consideration for the bill and a'l amendments and a final vote for a time certain tomorrow. Since that time, I understand that the request has been changed so that all amendments except one amendment will be disposed of tomorrow, and that that amendment would be disposed of on a time limitation during the day on Friday; that, in the intervening time, the Senate would be free to proceed to other business.

Mr. EXON. Mr. Precident, reserving the right to object further, as I understand it, the intention of the majority leader now is to at least complete all work on the military pay bill no later than this coming Friday. Is that correct?

Mr. BAKER. That is the request that is being considered now through the clearance process on the minority side.

Mr. EXON. Reserving the right to object further-and I do not intend to object-I thank my friend, the majority leader. I say to him that I hope we can dispose of this bill today. If we are not going to do so, and it appears that we are going to wait until Friday, I hope we can get it done then.

I need not tell the majority leader that he and we have a lot of work to do, and I hope my colleagues will join the majority leader and recognize that we cannot accommodate everybody on this floor at the time they are supposed to be here. They are all supposed to be here now. I wish they were here, so that we could proceed

Mr. BAKER. I thank the Senator.

DEATH OF LOWELL THOMAS, SR.

Mr. BAKER. Mr. President, I would like to join millions of Americans across the country in noting with sadness the passing of Lowell Thomas, the dean of broadcast journalism, on August 30, 1981.

I was fortunate enough to be with Lowell Thomas earlier this year, when he presented me with the Daniel Webster Award from the International Platform Association of which he was president. He was in great spirits, and as distinguished and tireless as the day when he made the first television broadcast in 1939.

Throughout his 89 years, his peripatetic lifestyle brought him to Lawrence of Arabia, to Italy as a soldier in World War I, to broadcasting from a plane over Berlin during World War II, and to hundreds of historic and immensely popular radio broadcasus

News is only news for the moment, but the golden days of Lowell Thomas and "so long until tomorrow" will be with us forever and ever.

The ACTING PRESIDENT pro tempore. The majority leader's time under the combined standing order and previous order, has expired.

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, how much time do I have?

The ACTING PRESIDENT pro tempore. Twenty-five minutes.

Mr. ROBERT C. BYRD. There are a number of Senators on my side of the aisle who wish time.

How much time does the Senator from Mississippi wish?

Mr. STENNIS. Mr. President, I was hoping to have about 20 minutes, but I do not want to be selfish.

Mr. ROBERT C. BYRD. I have 25 minutes, and Mr. Hollings wants 15. Mr. PROXMIRE needs a few minutes, Mr. FORD needs 1 minute, and Mr. STENNIS wishes time.

Mr. President, I wonder whether the distinguished majority leader would change the arrangement so as to give my colleagues time to speak. I have 25 m'nutes. Mr. Hollings wants 15 minutes, Mr. STENNIS wants 20 minutes, Mr. Prox-MIRE wants 3 minutes, and Mr. FORD wants 1 minute.

Mr. STENNIS. I will take 15 minutes. Mr. ROBERT C. BYRD. I have 25 minutes. I wonder whether I could have 35 minutes, and the majority leader could have some additional time.

Mr. BAKER. Yes.

Mr. President, I ask unanimous consent that the time allocated to the distinguished minority leader be extended from 25 minutes, under the aggregation arrangement previously agreed to, to 45 minutes and that the majority leader have under his control an equal amount of additional time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. Mr. ROBERT C. BYRD. Mr. President, the distinguished majority leader is ac-

commodating, as is characteristic of him. I now yield 15 minutes to Mr. STENNIS. inasmuch as he asked first.

The ACTING PRESIDENT pro tempore. The Senator from Mississippi.
Mr. STENNIS. I thank the Senator

from West Virginia.

S. 1598—NATIONAL COMMISSION ON INTEREST RATES ACT

Mr. STENNIS. Mr. President, I do not believe I have ever had the privilege of addressing the Senate on a more important matter affecting so many people. This relates to the unusually high, persistently high, interest rates we have had for more than 15 months.

I point out, at the beginning, that there is nothing unusual or radical about the proposal I will make, which will be within the limits of our Senate committee system, with respect to a commission I will propose which will be composed of persons who are highly experienced

in the field of finance.

Mr. President, before the Senate recessed, during consideration of the tax bill. I addressed the Senate on the extremely serious and harmful effects which high interest rates were having on the economy. At that time, I offered amendment to the tax legislation which would establish a National Commission on Interest Rates for the purpose of bringing responsible and knowledgeable officials in the Government and from the private sector together to conduct an in-depth study of our economy and determine ways by which moderate and stable interest rates could be achieved on a lasting basis.

I withdrew the amendment after a very constructive Senate floor discussion on the issue of high interest rates with several Members of the Senate, including the chairman and ranking minority member of the Finance Committee, Senators Dole and Long; the chairman of the Budget Committee, Senator Dom-ENICI, and the vice chairman of the Joint Economic Committee, Senator JEPSEN. The full discussion is printed in the CONGRESSIONAL RECORD of Thursday, July 23, 1981. I also quoted there the Secretary of the Treasury, Mr. Regan, who had consulted with us and authorized that his name be used, in the interest of disposing of that amendment. In summary, it was agreed that immediately upon return from recess this matter of high interest rates would be given first priority. It was agreed that hearings would commence shortly after the Congress returned from recess

I feel even more strongly that it is extremely urgent that the Government act to bring down high interest rates. During the recess, I sought further facts and counsel on the problem, and I toured my State, listening to the concerns of Mississippians and others, and all this reaffirmed the growing seriousness of economic situation. Clearly, the'r No. 1 concern and problem is high interest rates, and their concern is highly justified. They have witnessed, as I have, the growing numbers of hard-working people who have lost their jobs or have been laid off because of business slowdowns or bankruptc'es. The "would-be" builders and purchasers are denied a chance to get a start on a home or purchase a car that is necessary for travel to work. How long can they wait? How long can businesses survive this economic stagnation that has already set in?

The effect of high interest rates on automobile and home sales have seriously hurt the industries in my State—and all over the Nation—which manufacture components for autos and homes. The forest products and homebuilding industries are at record lows. Agriculture, a major industry in my State, has been hobbled by the high costs of farm loans. These high interest rates have simply put automobile loans, home mortgages, and small working capital loans out of reach for the average wage earner and small businessman. These conditions are rapidly developing in all areas.

These are not the only victims. The interest rates have been at such high levels for so long that no sector of the economy has escaped the ravages of these soaring rates. The Federal, State, and local governments are suffering. The high cost of money and a weak bond market have created enormous fiscal problems. The urgency of the interest-rate problem is exemplified by the much higher projected Federal deficit for fiscal year 1982 which confronts Congress as we return after the recess. Less than 2 months ago, on July 15, the President estimated the deficit for fiscal year 1982 to be \$42.5 billion, and now it is reported that the estimate may be revised upward as much as \$15 to \$20 billion.

And it is reported that one of the main reasons for the new estimate is because it is anticipated that interest rates will remain at high levels throughout the coming year.

Mr. President, these matters add up.
Some way must be found within our financial institutions, within our financial structure, to meet these conditions. I believe that these conditions are serious enough that emergency measures of some kind are warranted.

Certainly we cannot allow these high interest rates to continue any longer without something being done to reduce them. If these rates continue at these high levels, the entire economy will suffer serious and lasting harm. These high rates could defeat the successful operation of the Reagan plan.

I am never more serious than when I view, and I view with alarm, prospects of a happening of that kind.

The current economic stagnation is generating long-term shortages of goods and services which will contribute to future inflation. If we continue to fight inflation with recessions induced by high interest rates, the greatest loss to the economy will be the loss of confidence of the American people in the economic system and in their Government and its ability to cope with these situations.

Something must be done. Moderation and stability in rates must be established. The problem of high interest rates is complex indeed. I do not pretend to know the solution, but I know the situation is urgent and critical. A strong and concerted effort must be initiated to attack the problem. I believe a way can be found to solve this problem.

This is no time to assess blame. The last two decades have been particularly difficult for the economy. The Vietnam war and the two dramatic OPEC energy increases took a heavy toll, but we are not trying to assess blame. The economy has been on an economic roller coaster of inflation, rapid credit expansions, and recessions. In addition, interest rates have been extremely volatile.

The conditions are that the past year and a half is an example: In the spring of 1983 the prime rate soared to 19½ percent. By August it had dropped to 11 percent. Then by December 1980 the prime rate had returned to 21½ percent. Frime rates have hovered around the 20's since then and have been above 20 percent since May of this year. These conditions brought about a loss of confidence and a sense of uncertainty in the economy. The result has been lagging productive investment, declining personal savings, greater Government spending, and a loss of productivity.

a loss of productivity.

The inability of our institutions to adequately preserve economic stability have created a widespread belief that price inflation is here to stay. This belief is manifested in the so-called indexed economy: Indexed labor contracts, indexed Government contracts, and indexed prices have replaced the axiom of American economic strength—that wages should increase as a result of in-

creases in productivity.

The current situation places the socalled inflationary psychology in vivid focus. Even though price inflation and business activity have eased and the President's plan for economic recovery has been signed into law interest rates have remained high. The financial markets obviously believe that inflation will continue. Investors are demanding high interest rates to preserve the purchasing power of their savings. Paradoxically, if high interest rates continue, the investors expectations will be fulfilled due to the shortages of goods and services which are being created by the economic recessions which follow periods of high interest rates.

I am convinced that we need to strengthen the ability of our economic institutions to respond to shocks like those we experienced over the last decade. We need to take a long-term look at our banking and financial institutions and determine if there are some changes which could be made that would achieve lasting, moderate and stable interest rates.

This is no reform movement now or anything of that kind. It is a concern here with a serious inadequacy of our financial system.

In the short term, hearings should commence as soon as possible on temporary emergency actions which would bring down interest rates. I am not an economist but I hope that we can all agree that the situation is serious enough to warrant emergency action. The main objective of these actions would be to bring about a quick return to moderate interest rates without launching a new round of inflation.

For the long term, I would propose that a special blue ribbon commission be

established to study the economic experience of the last decade and make recommendations to the President and Congress for ways that inflationary forces which seemed to have emerged in the past decade and make recommendations to the President and Congress for ways that greater economic stability and greater prosperity can be achieved.

Mr. President, in this regard, I send to the desk a bill which would establish National Commission on Interest Rates. I invite my colleagues to join me in sponsoring this legislation. I deeply believe that such a commission is

urgently needed.

I am a great believer, as I said, in our Senate committee system. I hope that we will move with reasonable dispatch and in great depth in these matters, and I believe that the passage of such a bill will give us a better look than we have

been able to make so far.

I urge that this bill be given quick consideration. It is highly necessary to begin a thorough study of the cause of high interest rates and the steps necessary to reduce and restore stability in interest rates. I am not wedded to the precise form and membership of this commission. I leave these matters to the judgment of the committee and the President but I would urge that the substance and purpose of the commission's work should be held intact. The bill as written proposes the following officials:

First. The Secretary of the Treasury.

or his delegate;

Second. The Chairman of the Council of Economic Advisers, or his delegate; Third. The Comptroller of the Cur-

rency, or his delegate;

Fourth. The Chairman of the Federal Home Loan Bank Board, or his delegate; Fifth. The Administrator of the National Credit Union Administration Board, or his delegate:

Sixth. The Chairman of the Board of Directors of the Federal Deposit Insurance Corporation, or his delegate;

Seventh. The Chairman of the Securities and Exchange Commission, or his

Eighth. The Chairman of the Federal Trade Commission, or his delegate;

Ninth. Two members appointed by the President, one of whom is an official of a State agency that regulates banking or similar financial institutions, and one

of whom is an official of a State agency that regulates savings, thrift, or similar

financial institutions.

To those five members from private life who are not officers or employees of Government would be added by the President of the United States.

I have faith in a commission composed of the officials designated by this bill and other highly competent persons chosen by the President from the field of finance, business, and industry, and related fields. I would request them to use their judgment and the broadest discretion in seeking and outlining a plan that would lower and stabilize interest rates.

It is an absolute necessity for our economy and our entire financial structure that something along this line be done, and there is no time to lose.

The commission should have no other duties except to make recommendations of such a pian. The commission would be authorized to meet in open or closed sessions as it may choose.

I believe that with encouragement and leadership of the President of the United States, Mr. Reagan, who is acting in such good faith in these matters, they will be able to find a way and fear not after the complete efforts to save the Nation because we are struck here with something that is catastrophic.

I remember the days of the Great Depression now called, and I am not predicting another depression now. I am not trying to scare anyone, but while there is time I think the President, with his fine leadership, should direct himself to solve this problem, and through this commission of experts in which Congress would have a hand and a contact, some kind of a way can be found.

The President, Congress, or both, could adopt their recommendations if any they make or any part thereof or reject them all. It is the benefit of their judgment

that we need

Mr. President, I ask unanimous consent that the Senator from Tennessee (Mr. Sasser) be added as a cosponsor of this bill, that the text of the bill be printed in the RECORD, and that the bill be appropriately referred.

The ACTING PRESIDENT pro tem-

pore. Without objection, it is so ordered.

The text of the bill follows:

S. 1598

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "National Commission on Interest Rates

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds and declares that-

(1) interest rates charged by lenders have reached levels which threaten the health of

the Nation's economy;
(2) high interest rates have contributed to price inflation, a reduction in the supply of goods and services, economic stagnation, and a higher Federal deficit;

(3) the volatility of interest rates has created business uncertainty, encouraged speculation, and deterred investment in produc-

tive capacity;

(4) existing monetary, credit, banking, and fiscal policies have not stabilized interest rates at beneficial levels; and

(5) the development of policies to restore stability and confidence in the financial markets is necessary to the economic security of the United States.

(b) It is the purpose of this Act to establish a commission to investigate and recommend methods of promoting moderate and stable interest rates.

ESTABLISHMENT

SEC. 3. (a) There is established as an in-dependent instrumentality of the United States a commission to be known as the National Commission on Interest Rates (hereafter in this Act referred to as the "Commission").

The Commission shall be composed

the following members:
(1) The Secretary of the Treasury, or his

(2) The Chairman of the Council of Economic Advisers, or his delegate.

(3) The Comptroller of the Currency, or his delegate.

(4) The Chairman of the Federal Home

Loan Bank Board, or his delegate.
(5) The Administrator of the National Credit Union Administration Board, or his

(6) The Chairman of the Board of Directors of the Federal Deposit Insurance Corporation, or his delegate.

(7) The Chairman of the Securities and Exchange Commission, or his delegate. (8) The Chairman of the Federal Trade

Commission, or his delegate.

- (9) Two members appointed by the President, one of whom is an official of a State agency that regulates banking or similar financial institutions, and one of whom is an official of a State agency that regulates savings, thrift, or similar financial institu-
- (10) Five members appointed by the President from private life who are not officers or employees of the Federal Government or of any State or local government.

 (c) The Commission shall consult with the

Board of Governors of the Federal Reserve System in carrying out its functions.

- (d) Upon the appointment of the members described in paragraphs (9) and (10) of subsection (b), the President shall designate a member of the Commission to be Chairman of the Commission. This designation shall be made by and with the advice and consent of the Senate unless the individual designated already holds an office to which he was appointed by and with the advice and consent of the Senate.
- (e) A vacancy on the Commission shall not affect its powers and shall be filled in the same manner in which the position was originally filled.

DIFFTES

Sec. 4. (a) The Commission shall make a full and complete investigation of and make recommendations with respect to ways to establish moderate and stable interest rates. In conducting this investigation, the Commission shall consider-

(1) the upward ratcheting of interest rates:

(2) the "crowding out" of private borrowing and lending;

(3) the unprecedented volatility of interest rates:

(4) the high cost of long-term borrowing; (5) the impact of international financial

conditions on the domestic economy; (6) the increase in speculative investment:

the expansion of consumer credit; (8) the expansion of housing credit; and

(9) any other problems relating to the establishment of moderate and stable interest rates

- (b) Not later than one year after the date on which the last member of the Commission is appointed pursuant to section 3(b). the Commission shall submit to the Presi dent and to the Congress a final written report concerning its investigation and make such recommendations for administrative action and legislation as the Commission finds appropriate.
- (c) Not later than 6 months after the date of enactment of this Act, the Commission shall submit an interim report to the President and to the Congress, describing the activities of the Commission during the period prior to the submission of such report.

(d) The Commission shall cease to exist sixty days after it submits its final report to Congress under subsection (b).

POWERS

SEC. 5. (a) The Commission or, on the authorization of the Commission, any member thereof, may, for the purpose of carrying out the provisions of this Act, hold such

hearings and sit and act at such times and places, administer such oaths, and require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such evidence as the Commission or an authorized member may find

advisable.
(b) (1) Subpenss may be issued only under the signature of the Chairman or any member of the Commission designated by him and shall be served by any person desig-nated by the Chairman or any members. The attendance of witnesses and the production of evidence may be required from any place in the United States at any designated place of hearing in the United States.

(2) Any member of the Commission may administer oaths or affirmations to witnesses

appearing before the Commission.

(3) The provisions of section 1821 of title 28. United States Code, shall apply to witnesses summoned to appear at any such hearing. The per diem and mileage allowances to witnesses summoned under authority conferred by this section shall be paid from funds appropriated to the Commission.

(4) Any person who willfully neglects or refuses to qualify as a witness, or to testify, or to produce any evidence in obedience to any subpena duly issued under the authority of this section shall be fined not more than \$500, or imprisoned for not more than 6 months, or both. Upon the certifica-tion by the Chairman of the Commission facts concerning any such willful of the disobedience by any person to the United States attorney for any judicial district in which such person resides or is found, such attorney may proceed by information for prosecution of such person for such

(c) The Commission may acquire from the head of any Federal agency available data, reports, and other information which the Commission considers useful in the discharge of its duties. Each such agency shall cooperate with the Commission and furnish all information requested by the Commission to the extent permitted by law.

ADMINISTRATION

SEC. 6. (a) Subject to such rules and regulations as may be adopted by the Commission, the Commission is authorized to-

(1) appoint and fix the compensation of an Executive Director, by and with the advice and consent of the Senate, and such additional staff personnel as may be necessary, without regard to the provisions of United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at such rates not in excess of the maximum rate for GS-18 of the General Schedule under section 5332 of such title;

procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code, at rates not to exceed \$200 a day for in-

dividuals;

(3) procure supplies, services, and prop-

erty, and make contracts; and (4) enter into agreements with the General Services Administration for procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Commission in such amounts as may be agreed upon by the Chairman and the Administrator of the General Services Administration.
(b) The Comptroller General is author-

ized to make detailed audits of the books and records of the Commission, and shall report the results of any audit to the Commission and the Congress.

COMPENSATION

SEC. 7. Each member of the Commission not otherwise employed by the United States shall be compensated at the rate of \$200 per

day for each day, including traveltime, that he is engaged in the actual performance of his duties as a member of the Commission. A member of the Commission who is an officer or employee of the United States shall serve without additional compensation. All members of the Commission shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties as members of the Commission.

ASSISTANCE

SEC. 8. (a) Upon the request of the Commission, the head of any Federal agency shall furnish the Commission with available data, reports, and other information to the extent permitted by law.

(b) Upon the request of the Commission, the head of any agency, department, or other instrumentality of the United States furnish personnel and services to the Commission, with or without reimbursement.

AUTHORIZATION

SEC. 10. There are authorized to be appropriated without fiscal year limitation such sums, not to exceed \$2,000,000, as may be necessary to carry out the provisions of this Act.

Mr. SASSER. Mr. President, I am pleased to be an original cosponsor of S. 1598, a bill to establish a National Commission on Interest Rates. I commend Senator STENNIS, my distinguished colleague from Mississippi, for bringing this measure before the U.S. Senate for its consideration.

Mr. President, we have an interest rate crisis in this country. The prime rate has been above 20 percent for the past several months, and many economic experts are forecasting a possible increase in the prime rate to a level of 25 percent in the months ahead.

The high level of interest rates that we are experiencing is threatening the progress of our economic recovery.

Business bankruptcies reach higher and higher levels. The gross national product suffered a decline of 2.4 percent during the last quarter, and most economists are predicting another GNP decline for the third quarter of 1981. Mortgage rates have reached a record level of nearly 18 percent and housing starts are close to the lowest level of production in nearly two decades. Indeed, a May 1981, Associated Press/NBC News poll indicates that 90 percent of the American public believe they cannot afford the kind of housing they would

High-interest rates have devastated the stock market which has lost some 150 points during the past several months. and the 20-percent prime rate we now have has curbed virtually all economic activity on the municipal bond market.

Moreover, interest rates have reached record levels in real and not just inflationary terms. There is a far wider spread between the rate of inflation and the level of interest rates than we have ever experienced before, normally, interest rates are pegged at 2 to 3 percentage points above the rate of inflation. Now the spread, when one looks at the Consumer Price Index and the level of prime rates in this country, often exceeds 7 to 10 percentage points.

The truth is, Mr. President, that the American business community has become so disconcerted by the high-interest rate policy of the Federal Reserve Board that there is no longer any long-term stability in interest rates.

The Federal Reserve Board has focused on a policy of trying to control the growth of various monetary aggregates almost on a day-to-day basis, a difficult task in an increasingly sophisticated and open monetary system. And the Federal Reserve Board has abandoned a policy of trying to keep in place relatively stable interest rates that will encourage long-term business investment.

Mr. President, America is paying the price for these high-interest rates policies. More and more business debt is being financed on a short-term basis at exorbitant interest rates. Higher and higher interest rate costs are cutting into the profits of American business. And for the small businessman, the farmer, the homebuilder, the automobile dealer, any many, many others, interest rate costs are slowly but steadily pushing them out of business.

The administration has promised the American people a program of economic recovery based on cuts in Federal spending, reduced Federal taxation, and lower interest rates.

The Congress has just passed legislation bringing about truly historic reductions in Federal spending and taxation. Now the administration and the Congress must turn their attention to the problem of stabilizing and lowering interest rates so that our economic recovery can proceed as planned.

I urge that the U.S. Senate take expeditious action in enacting S. 1598.

Mr. STENNIS. Mr. President, I thank the Chair and I yield the floor.

(Later the following occurred:) Mr. BAKER. Mr. President, I ask unanimous consent that a bill introduced today by the distinguished senior Senator from Mississippi (Mr. STENNIS) dealing with the establishment of a commission to study interest rates be held at the desk, pending referral, until the close of business on Friday, September 11.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. HOLLINGS. Mr. President, I yield now to the distinguished Senator from Wisconsin 3 minutes.

The ACTING PRESIDENT pro tempore. The Senator from Wisconsin is recognized.

Mr. PROXMIRE. Mr. President, I thank the distinguished Senator from South Carolina.

Mr. President, I ask unanimous consent that the Senator from Oklahoma (Mr. Boren), the Senator from Alabama (Mr. HEFLIN), the Senator from Maryland (Mr. SARBANES), and the Senator from Colorado (Mr. Hart) be added as cosponsors of S. 1528, the Social Security Trust Fund Reform Act of 1981.

The ACTING PRESIDENT pro tempore. Without objection, is is so ordered.

IRANIAN BAHAIS IN DANGER

Mr. PROXMIRE. Mr. President. on August 6, 1981, the New York Times carried an editorial entitled "For Bahais in 17an, a 1nreat of Extinction." The author of the editorial is Firuz Kazemzadeh, professor of history and chairman of the committee on Middle Eastern studies at Yale, and also a member of the national governing body of the American Bahai organization.

Professor Kazemzadeh warns us that the "Bahais in Iran are in danger of extermination." According to him—

More than 60 people have been lynched by mobs or executed by revolutionary firing squads. Hundreds have been dismissed from jobs; thousands have lost their homes and possessions.

A year ago the entire national governing body of the Bahais of Iran was kidnaped and disappeared.

Professor Kazemzadeh points out that the Shiite clergy, as well as the Government in Iran and their representatives abroad, see members of the Bahai faith as dangerous heretics and a political conspiracy serving the interests of foreign powers. Other accusations against the Bahais include, according to Kazemzadeh, the "promotion of prostitution, cooperation with Zionism, spying for imperialist powers, corruption on Earth and warring against God."

Professor Kazemzadeh further asserts

This assault against the approximately 400,000 Bahais is not confined to individuals nor is it a mere outburst of religious passion. It is a case of well-planned genocide.

The Genocide Treaty, which has been before the Senate for 32 years, declares that whether committed in time of peace or war, genocide is a crime under international law to be prevented and punished. Article II of the treaty defines genocide to be the "intent to destroy, in whole or in part, a national, ethnical, racial or religious group."

According to Professor Kazemzadeh, numerous atrocities have been committed against Bahais. They include two men being burned alive in Shahmizad, mobs attacking Bahais in Ardistan, houses and stores being burned in Zenjan, and families who refuse to recant their faith being driven out of their villages.

Iran is 1 of the 86 countries which has ratified the Genocide Convention. Despite its major role in drafting and rallying support for the treaty in 1943, the United States has shamefully failed to demonstrate its commitment to the prevention and punishment of genocide by ratifying the convention. How are we to judge other countries' violations of human rights when we have failed to ratify the first United Nations inuman rights treaty?

The threat of genocide is present today. The need for a genocide treaty does not fade as years go by. Professor Kazemzadeh's editorial reminds us that various groups and their existence are now being threatened.

I urge my colleagues in the Senate to swiftly ratify the Genocide Convention.

I ask unanimous consent that the New York Times editorial to which I have referred be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the LECLRD, as follows:

FOR BAHAIS IN IRAN, A THREAT OF EXTINCTION (By Firuz Kazemzadeh)

New Haven.—The Bahais in Iran are in danger of extermination. Not a week passes without a sinister incident. Already more than 60 people—storekeepers, artisans, teachers, Government employees, doctors and a distinguished university professor—have been lynched by mobs or executed by revolutionary firing squads. Hundreds have been dismissed from jobs; thousands have lost their homes and possessions.

From every province pour in accounts of atroctites. Two men are burned alive in Shahmirzad; a clinic is dynamited in Kata; a community center is burned to the ground in Tavil; graves are descrated at Hoseynabad; houses and shops are set on fire in Zenjan; mobs attack Bahais in Ardistan; families that refuse to recant their faith are driven out of several villages near Hamadan; a man, his wife, their 7-year-old child and 4-year-old grandchild are beaten nearly to death with iron-tipped staves near Birjand; the Bahais are forbidden to bury their dead in the cemetery at Chahbahar; the Bahai hospital is confiscated in Teheran; seven Bahais are executed in Yezd....

Authorities conduct sham trials of Bahais that invariably result in their conviction. The charges hurled at Bahais by prosecutors, shouted by crowds in the streets, spread by the press, radio and television and glossed from the pulpit by the Shiite clergy are always the same. They include the promotion of prostitution, cooperation with Zionism, spying for imperialist powers, corruption on earth and warring against God.

This assault against the approximately 400,000 Bahais is not confined to individuals nor is it a mere outburst of religious passion. It is a case of well-planned genocide. The scope of the attack became clear a year ago when the entire national governing body of the Bahais of Iran was kidnaped and disappeared without a trace.

Allegations that the Bahais faith is a political conspiracy serving the interests of foreign powers have been made by the Shifte clergy and the Government in Iran and by their representatives abroad. They contend that the Bahais were favored by the Shah's Government and that they ran both the infamous secret police, Sa'ak, and the Government. Stories make it appear that all the ills of a rapidly changing society are directly attributable to the machinations of an accursed group of heretics.

The hatred that a large segment of the Shiite clergy and the more retrograde elements of Iranian society feel for the Bahai faith has nothing to do with politics. It is inspired by a primitive religious fanaticism. A century ago, before the modern notions of religious toleration penetrated Iran, the Islamic religious men did not bother to hide the true reasons for their hostility to the Bahai faith. They say it as a dangerous heresy and its followers as apostates who deserved death. That the Bahais worshipped the same God and held the Koran to be divinely inspired scripture made matters worse. The Bahais also believe in progressive revelation. They repudiated the notion that non-Moslems are unclean. They taught principles that the clerics found either incomprehensible or odious: universal peace and the unity of mankind, the equality of sexes, the harmony of religion and science, universal education. That the Bahais have no clergy, trusting the leadership of their community instead to elective bodies, is an affront to the arrogant religious leaders.

Unlike Jews and Christians who belong to distinct ethnic groups and cultures, the Bahais were Persian- and Azerbaijani-speaking converts from Islam. They were an organic part of the Iranian nation and could not be confined to a physical or spiritual ghetto, they could only be exterminated. And the Shiite clergy have long been trying to achieve this.

As times change, so change rationalizations and slogans. In the 20th century the Bahai faith could no longer be attacked on purely theological grounds. Secularism has influenced the educated who embrace nationalism as a surrogate religion. To turn them against their Bahai fellow citizens it was necessary to show that the Bahais were unpatriotic. Their opponents resorted to lies, including the production of fake historical documents. During the revolution of 1906-1911, reactionary religious men in the Shah's camp charged that the Persian constitutional movement was a Bahai plot to take over the country. Simultaneously those clerics who led that revolution in an uneasy alliance with a handful of liberals accused the Bahais of supporting despotism. Neither side would acknowledge that the Bahais, adhering to the principle of noninvolvement in partisan politics, remained neutral.

During the anti-Communist 1930's, the Bahais were linked with Russia, Czarist and Soviet. When American influence in the Middle East increased after World War II, the Bahais were linked by their opponents to the United States. More recently they have been accused of supporting Zionism. One may expect that soon they will be linked to Iraq or some other hostile power.

In spite of a century of persecution, Iran's Bahais remain loyal to the country that is not only their homeland but also the land where their religion was born. However, their fate should not be hidden from the world by a veil of misrepresentation. Humanity should be aware of the plight of a peaceful, law-abiding community in the clutches of a relentless and unscrupulous foe.

TRIBUTE TO ROY WILKINS

Mr. PROXMIRE. Mr. President, yesterday a great American, Roy Wilkins, died. Mr. Wilkins, I think, has done more to improve race relations in this country and to make progress against racism than any American in the last 50 years. He became Mr. NAACP.

An editorial in the New York Times this morning commented on Mr. Wilkins' great career when it said:

Roy Wilkins made history, and made America a more just and decent place, for whites as well as blacks.

Racism was still blatant and legal when he began his career. It is neither of these now, thanks in large part to his leadership. What a monument to one man.

Mr. President, I ask unanimous consent that the full text of the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

RACISM WAS THE ENEMY

Roy Wilkins made history, and made America a more just and decent place, for whites as well as blacks.

as well as blacks.

In his 46 years with the National Association for the Advancement of Colored People, he held steadfastly to a belief in the power of reason and the rule of law rather than force. Racism was the enemy, whether by intolerant whites or impatient blacks.

Though he saw the value of peaceful picketing, he preferred the path of litigation and legislation, fearing that victories resulting from confrontation would prove transitory. He assessed his extraordinary achievements with a modest comment: "We did what we could do when we could do it." It was a shrewd formula for success.

Through the years that the N.A.A.C.P. grew from 25,000 members to a national organization of half a million, Roy Wilkins combined unwavering commitment to principle with careful pragmatism. When he joined the organization in the 1930's, night riders commonly terrorized blacks. An aggressive N.A.A.C.P. campaign led to state anti-lynching legislation; it was the first of many legislative victories that would eventually mark the organization as the secretariat and chief lobbyist for the civil rights movement.

It was Roy Wilkins's painstakingly orchestrated legal strategy that ultimately persuaded the Supreme Court in 1954 to outlaw school segregation. And he was a leader in the civil rights coalition that cajoled and pressed and persevered until Congress finally banned discrimination in the great civil rights enactments of the 1960's.

He hardly had time to savor those triumphs, however, before being challenged by disgruntled black activists who disavowed nonviolence and called for black power.

Roy Wilkins understood how cheap—and chic—militant talk could be. Eloquently, he denounced black separatism. Even if black power should be enshrined briefly, he warned, "the human spirit, which knows no color or geography or time, would die a little, leaving for wiser and stronger and more compassionate men the painful beating back to the upper trail."

Racism was blatant and legal when he began his career. It is neither of these now, thanks in large part to his leadership. What a monument to one man.

Mr. PROXMIRE. Mr. President, I yield the floor.

Mr. HOLLINGS. Mr. President, I am glad to yield a minute to the distinguished Senator from Kentucky (Mr. FORD).

HIGH INTEREST RATES

Mr. FORD. Mr. President, during the August recess, I was back in Kentucky and, as in the past, I spent a good deal of my time traveling across the State doing more listening than talking to find out what people had on their minds.

About all anyone wanted to talk about was the high interest rates that are crippling many vital sectors of our economy. I spoke with farmers, car dealers, realtors and a host of small businessmen. They are all searching for an answer. They want to know when high interest rates will be brought down and what we in Washington are going to do to bring them down.

Many of the people with whom I spoke are indeed desperate. They see other businessmen and farmers in their community going out of business everyday and they wonder if they will be next. They literally keep their business going from month to month looking at their balance sheets to figure out if they can stay in business with the high interest rates they must continue to pay.

In fact, people in my home State are so upset they have started a national letter writing campaign called "Save Our Society" to influence Washington to find a way to lower these ruinously high interest rates. The common perception of these people is that excessive interest rates are part of the problem, not the solution, and it is difficult to argue otherwise.

Of course, this is not a new problem; I, and many other of my colleagues, have taken the Senate floor on numerous occasions to urge that the administration take some kind of action to bring interest rates down. Granted, rates were high when this administration was elected last November, and I suppose public discontent with the then high interest rates was a good part of the reason Ronald Reagan was elected President.

When he came to town, Mr. Reagan offered a bold new economic recovery plan and he had his advisers, OMB Di-rector David Stockman and Treasury Secretary Donald Regan, come before congressional committees testifying as to what this economic recovery program would mean to the country. It would mean new jobs, increased productivity, and lower interest rates, they said. And, I remember Mr. Stockman confidently promising that interest rates would come down as soon as the financial markets realized Congress would indeed cut spending and taxes just as the administration requested. It then became clear that Congress would give the President almost everything he wanted-and we

But, the markets did not respond. Interest rates remained at their high level. So then the administration said, well just wait until Congress actually votes approval of our entire economic recovery plan—budget cuts and tax cuts exactly as requested, no changes allowed—then the market will respond and interest rates will come down.

Just before the August recess, Congress passed the largest spending and tax reductions in the history of this Nation, just as President Reagan had requested. Since then, the stock market has fallen 95 points. The prime interest rate has remained unchanged at around 20 percent and the bond market has sunk to its lowest level ever.

Now the administration is singing a different tune. It is now saying that it might take just a little longer than originally thought to turn things around to bring interest rates down. And the President is now admitting what everyone else had been saying all summer—that, yes, the budget deficit might indeed be more—much more—than was originally promised.

The administration is now worriedand rightfully so—that the continuing high interest rates will jeopardize the supply-side economic recovery that has been promised these many months. But, the results of the contradictory economic policy of this administration should have been clear to all of us. On the one hand, the administration is pursuing a stringently tight monetary policy that allows a supply of money to grow at only an exceedingly slow rate. This policy goes directly against the high demand for money the Government is causing by its expansionary fiscal policy of huge tax cuts and larger budget deficits. When combined with the fears of higher deficit spending, there can be no escaping the resulting high interest rates. And, the higher public and private demand for a slowly growing supply of money will continue to keep interest rates at their cur-

rent levels and the small business and farm economy will continue sliding down the drain.

The magnitude of this situation must be confronted immediately. It is crucial that the administration and Congress take steps immediately to bring the high rate of interest down, and there must be strong and positive leadership forthcoming from the administration in this area.

This is not and must not become a partisan issue. It is a national issue with far reaching and long lasting implications for the country's present and future. If the administration is determined to put the economy back on its feet, the entire economy not just the Fortune 500 corporations, it will move to tackle the high interest rate crisis with the same determination and intensity it used in selling the budget cuts and tax programs to the American people.

If not, well then by the time its socalled economic recovery program ever takes hold, there will be little if anything left for most people to recover.

I thank the distinguished Senator from South Carolina.

ADMINISTRATION'S APPROACH TO OUR FISCAL DIFFICULTY IS FLAWED

Mr. HOLLINGS. I thank the distinguished Senator from Kentucky.

Mr. President, I yield myself 15 minutes. The distinguished Senator from Maryland wants to be heard, and I would be glad to yield to him, but I do not want to miss my chance to speak while the majority leader is here on the floor. I would appreciate a chance to have a conversation with him.

A person would have to be blind not to realize that we are in serious economic trouble. Now is not the time for recrimination. Later I am going to include in the Record the article by the former Secretary of Defense, James Schlesinger, who served under several administrations

I could probably make my point in about four words by saying "I told you so." But now let us be constructive and see how we can correct this terribly difficult situation.

Mr. President, ever since the oil embargo in 1973, inflation has been rampant. We had a balanced budget in 1969, and nearly a balanced budget in 1970. But by 1975 we had begun running large deficits, more than \$45 billion, and more recently, we have had even larger ones of \$60 billion and more.

In the Congress one fact must be understood: The U.S. Government loses on these high interest rates; it loses on inflation. That is the hardest point to get through to the Republican majority and the administration, including Mr. Stockman.

Inflation widens the Federal budget deficit. We heard it last January, how Government revenues increase with inflation, with people receiving higher wages, and some persons paying taxes for the first time. It is true that, as a result of inflation, the Federal Treasury took in \$70 billion more than it would have, but inflation also cost the Treasury,

in cost-of-living payments, \$83.1 billion. To keep programs funded at a constant level in real terms, we would need an additional \$13 billion.

Great credit is due the President for his support in helping the Congress cut \$35 billion in 1982 in the reconciliation bill. But these were not the first spending cuts. Last year the Democratically controlled Congress enacted the first reconciliation bill.

That bill cut \$8 billion off the deficit. The main point however is that we in Congress have been fooling ourselves. We have been cutting programs, right along and congratulating ourselves on the cuts. We even promised that we were headed toward a balanced budget. But then we got carried away with cuts and cut revenues by such a large amount that we are not likely to see a balanced budget for some time.

With the huge individual tax cuts, we cannot hope to produce a balanced budget just by cutting domestic spending programs. Defense will have to shoulder some of the burden too, although there is not a great deal of leeway there.

Mr. President, we are almost to the point of trying to get blood out of the turnip, and there is not much there. There is still a need for some additional cuts but we will not reach a balanced budget with spending cuts alone.

That is especially true if we leave the entitlement programs sacrosanct. That is exactly what Mr. Stockman said-we are going to leave entitlements alone, but we are still going to cut \$73 billion in 1983 and 1984. Mr. President, that simply is not enough to balance the budget. In order to eliminate the size deficits we're looking at now, and still preserve funding for defense, interest payments, and the social "safety net" that the President has promised to maintain, you would have to cut about 60 percent of the rest of the budget in 1984.

No one likes to address the inflammatory subject of social security cuts. But if we are going to bring confidence to the market, the financial community, and the people of this Nation, and get interest rates down so that small businesses can begin to grow and prosper again, we are going to have to reduce some of those entitlements, particularly with respect to the cost-of-living payments. One way to do this might be to cut 3 percent of the cost-of-living adjustments each year for the next 3 years. This would only be tem-

The senior citizens can make their contribution to our economic battle and still not have their checks cut. Instead of receiving, let us say an 11.2-percent costof-living increase we reduce that by 3 percent, and they still would receive over an 8-percent increase. If we projected a 10-percent rise, they would get a 7-percent increase. They would still be getting a check and still be getting an increase. Such a proposal would lower spending by billions and allow the budget to head toward balance more quickly with a relatively painless effect.

The administration tries to blame Paul Volcker and the Federal Reserve for our economic woes. The Chairman of the Federal Reserve has only two choices.

The first choice. of course, is to monetize the extra Federal debt, and print

the money to pay for it. The second choice is to keep the money supply steady so that inflation will not be fueled.

If the fiscal policy of the Government continues to run high deficits, Mr. Volcker and the financial crowd have no other option. The Federal Reserve has no choice but to continue its efforts to keep the money supply controlled so as to lower the rate of inflation.

The administration's tax cut has devastated the revenue picture of the Government. The tax cuts cost \$93 billion in 1983, and \$150 billion in 1984. Revenues are reduced by \$199 billion in 1985, and \$268 billion in 1986. That is over 15 to 20 percent of the budget. If you are going to lose revenues to the tune of 15 percent of the budget over the next 5 or 6 years, every year, where is there

hope for a balanced budget?

My third point is that the administration's program is flawed on the impoundment issue. Let us have a fair fight on the floor as to how much is needed on these appropriation bills. We can determine which ones are too high. If the President disagrees, he can show leadership by vetoing the bills. We do not have to give new impoundment powers to him. He already has the responsibility and the power to veto bills he considers excessive. He should not duck that responsibility.

The impoundment proposal assumes, Mr. President, that the Congress is going to appropriate more than is needed. There is nothing to support that assumption. We should not give the President blanket power to impound spending. What we really need to do is impound the tax cut instead.

We cannot affect the 5-percent individual rate cut effective on October 1, 1981. There simply is not the time to accomplish it. However we could enact legislation to "impound" the subsequent individual rate cuts in 1982 and 1983. We should not change the business tax cuts. The stimulus, the incentive, to make America's businesses and industries competitive is only \$10 billion for 1982, \$18 billion in 1983, and \$28 billion in 1984. These proposals are good. I proposed an amendment to the tax bill that would have given tax cuts to business immediately and withhold them from individuals until 1983. Unfortunately, that amendment was defeated. But it would have provided the incentives to business it needs, the assurance to Wall Street it wants, and the balance to the Federal budget we all desire, while bringing interest rates down and cooling the inflation rate.

You are not going to get interest rate relief by giving the President more impoundment power. The most he could cut would be around \$70 billion in 1983 and 1984. A \$70 billion cut will not change the interest rates. You cannot achieve success until you show that you have a credible program to reduce the deficit and get the Government operating in the black.

We must move quickly and positively in this Congress to repair the damage done by the most irresponsible tax reduction I have ever seen. It has literally frightened the financial community in spite of all the TV and letter-writing campaigns and rhetoric about supplyside economics. Our President does not understand that this tax cut is priming the pump. We had it under Franklin Roosevelt. We had it under Lyndon Johnson with his guns and butter approach. Now we have the guns and butter approach again with President Reagan—this time wrapped in the guise of supply-side economics. It is nothing but pure fiscal tommyrot.

Uncontrolled Presidential impoundments will destroy the discipline of the budget process. I was here and the distinguished Senator from Tennessee was here when we reasserted our constitutional prerogatives in fiscal matters against the illegal and unprecedented actions of Richard Nixon and the executive branch. The Impoundment Act severly restricts Presidential impoundments. To live up to our responsibility here in the Congress, my hope is that the proposal to give the President unlimited impoundment authority will be filibustered, if necessary, by colleagues on both sides of the aisle. We must not start down the road of relinquishing our responsibilities.

There is talk of courage and bravery because the President is willing to take the responsibility; there is talk about a proviso that both Houses have a veto over any impoundments, so it would be a shared responsibility. That is the typical Washington solution—a shared proach with no fixed responsibility. It is bad. It breaks our fiscal discipline and destroys the credibility of the budget process. And it will not work.

I thing we ought to have a fair fight. an up-or-down vote, on the appropriation bills and let our President, if he thinks there is too much money appropriated in any bill, veto the blooming thing. I think he can be sustained on some of those vetoes.

We can fashion a package of spending cuts affecting entitlements and defense and the other programs. We should not be talking of impounding spending. Let us use the existing process and have vetoes of those appropriation measures that go too high. It is irresponsible to appropriate too much now and later impound. We must keep budget discipline within the Congress. Instead, let us talk about impounding that tax cut so the country will know it, will not be saddled in 1983 with \$100 billion in lost revenues, in 1984 with \$150 billion lost, in 1985 with \$199 billion lost, and in 1986 with \$268 billion lost. What would you do in those circumstances if you were a businessman?

Mr. President, there appeared in this morning's Washington Post an insightful and timely column by one of this country's most experienced and respected public servants, James R. Schlesinger. I ask that his column be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD. as follows:

REAGAN'S BUDGETARY DUNKIRK

(By James R. Schlesinger)

The last rites have now been pronounced over the great rearmament boomlet of 1981. Its demise had been expected by the diagnosticians for some time. Like Halley's comet, it visited us and then departed quickly, trailing only a long (though quite insubstantial) tail deserving further observation.

For the past six months the defense debate has focused on the wrong issue: could the "immense" funds ostensibly being made available to the Department of Defense be usefully spent in significantly enhancing the security of our international position. With the Soviet Union outspending the United States by some 50 percent on defense generally and by a disturbing 85 percent in the critical area of military investment (pro-curement), with conventional capabilities in Europe porous and relatively weak and theanuclear forces now overshadowed by those of the Soviet Union, with deterrence flimsy (at best) in the region of the Persian Gulf despite the West's enhanced interests and responsibilities, with the naval balance deteriorating in the Far East, and with trouble even in the Caribbean (and an evanescent threat "to go to the source")—not to mention concern about the strategic bal-ance, Minuteman vulnerability and aging -that should have been an issue in principle easy to resolve. Yet, all along the real question should have been—given the administration's fiscal proposals—how to maintain adequate deterrence with growing responsibilities in the Indian Ocean and with resources dramatically less than those invested by the Soviet Union

Seven months have been wasted on an irrelevant debate. We shall now have to make do with a smaller growth in defense resources than that projected by the Carter administration—previously denounced as hopelessly inadequate. So much for "making America strong again," "closing the window of vulnerability" and the vaunted "superiority" so casually endorsed in the Republican platform.

The unavoidable outcome, given its fiscal goals, seems genuinely to have surroused the Reagan administration. Disregarding the normal laws of arithmetic, and bemused by its own distortions of supply-side economics (alternatively known as "voodoo economics," snake oil or the Tooth Fairy), it lulled its pro-defense supporters (and itself) with farfetched projections supposedly demonstrating that the proposed rearmament effort could be achieved in the face of a massive shrinkage of the tax base.

According to the initial mythology, dramatically lower interest rates and cutting the "balance of government" almost in half (everything beyond interest payments, defense and the "social safety net") would permit the achievement of a balanced budgby 1984. But interest rates have rather than fallen, and only so much blood can be squeezed from the "balance of gov-ernment" turnip, so the cuts unavoidably must now come from the fenced "social safety net" or from defense. More significantly, the recent tax legislation-which seems likely to go down in history as the single most irresponsible fiscal action of modern times reduced the tax base to 19 percent of the GNP by 1984 (with expenditures running some 22 percent of the GNP), a revenue reduction of \$150 billion or roughly 17 percent. As an offset, some \$35 billion in non-defense expenditure reductions have now been achieved-less than one-third of those projected for 1984, less than one-fourth of the revenue loss

The budget director, occupationally debarred from an abiding faith in the Tooth Fairy, has now read the grim arithmetic—the equivalent of a Budgetary Dunkirk. The fiscal consequences may be briefly, if sadly, stated. Unless the tax reductions are reversed—which seems unlikely—on the basis of present legislation and projected defense spending, the nation faces growing budget deficits of \$65 billion in 1982, \$90 billion in

1983 and \$120 billion in 1984. Non-defense reductions will be increasingly hard to achieve. Thus, only the total jettisoning of the administration's goal of a balanced budget will permit even a modified defense buildup to survive.

Nor should one believe that with the halfannounced cuts for defense of \$20-\$30 billion we have reached the end of likely defense reductions. The best current estimate for FY 82 outlays is \$715-\$720 billion (\$20 \$25 billion over ceiling). The ceiling for FY 83 in the revised Reagan budget is \$732 billion—a total increase over 1982 of \$12-\$17 billion. Limiting spending to this ostensiceiling, given probable inflation rates, would imply a reduction of real federal expenditures by 6-7 percent. Not very likely. Far more probably 1983 expenditures will run roughly to \$775 billion—a sum \$45 billion over the presumptive ceiling. Substantially to reduce the out-year deficits, given the growing difficulty in achieving non-defense cuts, would probably require that some three out of four dollars in reductions come from defense.

One can always spend less—by doing less. Gone now are the fancies of nine additional tactical air wings, of three additional Army divisions. Gone, too, in all probability, is the 600-ship Navy—unless, like Jefferson, we provide mostly frigates or gunboats. Embarking on major new systems like MX or B1 or new acquisitions like carrier task forces will ultimately lead to an ill-balanced force by leaving insufficient funds for operations, readiness and sustainability.

The planned buildup for NATO will have to be reduced—especially so in light of Indian Ocean requirements. What an ideal moment, given the anti-nuclear tide running in Europe, to increase the degree of dependence on nuclear weapons and diminish conventional capabilities.

The international ramifications are disquieting—to say the least. The already apprehensive Europeans will conclude that, while the United States is prepared to disturb the international scene by threatening to launch an arms race, it is now seen to be unwilling to provide the resources either to run the race or to provide additional military muscle. The Soviets will not be loathe to exploit those European apprehensions. Moreover, the Soviets will conclude that, despite American bluster, they have little to fear in terms of additional forces to narrow the growing disparity in military capabilities. As for the Japanese (and others), this notable example implies that we might as well abandon the effort to persuade them significantly to increase defense spending.

In creating and maintaining forces, wishful thinking is no substitute for an adequate tax base. In this ill-fated venture the cycle from bold words to budget cuts has been the shortest on record—a kind of instantaneous New Look. The historic failure lies in so casually dissipating the carefully forged national consensus supporting higher defense spending—while leaving in the public mind the illusion that a sizable new defense effort has actually been launched.

Mr. HOLLINGS. Mr. President, I yield to the distinguished Senator from Maryland.

The PRESIDING OFFICER (Mr. Mar-TINGLY). The Senator from Maryland is recognized.

Mr. SARBANES. Mr. President, I thank the Senator from South Carolina.

Mr. President, during the August statutory break period, I held a series of field hearings in Maryland on behalf of the Subcommittee on Investment, Jobs and Prices of the Joint Economic Committee to assess the effect of high inter-

est rates on Maryland communities and citizens. The Joint Economic Committee is of course charged with reporting to the Congress on economic developments and economic policy, and these hearings provided an opportunity to hear graphic examples from a wide range of business and local interests describing how high interest rates have affected the economy throughout my State. I submit that the experience there is typical of what is taking place across the country.

In six separate hearings over the course of last week, the Subcommittee on Investment, Jobs and Prices of the Joint Economic Committee heard from more than 80 witnesses about the severe challenge posed by high interest rates—a challenge which those witnesses know best, since they face it daily in their own economic activities.

It is no exaggeration, Mr. President, to say that the problems created by continuing high interest rates are approaching crisis proportions. The situation this year, with the prime rate remaining over 17.5 percent, is unparalleled. In the last 12 months, the prime has been as high as 21.5 percent. Today it remains at 20 percent. The mortgage rate at many financial institutions is over 17 percent. the highest it has ever been. The interest rate on tax-free municipal bonds is now over 11 percent, twice what local governments had to pay only 4 years ago. These rates have created grave obstacles to the operations of many established and productive enterprises, particularly in those sectors of the economy which depend upon a line of credit. The damage thus far is extraordinarily severe; and, if conditions are not soon improved, will be irreparable. Enterprises which have been an important economic asset to their respective communities, an important economic resource, will be lost.

The burden of high interest rates has

The burden of high interest rates has become a major financial problem for small businesses. Auto dealers and other sellers of consumer durables have been particularly hard hit. For the first time in the history of a quarterly survey by the National Federation of Independent Business, small businesses rank interest rates and financing as the single most important problem facing them. The survey, which was released 2 weeks ago, states:

The currently high rates of interest are making a bad situation unbearable for many small firms.

Last year almost 12,000 businesses failed nationwide, the highest figure in more than a decade and almost double the number of failures in 1978 when interest rates were only half their current level.

The situation is particularly critical in the homebuilding industry and real estate industry. Housing starts in July stood at an annual adjusted rate of just over 1 million, down 17 percent from the already-reduced pace of a year ago and only half the 2 million starts needed to meet nationwide demand. Construction-related business is similarly depressed, with unemployment in the construction industry running at 15 percent, more than twice the industrial average. Home

sales have fallen dramatically, down in Maryland as much as one-third, to one-half from the level of 2 years ago. With mortgage rates now above 14 percent, purchase of a median-priced house in the National Capital area, for example, would require an annual income of more than \$50,000—an income realized by only the people at the very top of the income scale.

Financial institutions, particularly savings and loan associations which have done so much to make homeownership a reality, face unprecedented pressures. High interest rates also have very serious implications for the finances of State and local governments.

As a New York Times article two Sundays ago commented:

These are dark days for State and local treasuries. . . Frices of municipal bonds have been sliding all year and fell to a historic low last week. At the same time, the interest rates that governments have to pay on their new bonds have reached historic high.

This is an especially serious blow at a time when State and local jurisdictions must look forward to snarp reductions in financial support from the Federal Government.

The Federal Reserve Bank in Richmond reports that Maryland farmers are now paying the highest interest rate they have ever had to pay for bank loans, with many farmers paying 2 to 3 percentage points above the current prime rate. As a result, farmers across the State, as elsewhere in the Nation, have been postponing or abandoning productive investments which would make them more efficient and effective producers.

Mr. President, in the course of these hearings we heard some very pointed, detailed, and thoughtful testimony. The transcripts of those hearings are being prepared and will, of course, be made available through the normal committee procedures. But examination of the testimony reveals certain recurrent themes, which were developed by the very thoughtful witnesses who appeared before the subcommittee and I want very briefly to summarize some of these observations.

First of all, it is very clear that the high interest rate policy is proving to be counterproductive in a number of significant ways.

The high interest rates, ostensibly designed to check inflation, themselves become an important contributing factor to inflation.

In the very sharp 15-percent rise in the consumer price index last month—and I realize the difficulties of annualizing from 1 month's figure—the single most significant component of that increase were the costs related to the housing sector, which are directly attributable to high interest rates. In addition, indirectly and in many other ways, the high interest rates are passed through as a cost of goods and services which the consumer is required to pay.

Farmers testified repeatedly that their only choice is to pass on the high interest costs confronting them in the cost of their goods. There is nothing else

they can do. Small businessmen, homebuilders, auto dealers and others expressed the same view.

Second, with respect to the effort to bring down the Federal deficit, the high interest rates contribute to raising the deficit in two very significant respects: first of all, they increase the carrying charge on the existing debt, thereby raising expenditures. Further, and very importantly, the recession which has been provoked in certain sectors of the economy by the high interest rates-housing, autos, many of the small business sectors of the economy-results in workers losing their jobs. People are laid off, dropped off the payrolls of ongoing enterprises. These workers then cease to be earners and taxpayers who pay revenues into the Treasury, and instead start drawing unemployment payments out of the Treasury.

So the consequence of the slowdown in economic activity brought about by the high interest rates is a double penalty with respect to the Federal Treasury and the effort to balance the Federal budget. We lose people who were earning and working and who were tax-payers; they become dependent and start drawing unemployment or other support payments and, therefore, draw money out of the Treasury.

A third extremely important point is that the enterprises being affected in the small business sector—the auto dealers, farmers, the homebuilding industry, and realtors—are long-established, effective, efficient economic endeavors. They simply cannot handle the situation with which they are being confronted. In the coming days I plan to submit to my colleagues excerpts of their testimony which develop in detail what certain highly respected firms and individuals

are experiencing.

It is not marginal businesses which are unable to cope with this situation—they fell by the wayside long ago. What is happening now is that long-established economic endeavors, recognized within their area of economic activity as being amongst the best in the business, are unable to work with current interest rates, are laying off employees, and in some instances have already closed down. We are seeing a tremendous weakening of the small business sector of our economy.

Fourth, the high interest rates have created a major disincentive to investment. Business men and women whose enterprises can continue to operate are really asking whether it makes good financial sense to invest in new equipment, in new machinery, in new plant, when, in many instances, they could take the money, if available for investment purposes, put it in the market for money market funds and receive the high returns which now exist because of the high interest rates.

When they face the prospect of borrowing in order to carry forward such economic endeavors, they confront enormously high costs, with the note going up from month to month. They simply decide not to make the investment, even though they will tell you that as a business decision, the best course of action to improve efficiency and productivity,

which is something we very much want to encourage, would be to add the particular piece of equipment or machinery that would make them more effective products.

We are familiar with what has occurred in the housing sector. The high mortgage rates, absolutely unprecedented, have virtually eliminated from the housing market any but those at the very top of the income scale. With the notable exception of luxury and vacation homes, residential construction is almost at a standstill in my State.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. BAKER. Mr. President, have I time remaining?

The PRESIDING OFFICER. The Senator has 20 minutes remaining.

Mr. BAKER. Mr. President, I yield to the Senator from Maryland such time as he may require.

Mr. SARBANES. I appreciate the consideration of the majority leader.

Furthermore, those who are caught in the situation where they must relocate because of their jobs or because they are in the military face most distressing circumstances. The only people today who can handle that situation are people associated with large firms that offer relocation assistance as a benefit of employment, with the frm taking over the employee's house when a move is required. The consequence of that, interestingly enough, as testimony received in the course of the six Maryland hearings underscored, is to place small business at an even greater disadvantage with the large concerns: small business companies are not able to offer that benefit. As a consequence, they have difficulty in competing for talent.

In the farming sector, it is clear that young people cannot get into farming today. In fact, one witness said the only way a young person can enter farming is either to inherit the farm or marry into it. The purchase of farm equipment is obviously being deferred even though the farmer calculates that the addition of such equipment will make him a more effective and efficient producer, thereby increasing his productivity. Yet, when he confronts the high interest rates that are associated with acquiring the equipment, he is simply not able to go forward.

Mr. President, these are only some of the more serious and striking distortions in business and community patterns which were brought out during the course of these hearings. It is clear that unless interest rates are brought down to a level where productive enterprises can carry on their businesses, our economy is going to lose a whole range of economic enterprises of proven efficiency and productivity. The witnesses we heard from were invariably the leading business people in their fields; these were people who have been productive and effective economic contributors for a sustained period of time.

The message from all of them was that they clearly cannot handle the situation with which they are now confronted. If the adm'nistration, first of all, were to urge the Federal Reserve to move to a more reasonable policy—and, for the

moment, they are not doing that. Since 2 weeks ago, Chairman Volcker announced that the Federal Reserve would continue its current polices and immediately thereafter the Chairman of the Council of Economic Advisers, Murray Weidenbaum, said that the Fed is following the policy which the administration supports—the same assertion that Mr. Volcker made in the course of questions and answers on one of the Sunday talk shows.

Mr. President, it seems to me that the administration, as a start, has to make clear to the Federal Reserve that the Fed policy of unprecedented high interest rates is proving to be counterproductive. The policy is not succeeding in the effort to check inflation. It is, in fact, contributing to the inflation. As I said earlier, the high interest rates themselves have become a factor in the high costs reflected in the Consumer Price Index; and the high interest rates, by provoking a deep recession in certain sectors of the economy, by provoking this economic downturn and bringing economic activity to a halt, are throwing out of work people who could otherwise be produc-

People who could produce goods and services which the economy needs and wants cease to be independent. Instead of earning and paying taxes, they become dependent and start drawing cut of the Treasury. It makes absolutely no sense to shift people from working and producing, supporting themselves and their families, contributing their share to the National, State, and local budgets, and have them jobless and drawing out of the National Treasury.

The jump in interest costs has had an enormous impact on State and local governments, which is reflected in turn in the tax burden carried at the State and local level. It is reflected by the inability of State and local governments to develop the economic infrastructure needed for the development of the private sector if we are going to have economic vitality and job creation.

Mr. President, I join with others in underscoring the enormous importance of addressing this interest rate problem and urging a prompt change in policy.

I thank the majority leader for his consideration in yielding me additional time.

Mr. BAKER. Mr. President, I thank the distinguished Senator from Maryland for his contribution.

I yield now to the distinguished acting minority leader.

Mr. HOLLINGS. I thank the distinguished majority leader.

Mr. President, the idea, to be more specific, is not to reverse the program. We have to be realistic and see where the votes are. Everybody knows my position. I tried to phase a tax cut in. I did not favor the individual income tax cut taking effect until we first got the Federal budget moving toward the black.

I do not think Congress can act prior to this October 1. But I do think we can and should act now to insure that President Reagan's economic predictions come true in 1983 and 1984. I propose that the individual income tax cuts be "im-

pounded" unless and until we get to the President's deficit figures of \$42.5 billion for fiscal year 1982, and \$22.9 billion or less in the ensuing year. In other words, we can have those individual tax cuts if the economic premise upon which they were enacted comes true.

This approach will insure that we do not have huge deficits caused by stimulative individual tax cuts. The business side tax cuts would remain in place.

In addition, I propose that we immediately repeal the ill-considered and hastily enacted provision indexing the income tax, which, if it stays on the books and is allowed to take effect in 1985, will only throw us right back into

Once we get the budget balanced, we can work together to cut down the size of the Government and get the tax cuts we all want. What we are doing now, in reality, is increasing the size of the Government, because these high-interest rates are not only destroying the individual businessman, they are destroying the ability of the Government to control

Mr. President, I ask unanimous consent that documents be printed in the Record showing a draft bill specifying what is intended by the Senator from South Carolina.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

DRAFT BILL

Sec. 1. Section 104 of P.L. 97-34 is hereby repealed.

Sec. 2. Notwithstanding the provisions of section 101 of Public Law 97-34, the provisions of that law which provide for individual tax rate cuts beginning in calendar year 1982 shall not be effective until the President has certified, and notified the Congress, that the deficit for fiscal year 1982 is \$12.5 billion or less, and that the deficit for fiscal year 1983, assuming that the rate cuts for 1982 take effect, is projected to be \$22.9 billion or less, in which case these rate cuts shall be effective on October 1, 1982;

And, in addition, the provisions of section 101 of Public Law 97-34 which provide for individual tax rate cuts beginning in calendar year 1983 shall not be effective until the President has certified, and notified the Congress, that the deficit for fiscal year 1983 is \$22.9 billion or less, and that the deficit for fiscal year 1984, assuming that the rate cuts for 1983 take effect, is projected to be zero or a budget surplus in which case those rate cuts shall be effective on October 1, 1983.

Mr. HOLLINGS. Mr. President, this spring, the President told the country how to get itself out of our economic mess. The President asked Congress to enact massive budget cuts and to pass a large tax cut. He promised that this combination would restore the country's economic vitality and bring us to the promised land of the balanced budget by fiscal year 1984.

Well, we did just what the President asked. We gave him the largest budget cuts in history. We gave him the Reagan-Kemp-Roth tax cut. The President then left town in a blaze of glory, having achieved his economic program and confident that it would succeed. A lot of Senators in this Chamber also left town feeling pleased with themselves, as well, for enacting the administration's program.

But not all of us were taken in by the new economic rhetoric. And now, our fears are proving to be true. Just 1 short month after passing all of the administration's economic program, those promises of an invigorated economy ring hollow. The stock market has dropped out. The prime interest rate remains above 20 percent and the 90 Treasury bills draw nearly 17-percent interest.

But the most discouraging news is that the Federal budget deficit is not shrinking, as the President promised it wouldin fact, it is growing at an alarming rate. Rather than the \$42.5 billion deficit pre-dicted surely by the administration as late as just a few weeks ago, we are now looking squarely in the face of a 1982 deficit of as much as \$65 billion. And it gets worse, not better, as we were promised, in the outyears—as much as \$70 billion in 1983 and \$80 billion or more in 1984. No wonder Wall Street is not convinced. No wonder the market has dropped 100 points since August. The President's economic program is not working-and while some of us have known all along that it would not work. all of us should have known.

The administration is now working on a second budget cut list for the 1982 budget which could total as much as \$20 billion. There is a lot of talk about giving the President the authority to impound 10 percent of all appropriated funds for 1982—just temporary authority, they say.

But we do not have just a 1982 problem, Mr. President. The problem is not tem-

It is a much deeper problem, and one that some additional budget cuts or temporary impoundment authority will not cure.

In order to get the Government into the black and restore confidence in the financial markets we need a four-point program that will:

First, make the budget cuts which were assumed in the first budget resolution; Second, use the Presidential veto to force revisions in appropriation bills:

force revisions in appropriation bills;
Third, "impound" the personal tax
cut: and

Fourth, repeal the tax indexing provision.

Mr. President, it is clear that we must enact the additional budget cuts which were assumed in the budget resolution. These can and should be made. But by themselves, they are insufficient to restore investors' confidence that the budget will be balanced any time soon. To do that we must "impound" the personal tax cut portion of the President's tax cut until the administration's deficit projections for fiscal years 1982 and 1983 are a reality.

This would allow the 10-percent personal tax cut in 1983 if the budget deficit for 1982 was \$42.5 billion, as forecast by the administration. It would also allow the additional 10-percent cut in 1984 if the administration reaches its target deficit of \$23 billion in 1983.

We must also repeal the indexing of the personal tax rates that was enacted last month without any hearings at all. It is too massive a change to have received such little serious consideration. Finally, the proposals to give the President additional impoundment authority should be rejected. Simply put, they will not work

Mr. President, with this program we can get the Government into the black with a credible program. It will restore the confidence of investors and provide

for a true economic recovery.

Mr. BAKER. Mr. President, in just a moment, I intend to yield to the Senator from Pennsylvania. Before I do, let me express my deep appreciation to the Senator from South Carolina for his views and statement of position. There are few Members of this body for whom I have greater respect and admiration than I do for the distinguished former chairman of the Budget Committee, the junior Senator from South Carolina. He makes a unique and special contribution to this body in so many ways.

I must say, however, Mr. President, that even though I find his proposal unique—that is, to impound the tax cut—I disagree. For I still feel that America is overtaxed, it is overburdened by regulation, that we spend too much, that we regulate too much, that it is having a stultifying effect on the economy of this Nation. The only way we shall change it or have a permanent solution is to reduce both the level of taxation and the level of Federal expenditures.

Mr. President, the Senate has done a remarkable thing; the Congress has done a remarkable thing; the administration has done a remarkable thing, even an historic thing, in reducing the rate of growth of the Federal Government. That is all we did. We did not reduce the Federal Government, we reduced the rate of growth of the Federal Government in the past 6 months. We did an extraordinary thing in making fundamental changes in the nature of the tax burden of private business and American citizens.

I find it absolutely appalling, Mr. President, that the reaction in the money markets of this country, among our financial institutions, among investment bankers of this Nation, has been, as the Senator from South Carolina says, to vote with their money, vote with their industries. They are voting the wrong way and they are voting themselves right down a hole.

The program has not even started yet. The tax cuts have not even taken effect yet. The budget is also not in effect yet. And yet it is alleged to be a failure based on the early returns from the financial markets and the banking community.

All I can say, Mr. President, is that if that is the judgment of the banking community, it ought to reexamine the issue, because Congress and the Government cannot pull this load all by itself. There is another oar out there. There is another oar and that belongs to the business and financial community of this Nation.

Mr. President, I hope and expect that we shall see a favorable reaction to the President's program and I believe we will. In the meantime, Mr. President, it is time to give it a fair shake. For the moment, I sincerely hope that we do not decide, 6 months or 6 years from now.

that interest rates are high because the financial community is hooked on high interest rates just like a person can get hooked on something else. I am saying now that those rates have to come down. I am saying that interest rates are a cause of inflation. I am saying they are doing drastic damage to the economy of this Nation, to individual citizens, and to the Government of the United States; and that we need now an input and a contribution from the business community on how to get those rates down, and now to me does not mean months and years in the future.

I am talking about days and weeks from now. We will have to have some cooperation. Congress and the administration cannot carry this whole burden.

Mr. President, I have just been handed a note that is more distressing than anything else we have discussed this morning. I have a note from my wife saying that I ran off with the car keys this morning. [Laughter.]

With my apologies to my wife, I do not have the car keys.

UNANIMOUS-CONSENT AGREEMENT, S. 951, DEPARTMENT OF JUSTICE AUTHORIZATIONS

Mr. BAKER. Mr. President, earlier today, I mentioned that there are two unanimous-consent requests, perhaps three, that I hope we can deal with today with respect to scheduling.

I inquire of the minority leader: Can we proceed now to consider a time certain to vote on the cloture motion on the appropriations bill and the Johnston amendment thereto and schedule the military pay bill?

Mr. ROBERT C. BYRD. I am ready to proceed.

Mr. BAKER. I thank the Senator. First, Mr. President, I ask unanimous consent that the cloture vote scheduled to occur tomorrow on Amendment No. 96 to S. 951 take place at 2 p.m., the provisions of rule XXII to the contrary notwithstanding.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME AGREEMENT—S. 1181, MILI-TARY PAY BILL

Mr. BAKER. Mr. President, I ask unanimous consent that on Thursday, September 10, no later than 10:30 a.m., the Senate proceed to the consideration of Calendar No. 190, S. 1181, the military pay bill, under the following time agreement:

Two hours on the bill, equally divided, between Senators Jepsen and Exon.

Thirty minutes, equally divided, on all amendments in the first degree, with the exception of the Matsunaga-Hatfield amendment dealing with comparability pay raise for entry level military personnel, in which there is a 3-hour time agreement, equally divided.

Ten minutes, equally divided, on all second-degree amendments, debatable motions, appeals, or points of order, if so submitted to the Senate.

That the agreement be in the usual form, with the proviso that the Matsu-

naga-Hatfield amendment be considered at 9:30 a.m. on Friday, and that amendment be the only amendment in order on Friday; and following disposition of the Matsunaga amendment, a vote occur immediately, without any other amendments, intervening motions, appeals, or points of order, on final passage of S. 1181. the miltary pay bill.

1181, the miltary pay bill.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I inquire of the majority leader what would be the plan, in view of the fact that his unanimous-consent request provides that on Thursday, no later than 10:30 a.m., the Senate would return to the consideration of the military pay bill—what would be the plan in the event cloture is invoked on the Johnston amendment on tomorrow and in the event that amendment is not disposed of by 10:30 a.m. on Thursday?

Mr. BAKER. Mr. President, I make this parliamentary inquiry: In the event the situation described by the minority leader should transpire—that is to say, cloture is invoked on the Johnston amendment at 2 o'clock tomorrow and debate on that amendment under the provisions of rule XXII has not been concluded by 9:30 a.m. on Friday—what would be the business before the Senate at 9:30 a.m. on Friday, assuming that this unanimous-consent request is agreed to?

The PRESIDING OFFICER. At 9:30, the amendment of the Senator from Hawaii and the Senator from Oregon would recur, pursuant to the unanimous-consent order, if granted.

Mr. BAKER. I am not sure I understand the Chair. Do I correctly understand the Chair to say that if this agreement is granted and assuming that cloture is invoked on the Johnston amendment, and assuming that debate on the Johnston amendment, pursuant to the provisions of rule XXII dealing with post-cloture debate, has not expired, the Matsunaga-Hatfield amendment will be pending? It is my understanding that under rule XXII, the Johnston amendment would still be the pending business, having displaced any other business before the Senate, under the provisions of that rule.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. So, at 9:30 on Friday, notwithstanding this agreement, if it is granted, the Johnston amendment would be the pending business?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Under the conditions I have described.

The PRESIDING OFFICER. That is correct.

Mr. BAKER. I thank the Chair.

Mr. ROBERT C. BYRD. So what the Chair is saying—I ask the Chair—is that if cloture is invoked on the Johnston amendment, then the provisions of rule XXII would prevail and would supervene the provisions of the unanimous-consent agreement.

The PRESIDING OFFICER. Unless the agreement specifies to the contrary.

Mr. ROBERT C. BYRD, I thank the Chair.

Mr. BAKER. Mr. President, I inquire of the minority leader: I would be willing to put the agreement in that form. I had assumed that that would not be the preference of the minority, but I would be glad to do it either way.

Mr. ROBERT C. BYRD. I say to the distinguished majority leader that I have to assume that Mr. Johnston, in agreeing to the request, would be agreeing on the condition that if cloture is invoked and if indeed the Johnston amendment is not disposed of by 9:30 a.m. on Friday-I would assume that he agreed on the condition that the Senate would continue to proceed with the Johnston amendment until it is disposed of, notwithstanding the unanimous-consent agreement.

Mr. BAKER. Mr. President, I propound a further parliamentary inquiry: Assuming the set of circumstances that have been discussed—that is to say, assuming that cloture is invoked on the Johnston amendment and that debate has not been concluded at 9:30 on Friday, and that the Senate is still considering the Johnston amendment under the provisions of rule XXII—after the Johnston amendment is disposed of, would the Matsunaga-Hatfield amendment then recur as the pending business, under this agreement?

The PRESIDING OFFICER. The Sen-

ator is correct.

Mr. BAKER. Mr. President, I inquire of the minority leader one other step: Would he object to an addition to this request to provide that no motion be in order to send S. 1181, the military pay bill, back to the calendar?

Mr. ROBERT C. BYRD. I would agree to that additional provision, with the understanding that upon the disposition of the military pay bill, the Justice Department appropriation bill, the unfinished business, would again be the business before the Senate.

Mr. BAKER. Mr. President. I believe that would automatically be the case, but I include it in the request. as an

amendment to the request.

The PRESIDING OFFICER. Is there objection to the request? The Chair hears none, and it is so ordered.

The text of the agreement follows: Ordered, That on Thursday, September 10, 1981, at no later than 10:30 a.m., the Senate proceed to the consideration of S. 1181 (Order No. 190), a bill to amend titles 10 and 37, United States Code, to increase the pay and allowances and benefits of members of the uniformed services and certain dependents, and for other purposes, with debate on any amendment in the first degree to be limited to 30 minutes (except on a Matsunaga-Hatfield amendment dealing with a parability pay raise for entry level military personnel, on which there shall be 3 hours), to be equally divided and controlled by the mover of such and the manager of the bill, and with debate on any second degree amendment, debatable motion, appeals, or points of order which are submitted or on which the Chair entertains debate to be limited to 10 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: Provided, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: Provided further, That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 2 hours, to be equally divided and controlled, respectively, by the Senator from Iowa (Mr. Jepsen) and the Senator from Nebraska (Mr. Exon): Provided, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

Ordered further, That at 9:30 a.m. on Friday, September 11, 1981 the Senate proceed to the consideration of the Matsunaga-Hatfield amendment, and that that amendment

be the only one in order.
Ordered further, That following the disposition of the Matsunaga-Hatfield amendment, the Senate proceed, without intervening amendment, motion, appeal, or point of order, to vote on final passage of S. 1181. Ordered further, That no call for the regu-

lar order shall bring back the unfinished

business before the Senate.

Ordered further, That following the disposition of S. 1181, the Senate resume consideration of S. 951 (Order No. 118).

Mr. BAKER. I also make this inquiry of the minority leader: Is there some possibility that later in the day, we may be able to arrange, by unanimous consent, for the consideration of the Interior appropriation bill?

Mr. ROBERT C. BYRD. I do not believe so. I will be happy to explain to the distinguished majority leader what the

Mr. BAKER. I thank the distinguished minority leader. Perhaps we can discuss that a little later.

Mr. President, I have no further need for any time I have remaining under the standing and special orders as previously provided for. I am prepared to yield back my time. I shall yield to the Senator from Pennsylvania, but before I do that, I wish to provide for the convening hour on Thursday and Friday.

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW AND 9 A.M. FRIDAY, SEPTEMBER 11, 1981

Mr. BAKER. Mr. President, at this time I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10 a.m. on tomorrow and that when the Senate completes its business on tomorrow that it stand in recess until the hour of 9 a.m. on Friday.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I do so merely to ask a question of the distin-

guished majority leader. Does the majority leader intend to

have a Senate session on Saturday? Mr. BAKER. I do not intend to have a session of the Senate on Saturday this

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I yield to the Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I thank the distinguished majority leader.

PROPOSED SALE OF AIRCRAFT TO SAUDI ARABIA

Mr. SPECTER. Mr. President, I speak today to urge the President to abandon the proposed sale of F-15 enhancement and E-3A airborne warning and control system (AWACS) aircraft to Saudi Arabia.

I believe that the best interests of the United States will be served by abandoning that sale on the merits, and by avoiding a confrontation between the President and the Congress on that issue. The U.S. Senate is well-known as a "deliberative body." Similarly, on an individual basis, U.S. Senators are known for their individual deliberation. By letter dated June 24, 1981, 54 Senators wrote to the President urging him not to proceed with the sales proposal because it "is not in the best interest of the United States."

I believe that those U.S. Senators will stand by their stated position as will the 246 Members of the House who have sponsored a resolution of disapproval.

On August 24, 1981, I received official notice from the President of his intention to proceed with the proposed sale. Two days later, on August 26, 1981, I wrote to the President urging him to withdraw the proposal, with copies of that letter to Secretary of State Alexander Haig, assistant to the President for national security affairs Richard V. Allen and assistant to the President for legislative affairs Max L. Friedersdorf. As of today, I have had no reply.

I strongly believe that it is contrary to the interests of the United States to have a protracted confrontation between the President and Congress over this issue which, as I see it, the President will lose. That confrontation will weaken our Nation in its Mideast policy as well as in international relations generally, it will, in addition, be detrimental to unity within the Republican Party and to the im-

portant priorities which the President has established for domestic action. My letter of August 26, 1981, to the President detailed my concerns as follows:

AUGUST 26, 1981.

The PRESIDENT,

The White House, Washington, D.C.

DEAR MR. PRESIDENT: I respectfully urge you not to proceed with the proposed sale of the enhancement package, including the Airborne Warning and Control System (AWACS) aircraft, to the Royal Saudi Air

After considerable study, it is my view that this sale would be contrary to the best in-terests of U.S. foreign policy, and the pro-posed sale would subject your Administra-tion to a significant risk of Congressional

I was among many in the Senate who supported your Economic Recovery Program even though we had significant reservations. supported your program because I felt it was very important to back your leadership notwithstanding significant problems with the budget cuts for my state, Pennsylvania, and my stated preference for tax cuts on a year-to-year time basis to measure their effects on inflation and economic recovery.

On the issue of AWACS and the F-15 enhancement equipment, it is my view that

many of your supporters, enough to make up a majority of the Congress, will not be able to support your position. I joined 53 other Senators in writing to you on June 24, 1981, urging that you not proceed with such a proposed sale to Saudi Arabia in the hope that this issue would not be brought to a vote

While I join many others in the Senate and House in according great weight to your leadership, I strongly disagree with this proposed sale both on the merits and on my concern that a potential loss on this issue by your Administration would have significant, collateral, undesirable consequences. The prospect of a divisive Senate battle over the issue can only damage Congressional/ Executive relations, Republican Party unity, and hopes for a strengthened U.S. presence in a secure and stable Middle East

While I understand the need to contain Soviet expansionism and secure the Saudi oil fields. I fear that the proposed sale will create more long-run problems than may be resolved in the short term by acceding to this request. Rather than enhance Saudi Arabian security, the sale of such sophisticated equipment may well increase Saudi political instability and the risks of Saudi involvement in regional conflicts. It is clear that, once the AWACS planes are given over to Saudi Arabia, the United States would have little control over them, including their use against Israel, thus altering the military balance in that region.

While no one can predict Saudi Arabia's future political stability, sufficient doubts have legitimately been raised about that issue to fear the compromise of one of America's most sophisticated aircraft once it falls into Saudi hands, notwithstanding the most elaborate security precautions.

I am also deeply troubled by the long-range implications on the pledge made to the Congress in 1978 not to sell F-15 enhancement equipment to Saudi Arabia. If such pledges are subject to modification or cancellation on the contention of changing circumstances, how can the Congress ever agree to a proposal, conditioned on such a pledge?

Almost all the objectives outlined to justify the sale of AWACS could be met by leaving the planes in U.S. hands. The true test of the United States as a reliable ally is in our ability to be honest with our friends about their real military needs. not by agreeing to a request of questionable military necessity and uncertain political ramifications. When our Nation's reliability as an ally is tested in international relations. it is my view that we fall far short in subjecting Israel to the risks proposed by these powerful weapons in the context of repeated hostility by Saudi Arabia towards Israel.

I am taking liberty of sending copies of this letter to Secretary of State Haig, Assistant to the President for National Security Affairs Allen and Assistant to the President for Legislative Affairs Freidersdorf so that they will also know the depth of my feeling on this subject.
With best wishes,

Sincerely.

ARLEN SPECTER.

In summary, Mr. President, it is my view that supplying the most advanced arms to all sides in the Arab/Israeli conflict is certainly no answer to the tensions and instabilities in the region. Assisting one friend to the serious detriment of another is no answer to the charges of U.S. inconstancy toward its allies. Violating a prior Executive pledge to the Congress is no answer to congressional/Executive harmony and trust in the conduct of U.S. foreign relations. Endangering the technological superiority of advanced U.S. missiles and aircraft

is no answer to strengthening America's military posture toward the Soviet Union. Acceding to every questionable military request of a friendly nation is no answer to being a true and constant friend of that nation.

I, and a majority of other Senators, had sincerely hoped that these would not be the answers given by this administration to questions surrounding the U.S. role in the Middle East. I had sincerely hoped, and still hold the hope, that a congressional/Executive confrontation on this issue can be avoided.

I thank you very much, Mr. President, and I yield the floor.

Mr. BAKER. Mr. President, I yield now to the distinguished Senator from Colo-

Mr. ARMSTRONG. Mr. President, I appreciate the majority leader yielding.
The PRESIDING OFFICER. The time of the leader has expired.

Mr. BAKER. Mr. President, is there provision for morning business?

The PRESIDING OFFICER. There is provision for 30 minutes of morning business

Mr. BAKER. Mr. President, I yield the

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business.

FEDERAL EXPENDITURE CONTROL ACT OF 1981

Mr. ARMSTRONG. Mr. President, I was extremely glad to learn from our distinguished majority leader that he and the Republican leader of the House have met with President Reagan and agreed to support legislation to strengthen the President's power to control Federal spending through the rescission process

The American people have given the President a mandate to get Federal spending under control. Obviously, we must do so in order to balance the budget and, thereby, to curb inflation which I believe all Senators and all Americans recognize as the most serious threat to this Nation's economy.

But while the President is determined to balance the budget, he lacks the basic tools needed to get that job done.

Our President presides over the largest budget in the world, an estimated \$660 billion in this fiscal year. Yet he has less management control over that budget than almost any other Chief Executive. The Governors of virtually all of our 50 States have the power to block wasteful, duplicative and unnecessary spending. but Congress has denied this essential management prerogative to our President.

Under present law, if the President discovers that funds appropriated by Congress for a particular purpose are no longer required, or are more than are required to achieve that purpose, he may not prevent the expenditure of the excess funds without obtaining explicit permission from Congress to do so.

The Congressional Budget and Im-

poundment Control Act of 1974 does protect the constitutional prerogative of Congress to have the first and the last word about the expenditure of public funds, but it does so in a needlessly

wasteful and extravagant way.

The trouble with the Impoundment Control Act is that the President's efforts to restrain wasteful spending can be thwarted simply by congressional inaction. If the President determines that funds appropriated for a particular purpose need not or should not be spent, he must inform Congress of his intention to rescind them. But if both Houses of Congress do not pass resolutions approving the rescission within 45 days of the President's announcement, then the funds must be released.

Unfortunately, all kinds of factors other than the merits of a proposed rescission can block action by both Houses of Congress before the 45-day period expires. Since 1974, Congress has approved fewer than 15 percent of the rescissions proposed by Presidents Nixon, Ford, and Carter. In most cases, the rescission request never even reached a vote.

The last fiscal year, fiscal year 1980, provides an all too typical case in point, In that year, a year of near record budget deficits and double-digit inflation. President Carter sent to Congress rescission requests totaling \$1.6 billion. Congress rejected by inaction \$1.1 billion of these rescission requests. Thus, out of a budget of \$579.6 billion, a scant \$500 million, 8 one-hundredths of 1 percent of the total, was saved through the decision of the President that the same results could be achieved with fewer dollars through better management.

Presidents used to have a very potent power to prevent wasteful spending, the power of impoundment. The history of Presidential impoundments shows clearly that this power was used in virtually every instance to achieve sound management objectives. The most common reason for impoundments was because changed circumstances rendered a particular expenditure unnecessary, as when President Jefferson blocked \$50.000 for gunboats on the Mississippi after the Louisiana Purchase had removed the threat the gunboats were supposed to guard against. Another frequent reason was to prevent waste, as when President Van Buren blocked payment of a duplicate pension to a military widow, and President Truman refused to spend money to build Veterans' Administration hospitals until a study had been made to determine the geographical need

But there were instances where the impoundment power was abused. President Lincoln, for instance, impounded funds for water projects in order to punish certain Illinois Congressmen who had opposed his administration on other policy matters.

The use by some Presidents of the impoundment power to punish recalcitrant legislators, or to alter policies enacted by Congress quickly irritated Congress, and raised a serious constitutional question as well. The Constitution makes it clear that Congress has the power to determine how public money should be

spent. But if the President impounded funds appropriated by Congress, Congress either would have to pass the appropriation again—in which case it would be subject to a second impoundment, or a veto—or take the President to court. This was, especially from the congressional point of view, most unsatisfactory.

The impoundment controversy came to a head in 1972 when President Nixon attempted to force Congress to adopt a block grant housing approach by imposing a moratorium on funding of the housing programs authorized by Congress. The President won the battle—an appeals court ruled against Congress lawsuit—but Congress, by enacting the Budget and Impoundment Control Act of 1974, won the war.

Most Americans would agree that some protection has to be found against the sporadic Presidential abuses of the impoundment power. But the congressional cure has proven far worse than the disease. Clearly, some middle ground must be found.

The answer to this dilemma is the Federal Expenditure Reform Control Act of 1981, a proposal (S. 384) which I introduced on February 3. If approved, my bill will allow the President essential flexibility in achieving needed savings without a return to the old abuses.

The Federal Expenditure Control Reform Act would make one simple but significant change in current policy. As before, the President would be required to notify Congress of his intent to rescind appropriated budget authority. Congress would then have 45 days in which to pass a resolution disapproving the rescission.

This basic change, to congressional veto from congressional approval, would alter the climate for Presidential action by requiring a positive, considered action by Congress in order to block proposed rescissions instead of killing needed rescissions by inaction—without even having a vote. The President would be allowed the managerial flexibility required for efficient government, but Congress would retain its constitutional prerogative to control the public pursestrings.

Mr. President, I ask unanimous consent to have printed in the RECORD the text of my bill S. 384.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

8. 384

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1011(3) of the Impoundment Control Act of 1974 is amended to read as follows:

"(3) 'rescission resolution' means a concurrent resolution of the Congress which disapproves, in whole or in part, the rescission of budget authority proposed in a special message transmitted by the President under section 1012, and upon which the Congress completes action before the end of the first period of 45 calendar days of continuous session of the Congress after the date on which the President's message is received by the

(b) Section 1012(b) of such Act is amended to read as follows:

"(b) REQUIREMENT TO MAKE AVAILABLE FOR OBLIGATION.—Any amount of budget authority or any part thereof proposed to be rescinded or that is to be reserved as set forth in such special message shall be made available for obligation if, within the prescribed 45-day period, the Congress adopts a rescission resolution disapproving the rescission or reservation of such amount or part thereof."

(c) (1) Section 1017(c) (5) of such Act is amended by striking out "bills and".
(2) Section 1017 of such Act is amended by striking out "bill or" each place it appears.

by striking out "bill or" each place it appears.
(3) Section 1017(c) of such Act is further amended by striking out "bill" each place it appears and inserting in lieu thereof "resolution".

Mr. ARMSTRONG. Mr. President, I yield the floor.

The PRESIDING OFFICER. Is there further morning business?

Mr. BAKER. Mr. President, suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the guorum call be rescinded.

The PRESIDING OFFICER (Mr. Nickles). Without objection, it is so ordered.

JOSEPH H. HIRSHHORN AND HIS MONUMENT

Mr. MOYNIHAN. I rise with the sad task to report to the Senate the death of Joseph H. Hirshhorn, one of the great public benefactors of his time. It has been my honor to have been a member of the board of trustees of the Hirshhorn Museum and Sculpture Garden from the establishment of that body under President Johnson. I have also, through that time. served as the chairman of the board. And it is thus both a responsibility in that sense and a privilege to ask that the Senate observe the passing of this singular American, with his singular bequest to the United States-and I can report this to the Senate, although not in greater detail-now greatly enhanced by the terms of his will that is to be probated and made more public in a short period.

Mr. President, when Joseph H. Hirshhorn died on August 31, at age 82, he left behind a museum which is more than a monument to his spirit—it is, as well, a national treasure he has bequeathed to us all.

Born in Latvia, the 12th of 13 children, Joe Hirshhorn settled in Brooklyn in 1915 with his widowed mother. He earned \$15 a week when he got his first Wall Street job—peddling newspapers—and it was not long before he accumulated \$255 in savings, which when invested, returned \$68,000 by the time he was 17. That sum was sufficient to launch his brilliant career in finance, first as a stockbroker, and then as the force behind investment projects which spanned the Americas from Wall Street to the Yukon.

Beyond his remarkable success in finance, he succeeded in assembling one of America's great art collections. He matched the drive and ingenuity he cultivated in the world of business to his profound fondness for that which was truly splendid in the world of art.

Mr. President, as chairman of the board of trustees of the Hirshhorn Museum and Sculpture Garden, I would wish to state our devastating sense of loss at the death of a beloved colleague and incomparable patron. Mr. Hirshhorn was, of course, an elderly man; but his energy, enthusiasm, yes even his eccentricities, were those of youth, middle years, and age combined, synthesized, yeah transcended. At out last board meeting he was as full of ideas and as bounteous with gifts as he was at our first meeting almost a decade ago.

The country and people Joe Hirshhorn served so well were enhanced by his presence and are now diminished by his death. His keen insight, sensitivity, and exuberance will be painfully missed, not only by his colleagues, friends, and family, but also by the millions of people whose lives he touched through his ideas and contributions. He had a vision. And he persisted even when all others opposed him. He lived to see his dream become his reality and it is we who are better for it. His memory is immortalized not only on the Mall, but in the hearts of a public enriched by his having lived.

Mr. President, it is well and good to mark the death of one who lived his life so well but better still to remember that the texture and fabric of that life is woven into the memory of all those who live on. William Faulkner once said that—

The aim of every artist is to arrest motion, which is life, by artificial means and hold it fixed so that a hundred years later, when a stranger looks at it, it moves again since it is life.

Because we all were blessed with Joseph Hirshhorn and because he worked so hard to hold fixed the art which moved through his life and ours, we can regard the legacy he has left this Nation and the memories he has left his friends as his greatest work of art for the generations to come.

Mr. President, I know my colleagues would wish to join in their most heartfeit expression of sympathy of Olga Hirshhorn and I would note that a memorial service for Joe will be held on September 16 at 11 a.m. at the Washington Hebrew Congregation.

I ask unanimous consent that the text of two articles from the Washington Post and New York Times of September 2, 1981 be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the Record, as follows:

[From the New York Times, Sept. 2, 1981] JOSEPH HIRSHHORN DIES; FINANCIER, ART PATRON

(By John Russell)

Joseph H. Hirshhorn, man of money, man of adventure, one of the shrewdest prospectors of gold, uranium and oil of his day and founder and benefactor of the museum in Washington that bears his name, died of a heart attack late Monday in Washington. He was 82 years old.

Mr. Hirshhorn collapsed about 11 p.m. as he and his wife were returning home after an evening at the theater. He was taken to George Washington University Hospital, where he was pronounced dead at 11:59 p.m.

Mr. Hirshhorn made a manifold mark on his time. As a broker and an inspired analyst of the market, he was in the highest class. Wall Street office boy at the age of 14, he is said to have made \$168,000 by the time he was 17 on an initial investment of \$250. An occasional setback notwithstanding, he went on to enjoy spectacular success in this do-main. He was also one of the few men who saw the stock market crash coming in 1929 and sold out just in time.

OUTSTANDING AS PROSPECTOR

He was no less outstanding as a prospector in gold, uranium and oil who had the instinct, the energy and the daring to venture successfully into areas where others had spent big money to no purpose. "My Name Is Opportunity and I Am Paging Canada" was the headline of the full-page advertisement that he put in The Toronto Northern Miner in 1933. "Canada, your day has come", he continued. "The world is at your feet, begging you to release your riches cramped in Mother Earth."

Not every Canadian liked that kind of talk, any more than they liked the way in which Mr. Hirshhorn played on his desk full of telephones the way a gypsy violinist plays on his fiddle. As for "the riches cramped in Mother Earth," they took a little time to

emerge.

But within three years of placing his ad, Mr. Hirshhorn triumphed with Preston East Dome Mines Ltd., a company formed early in this century and long given up for lost. Its shares had come to be so poorly regarded that their owners are said to have used them to make change in poker games. Mr. Hirsh-horn spent \$25,000 on a drilling program, struck gold within a few feet of an existing shaft, and lived to sell his remaining shares in 1956 at \$7.55 apiece.

TURNED TO URANIUM

In the late 1940's, Mr. Hirshhorn became interested in uranium. In particular, he studied the Algoma Basin. This was an area in Ontario in which many a false alarm had been sounded as to the existence of the element. It was much used by hunters and vacationers. The area fancied by Mr. Hirshhorn and his geological adviser, Franc R. Joubin, was close to both a major highway and the Canadian Pacific railroad track. When 50 out of 56 trial samples taken in that area turned out to contain uranium, it seemed impossible to keep the secret.

But Mr. Hirshhorn distracted his rivals by taking out mining licenses all over Ontario. When he sent in his own stakers he fixed it so that ever they did not know quite where they were. In all, he staked 1,400 claims over 56,000 acres. Two companies, Pronto Uranium Mines and Algoma Uranium Mines, were formed to exploit the claims, and in 1955 Time magazine reported that Algoma was capable of producing more uraalone nium than all of the more than 600 uranium mines in the United States put together.

For a man who liked to say that "Poverty has a bitter taste," Mr. Hirshhorn was doing splendidly. (He also did very well some years later in the oil boom in western Canada.) By any standards, he had made a great deal of money. Already in the 1930's he had built a house in the French Provincial style on a 470-acre estate in the Poconos. Its Guernsey herds, handball courts and extensive children's dormitories were much talked of. but Mr. Hirshhorn was not fundamentally a property man. He was an art man, and as he got older and was more and more able to afford it, he bought more and more art.

HIS LIFELONG LOVE

He had always loved art. In childhood, and in times of great poverty, illustrated calendars had given him dreams of a happier world. As a very young man he had begun to buy etchings, at least one of which he kept

by him all his life. By the early 1940's-a time at which committed and large-scale collectors of new art were very rare-he was beginning to buy fast and in bulk.

He bought from feeling, not from calcula-tion. Always sensitive to the sufferings of others-except perhaps when they were his rivals in business—he had a particular fond-ness for the work of Louis Eilshemius, the American painter whose long career of failure and sickness was one of the most poignant in the history of this country's art. He took to the Abstract Expressionists, whose style of life seemed to him to speak for an archetypal Bohemia. He was devoted to the British sculptor Henry Moore, who like himself was plain and direct in his ways. He felt close to Larry Rivers, who is the subject at this moment of a one-man show in the Hirshhorn Museum, because of his reckless,

euphoric, insubordinate stance before life. As his collection grew to be of institutional proportions, there was naturally much speculation as to where it would eventually go. Eccentric and lopsided as it might be in some of its aspects, it had strengths that would have made it welcome in almost any big city in the Western world. Mr. Hirshhorn was doubtless aware of this, but he refused

to make any commitment.

The situation was one that he was entitled to enjoy, in that in earlier years he had not always been welcome in the communities he chose to settle in. Now, in his 60's, people of consequence from many countries were beating a path to his door. Britain, Israel, Switzerland-all were believed to be after the collection. So was more than one American city.

Mr. Hirshhorn loved to tell how he made

up his mind that Washington was the right place. "When I went into the White House," he would say, "there was that great big Lyndon Johnson, six feet and some, and there was tiny little Joe Hirshhorn. He came up to me, he put his arm round my shoulder and he said to me 'Joe, how are you?' And I knew we were in business."

That was in 1965. By the terms of the deal that resulted, the United States Government was to build and maintain a new museum on the Mall that would bear the donor's name. Mr. Hirshhorn gave his collectionof the largest private collections of sculpture and paintings in the world—and it was understood that further gifts would follow. He also contributed a million dollars toward the fulfillment of the project.

Gordon Bunshaft of Skidmore, Owings & Merrill was appointed architect. Ground was broken, with President and donor once more side by side. Not everyone was in favor of the undertaking, and Dr. Sherman Lee, director of the Cleveland Museum, went on record as saying that the acceptance of the project "ill accords with the current standards of wisdom and professional knowledge in the arts." Not everyone liked Mr. Bunshaft's building either, though it cannot be said to disgrace a particularly hideous stretch of the Mall.

OPENED IN OCTOBER 1974

The Joseph H. Hirshhorn Museum and Sculpture Garden was opened in October 1974. After the initial flurry of excitement-not all of it good-natured-it settled down as a miscellaneous museum of American and European art. It had not the cool, rational, carefully argued character of museums of modern art elsewhere. No learned committees had argued the toss as to this acquisition or that. What the visitor saw, and what he sees today, is what Joseph Hirsh-horn had bought in hot blood.

This is my money and my taste," he once said, discussing his art purchases. "I've operated that way all my life—in my life and my business. I like to test my own judgment. I don't care if my grandfather or my friends like it."

Necessarily, therefore, it was strong in some directions and weak in others. As Hil-

ton Kramer, art critic of The New York Times observed in 1974, the collection turned out to constitute "a substantial treasury of sculptural achievement" that ran from Daumier, Degas and Rodin in 19th-century France to David Smith and his successors in this country and in our own day. It was also strong in the paintings of Thomas Eakins, in early American modernism, and in one or two living painters for whom Mr. Hirshhorn had a special liking. But there were areas in which a sharper focus and a keener sense of what is and what is not a masterpiece would have helped.

GAVE POWER TO CURATORS

With wise and exceptional modesty, Mr. Hirshhorn decreed from the start that any work from the collection could be sold or exchanged, if the museum's curators judged it to be of inferior quality, provided the money was spent on further purchases. The Hirshhorn Museum is not, therefore, a stagnant entity. It has also been able in its seven years' existence to mount or play host to a number of important temporary exhibitions, thereby contributing to the upturn of cultural activity in the nation's capital.

In human terms the opening of the Hirshhorn Museum in one of the most prestigious of all American locations must be seen as the culmination of an archetypal American life story. Joseph Herman Hirshhorn had come from nowhere and begun from nothing. Born in Mitau, Latvia, on Aug. 11, 1899, he was the 12th of 13 children of a merchant, Lazaar Hirshhorn, and his wife, Amelia. His father died when Joseph was quite young.

When Joseph was 6 years old, his mother brought him to the United States. They set-tled in the Williamsburg section of Brooklyn, where she worked in a purse factory, 12 hours a day and six days a week, for a salary of \$12 a week. In 1908 the tenement building in which they lived was gutted by fire, his mother was taken to the hospital and the family was dispersed to various homes in the neighborhood.

TRIGGER FOR AMBITION

The boy determined to get out of the environment in which such things were com-monplace, and a first glimpse in 1913 of what later became the New York Stock Exchange convinced him that this was a world in which he could do well. Never was a man

more correct in that particular presumption.

Mr. Hirshhorn had an uninhibited enjoyment of his every activity. Though famously small, he had an outsize personality. With his dancer's walk, his command of verbal karate and his unfeigned interest in everyone who crossed his path, he soon came to dominate the company in whatever room he found himself. He was also—and with all possible discretion—both generous and imaginative in his help to artists of every kind.

Since 1964 he had been married to the former Olga Zatorsky, whose character and interests ideally complemented his own. They had recently moved to Washington after having lived for some years in Green-

wich, Conn.
Mr. Hirshhorn's three previous marriages ended in divorce. He had four children, Robin, Gene, Gordon and Naomi by his first wife, Jennie Berman. During his subsequent marriage to Lily Harmon he adopted two daughters, Amy and Joann. His third wife Brenda Hawley Heide. He had many grandchildren.

The funeral service will take place at 2 M. tomorrow at Temple Shalom in

[From the Washington Post, Sept. 1, 1981] JOSEPH HIRSHHORN DIES AT 82; ART COLLECTOR, PHILANTHROPIST

(By Martin Weil)

Joseph Hirshhorn, 82, the immigrant, selfmade uranium tycoon and art collector who donated \$50 million in paintings and sculpture to establish the museum on the Mall named for him, died last night after suffering a heart attack at his Northwest Washington home.

The intensely dynamic 5-foot-4-inch entrepreneur and art patron collapsed about 11 p.m. as he and his wife were returning to their home on Bancroft Place after an evening out. He was taken to George Washington University Hospital where he died at one minute before midnight.

Born in Latvia the 12th of 13 children, Mr. Hirshhorn came to America with his widowed mother when he was 6, settled in an immigrant section of Brooklyn, and surmounted a dismal boyhood and grinding poverty to make a great fortune, rub elbows with the educated and cultured and see a museum named for him dedicated by a president of the United

The immigrant who once "stayed alive on garbage" became one of those whose lives, or at least whose legend, embodied and even outstripped the American promise of unbounded opportunity and unrestricted wealth for a man of energy, intelligence and ambition.

Dropping out of school at the age of 12, Mr. Hirshhorn started out by selling newspapers, moved to Wall Street, made his first million before he was 30 and finally, through shrewd and secret maneuver, acquired vast and fabulously valuable Canadian uranium

Meanwhile, much of his growing fortune was spent on the art collection that helped make the Hirshhorn Museum a dazzling success from the day it opened in 1974. By 1978, collection built on Mr. Hirshhorn's artistic and acquisitive instincts was drawing 1.5 million visitors a year to the gleaming circular building on the Mall, outstripping the Museum of Modern Art in New York to become the fourth most popular art museum in the United States.

Whatever the triumphs and satisfactions the success of the museum may have given Mr. Hirshhorn, they were not earned withfrustration and heartache

His insistence that the building be named after him was not viewed with universal admiration and approbation. Indeed, it produced a flood of protest.

Mr. Hirshhorn's curator, Abram Lerner, recalled telling Mr. Hirshhorn; "Joe, it will go easier for you if you don't insist upon

"And he knew that." Lerner added. "But he said, 'Dammit, this was my life's work and I want my name on it.'"

As it turned out, he got his way, but the controversy was sufficiently bitter that for a time afterward, Mr. Hirshhorn was separated entirely from the museum and its activities. Finally, in December 1977, it was decided by the trustees that the man who had formed the museum's collection should become one of them.

Joseph H. Hirshhorn was born in Mitau, Latvia, on Aug. 11, 1899, and after the death of his merchant father, came with his family to the Williamsburg section of Brooklyn. where his mother worked in and Mr. Hirshhorn was expected from child-hood to fend for himself.

"Poverty has a bitter taste," Mr. Hirshhorn once told an interviewer. "I swore I would never know it again."

Those who searched his childbood for signs of the man he would become noted that at least one element of relief in the harsh landscape of his boyhood was provided by the annual Christmas cift calendars sent out by the Prudential Life Insurance Co.

Above his bed, Mr. Hirshhorn pinned their reproductions of animal paintings by Sir Edwin Landseer and of ladies of high fashion by Adolphe Bouguereau. These were his first introduction to the graphic arts.

Meanwhile, Mr. Hirshhorn's introduction economic reality took him from selling

newspapers to a job as an office boy on the Curb Market, later to become the American Stock Exchange. With \$255 saved from a job charting stocks, he established himself in his teens as a broker, making \$168,000 in his first year.

Two months before the great crash of 1929. having amassed \$4 million, Mr. Hirshhorn suddenly pulled out of the stock market, demonstrating either luck, wisdom or some combination of the two that he appeared never to lack thereafter.

Canada became his next arena of financial maneuver. "My Name is Opportunity and I am Paging Canada," read the grandiloquent advertisement he placed in a Toronto mining newspaper in 1933. Three years later, having obtained substantial holdings in what appeared to be unrewarding mines, he found gold within a few yards of an old shaft.

In the late 1940s, after the dawn of the nuclear age, Mr. Hirshhorn became interested in uranium. His financial support of the unconventional theories of one Canadian geologist led to successful drilling tests and prompted an elaborate stratagem to stake

claims quietly before news could leak out.

According to art critic Aline Saarinen's book, "The Proud Possessors," "Scores of mining licenses were taken out in deceptively scattered points; fishing and hunting licenses were obtained to allay . . . suspicions . . . ; dozens of stakers in pontoon planes were dispatched to unidentifiable parts of the land to follow the siren tick of Geiger counters.

By July of 1953, Mr. Hirshhorn had acquired 1,400 claims covering 56,000 acres; one of his mines was said to be capable of producing more uranium than all of the mines in the United States. Three years later, Mr. Hirshhhorn obtained \$50,000,000, mostly in stock for his Canadian properties, and in 1960 he sold his uranium interests and began reducing his business involvements.

Active and decisive in business, where he was known as a hunter of bargains, he showed similar traits as a collector, stunning dealers with the speed and size of his purchases. Repeatedly he was quoted as playing variations on one basic theme: "Why don't you throw this one in for the same price?'

Early in his career he bought on a dealer's advice and regretted it. Thereafter he relied on his own taste. "It's got to get me here," he would say as he thumped his chest.

To a dealer who advised on the investment value of paintings he retorted: "Don't tell me how to make money. I don't collect art to make money. I do it because I love art.'

Although some suspected that much may have been hidden behind the personality the world was shown, Mr. Hirshhorn seemed all energy, instinct and confidence. Art critics described his "feel" for art as almost infalli-ble. One said "he actually feels a moral obligation to understand what he buys.

His years of art buying culminated on that clear cold January day in 1969 when Mr. Hirshhorn stood next to President Lyndon Johnson at the groundbreaking for his museum and said: "It was an honor to give my art collection to the people of the United States." Five years later, when the museum finally opened, he said "I repeat, it was an honor for me to give my art collection to the people of the United States."

AN ACT OF CYNICISM

Mr. MOYNIHAN. Finally, Mr. President, with no pleasure but with a sense of responsibility, I ask unanimous con-sent that there be included in the Rec-ORD today the lead editorial of the Washington Post, the editorial entitled "An Act of Cynicism." which directs itself to the plan announced by the Secretary of Health and Human Services to insure that no family receiving welfare benefits in the United States have personal possessions in excess of a value of \$1,000.

There being no objection, the egitorial was ordered to be printed in the RECORD. as follows:

AN ACT OF CYNICISM

Two thousand dollars worth of possessions not counting your living quarters, essential household goods and car, if you have one, does not exactly represent a royal patrimony. You could maybe have a couple of real luxury items for that or an accumulation (though not a very large one) of things that could be given up without doing harm your health, safety or sanity. But basically \$2,000 doesn't buy an awful lot of anything these days. Still, to the self-denying, spartanliving members of the U.S. Congress and the Reagan administration it seems a rich and princely sum indeed, far too rich and princely for a welfare family-yecch! a welfare family-to possess. So it is that the government in its wisdom has decided to reduce from \$2,000 to \$1,000 the worth of personal property outside the necessities that a person may have and still qualify for welfare.

A lot of the trimming back on domestic social programs that has occurred over the past several months has been warranted. Some of it has been questionable. particular initiative, however, taking place as it has in the Age of the Senate Steam Room and under the Sign of Harper's Bazaar, is disgusting. We suppose that if you persist in viewing all welfare recipients as variations on the spectacular cheaters and "welfare queens" who are periodically uncovered, it makes sense. But if you believe that welfare recipients are something other than a class of criminals and subhumans who need to be punished, believe that they are in fact much like what we otherwise describe as "people"—people who would like to keep their families together and to enjoy a dignified, productive relationship to society you will see this punitive, degrading act for what it is.

The economics of the effort are a joke. What is the merit of a one-shot gain that comes from disposing of those assets a welfare recipient has in excess of \$1,000 in value, when the present limit is \$2,000? What is the effect to be on those numerous people who go on and off welfare as their job opportunities and fortunes change with the changing economic times? If you want help for a few months, you'd better sell off that second thousand dollars worth of inessential goods. Are we not trying to strengthen the stability and self-confidence of the people who are on welfare, to enlarge and protect the stake they feel they have in the society as a whole-to bring them into the normal middle-class economic order in which most of us live? Do you do this by ensuring that anyacquired beyond \$1,000 have thev worth must be sold off before they get help?

The Congress that was so solicitous of inherited wealth, making sure this summer that the estate tax laws would be revised so to ensure that family acquisitions could passed on from one generation to another, seems not to have any idea at all that a few permanently held, valuable possessions might have a beneficial effect on a welfare family far in excess of any good to be had by making it sell these things. The Congress that went to such lengths to guarantee that the independent oilmen should have the greatest capital gains blessings the government could provide them is worried that a welfare recipient might have, at \$2,000 worth, just too darn many assets. It sounds as though they really just want to make sure that these people never get any sense, how-ever dim, that things for them, materially, can get better. It is bad economics and wretched social policy. Our guess is that they

know it too, that we are dealing here not with mindlessness, but with sheer cynicism.

Mr. MOYNIHAN. The inappropriateness of this clearly punitive and mean measure at a time of Government which has certainly not been reluctant to bestow upon persons high income and great expectations through inheritance benefits of an unprecedented kind, now to conclude that the Nation commence a search of the homes of the poorest and most dependent of our children, with a thought of evaluation made in some mode for dresses, chairs, table cloths, crockery, chairs, window shades, lamp shades, light bulbs, extension cords, blankets, baby bottles, teething rings, diaper pails, clothes pins, Oxydol, Clorox, cough medicine, aspirin-a very close accounting of just how much cotton and wool, how many safety pins, how many Sunday dresses, if any, how many hats, warm clothes for winter, boots—I am trying to think of the paraphernalia of children-I suppose dolls, I suppose stuffed dogs, if any, Mickey Mouse caricatures, black boards and chalk on which drawings might be made and letters learned, notepads, crayons, butcher paper on which drawings are made.

All these would be assessed by the U.S. Government for fear that their total value might reach \$1 over \$1,000 in which event I suppose it is the crayons that would be confiscated, or perhaps the diaper pail or window shades or the lamp shades-heaven forbid that we find a rug on the floor or a picture on the wall much less, as Philip Murray might have said, some means of music in the home—at a time when we have apparently exempted from taxation vast increases in awards of unearned income from property, we engage in the nation-wide search of the homes of the poor and we do this in the name of economy.

Mr. President, over the month of August visiting in my home State, on one occasion I was presented as a gift a wonderful new volume of students of Samuel Jackson who extracted from his original dictionary definitions that are of quite interest and present attractions of elegant citations, references. I happened to be reading through the section under the letter "L" and there was a simple definition when I came to the word "liberal," a word much poisoned, one fears, in the premises of late. No one seems to be dared to be thought that. Progressive is what one should be known

I thought Samuel Jackson's definition of the word "liberal" was eloquent and succinct and not without reference to this measure. "Liberal," said that definition, "not mean."

That is a judgment I think all Members of this body would wish to have made of them, no matter what their particular politics. Certainly, it is not generous to set about a nationwide search of the houses of the dependent poor to see if by any circumstance their possessions are such as would add up to the amount that any number of persons in this city would spend for dinner and an evening in the theater for several persons.

I would hope that the Secretary, our respected Secretary, a well-regarded former Member of this body, would think twice before pursuing this matter. That there can be abuses of any program, yes. But, surely, the reality for the greater part is otherwise.

What are we saying about ourselves, about our trust in one another, if we proceed to this unworthy enterprise?

Mr. President, I thank the Chair for his courtesies.

The PRESIDING OFFICER. Is there further morning business?

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. JOHNSTON, Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLOTURE VOTE TOMORROW ON AMENDMENT JOHNSTON TO HELMS ANTIBUSING AMENDMENT

Mr. JOHNSTON. Mr. President, tomorrow, at 2 p.m., we are scheduled to vote on a third motion for cloture on the Johnston amendment to the Helms antibusing amendment to the Justice Department bill. Mr. President, I will say a few words about the substance of the amendment, but my remarks today deal with the very practical problem of absentees in the Senate and whether or not those absentees will prevent us from getting a meaningful judgment of the Senate on the question of whether or not we have 60 votes for cloture.

Mr. President, in the past, I have resisted voting more than three times on a cloture motion. I think the Senate ought to make up its mind sooner than that. If a Senator intends to vote for cloture, I think he ought to, if not on the first try, then on the second try; certainly, he ought to by the third try. In that spirit, I have counseled the leadership in the past not to continue with too many successive tries on cloture motions. So, I have great sympathy, Mr. President, with the leadership should they feel hesitant about going beyond a third motion on cloture.

However, Mr. President, in this particular case, we have an unusual, if not unique, situation. We have already demonstrated here, on the floor, that we have more than 60 committed votes, Senators who have already voted for cloture. The question is whether or not, on the second day after a long recess, we have enough in attendance on the floor of the Senate to demonstrate meaningfully the will of the Senate.

As the Senate will recall, in the last vote on cloture, we achieved 59 votes. Two other Senators had already voted for cloture. One was Senator GOLDWATER from Arizona, who has long opposed busing. Senator GOLDWATER was absent at that particular time because of his attendance at the Casey CIA hearings. He was presiding at those hearings and felt

it necessary to be there. Frankly, Senator GOLDWATER stated he did not think his presence here was necessary.

Senator Melcher had an attack of asthma and was on the sofa in his office. unable to move. Senator Melcher had also previously voted for the cloture motion. So, what we had in the last vote, Mr. President, was 61 solid demonstrated votes-59 present and voting and 2 who were absent but who had previously voted with us. That, of course, would have us over the top with room to spare.

Since that last vote, Mr. President, I have talked to my colleagues and have reason to hope that two to four additional Senators will vote with us. That would give us 63 to 65 Members of the Senate who believe that we ought to invoke cloture on this amendment. If that is so, Mr. President, then the will of the Senate ought to be determined by hav-

ing a proper vote

The question is, Is tomorrow the day for such a proper vote? My preliminary indication is that six of the Members who would vote with us will be absent. My indication is that three Democrats will necessarily be absent-Senators CANNON, SASSER, and ZORINSKY. Three Republicans, Senators SIMPSON, SYMMS. and Abdnor, will also necessarily be absent tomorrow.

That would mean that if an additional two to four Senators, over and above the 61 who have already demonstrated for us, were present and voting, we would end up still short on cloture.

Mr. President, I cannot recall ever having voted on cloture on the day after returning from a recess. Perhaps we have. But since it happens to have occurred in the course of this debate, it seems to me appropriate that we should at least have the will of the Senate determined by an additional cloture vote. assuming tomorrow we do not reach cloture tomorrow, at a time when Senators are able to be present and vote.

Mr. President, that is important not only because of the overriding importance of busing around the country and what it is doing to our school systemsand I can and will argue that very briefly again in a moment-but also because on an issue of national importance, Senators deserve and have the responsibility for making their wishes known and reported. Tomorrow, it will be impossible for that to happen.

There are those who would like this issue to go away. The issue will not go away. It will not go away in the minds of the American people, nor indeed will it go away in the minds of Senators who, I believe, one way or the other, want, deserve, and have the responsibility for settling the issue.

If we do not get the appropriate number of votes, if we let tomorrow finish this amendment, I feel safe in predicting that either we will not deal with busing for a very long time, or we will bring it up in the midst of a very busy fall. Then we will have to put together legislation and an amendment—a series of amendments, in effect-from ground zero, and have the debate, not only on the issue of busing but also on the kind of legislation we would use, which, in my judgment, would take 2 to 3 weeks to accomplish.

Mr. President, I do not believe that if we spent 2 months here we could make a better formulation of legislation to deal with this matter than we have on the floor. This is particularly true when we consider that the final bill, in large measure, will be written in a conference committee. Whatever we pass on the floor of the Senate that deals with busing will not be accepted immediately and without change in the House. We must go through long House hearings and then through a rule from the Rules Committee or through a discharge petition, finally to get it up to a vote on the floor of the House, and then to a conference committee.

So I believe the case is overwhelming for letting the Senate work its will on this bill at this time with a cloture vote when enough Members are here, present and voting on the floor, to represent accurately the will of the Senate.

As I have said, it appears that because of the six absentees, six absentees who voted with us previously, it will be very difficult to get that done tomorrow.

Mr. President, very briefly, to bring the Senate up to date, in my own State of Louisiana, the city of Baton Rouge is presently in the throes of a very difficult busing situation.

Since the busing order came down, and this information comes from Mr. Ray Alberson, the superintendent of the school board, the East Baton Rouge Parish schools have suffered a net loss of at least 5,000 students. First and second grade students, according to Mr. Alberson, are being bused across town, one way, for an hour and a half a day—an hour and a half a day—first and second grade students.

It is no wonder that we already have suffered a 5,000 student diminution. In fact, it may be more than that. There were 64,000 students last year. On the first day of registration, there were only 57,000, so the actual diminution is some 7,000 out of 57,000. The school board hopes some will come back who have not yet shown up.

Mr. President, since I last spoke on the floor of the Senate on this issue, an antibusing rally in the small city Natchitoches, La., was attended by hundreds of people, almost one-third of whom were black. So, Mr. President, we are not talking about a return to segregation, about an issue which is supposed only by whites and opposed by blacks. To the contrary, a nationwide poll taken just a couple of months ago shows that, by margin of 49 to 46 percent, blacks oppose busing. But when we look at those who have strong feelings, 38 percent oppose and only 26 percent support.

One of the most incisive statements on this issue was an article in the Washington Post of Friday, September 4, by William Raspberry, who is, of course black. He points out the folly of our present busing policy. I will quote a paragraph or two from this article dealing with the situation in Prince Georges County.

He points out that in Prince Georges, bus routes and pupil assignment plans were drawn up which had the effect of ending official segregation.

The school system at that time was 13 percent black. However, since that time, the school system has become 40 percent black. He says:

One result of all this is that the busing patterns that enhanced integration when they were established now often involve the absurd phe..ome.ion of black children traveling great distances from their neighborhood only to wind up in schools that are overwhelmingly black.

Mr. President, Mr. Raspberry points

There are other questions, but this one is key. For instance, the NAACP has questions regarding possible discrimination in hiring and assigning black teachers. In my opinion, that is a proper issue for the teachers themselves,

He concludes:

The NAACP thinks it is committed to improving education for black children. What it is really committed to is a specific method—busing—for achieving that end. And it would rather fight its quixotic court battes than switch to a different approach.

I would not argue for a return to the days of separate-but-equal, when black children were transported great distances to keep them from sitting next to white children. But neither would I argue for hauling black children needless miles to keep them from sitting next to other black children. Color isn't the problem; education is.

Mr. President, I ask unanimous consent that this article be printed in the RECORD at this time.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHY IS BUSING THE ONLY ROUTE?

(By William Raspberry)

The NAACP, unhappy with the results of nearly a decade of court-ordered busing in Prince George's County, has asked the court to reopen the original case.

The civil rights organization's contention will be that the county has not done all it could to maximize racial integration in the public schools. It obviously has not, though officials no doubt, will contend they have done all the law required them to do in that regard. They drew up bus routes and pupil-assignment plans that, at least at the beginning, had the effect of ending official segregation.

A couple of things have happened since the plan was implemented in 1972. First, a large number of whites have left the public schools while a large number of black families have moved into the county, most of them in areas near the District of Columbia. Second, housing patterns in 1981 are not what they were in 1972. Whites have been moving farther out into the county, in many cases selling their homes to black newcomers.

The school system that was 13 percent black a decade ago is some 40 percent black today. One result of all this is that the busing patterns that enhanced integration when they were established now often involve the absurd phenomenon of black children traveling great distances from their neighborhood only to wind up in schools that are overwhelmingly black.

It may be fair to ask whether the county has done as much as possible to maximize racial integration. Clearly, it hasn't. But the suspicion here is that that is the wrong question. The relevant inquiry is whether

anyone—including the NAACP—has done as much as possible to improve the education of brack children.

There are other questions, but this one is key. For instance, the NAACP has question, regarding possible discrimination in liring and assigning black teachers, in my opinion, that is a proper issue for the teachers themselves, but it has little to do with the question of educating black children, or of busing, for that matter. Indeed, if black teachers are being assigned disproportionately to black schools, that ought to enhance the education of black children—unless it is assumed that black teachers are either less qualified than whites or less concerned about the education of black children.

There is the question of whether schoolclosing decisions have been made in a way calculated to reduce the amount of racial integration, a charge which, if true, might prove to be the most effective lever for reopening the busing case.

There is the question of discrimination against black children, even when they attend integrated schools. The NAACP points out, for instance, that black children make up 67 percent of the "educable mentally retarded" and 61 percent of the children identified as having "specific learning disabilities." Black students, says NAACP general counsel Thomas I. Atkins, "are being disciplined for things that would be disregarded or given less discipline for whites." So why does Atkins work so feverishly to expose more black children to such disparate treatment?

There may even be a question of the equitable distribution of resources—the question that resulted in the busing order in the first place. But if that remains a problem, it strikes me that it can be resolved far more easily than by transferring pupils.

The NAACP's single-minded insistence on racial integration resolves none of these questions, and in some cases—the matter of school discipline, for instance—aggravates them. So why the continuing fervor for busing?

The reason, I suspect, is that the NAACP, seeing clearly the importance of better education for black children, is trying to achieve it with the only tool it has at hand: litigation. Litigation works reasonably well in terms of statistical equity. It doesn't work worth a damn for the education of specific black children.

black children.

The NAACP thinks it is committed to improving education for black children. What it is really committed to is a specific method—busing—for achieving that end. And it would rather fight its quixotic court battles than switch to a different approach.

I would not argue for a return to the days of separate-but-equal, when black children were transported great distances to keep them from sitting next to white children. But neither would I argue for hauling black children needless miles to keep them from sitting next to other black children. Color isn't the problem; education is.

If the NAACP and its supporters had spent as much of their resources, financial and otherwise, improving the education of black children as has been spent trying to get them into predominantly white schools, the problem would have been solved long ago.

Mr. JOHNSTON. Mr. President, I will not at this point repeat the overwhelming arguments in favor of showing that busing as a remedy has failed.

It is a dismal failure. This is reflected not just in public opinion polls, the forum where great public issues are ultimately settled and which is reflected in this Congress, it is shown by educational studies, and it is known to individual citizens who have had a chance to look

at busing. As Mr. Raspberry says about Prince Georges County, when white students leave the school system, what you end up with is the absurdity of black children being transported across the county in order to sit next to other black children and a segregation of the school system.

What is written small in Prince Georges County is written large across this country, from coast to coast, from Los Angeles, where busing was a dismal failure and they have abandoned that remedy by a vote of the people, to Boston, where the same kind of dismal failure is recorded by the experts and by those familiar with the issue.

So, Mr. President, I hope that tomorrow there will be sufficient Senators in the Chamber to give a meaningful judgment on this most important national issue.

If there is not a sufficient number of Senators here because of the necessary absences, I hope and trust that we will have an additional chance to have the will of the Senate recorded and made manifest.

Mr. President, I yield the floor.
The PRESIDING OFFICER. Is there
further morning business?

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk

The assistant legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. My President, I rise in opposition to the position taken by the distinguished Senator from Louisiana. To reiterate very simply, the issue that will be decided tomorrow has nothing to do with busing at all. It has to do with the Constitution of the United States, more specifically the separation of powers as among the legislative, executive, and judicial branches. It has to do with whether or not the legislative branch of government will dictate politics to the courts or whether the courts will remain independent.

I shall read into the RECORD at this time a letter dated August 24, 1981, on the stationery of the American Bar Association, from the president of that association, David R. Brink, addressed to this Senator.

Dear Senator Weicker: On August 11, the House of Delegates of the American Bar Association overwhelmingly approved a resolution opposing congressional curtailment of the jurisdiction of the Supreme Court or the inferior Federal courts for the purpose of effecting changes in constitutional law. This resolution was brought to the House of Delegates because of the many bills which are pending in Congress to strip the Federal courts of jurisdiction to hear cases on controversial subjects such as busing, school prayer and abortion. A copy of the resolution, and a copy of the report which accompanied it before the House of Delegates are enclosed.

At best the pending legislation is of questionable constitutionality, but in any event it is, in my judgment, expressive of an extermely poor policy with serious, adverse implications for the future. If lawmakers, or

others, believe our Constitution, as interpreted by the branch of government to which its interpretation was entrusted is wrong, the answer lies either in the appellate judicial process itself or in the amendment of the Constitution by the means provided in that Constitution. Anything else represents a change in our basic system of government that might please some persons today and be used tomorrow to destroy things in our system that the same persons hold dear.

Although the Secretary of the Association will formally advise the President, the Attorney General, the Chief Justice, and the relevant committees of the Congress of the action taken by our House of Delegates, because of the grave importance of the subject, the fact that it will again be before the Senate immediately upon the reconvening of the Congress, and my strong support for the action of the House of Delegates, I personally call it to your attention and urge your assistance in defeating any such legislation.

Sincerely.

DAVID R. BRINK.

Mr. President, I hope that this letter and more importantly the action of the American Bar Association which is expressed in the letter will come to the attention of each one of my colleagues prior to the vote tomorrow.

Again, I repeat, regardless of what position any of us hold on the matter of busing, that is not what will be voted up or down with tomorrow's cloture vote. The issue simply is whether or not Senators will be leaning over the shoulders of judges in this country on any issue affecting any segment of our population; such, I hope will not become the case.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not morning business is closed.

DEPARTMENT OF JUSTICE AUTHORIZATIONS, 1982

The PRESIDING OFFICER. The Senate will resume consideration of the unfinished business, which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill (S. 951) to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1982, and for other purposes.

The Senate resumed consideration of the bill.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR THE TRANSACTION OF MORNING BUSINESS

Mr. BAKER. Mr. President, notwithstanding that the Senate now is considering the Department of Justice authorization bill and, more particularly, the Johnston amendment, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not longer than 5 minutes, in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

OLD DEFENDERS' DAY

Mr. MATHIAS. Mr. President, this week Marylanders will observe Old Defenders' Day, a holiday commemorating the War of 1812 batties of North Point and Fort McHenry, which took place on Maryland soil 167 years ago, on September 12, 1814. On Old Defenders' Day, we honor the men and women who defended Baltimore and the Nation in those two decisive battles; we remember their bravery and their commitment. We also recall the price paid for those victories—the casualties suffered, the lives lost.

When the U.S. Congress declared war on Great Britain on June 18, 1812, it was, in part, to express opposition to the restrictive trade orders imposed by that country. Ironically, just 2 days earlier, Great Britain had repealed those trade orders, but news of the repeal had not yet reached Congress. That war might have been avoided, those lives might have been avoided, those lives might have been avoided, those lives might have been spared had we been able to communicate with the British more quickly.

This incident in history helps us appreciate just how much our international relations benefit from today's high technology communications. We can reach almost any nation in the world in a matter of minutes. Yet, this same advanced level of technology that makes communication so easy also makes the threat of international conflict more serious. In war today, armies traverse battlefields in tanks instead of on foot or on horseback as they did in 1812; they fire missiles rather than cannonballs. And always in reserve are the nuclear weapons that make the specter of modern warfare so terrifying.

The increased dangers of a conflict today remind us of how important it is that we apply our modern technology in ways that promote peaceful interaction among nations. This year the successful flight of the first Space Shuttle suggests that we may develop a space information system which would open the world to the eves of all nations, and a space communications network which would tie the peoples and the nations of the Earth together.

The War of 1812 reminds us of what can happen when nations do not communicate effectively. In 1981 we have the technology we need to prevent such misunderstandings as well as to carry on productive dialog with all other na-

tions with ease. In short, we have the ability to communicate fully. Our success in strengthening global stability and promoting peace depends on our willingness and on the willingness of other nations to do so.

JOHN FRANCIS POHLHAUS

Mr. MATHIAS. Mr. President, this Nation recently lost one of its great unsung heroes when J. Francis Pohlhaus, a distinguished veteran of the American civil rights movement, died on July 29

at the age of 63.

A Baltimore native, Mr. Pohlhaus served as legal counsel for the Washington bureau of the National Association for the Advancement of Colored People from 1954 until his retirement earlier this year. Throughout his career, Mr. Pohlhaus was a steadfast and effective advocate for civil rights for all Americans, and played a key role in the passage of every major piece of civil rights legislation during the critical years of the 1950's and 1960's.

Mr. Pohlhaus retired from the NAACP in March of this year, but he had great difficulty separating himself from the issues to which he had devoted so much energy and compassion over the years. Characteristically, on the day of his death, he attended the House Judiciary Committee markup of a bill to extend the 1965 Voting Rights Act. This was no surprise to those who knew J. Francis Pohlhaus. For, as Joe Rauh has written, Frank Pohlhaus' "devotion to the cause was not for a day or a year or even a decade, but for all time."

At the funeral services held in late July, Clarence Mitchell, former director of the NAACP Washington office and Frank Pohliaus' boss, colleague, and friend, delivered a moving eulogy. More recently, Mr. Mitchell wrote a tribute to Mr. Pohlhaus which appeared in the August 9 edition of the Baltimore Sun. I commend it to the attention of my colleagues and ask unanimous consent that

it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the Record, as follows:

[From the Baltimore Sun, Aug. 9, 1981]

A Man of Conviction

(By CLARENCE MITCHELL)

John Francis Pohlhaus was the kind of man who needs no trumpet to call him to action, and active he was for a long time in promoting the cause of racial justice.

He resigned recently from the Washington Bureau of the NAACP where he had served since 1954, but last week he was still carrying out self-assigned tasks for the organization. Then, after a visit to Mrs. Pohlhaus, who was in the hospital following an operation and after making a check on the status of voting rights legislation before the House Judiciary Committee, he died of a heart attack.

Right to the end he was performing as I had known him to serve during the 30 years of our friendship and association. He was a man of deep convictions and great ability. He operated without fanfare and seldom did

he leave unfinished work.

Mr. Pohlbaus' commitment to civil and human rights is a reason for knowing how absurd it is to assume that only blacks care about ending second-class treatment based on race. He came from a highly respected Baltimore family of German and Irish forebears.

After duty in the armed services and some legal work for labor organizations, he decided in the 1950s that he wanted to work for the national NAACP. At that time the NAACP couldn't even afford to hire a lawyer who was willing to work for low pay.

A suggestion was made that Mr. Polhaus could help by getting a job in what was called the civil rights section of the U.S. Department of Justice's criminal division. This was a kind of ste, child in the department and its functions were severely restricted. Nevertheless, he took a job there and served with a high performance record.

with a high performance record.

After a few years in the department he joined the NAACP staff. From 1934 to the time of his death, he was an important member of the Bureau's civil rights team keeping a close watch on legislation and working to improve racial policies in all functions of the federal

rovernment

One of his assets was the ability to detect potential problems in the sometimes innocent-sounding language offered by opponents to amend civil rights bills or regulations. He spent a great deal of time in specialized law libraries of the executive branch and the U.S. Supreme Court.

The books and records in his own office were always arranged with precision. If he was asked a question that could be given an exact answer from them, he could find it in minutes. At the national conventions of the NAACP he would spend hours helping to polish the language of resolutions that would be the organization's policy guidelines in the year ahead.

Problems of the poor and sick weighed heavily on his mind. In his home the spirit of caring for fellow humans was frequently reflected by his wife, his four daughters and

his son.

During the riots that seared Washington in 1968 there were many arrests of blacks who had the misfortune to be in harm's way when curfews went into effect or the police made a dragnet type of sweep. Mr. Pohlhaus worked many hours to free those who were imprisoned although they were not guilty of any wrongdoing.

As a devout Catholic, he served on the school board of the Washington Archdiocese for a time. As controversy over abortions mounted he was increasingly troubled by attempts of bigots to use this as a vehicle for curbing social reforms in other areas. For him human life was to be protected both before and after birth.

Perhaps the most poignant evidence of his desire to promote interracial justice and good will came from a legacy he left for Howard University. There was no coffin at the mass for him in St. Francis DeSales Church. At his wish the family had given his body to the university's medical school.

MARKING THE BICENTENNIAL OF WASHINGTON COLLEGE IN CHES-TERTOWN, MD.

Mr. MATHIAS. Mr. President, I send to the desk a resolution to mark the bicentennial of Washington College in Chestertown, Md. I ask unanimous consent that it be held at the desk.

The PRESIDING OFFICER (Mr. COHEN). Without objection, it is so

ordered.

The resolution reads as follows:

S. RES. 206

Whereas Washington College is the first chartered college in the State of Maryland and the tenth chartered college in the United States, and

Whereas the Maryland Provincial Assembly did authorize the establishment of the Kent

County Free School by law in 1723, creating the visitors to supervise and operate such school, and

Whereas the Reverend Doctor William Smith, noted educator and clergyman, did become master of the Kent County School in 1780, and

Whereas by his energy and dedication did succeed in advancing the stature of that school thereby causing its student body to increase in numbers to such a degree that he encouraged the visitors of the Kent County School to petition the Maryland General Assembly to grant a collegiate charter to the Kent County School, and

to the Kent County School, and
Whereas General George Washington, Commander in Chief of the American Army, from
his headquarters in Newburgh, New York,
did give his consent to name the new seminary of learning Washington College, and

Whereas the Maryland General Assembly, on May 24, 1782, did enact legislation granting a charter to the visitors of the Kent County School, in the name of Washington College, in honorable and perpetual memory of His Excellency General George Washington, the illustrious and virtuous Commander in Chief of the Armies of the United States, and

Whereas George Washington did contribute the sum of fifty guineas as an earnest of his wishes for the prosperity of the seminary,

Whereas George Washington did visit the college in 1784 at which time he signed his name as a visitor and governor of the college and in 1789 did accept the honorary degree of doctor of laws conferred upon him by the college, and

by the college, and
Whereas the college during its long history
has been proud to bear the name of the

founder of this country, and

Whereas through the years the college has prepared many men and women who later distinguished themselves in government, the ministry, business, law, medicine and education, and

Whereas three Presidents of the United States in addition to George Washington have honored the college with visits to the campus, namely Franklin Delano Roosevelt, Harry S. Truman, and Dwight D. Eisenhower, and

Whereas numerous Governors, Senators, and Representatives of Congress have similarly honored the college, and

Whereas the visitors and governors of Washington College will set aside the academic year 1981-1982 to commemorate their two centuries of service to the State and Nation: Now, therefore, be it

Resolved, That this body pay tribute to Washington College and congratulate the visitors and governors, the president and administration, the faculty and students, the alumni and all friends of the college for their long, devoted, and faithful commitment to excellence in American higher education.

Mr. MATHIAS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ELECTING TERRENCE E. SAUVAIN AS SECRETARY FOR THE MINOR-ITY OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution which I have cleared with the distinguished majority leader. I ask unanimous consent that it be stated by the clerk and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the resolution by title.

The legislative clerk read as follows: A resolution (S. Res. 205) electing Terrence E. Sauvain as secretary for the minority of the Senate.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the resolution.

The question is on agreeing to the resolution.

The resolution (S. Res. 205) was agreed to, as follows:

Resolved, That Terrence E. Sauvain be and he is hereby elected Secretary for the Minority of the Senate, effective September 1,

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BAKER. Mr. President, assuming the position that I exercised for a very long time. I move to lay that motion on

The motion to lay on the table was agreed to.

Mr. BAKER, Mr. President, there are at least two other unanimous-consent requests that are in the clearing process. I believe we have not completed that process, but I expect to be able to make that further request shortly.

In the meantime, Mr. President, I understand the Senators from Virginia have a matter they wish to address in morning business. I am prepared to yield the floor.

Mr. HARRY F. BYRD, JR. Mr. President, I suggest the absence of a quorum. The PRESIDING OFFICER. The clerk

will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HARRY F. BYRD, JR. Mr. Presjdent, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without

objection, it is so ordered.

THE 200TH ANNIVERSARY OF THE BRITISH SURRENDER AT YORK-

Mr. HARRY F. BYRD, JR. Mr. President, on October 19, 1981, our Nation will celebrate the 200th anniversary of the surrender of the British Army to the American military forces led by Gen. George Washington. The event took place at Yorktown, Va., in York County, Va. There will be a commemorative ceremony at Yorktown on October 19. The President of the United States will be present for that 200th anniversary of that very important date in American history.

My distinguished colleague from Virginia and myself have a resolution which we desire to submit to the Senate and ask that it be appropriately referred.

The resolution expresses the sense of the Congress that the Congress should be operated on that day, on October 19, if it is in session at all, in a manner that would permit all Senators and all Members of the House of Representatives who wish to attend the ceremony at York-town to have the opportun.ty to do so.

On behalf of myself and my colleague (Mr. WARNER), I submit this concurrent resolution and ask that it be appropriately referred. I ask that the concurrent resolution be printed in the RECORD at this point.

The PRESIDING OFFICER. Without objection, the concurrent resolution will be received and appropriately referred.

There being no objection, the concurrent resolution was ordered to be printed in the RECORD, as follows:

S. CON. RES. 31

Whereas October 19, 1981, is the two hundredth anniversary of the surrender at Yorktown, Virginia, of the British Army to the George military forces led by General Washington;

Whereas such date has been designated by law as a Day of National Observance of the Two Hundredth Anniversary of the Surrender of Lord Cornwallis to General George Washington at Yorktown, Virginia; and

Whereas it is appropriate that the Members of the Congress participate in the cele-bration in Yorktown, Virginia, of such Day of National Observance: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring). That it is the sense of the Congress that both Houses of the Congress should be adjourned on October 19, 1981, for purposes of permitting the Members of the Congress to participate in the celebra-tion in Yorktown, Virginia, of the Day of National Observance of the Two Hundredth Anniversary of the Surrender of Lord Cornwallis to General George Washington at Yorktown, Virginia.

Mr. HARRY F. BYRD, JR. I yield to my distinguished colleague WARNER)

Mr. WARNER. Mr. President, I join with my distinguished colleague from Virginia in making this request to the Senate.

History reflects that in 1881 during the centennial of this historic event as well as the sesquicentennial in 1931, the Congress went into recess and many of the Members of the Congress were present, at which time the President of the United States addressed the world on this auspicious occasion.

My distinguished colleague was careful to use the words to operate the Senate in such a way to enable those Members who desire to attend can do so. It is our hope that something can be worked out in this vein, recognizing, however, the tremendous workload on the Congress in the coming few weeks.

Mr. HARRY F. BYRD, JR. If the Senator will yield, the resolution suggests that the Congress be in recess that day, but I do not think that is essential so long as the leadership of the Senate and the House will arrange the affairs of the Senate and the House in such a way that Members may get to Yorktown and return without missing votes. That is really what the two Senators from Virginia are seeking to do, to make it possible for Members of Congress, those who can and who wish to do so, to attend this historic event in York County, at Yorktown, Va.

Mr. WARNER. Thank you, Mr. President.

I suggest the absence of a quorum. The PRESIDING OFFICER. clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded. The PRESIDING OFFICER. Without

objection, it is so ordered.

THE NATIONAL GUARD: AN ANCIENT AND HONORABLE DEFENSE FORCE

Mr. ROBERT C. BYRD. Mr. President, I am pleased today to join with the Senator from Tennessee (Mr. SASSER), the Senator from Florida (Mr. CHILES), Senator from Montana the (Mr. Baucus), the Senator from Connecticut (Mr. Dopp), the Senator from Arkansas (Mr. PRYOR), the Senator from Colorado (Mr. HART), the Senator from Maine (Mr. MITCHELL), and the Senator from Maryland (Mr. SARBANES) in introducing a joint resolution designating October 7, of each year as National Guard

Long before our War of Independence, an American fighting man, unique in character, began to emerge in the form of the citizen-soldiers of today known as the National Guard.

English in origin, the Guard can trace its ancestry to the Trainbands of the day of Alfred the Great, the Anglo-Saxon King of Wessex, England, in the ninth century, which guarded the communi-ties, lands, and boundaries of the kingdom. During our early colonial days, it was beholden to our citizens to band together, to arm themselves, to fight marauders, wild animals, and to assist one another in times of disasters.

As a legal and actual instrument the National Guard was founded on October 7, 1636, when the General Court of the Massachusetts Bay Colony ordered its loosely gathered militia units to be officially incorporated into a regiment.

With the incorporation of these militia elements into the first citizen regiment formed on the North American continent for colonial defense and security, a long and honorable tradition of service was launched.

The tradition of the U.S. military service itself had its origins in the trained bands of militiamen protecting the wilderness perimeters and safeguarding movements along the trails, roadways, and waterways as the seeds of the new nation began to grow. From the militia came the volunteer forces which produced the rough and rugged Continental Army that endured frigid nights, fought and finally won, our independence from England. The legends of Bunker Hill, Valley Forge, Yorktown, are the splendid heritages of the militia from whose valor in those historic conflicts emerged our Nation.

Many years after the Revolution, in 1824, the beloved hero of the great war, the Marquis de Lafayette, of France, was invited to the United States. The former Revolutionary War general, and friend of our First President, was escorted by the 7th Regiment of the New York State Militia. He popularized the term "Guarde Nationale" by applying it to all of the organized militia in America. New York, by statute, adopted the term during the Civil War; and with the founding of the National Guard Association of the United States in 1878, the organized militia of the various States became the National Guard as the country's official Reserve Force, to be equipped by the Federal Government, but to remain under State control. The National Defense Act of 1916 subjected the National Guard to a Federal

In World War I, the National Guard units were absorbed into the regular armed forces, and with the establishment of the U.S. Air Force in 1947, the Air National Guard became a separate institution. Today, the Army National Guard (ARNG) and the Air National Guard (ANG) are the only components of the U.S. force which are authorized by the law with a dual mission—that is, a Federal mission and a State mission. The National Guard is now required to fight when, where, and as well as the

Regulars.

It is safe to say that our Nation would not exist as it is today were it not for the night and day protection of our National Guard units. The Guard has become a force unique unto itself due to its State and Federal character. Ever ready to aid citizens in need of assistance when disaster strikes and ready to serve on the battlefields in time of war, the National Guard has earned the respect and the confidence of the American people.

I vividly recall the spring of 1977, when the southwestern portion of West Virginia was inundated in one of the worst floods of my State's history. On April 3 through April 5 the heaviest rains of the season fell on the mountainous regions of southwestern Virginia, eastern Kentucky, and southern West Virginia. Among the worst flooding occurred along the Tug Fork River separating West Virginia from Kentucky. Many towns and villages in the valley through which the waters of the Tug rampaged were inundated and destroyed. The Tug crested at 54 feet. The severity of the water damage was compounded by heavy winds which gusted over 60 miles per hour. On April 5, the Charleston Daily Mail headlined a story on the flood as "Flooding as the worst in the State's history." In the opinion of eyewitnesses, there has never been devastation in the State to compare with that of the April flooding along the Tug. Basic services were completely eliminated, communications were nonexistent, and the Appalachian Power Co.'s main power station serving the Tug Fork Valley was under water. Natural gas service was disrupted and water supplies contaminated; 8,600 private dwellings were affected, many completely destroyed, and 2,000 families had to be evacuated. President Carter declared a 10-county area of southern West Virginia a major disaster area. Local emergency services were powerless in the face of such widespread devastation. The loss of dollars was in

the millions. The loss of lives from the flood was none. This miracle can be attributed to the timely arrival, to the courage, to the endurance, and to the skill of the volunteer army of men and women who labored around the clock during that awful time, the State's National Guard.

In sequence, it can be noted that announcements of heavy rains were made public on April 2, 1977, flood warnings went out by the morning of April 4, and by night, the West Virginia National Guard had moved into the flooded counties. The Guard immediately established a command post, and set up "Operation Downpour." Amphibious crews rescued people from rooftops, dangerous debris was diverted from damaging paths, potable water supplied, power generated, and the intricate cleanup accomplished as the waters subsided. The West Virginia National Guard was cited for its efficiency and bravery during that operation.

Other disasters throughout the land have earned the Guard national immortality-the Johnstown flood, the Texas City explosion, Hurricanes Camille and Agnes, the Teamsters' truck strike when 9,052 Guardsmen moved interstate traffic, the tornado in Xenia, Ohio, the paralyzing snowstorm in Massachusetts, the refugee crisis in Key West, Fla. The list goes on.

In fiscal year 1980, the Governors of the States found it necessary to call on the Guard to perform State emergency duty on 469 occasions in 47 States and territories. These State emergencies required the services of 30,000 National Guard soldiers and airmen and 203,000 man-days of service. These minimobilizations tested the troops' leadership under circumstances of strain, thus improving the capability of the units under pressure.

Since 1970, the National Guard has been fully committed to its role as an important element of the total force. Since the end of the draft following the war in Vietnam, U.S. national strategy has been based upon reliance on the National Guard as part of the force which would immediately expand the Army and Air Force to war fighting strength. In some operational areas, the National Guard represents from 40 to 50 percent of the total U.S. military strength for a given mission in the early days of a national emergency.

Under a total force policy, the units of the National Guard have been assigned significant roles and missions in our Nation's war plans-so significant that the Army and Air Force cannot reasonably be expected to conduct a conventional war successfully unless the National Guard can perform its wartime mission when and where required.

The production of combat readiness in the National Guard requires the same essential ingredients as does production of combat readiness in the Active Forces. There must be an adequate number of trained soldiers and airmen.

It is important to note that the Army's training base cannot begin to produce trained soldiers until about 7 months after conscription begins. The wartime strength requirement for the Army National Guard must be considthe peacetime strength requirement. With this awesome responsibility assigned to the National Guard, with the efforts of the administration to build up our defenses, and at the same time to balance the budget, it is pertinent to emphasize the importance that the National Guard plays in our national de-

On October 7, the National Guard will be 345 years old. It is only fitting that this date should be set aside for commemoration as National Guard Day. By declaring October 7 to be National Guard Day, the unique nature and important mission of the National Guard would be brought to the attention of the American people.

Through such recognition, and in anticipation of the range of publicity which the event would generate at the grassroots level throughout the land, it will be possible to further demonstrate the vital role of the Army and Air National Guard, to maintain the support which the Guard gets from the community, and to sustain and enhance the range of understanding essential to the recruiting and retention efforts. These are of paramount importance at this juncture in the Nation's history, when the Guard must be manned, equipped, and trained to be ready—in the best tradition of the Minutemen-to take its place alongside the active forces in the event that this Nation's security is challenged, anywhere in the world.

In recognition of the significance of

the National Guard both to our State and to Federal authorities, I am pleased to join my colleague, Mr. Sasser, in proposing that October 7 of each year be proclaimed as National Guard Day.

Mr. President, I send to the desk a joint resolution, ask that it be appropriately referred, and I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 107

Whereas the First Militia Regiment of the Massachusetts Bay Colony was organized three hundred and forty-five years ago as the first step toward citizen self-defense and the beginning of our National Guard, the oldest military organization in the United States; and

Whereas the past three centuries have witnessed the unflagging spirit shown by the citizen-soldier-a willingness to leave home and serve the Nation when need arises; and

Whereas the National Guard and its antecedents have served with distinction in every major military conflict involving the United States, from the earliest of colonial times through the Vietnam conflict;

Whereas the National Guard is equally ready to serve when disaster strikes at home; Whereas the National Guard continues to serve as the major reserve military force for the Regular Army and Air Force;

Whereas the National Guard currently consists of approximately four hundred and eighty thousand volunteer soldiers and airmen organized into approximately four thousand five hundred military units located in the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam and the Virgin Islands; and

Whereas the people of the United States owe a debt of gratitude to the citizen soldiers and airmen of the National Guard for their past and continuing contributions to the security of the United States:

Now, therefore, be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to designate October 7 of each year (commencing with the year 1981) as "National Guard Day," and to call upon Federal, State, and local government agencies and the people of the United States to observe the day with appropriate programs, ceremonies, and activities.

THE NATIONAL GUARD: ESSENTIAL TO OUR

• Mr. SASSER. Mr. President, I am pleased today to join with the distinguished minority leader, Senator ROBERT C. BYRD. in introducing a joint resolution designating October 7, 1981 as National Guard Day.

I believe there is no more immediate need—as we rebuild our Nation's defense posture—than to insure that we have the military personnel necessary to respond to military needs wherever and whenever the situation warrants.

Strong, reliable, well-equipped reserve components in the armed services are a key to meeting these needs.

A first step toward meeting this priority is to mobilize the awareness of the American people of the contribution made by the military's reserve components, especially the National Guard.

As with other colleagues, I am only too aware that most attention these days is focused on other, more highly visible military questions—questions involving massive short and long-term commitments, contingent on the priorities established by the administration and the Congress.

But let us not forget that the men and women in uniform are the heart and soul of America's defense posture. And in this sense, the National Guard and the reserves are an essential element.

In fact, half the Nation's combat power and two-thirds of its support capabilities are maintained in the Reserve components of our armed services.

A recent Defense Department report reminds us that the Ready Reserve now has a strength of about 1,300 000 personnel, with a personnel strength in the National Guard and Reserve of 809,000. "A fact often overlooked in public discussion," the report points out, "is that these units train regularly and comprise a force that is bigger than the active armies of France and West Germany combined."

What about readiness? In 1961, the United States depended largely on the National Guard as it mobilized to meet the threat posed by the Communist bloc during the crisis that surrounded the construction of the infamous Berlin Wall.

But it did take months to complete the mobilization, because of legislation restrictions on the Presidency and because of other considerations. The Presidency was later given greater flexibility by the Congress to mobilize the Guard and the

Because of international requirements, guardsmen are now aware that instant mobilization—requiring them to report to their duty stations within 24 hours of notification—is necessary. I have no doubt that the National Guard is up to the challenge should it arise.

Clearly, we now depend on the National Guard as much as, if not more than ever, before.

This begs the question. If we depend so much on the Guard, just how are they holding up.

Last June, I visited National Guardsmen from Tennessee for 2 days during their encampment at Camp Shelby, Miss. I was impressed by the morale, by the level of commitment and by the professionalism I saw.

It was indeed impressive when you consider the circumstances confronted by the guardsmen. Here they are, expected to be ready for instant mobilization, expected to be away from their families and spouses for long weekends throughout the year, expected to take weeks off during the summer, and expected—at times—to sacrifice their vacations.

Despite all that is expected of them, despite the importance of the National Guard's role in our defense posture, and despite the sacrifices we ask them to make, we do not really make enlistment in the Guard, nor staying in the Guard, all that attractive.

The same goes for employers of guardsmen. The employer has to juggle work schedules, vacation schedules and other personnel considerations in order to allow the guardsman to do his elected duty.

I have tried to address some of these problems in legislation I introduced earlier this year. A series of bills—S. 713, S. 714, and S. 715—would: Provide a refundable tax credit to employers who pay an employee who is off on training; increase the eligibility of those in the National Guard and in the Reserves for education grants, and; establish early retirement incentives for members of the Guard and the Reserves.

The key to all of these proposals is to attract and keep trained personnel in the Guard and in the Reserves, and to make such service less of a burden on employers. I hope all of these measures will be addressed some time during the 97th Congress.

For today, however, I want to put the emphasis on the first step we have to take in strengthening the National Guard and in doing so, our overall defense posture, and that is to set aside just 1 day of recognition—October 7—so that more Americans will realize just how important to America our National Guard is.

(By request of Mr. ROBERT C. BYRD, the following statement was ordered to be printed in the RECORD:)

 Mr. CHILES. Mr. President, I strongly support and am pleased to be a cosponsor of the resolution being introduced today to designate October 7 as National Guard Day.

S'nce the Guard was first established in 1638, as a cit'zens' m'litia to protect the Massachusetts Bay Colony, the National Guard has remained the backbone

of America's defense in reserve. These citizen-soldiers are the first to be called to active duty by the President in times of national emergency. The men and women of the Guard devote much of their free time—one weekend every month and 2 weeks of active duty each year—to keeping themselves in a constant state of military readiness.

I might point out that the National Guard is unique in that it serves a dual role. The guardsmen are not only subject to activation by the President, but they are also on call by the Governor for emergency duty when disaster strikes the'r State.

The Florida National Guard was established in 1778, and was then known as the Florida Rangers. Florida now has 87 Army National Guard units and 1 Air National Guard group.

I had the opportunity twice last year to see firsthand how efficiently and effectively the guardsmen performed their assignments when called to emergency duty. In Miami during the Liberty City riots, I watched as the guardsmen parolled the streets maintaining order. Again in Miami and on the Forida Keys, I observed how helpful the Guard personnel were during the influx of refugees from Cuba. Everywhere I went, I found the guardsmen to be cooperative and courteous, as they went about their duties. The superb training these individuals receive was evident.

This was not the first time I had come into contact with the work of our National Guard. From time to time in the past I have been present when the Florida Guardsmen have been called out to help when hurricanes hit or disaster strikes.

Some of the special accomplishments of the Florida National Guard over the past 2 years include:

June 1979, 1,100 Guard members were called to duty for 9 days during the Florida trucker's strike.

September 1979, 309 Guard members were called to duty for 4 days to help maintain order after Hurricane David.

April 1980, 24 Guard members were on emergency duty for 11 days when boatloads of Haitian refugees landed in southern Florida.

May 1980, 1,414 Guard members were again called upon to serve for 16 days to assist with the tremendous influx of refugees coming into southern Florida from Mariel Cuba.

In May 1980, 3,979 National Guard personnel were called up for emergency duty for 10 days to maintain order in the Liberty City civil disturbances.

Florida is fortunate to have men and women of such high caliber serving in the National Guard. We should be thankful for the fact that the Guard is always alert and ready to help in times of national emergency, natural disasters, civil disturbances, and to participate in search and rescue missions. I think it is appropriate that Congress pass a resolution setting aside a day to pay honor to the brave members of our National Guard.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the names of Senators Chiles, Baucus, Dodd, Pryor, Hart, Mitchell, and Sarbanes

be included as cosponsors of the joint resolution which has been jointly introduced by Mr. SASSER and myself.

The PRESIDING OFFICER. Without objection it is so ordered

Mr. ROBERT C. BYRD. Mr. President. I suggest the absence of a quorum. The PRESIDING OFFICER. The clerk

will call the roll.

The bill clerk proceeded to call the

The PRESIDING OFFICER. Without objection, it is so ordered.

THE GOLD COMMISSION

Mr. HELMS. Mr. President, a little over a year ago, the Senate adopted an amendment to the bill authorizing funds for the International Monetary Fund. The amendment established a commission to "study and make recommendations" concerning the role of gold in the domestic and international monetary systems.

I offered that amendment to the IMF bill, Mr. President, because of the deep monetary dilemma facing our Nation then and, to an even greater extent, now, For too long, we have sacrificed prosperity to inflation. We have allowed Government and politicians to corrupt our currency and with it the ability of the economy to grow and our people to prosper.

Why have a Gold Commission? Good question. The answer is simple. Because the monetary role of gold has been given short shrift by recent administrations.

Politicians and economists claimed they need and want only "flexibility" in monetary matters, but that socalled flexibility has only led to more and more inflation. A new gold standard is an option that must be considered.

The House of Representatives also adopted an identical amendment offered by Congressman Ron Paul, and President Carter signed the bill into law on October 7, 1980.

As the Chair will recall, since the elections were imminent, then Secretary of the Treasury, William Miller, did not move to appoint members of the Commission, and since the Republican candidate won the election, it was decided to leave the appointments to the next Secretary.

It can be argued that Secretary Regan did not act as fast as he should have in appointing the Commission members, but the law required him to appoint Federal officials, including two members of the Council of Economic Advisors, and their appointment to the CEA had to be approved by Congress.

A key problem that faces us now, is that Congress intended the Commission to have a year from the date of enactment of Public Law 96-389-October 7. 1980-to do its job. Unfortunately, the Commission did not have its first meeting until July 16 of this year.

I propose that the Commission be given a year, and that it be required to submit its report by June 30, 1982.

A second problem arose with regard to the appointment of members of the Commission. The bill calls for "one majority and one minority member each from first, the Joint Economic Committee of the Congress; second, the Committee on Banking, Housing, and Urban Affairs of the Senate; and third, the Committee on Banking, Finance and Urban Affairs of the House of Representatives."

I think, I am reasonably certain, that everyone expected that this would mean that there would be three Members of the House of Representatives and three Senators: a Senator and a Member of the House from the Joint Economic Committee-one Republican and one Demo-

crat from each committee.

But, early this year, the Speaker appointed four Members of the House: A Republican and a Democrat from the Banking Committee, one Republican and one Democrat from the Joint Economic Committee. The Senate appointed a Republican and a Democrat from the Banking Committee and a Republican from Joint Economic Committee. This leaves the Commission with an imbalance and at the last meeting of the Commission, Congressman Henry Reuss pointed it out. I understand that he said that if the report of the Commission rested on the vote of the extra member appointed from the House, he would feel obliged to object.

It seems to me, Mr. President, that no member of the Commission should feel that a vote one way would allow him to remain on the Commission as a voting member, and a vote another way would result in an objection to his being seated.

For this reason, I believe that the law should be amended to require that four members of the Joint Economic Committee be appointed: Two from the House membership on that committee and two from the Senate membership on the com-

A final point, Mr. President, concerns the procedures under which the Commission operates. The Federal Advisory Committee Act of 1972 establishes procedures for such bodies to operate. Unfortunately, a legal opinion of the Treasury Department legal counsel has been issued which states that since the Commission is intended to make recommendations to Congress and not to the President, the Advisory Committee Act is not applicable to the Commission. This technicality meant that certain members of the public were excluded from the last meeting of the Commission. What goes on here?

The exclusion of the public has been questioned by the Wall Street Journal and other important publications. Some observers have speculated that the Treasury Department does not want an open debate on the subject. Reports I have heard from the first meeting indicate that some rather tenuous arguments were heard for keeping the meeting

Mr. President, I think the public's business ought to be conducted publicly. I think the people have a right to know what is going on, except in the most extreme cases of national security.

Mr. President, in the years 1908-10, the congressionally mandated National Monetary Commission studied and made recommendations concerning the monetary system of the United States.

It provided Congress and the President with a 12 volume study, and its hearings and meetings were the subject of widespread public debate and concern. recommendations were Tts finally adopted in 1913 with the passage of the Federal Reserve Act.

We now have a Gold Commission, that has the congressionally mandated responsibility to review and come up with a report concerning the role of gold in our monetary system. It is not a light charge. The condition of our economy is precarious because of the disorder in our monetary system.

In fact, interest rates are higher than they have ever been in our history.

In fact, there is less confidence in our currency today than at any time with the possible exception of the desiruction of the "Continental Dollar" during the War of Independence and the greenback inflation of the Civil War.

In each instance, stability was restored to the currency by the adoption of a monetary standard utilizing gold.

A cursory treatment of the subject would be a disservice to the Nation. A few closed meetings would have the effect of limiting public discussion, and would obviously be viewed as an effort to do just that.

Mr. President, I have consulted with the distinguished Senator from Utah (Mr. GARN) who so ably chairs the Banking Committee. Senator GARN has promised cooperation so we can move expeditiously on this legislation.

Mr. President, I ask unanimous consent that the text of the bill and the following items be printed in the RECORD at the conclusion of my remarks:

A section of the Federal Advisory Committee Act of 1972 concerning the operations of advisory bodies such as the Gold Commission;

An editorial from the August 31, 1981 Wall Street Journal entitled, "A Seri-

ous Gold Debate";
A copy of the section of Public Law 96-389 establishing the Gold Commis-

A copy of my letter to Donald Regan concerning the operations of the Gold Commission and a copy of his response.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1602

Be it enacted by the Senate and House of Representatives of the United Mates of America in Congress assembled, That sec-tion 10(a) of Public Law 96-389 (31 U.S.C. 822a note) is amended by inserting ", to be known as the 'United States Gold Commission'," after "chair a commission". Sec. 2 Section 10(a)(2) of Public Law 96-

389 (31 U.S.C. 822a note) is amended-

(1) by striking out "(A) the Joint Economic Committee of the Congress, (B)" inserting in lieu thereof the following: "the members of the Joint Economic Committee of the Congress appointed by the President of the Senate. (B) the members of the Joint Economic Committee of the Congress appointed by the Speaker of the House of Representatives, (C)"; and

(2) by striking out "(C)" before "the Committee on Banking, Finance and Urban Affairs" and inserting in lieu thereof "(D)". SEC. 3. Section 10(b) of Public Law 96–389 (31 U.S.C. 822a note) is amended—

(1) by inserting "and the President" after "the Congress"; and

(2) by striking out "one year after the date of enactment of this Act" and inserting in lieu thereof "June 30, 1982".

Public Law 92-463, 92nd Congress, H.R. 4383 OCTOBER 6, 1972

An act to authorize the establishment of a system governing the creation and operation of advisory committees in the execu-tive branch of the Federal Government, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Advisory

Committee Act"

ADVISORY COMMITTEE PROCEDURE

SEC. 10. (a) (1) Each advisory committee meeting shall be open to the public.

(2) Except when the President determines otherwise for reasons of national security, timely notice of each such meeting shall be published in the Federal Register, and the Director shall prescribe regulations to provide for other types of public notice to insure that all interested persons are notified of such meeting prior thereto.

(3) Interested persons shall be permitted to attend, appear before, or file statements with any advisory committee, subject to such reasonable rules or regulations as the Di-

rector may prescribe.

(b) Subject to section 552 of title 5, United States Code, the records, reports, transcripts, minutes, appendixes, working papers, drafts, studies, agenda, or other documents which were made available to or prepared for or by each advisory committee shall be avail-able for public inspection and copying at a single location in the offices of the advisory committee or the agency to which the advisory committee reports until the advisory committee ceases to exist.

(c) Detailed minutes of each meeting of each advisory committee shall be kept and shall contain a record of the persons pres-ent, a complete and accurate description of matters discussed and conclusions reached, and copies of all reports received, issued, or approved by the advisory committee. The accuracy of all minutes shall be certified to by the chairman of the advisory committee.

- (d) Subsections (a) (1) and (a) (3) of this section shall not apply to any advisory com-mittee meeting which the President, or the head of the agency to which the advisory committee reports, determines is concerned with matters listed in section 552(b) of title 5, United States Code. Any such determina-tion shall be in writing and shall contain the reasons for such determination. If such a determination is made, the advisory committee shall issue a report at least annually setting forth a summary of its activities and such related matters as would be informative to the public consistent with the policy of section 552(b) of title 5. United States
- (e) There shall be designated an officer or employee of the Federal Government to chair or attend each meeting of each advisory committee. The officer or employee so designated is authorized, whenever he determines it to be in the public interest, to adjourn any such meeting. No advisory committee shall conduct any meeting in the absence of that officer or employee.
- (f) Advisory committees shall not hold any meetings except at the call of, or with the advance approval of, a designated officer or employee of the Federal Government, and in the case of advisory committees (other

than Presidential advisory committees), with an agenda approved by such officer or employee.

[From the Wall Street Journal, Aug. 31, 1981] A SERIOUS GOLD DEBATE?

Given the perplexities of the current economic outlook, these columns have several times expressed the hope that the newly formed Gold Commission will conduct a serious look at the possibility of anchoring money creation to gold or some other direct proxy for the general price level. The domestic and international monetary situation has deteriorated, not improved, since our last link with gold was severed only 10 years ago. And gold advocates suggest it is a cure for high interest rates, and given the paucity of alternatives on that front any plausible suggestion ought to be seriously examined.

This week members of the Gold Commis-

sion will take their first step in deciding whether their study will be serious or pro forma. The Treasury informs us that it is polling commission members by telephone on how to respond to requests from this newspaper that the minutes of its initial July 16 meeting be released under the Freedom of Information Act, and that its coming Sept. 18 meeting be open to the public under the Federal Advisory Committee Act

Hobart Rowen, the top economic writer for the Washington Post, wrote the other day that "senior members of the Reagan administration privately imply they are just going through the motions on this commission." A commission just going through the motions will of course want to do so in secret. But if there is to be a serious debate, the public deserves to be informed. We're sure that Mr. Rowen, and for that matter all news writers everywhere, would agree with us that the meetings ought to be open.

As a practical matter, this commission is not going to come up with any once-and-for-all answer. You are not going to get a consensus report from a commission including, to take two examples, Congressmen Ronald Paul, a stalwart advocate of gold, and Congressman Henry Reuss, an implacable

opponent.

So we hope that the commission members will decide to open their meetings without the necessity of testing the laws. If they should decide not to do so, Congress will have the opportunity to review the decision. The commission will have to ask for an extension of its Oct. 6 reporting deadline, and in granting the extension Congress can also specify open meetings to advance the com-mission's fundamental mandate of informing the public on an arcane but important sub-

PUBLIC LAW 96-389-Oct. 7, 1980 ROLE OF GOLD IN INTERNATIONAL MONETARY SYSTEMS

SEC. 10. (a) The Secretary of the Treasury shall establish and chair a commission consisting of-

(1) three members of the Board of Governors of the Federal Reserve System and two members of the Council of Economic Advisors, all of whom shall be designated by the Secretary of the Treasury;

- (2) one majority and one minority member each from (A) the Joint Economic Commit-tee of the Congress, (B) the Committee on Banking, Housing, and Urban Affairs of the Senate, and (C) the Committee on Banking, Finance and Urban Affairs of the House of Representatives, who shall be designated by the Speaker of the House of Representatives and the President of the Senats, respectively, upon the recommendations of the majority and minority leaders of the respective Houses; and
- (3) four distinguished private citizens with business, finance, or academic backgrounds who shall be designated by the Secretary.

(b) The commission shall conduct a study to assess and make recommendations with regard to the policy of the United States Government concerning the role of gold in domestic and international monetary systems, and shall transmit to the Congress a report containing its findings and recom-mendations not later than one year after the date of enactment of this Act

(c) Sums appropriated pursuant to section 5 of Public Law 95-612 shall be available to the commission to carry out its functions.

U.S. SENATE, Washington, D.C., July 16, 1981.

Hon. DONALD REGAN. Secretary of the Treasury, Washington, D.C.

DEAR DON: I understand that the Gold Commission established pursuant to an amendment I proposed and the Senate adopted on June 6, 1980, has met and is concerned that there is insufficient time for the Commission to do its job.

Let me pledge to you that I will do all I can legislatively to extend the date on which the Commission is to report. I believe that a year from the date the Commission was organized, which I understand was in June of this year, would be appropriate. In drafting the initial amendment to read, "one year from the date of enactment," it was certainly my intention to allow the Commission that much time to develop a thorough report.

I am also concerned that the Commission may not be in conformance with P.L. 92-463. The Federal Advisory Committee Act of 1972, and it would be my intention that the date extension legislation contain a specific directive concerning that act.

In addition, I would certainly appreciate your views as to whether that legislation should contain strictures concerning the submission date for the Commission report.

I hope this expression of my views and intent assists the Commission in its discus-

sion of procedural matters.
With best personal regards.

Sincerely,

JESSE HELMS.

THE SECRETARY OF THE TREASURY, Washington, D.C., August 10, 1981. Hon. JESSE HELMS. U.S. Senate.

Washington, D.C.

DEAR JESSE: Thank you for your letter on the Gold Commission.

I appreciate your support for the view that the Commission will need more time than permitted by the present October 7 due date if it is to do a thorough job. The Commission will discuss this further at its next meeting, scheduled for September 18, and attempt to reach a consensus view on an appropriate extension. I expect that the Commission will rely heavily on the advice of the Congressional members in this matter. I do think it is desirable for the Commission to set a firm deadline for submission of its report to Congress.

As to the present applicability of the Federal Advisory Committee Act to the Gold Commission, I have asked that a Treasury legal memorandum on this question be prepared for consideration by the Commission. In any event, I expect that the Commission will adopt realistic and efficient operating procedures consistent with its important

I believe that after the next Commission meeting, when these procedural matters are discussed, with the benefit of your views, we can better determine the nature and timing of any further legislation that may be required with respect to the Commission.

With best wishes.

Sincerely.

DONALD T. REGAN.

Mr. HELMS. I thank the Chair and I yield the floor. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. Gor-TON). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without

objection, it is so ordered.

MESSAGES FROM THE PRESIDENT RECEIVED DURING THE AD-JOURNMENT

Under the authority of the order of the Senate of August 3, 1981, the Secretary of the Senate on August 6, August 11, August 18, August 19, August 28, September 4, and September 8, 1981, received messages from the President of the United States, transmitting sundry nominations and two treaties; which were referred to the appropriate com-

(The nominations received on August 11, August 18, August 19, August 28, September 4, and September 8, 1981, are printed at the end of the Senate proceedings.)

LOAN GUARANTEE FOR THE OIL SHALE CORPORATION-MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT-PM

Under the authority of the order of the Senate of August 3, 1981, the Secretary of the Senate, on August 25, 1981, received the following message from the President of the United States, together with accompanying documents; which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

The Defense Production Act of 1950 (50 U.S.C. App. 2061 et seq.), as amended, provides that loan guarantees in excess of \$38 million be transmitted to the Congress for its review.

The Department of Energy has negotiated a loan guarantee commitment agreement, identified as Synthetic Fuel Action 1981-1, with The Oil Shale Corporation in the amount of \$1.112 billion for its participation in the Colony Project pursuant to the authority of Section 305 of the Defense Production Act. I am pleased to transmit for review:

1. an Executive Summary of the trans-

Major Terms and Conditions

3. the loan guarantee transaction documents; and

4. the Operating Agreement between The Oil Shale Corporation and Exxon Corporation for the Colony Project.

RONALD REAGAN.

THE WHITE HOUSE, August 25, 1981.

PRELIMINARY REPORT ON IMPACT OF NEW MILITARY CONSTRUC-TION ON COMMUNITIES-MES-SAGE FROM THE PRESIDENT RE-CEIVED DURING THE ADJOURN-MENT-PM 70

Under the authority of the order of the Senate of August 3, 1981, the Secretary of the Senate on August 28, 1981, received the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Armed Services:

To the Congress of the United States: Section 803(b) of the Military Construction Authorization Act, 1981 (P.L. 96-418) called for "a thorough study of the adverse impact on communities in areas in which major, new military facilities are constructed with a view to determining the most effective and practicable means of promptly mitigating such impact." On March 23, 1981, I submitted a preliminary report on this study which has been conducted by an interagency task force of the Economic Adjustment Committee. At that time, I indicated that additional portions of the study were underway and would be reflected in a final report which would be forwarded to the Congress as early as practicable. I am herewith submitting the final report of this study.

The final report augments the preliminary report by including further analysis of the ability of communities to absorb growth; analyzing an additional budgeting and organizational alternative; and updating information on existing Federal assistance programs to reflect the Administration's budgetary

revisions.

The report examines various organizational and budgeting mechanisms for providing assistance to communities impacted by the nearby construction of major, new military bases. The report concludes that, with rare exceptions, local and State resources and normal Federal domestic agency assistance should be used to provide public facilities and services supporting military bases. Special Federal assistance should only be warranted in highly unusual circumstances where a sudden population influx and the resulting demand for public services from a major, new military base could overwhelm State-local fiscal capacities and impede achievement of critical national security objectives, As the report states, the need for any special Federal assistance must be evaluated on a case-by-case basis.

In those rare circumstances where special Federal assistance would be warranted, we will want to attain a high degree of responsiveness to State and local concerns together with sufficient accountability and control of Federal funds associated with critical national security projects. In this regard, the Special Impact Assistance alternative appears to be a promising approach. However, the selection of the preferred

organizational and budgetary mechanism will depend upon the particular circumstances in each case. I will look to the Secretary of Defense and the Director of the Office of Management and Budget, in consultation with affected States and communities, to advise me in this regard. I will request additional statutory authority when it is required.

I have been gratified by the excellent cooperation among all levels of Government in the preparation of this study. We intend to continue working closely with affected States and communities to reach satisfactory outcomes on national security projects which affect their interests.

RONALD REAGAN. THE WHITE HOUSE, August 28, 1981.

REPORT ON FEDERAL PAY COMPARABILITY ALTERNATIVE PLAN-MESSAGE FROM THE PRES-IDENT RECEIVED DURING THE ADJOURNMENT-PM 71

Under the authority of the order of the Senate of August 3, 1981, the Secretary of the Senate on August 31, 1981, received the following message from the President of the United States, together with accompanying documents; which was referred to the Committee on Governmental Affairs:

To the Congress of the United States: Under the Pay Comparability Act of

1970, an adjustment in Federal white collar pay will be required in October, 1981.

That Act requires that calculations be made annually of the adjustments that would be required in Federal statutory pay systems to achieve comparability with private sector pay for the same levels of work. My pay advisers have made those calculations and indicated that an average 15.1 percent increase would be required to achieve comparability as the concept and process were defined in the Pay Comparability Act of

While I fully support the comparability principle as the best basis for determining Federal pay, I believe that significant changes are required in the way that principle is currently defined and implemented. Therefore, last March we transmitted to the Congress proposed legislation to revise and strengthen the comparability process. At that time, we estimated that the revised process would result in an average increase in Federal pay of 4.8 percent in October, 1981.

The reform proposal has not yet been acted upon in Congress, but in accordance with our economic recovery program, the Congress included in the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35) a provision which limits this October's Federal white collar pay adjustment to the same 4.8 percent. Accordingly, I am submitting to the Congress an alternative plan which would implement that limitation on Federal white collar increases.

Current law provides that the annual

increase for the military be the same as the average Federal white collar increase. This year, however, the Congress is expected to provide for a larger military pay increase as a part of the Defense Authorization Act for FY 82. The larger increases proposed under that legislation will supersede the increases that military personnel would otherwise receive under the alternative plan.

RONALD REAGAN.
THE WHITE HOUSE, August 31, 1981.

CONVERSION OF CERTAIN POSI-TIONS TO MERIT PAY—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM

Under the authority of the order of the Senate of August 3, 1981, the Secretary of the Senate on September 1, 1981, received the following message from the President of the United States, together with accompanying documents; which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

Supervisors and management officials in GS-13, 14, and 15 positions throughout the Federal Government will be converted to merit pay this October as required by Chapter 54, Title 5, U.S. Code, unless otherwise excluded by law.

Upon proper applications from the heads of affected agencies and upon the recommendation of the Director of the Office of Personnel Management, I have, pursuant to 5 U.S.C. § 5401(b)(2)(B), excluded 44 agencies and units of agencies from coverage under the Merit Pay System on account of size and efficiency, emergency conditions, and comity with the Legislative and Judicial branches.

Attached is my report describing the agency or unit to be excluded and the reasons therefor.

RONALD REAGAN.
THE WHITE HOUSE, September 1, 1981.

ANNUAL REPORT ON THE STATUS
OF THE NATIONAL WILDERNESS
PRESERVATION SYSTEM—MESSAGE FROM THE PRESIDENT
RECEIVED DURING THE ADJOURNMENT—PM 73

Under the authority of the order of the Senate of August 3, 1981, the Secretary of the Senate on September 4, 1981, received the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Energy and Natural Resources:

To the Congress of the United States:
In accordance with the Wilderness Act of 1964 (Public Law 88-577), I herewith transmit the Seventeenth Annual Report on the status of the National Wilderness Preservation System for the calendar year 1980. The period covered by the report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, September 4, 1981.

increase for the military be the same as the average Federal white collar increase. This year, however, the Congress is expected to provide for a larger military pay increase as a part of the Defense

Under the authority of the order of the Senate of August 3, 1981, the Secretary of the Senate on September 4, 1981, received the following message from the President of the United States, together with the accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States: In accordance with Section 13 of the Rehabilitation Act of 1973, as amended, I hereby transmit the Annual Report of the Rehabilitation Services Administration for Fiscal Year 1980 as submitted by the Secretary of Education. The period covered by this report precedes my term of office.

RONALD REAGAN. THE WHITE HOUSE, September 4, 1981.

ANNUAL REPORT ON MINE SAFETY AND HEALTH ACTIVITIES—MES-SAGE FROM THE PRESIDENT RE-CEIVED DURING THE ADJOURN-MENT—PM 75

Under the authority of the order of the Senate of August 3, 1981, the Secretary of the Senate on September 4, 1981, received a message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States: In accordance with Section 511(a) of the Federal Mine Safety and Health Act of 1977, as amended (30 U.S.C. 958(a)), I transmit herewith the fiscal year 1979 annual report on mine safety and health activities during the previous administration as submitted by the Secretary of Lahor.

RONALD REAGAN. THE WHITE HOUSE, September 4, 1981.

MESSAGES FROM THE HOUSE RE-CEIVED DURING ADJOURNMENT

Under the authority of the order of the Senate of August 3, 1981, the Secretary of the Senate on August 4, 1981, received a message from the House of Representatives which announced that the House insists upon its amendments to the bill (S, 304) to establish a national tourism policy and an independent Government agency to carry out the national tourism policy; disagreed to by the Senate, agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and has appointed Mr. Dingell, Mr. Florio, and Mr. Broyhill as managers of the conference on the part of the House.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amend-

ments of the House to the bill (S. 694) to authorize supplemental appropriations for fiscal year 1981 for the Armed Forces for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, and for research, development, test, and evaluation, to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for such fiscal year, to authorize supplemental appropriations for such fiscal year for construction at certain military installations, and for other purposes.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4242) to amend the Internal Revenue Code of 1954 to encourage economic growth through reductions in individual income tax rates, the expensing of depreciable property, incentives for small businesses, and incentives for savings, and for other purposes.

The message also announced that the House has passed the following bills, without amendment:

S. 547. An act to enable the Secretary of the Interior to erect permanent improvements on land acquired for the Confederated Tribes of Siletz Indians of Oregon; and

S. 875. An act to authorize the generation of electrical power at Palo Verde Irrigation District Diversion Dam, California.

The message further announced that the House has agreed to the following concurrent resolutions, without amendment:

S. Con. Res. 27. A concurrent resolution providing for an adjournment of the Senate from August 3, 1981, to September 9, 1981, and an adjournment of the House from August 4, 1981, to September 9, 1981; and

S. Con. Res. 30. A concurrent resolution directing the Clerk of the House of Representatives to make corrections in the enrollment of H.R. 4242.

The message also announced that pursuant to the provisions of title 22, United States Code, section 276a-1, as amended by Public Law 95-45, the Speaker appointed as members of the delegation to attend the Conference of the Interparliamentary Union to be held in Havana, Cuba, September 15-23, 1981, the following Members on the part of the House: Mr. de La Garza (chairman), Mr. Derwinski (vice chairman), Mr. Biaggi, Mr. Danielson, Mr. Bowen, Mr. Levitas, Mr. Lantos, Mr. Won Pat, Mr. McClory, Mr. Erlenborn, Mr. Butler, and Mr. Erdahl.

The message further announced that the House has passed the following bill and joint resolution, in which it requests the concurrence of the Senate:

H.R. 4121. An act making appropriations for the Treasury Department, the United States Postal Service, the Executive Office of the President, and certain Independent Agencies for the fiscal year ending September 30, 1982, and for other purposes; and

H.J. Res. 263. Joint resolution to designate May 6, 1982, as "National Recognition Day for Nurses." ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The message also announced that the Speaker has signed the following enrolled bills and joint resolutions:

S. 640. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to extend the authority of the Mayor to accept certain interim loans from the United States and to extend the authority of the Secretary of the

S. 1278. An act entitled the "Saccharin Study and Labeling Act Amendment of 1981";

H.R. 1100. An act to amend title 38, United States Code, to improve certain benefit programs of the Veterans' Administration for veterans who are former prisoners of war, and for other purposes;

S.J. Res. 64. Joint resolution designating August 31, 1981, as "National Blinded Vet-

erans Recognition Day"; and
H.J. Res. 141. Joint resolution authorizing and requesting the President to issue a proclamation designating the period from October 4, 1981, through October 10, 1981, as "National Schoolbus Safety Week."

Under the authority of the order of the Senate of August 3, 1981, the enrolled bills and joint resolutions were signed by the President pro tempore (Mr. Thurmond) on August 5, 1981.

Under the authority of the order of the Senate of August 3, 1981, the Secretary of the Senate on August 5, 1981, received a message from the House of Representatives announcing that the House has passed the following joint resolution, without amendment:

S.J. Res. 87. Joint resolution to authorize and request the President to designate September 13, 1981, as "Commodore John Barry Day."

ENROLLED BILLS SIGNED

The message also announced that the Speaker has signed the following enrolled bills:

S. 547. An act to enable the Secretary of the Interior to erect permanent improve-ments on land acquired for the Confederated Tribes of Siletz Indians of Oregon;

S. 694. An act to authorize supplemental appropriations for fiscal year 1981 for the Armed Forces for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles and for research, development, test, and evaluation to increase the authorized personnel end strengths for military and civilian personnel of the Department of the Defense for such fiscal year, to authorize supplemental appropriations for such fiscal year for construction at certain military installations, and for other purposes; and

S. 875. An act to authorize the generation of electrical power at Palo Verde Irrigation

District Diversion Dam, Calif.

Under the authority of the order of the Senate of August 3, 1981, the enrolled bills were signed by the President protempore (Mr. Thurmond) on August 5, 1981

Under the authority of the order of the Senate of August 3, 1981, the Secretary of the Senate on August 7, 1981, received a message from the House of Representatves announcing that the House has passed the following bills, and joint resolution, in which it requests the concurrence of the Senate:

H.R. 772. An act to provide for the retention of the name of Mount McKinley; H.R. 1946. An act to reinstate and validate

U.S. oil and gas leases numbered OCS-P-0218 and OCS-P-0226; and

H.J. Res. 207. Joint resolution to require the Secretary of the Interior to place a plaque at the U.S. Marine Corps War Memorial honoring Joseph Rosenthal, photographer of the scene depicted by the memorial.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Under the authority of the order of the Senate of August 3, 1981, the Secretary of the Senate on August 11, 1981, received a message from the House of Representatives announcing that the Speaker has signed the following enrolled bills and joint resolution:

H.R. 3982. An act to provide for reconciliation pursuant to section 301 of the first concurrent resolution on the budget for fiscal year 1982;

H.R. 4242. An act to amend the Internal Revenue Code of 1954 to encourage economic growth through reductions in individual income tax rates, the expensing of depreciable property, incentives for small businesses, and incentives for savings, and for other pur-

poses; and S.J. Res. 87. Joint resolution to authorize and request the President to authorize September 13, 1981, as "Commodore John Barry Day".

Under the authority of the order of the Senate of August 3, 1981, the enrolled bills and joint resolution were signed by the Vice President on August 12, 1981.

HOUSE BILLS AND JOINT RESOLU-TIONS REFERRED DURING THE ADJOURNMENT

Under the authority of the order of the Senate of August 3, 1981, the following bills and joint resolutions were read twice by unanimous consent, and referred as indicated:

H.R. 772. An act to provide for the retention of the name of Mount McKinley; to the Committee on Energy and Natural Re-

H.R. 1946. An act to reinstate and validate U.S. oil and gas leases numbered OCS-P-0218 and OCS-P-0226; to the Committee on En-

ergy and Natural Resources.
H.R. 4121. An act making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies for the fiscal year ending September 30, 1982, and for other purposes; to the Committee on Appropriations.

H.J. Res. 207. Joint resolution to require the Secretary of the Interior to place a plaque at the U.S. Marine Corps War Me-morial honoring Joseph Rosenthal, photog-rapher of the scene depicted by the memorial; to the Committee on Energy and Natural Resources.

H.J. Res. 263. Joint resolution to designate May 6, 1982, as "National Recognition Day for Nurses"; to the Committee on the Judiciary.

MESSAGE FROM THE HOUSE

At 2:02 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has agreed to a resolution (H. Res. 206) relative to the death of the Honorable WILLIAM R. COTTER, a Representative from the State of Connecticut.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

The Secretary of the Senate reported that on August 5, 1981, he had presented to the President of the United States the following enrolled bills and joint resolu-

S. 547. An act to enable the Secretary of Interior to erect permanent improvements on land acquired for the Confederated Tribes of Siletz Indians of Oregon;

S. 640. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to extend the authority of the Mayor to accept certain interim loans from the United States and to extend the authority of the Secretary of

the Treasury to make such loans;

S. 694. An act to authorize supplemental appropriations for fiscal year 1981 for the Armed Forces for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles and for research, development, test, and evaluation to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for such fiscal year, to authorize supplemental appropriations for such fiscal year for construction at certain military installations, and for other purposes;

S. 875. An act to authorize the generation of electrical power at Palo Verde Irrigation

District Diversion Dam, Calif.;

S. 1278. An act entitled the "Saccharin Study and Labeling Act Amendment of

1981"; and S.J. Res. 64. Joint resolution designating August 13, 1931, as "National Blinded Veterans Recognition Day."

The Secretary reported that on August 12, 1981, he had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 87. Joint resolution to authorize and request the President to designate September 13, 1981, as "Commodore John Barry Day.'

POM-359. A resolution adopted by the Senate of the Commonwealth of Massachusetts: to the Committee on Commerce, Science, and Transportation:

"RESOLUTIONS

"Whereas, a consolidation of Federal Aviation Administration offices throughout the country is now in the planning stages and Burlington has been rightly designated as a proposed site; and

"Whereas, a move to Massachusetts would be cost-efficient and productive and will attract better qualified people to the engineering and aviation policy by being located in the heart of the high-technology center along route 128 around Boston; and

"Whereas, contrary to the New York argument that a move to Massachusetts would be counter-productive, actual statistics prove that the number of skilled personnel available in this Commonwealth greatly exceeds that which may be found in New York; now therefore be it

"Resolved, That the Massachusetts Senate hereby supports the proposed cost-encient consolidation of the Federal Aviation Administration offices and encourages the imple-mentation of its plans to locate itself in the

Commonwealth; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the Clerk of the Senate to the President of the United States, the presiding officer of each branch of the each member thereof from the Congress, to Commonwealth, to the Director of the Federal Aviation Administration in Washington, D.C., and to its regional director in Burling-ton."

POM-360. A resolution adopted by the National Association of Counties, relating to State's rights to impose taxes; to the Com-mittee on Energy and Natural Resources.

POM-351. A concurrent resolution adopted by the Legislature of the State of Michigan; to the Committee on Energy and Natural Re-

HOUSE CONCURRENT RESOLUTION No. 264

"Whereas, The Natural Gas Policy Act of 1978 calls for the gradual decontrol of natural gas prices through 1985; and

"Whereas, The President of the United States has repeatedly pledged an attempt to decontrol natural gas prices completely and immediately; and

Whereas, Immediate decontrol of natural gas prices will cost the State of Michigan billions of dollars more than gradual de-

control through 1985; and

Whereas, Immediate decontrol will cause commerce and industry to pay considerably more for natural gas for heat and process uses, resulting in decreased revenues and investment in the State. Moreover, it will also result in higher consumer prices for food, clothing, housing, and other necessities of life; now, therefore, be it

"Resolved by the House of Representatives (the Senate concurring). That the members of the Michigan Legislature oppose the immediate decontrol of natural gas prices as proposed by the President of the United

States; and be it further

"Resolved, That copies of this resolution, with a roll call attached, be transmitted to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives, and the members of the Michigan Congressional Delegation."

POM-362. A joint resolution adopted by the Legislature of the State of Washington; to the Committee on Environment and Public

"SUBSTITUTE HOUSE JOINT MEMORIAL No. 4

"Whereas, The people of the State of Washington are grateful and deeply appreciative of the immediate emergency relief provided by the United States Congress to the people and communities of the State of Washington suffering from the devastating eruptions of Mt. St. Helens; and

"Whereas, A substantial amount of moneys which were allocated by the state and local governments for essential state and local services were diverted to respond to the erup-

tions of Mt. St. Helens: and

"Whereas, Much of the federal moneys appropriated to various federal agencies for relief to people and communities affected by the Mt. St. Helens eruptions has not been expended and probably will not be expended for the particular use designated in the appropriation: and

"Whereas, Much of the moneys appropriated to the federal emergency management agency for relief to people and governmental entities affected by the Mt. St. Helens eruptions has not been expended due to both an agreement that the federal government only

fund seventy-five percent of eligible governmental costs and many costs incurred by governmental entities are not eligible for reimbursement; and

"Whereas, The eruptions of Mt. St. Helens constituted both a major and unique catas-

trophe; and

Whereas, Although Mt. St. Helens has been temporarily quiet and the plight of the people in the damaged areas is no longer the nation's headline news story, a substantial amount of work and sums of money are required to help the lives of the people and the condition of the communities, return to normal; and

Whereas, Enough time has passed since the volcano's disastrous eruptions for the damages to be determined, the needs of each community assessed, and plans to expeditiously and economically satisfy those needs to be developed, and it is now possible for the federal funds administered by the Federal Emergency Management Agency to be used where the funds would be the most beneficial;

"Now, therefore, your Memorialists respectfully pray that the: (1) Funus appropriated by Congress to respond to the Mt. St. Helens eruptions be reassessed and reallocated to best serve the continuing emergency needs of the people and communities still suffering from the aftermath of the vol-canic eruptions; (2) eligibility criteria be altered to allow federal reimbursement for all reasonable expenses incurred by governmental entities in responding to the Mt. St. Helens cruptions; and (3) the seventy-five/ twenty-five percent reimbursement agreement be reexamined and altered to provide greater aid to affected governmental entities.

Be it resolved, That copies of this Memorial be immediately transmitted to the Honorable Ronald Reagan, President of the United States, the Federal Emergency Management Agency, the President of the United States Senate, the Speaker of the House of Representatives, and each Member of Congress from the State of Washington."

POM-363. A joint resolution adopted by the Legislature of the State of Washington; to the Committee on Environment and Public Works:

"SUBSTITUTE SENATE JOINT MEMORIAL NO. 106

"Whereas, Natural based products such as fish oil may have value for use as pesticides;

"Whereas, The use of these natural based products as pesticides may reduce the amount of depletable fossil fuel used to manufacture chemically based pesticides;

"Now, therefore, Your Memorialists respectfully pray that the Environmental Protection Agency review its current pesticide registration requirements for the purpose of relaxing those requirements pertaining to naturally based pesticides, including but not limited to fish oils, as a means of displacing conventional fuels used in chemically based pesticides.

"Be it resolved, That copies of this memorial be immediately transmitted to the Honorable Ronald Reagan, President of the United States, the Administrator of the Environmental Protection Agency, the President of the United States Senate, the Speaker of the House of Representatives, and each member of Congress from the State of Washington."

REPORTS OF COMMITTEES SUB-MITTED DURING THE ADJOURN-MENT

Under the authority of the order of the Senate of August 3, 1981, the following reports of committees were submitted on August 13, 1981:

By Mr. MATHIAS, from the Committee Rules and Administration, favorably without amendment:

S. Res. 20. Resolution providing for television and radio coverage of proceedings of the Senate (Rept. No. 97-178).

By Mr. ROTH, from the Committee on Governmental Affairs, favorably with an amendment in the nature of a substitute:

S. 10. Bill to establish a Commission on More Effective Government, with the declared objective of improving the quality of government in the United States and of restoring public confidence in government at all levels (Rept. No. 97-179).

By Mr. DANFORTH, from the Commiton Governmental Affairs, favorably without amendment:

S. 892. Bill to smend the Federal Grant and Cooperative Agreement Act (Rept. No. 97-180)

By Mr. ROTH, from the Committee on Governmental Affairs, without amendment: S. Res. 203. An original resolution waiv-

section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 10; referred to the Committee on the Budget.

Under the authority of the order of the Senate of August 3, 1981, the following reports of committees were submitted on August 27, 1981:

By Mr. WALLOP, from the Committee on Energy and Natural Resources, favorably with amendments:

S. 187. Bill to authorize the Secretary of the Interior to convey certain lands near Miles City, Mont., and to remove certain reservations from prior conveyances (Rept. No. 97-181).

By Mr. WALLOP, from the Committee on Energy and Natural Resources, favorably without amendment:

S. 634. Bill to authorize the exchange of certain lands in Idaho and Wyoming (Rept. No. 97-182).

S. 763. Bill to authorize and direct the Secretary of the Interior to convey, by quitclaim deed, all right, title, and interest of the United States in and to certain lands that were withdrawn or acquired for the purposes of relocating a portion of the city of American Falls out of the area flooded by the American Falis Reservoir (Rept. No. 97-183)

S. 764. Bill to provide for protection of the John Sack Cabin Tarshee National For-est in the State of Idaho (Rept. No. 97-

H.R. 618. Bill to convey certain interests in public lands to the city of Angels, Calif.

(Rept. No. 97-185). H.R. 2218. Bill to direct the Secretary of Agriculture to convey certain National Forest System lands in the State of Nevada, and for other purposes (Rept. No. 97-186).

Under the authority of the order of the Senate of August 3, 1981, the following report of a committee was submitted on September 3, 1981:

By Mr. WALLOP, from the Select Committee on Ethics, without amendment:

S. Res. 204. An original resolution expelling Senator Harrison A. Williams, Jr., of New Jersey, from the Senate (Rept. No. 97-

JOINT REFERRAL OF S. 1256

Mr. BAKER. Mr. President, I ask unanimous consent that S. 1256, the Retail Dealers Agreement Act, be jointly referred to the Committee on Judiciary and the Committee on Commerce, Science, and Transportation.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. STENNIS (for himself and Mr. SASSER):

S. 1598. Bill to establish a National Commission on Interest Rates; by unanimous consent, held at the desk until no later than the close of business on September 11, 1981.

By Mr. ROBERT C. BYRD: S. 1599. Bill for the relief of Olivia A. N. Dizon, M.D.; to the Committee on the

Judiciary.

By Mr. MOYNIHAN (for himself, Mr. ROBERT C. BYRD, and Mr. SARBANES):

ROBERT C. BYRD, and Mr. SARBANES): Social Security Act to permit borrowing between Social Security trust funds under specified conditions when necessary to assist in financing the old age and survivors program; to the Committee on Finance.

By Mr. RUDMAN (for Mr. Roth) (for himself and Mr. Levin):

S. 1601. Bill to provide for the direct participation of affected interests in the development of rules by establishing a procedure for the establishment and activities of regulatory negotiation committees; to the Committee on the Judiciary.

By Mr. HELMS: S. 1602. Bill to amend Public Law 96-389; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HEINZ:
S. 1603. Bill to amend the Internal Revenue Code of 1954 to provide a partial interest exclusion for taxable years beginning in 1983 or 1984; to the Committee on Finance.

By Mr. ROBERT C. BYRD (for him-self, Mr. Sasser, Mr. Chiles, Mr. BAUCUS, Mr. DODD, Mr. PRYOR, Mr. HART, Mr. MITCHELL, and Mr. Sar-BANES):

S.J. Res. 107. Joint resolution to designate the 7th day of October, 1981 as "Na-tional Guard Day."; to the Committee on the Judiciary.

STATEMENT ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. STENNIS (for himself and Mr. SASSER):

S. 1598. A bill to establish a National Commission on Interest Rates; by unanimous consent, held at the desk until no later than the close of business September 11, 1981.

The remarks of Mr. STENNIS and Mr. Sasser on this legislation appear earlier in today's RECORD.

By Mr. MOYNIHAN (for himself, Mr. ROBERT C. BYRD, and Mr. SARBANES):

S. 1600. A bill to amend title II of the Social Security Act to permit borrowing between social security trust funds under specified conditions when necessary to assist in financing the old age and survivors program; to the Committee on Finance.

BORROWING BETWEEN SOCIAL SECURITY TRUST FUNDS

Mr. MOYNIHAN. Mr. President, few issues have aroused so much public concern and comment in recent months as the financial status of the social security trust funds, of which there are, of course, three principal funds: The OASI, as it is called, the basic retirement benefit established under President Roosevelt; the disability insurance, DI, established under President Eisenhower; and the health insurance, HI, established under President Johnson.

There has not been a great deal of dispute that there is a short-term problem with respect to the first of these funds and it will in fact run out of money in about 18 months' time if there is not some provision made to prevent that.

A number of steps may have to be taken, of which the first and indispensable is that we permit ourselves the simple measure of borrowing between the several funds, one to the other.

I have announced that I would introduce legislation to this effect and I am doing so today. The bill I introduce would allow borrowing between the one social security fund that has a shortrange financial problem, that is to say the old age and survivors insurance fund. and the two solvent funds, the disability fund, and the hospital fund. The borrowed money would be repaid with interest to insure that it is not devalued by inflation. But it is all social security money. As such, it is perfectly in keeping with the system's purpose that money from one fund be used to meet the expenses of another.

On a related matter, Mr. President, according to the Social Security Administration, the reconciliation bill, as signed by the President early last month, will save the social security trust funds in their aggregate some \$28.2 billion over the next 5 years. Combined with interfund borrowing, this savings does bring the prospect of stabilizing the system's near-term financial difficulties clearly in sight.

Whatever else we do, we must begin by the fund transfer and I would urge that we act quickly in this regard.

Mr. President, the debate, while not always clarifying in these matters, has had one important result so far, I believe, which is that it is clearly distinguished in the public mind and in the view of the press that there is a nearterm matter, which is that of the first few years or perhaps this decade coming. coming at some point in this decade, we have shallows to go through, followed by a very substantial surplus period and then in the next century a new situation that arises from the demography of the large increase in population that took place in the 1950's and 1960's, followed by the dropoff in the birth rate of the 1970's and what may be the 1980's or may not be. That has not happened yet.

In any event, Mr. President, I believe that the opportunity to proceed in an atmosphere of fact and of reasonable respect for the difficulties of projections and reasonable concern for prudent management of these moneys has been established. I think we can do that. I think clearly the first measure will be to provide for interfund borrowing with that interest to be repaid.

Mr. President, I ask unanimous consent that the name of the Senator from West Virginia, the distinguished minority leader, be added as a cosponsor of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. RUDMAN (for Mr. ROTH and Mr. Levin):

S. 1601. A bill to provide for the direct participation of affected interests in the development of rules by establishing a procedure for the establishment and activities of regulatory negotiation committees; to the Committee on the Judiciary.

REGULATORY MEDIATION ACT OF 1981

e Mr. ROTH. Mr. President, the serious problems of our regulatory process demand innovative solutions which go beyond merely adding more procedures and hence delays to the existing system. One of the most promising approaches to regulatory reform does not rely on the courts, the Congress, or the President. Rather, it draws on the great expertise of the American public by bringing together the interests that will be affected by a regulation with representatives of the agency to negotiate the actual terms of the regulation. The legislation I am introducing today will establish an alternative mechanism for the resolution of regulatory issues, a mechanism which gets the parties involved at an early stage to negotiate rather than late in the process to litigate.

While agencies were seen during the New Deal as experts who could be trusted as the guardians of the public interest to reach right answers with a minimum of procedural formality, for the past decade they have been viewed more as umpires assessing competing claims. Agencies have generally been required to develop a strong support for any facts that are necessary for their decisions and required to explain in considerable detail the background of any

rule. Courts have taken a hard look at the agency's action to be sure it is within the confines of the broad discretion granted by Congress and an adequate factual basis developed. Additional safeguards prohibit the agency from communicating with outside people during the rulemaking process or from convening an advisory committee that may be biased or hold excessive sway with the

Many of these restrictions are designed to insure that the agency exercises its own judgment, untempered by corrupting influences of outsiders even though the procedural rights of parties to participate in the process have grown. This participation, however, generally means that the party may submit information for consideration by the agency and may challenge information submitted by others, not share in the ultimate decision. Since Congress no longer provides standards that guide agencies' decisions, which once formed the basis of the political legitimacy of delegated authority. and agencies are no longer viewed as neutral ex erts, the political legitimacy regulations currently issued by Government agencies derives largely through the elaborate procedures that are designed to insure their rationality. Along with this development, rulemaking has an adversarial process.

While these procedures—often called hybrid rulemaking procedures-are usually appropriate, they can also inhibit the ability of an agency to tap the enormous resources of the American people by getting the interested parties together to negotiate a rule that would be acceptable to Congress, the agency, and all affected parties. Negotiating a rule may be far more effective in appropriate situations than the elaborate procedures that have been constructed over the years. If they concur in a regulation, the results of their negotiation should be broadly acceptable so long as the outcome meets the standard embodied in a statute passed by Congress. In that case, the elaborate procedures designed to protect the integrity of the decision of Congress surrogate, the regulatory agency, are not nearly as important. Rather, the political legitimacy of the rule would stem from the agreement of the parties in interest concerning the rule.

We believe it would be appropriate to undertake a pilot project to authorize the use of mediation and negotiation in developing proposed rules, and this bill would provide a pilot program for 2 years to test its success.

These procedures are likely to succeed when there are only a few identifiable interests, each of which has sufficient power to block the unfettered exercise of the others' will. If any party has the power to impose its will, that party will undoubtedly attempt to do so whether in negotiation or in the traditional process. The parties would have an incentive to participate in these proceedings precisely because they would be sharing in the decision. Moreover, it affords the parties the opportunity to make trade-offs concerning various aspects of a regulation. Thus, the parties are in a better position to maximize the relative interests under

this procedure than if an agency merely surveyed the record and wrote a rule that involves an element of randomness for all the parties.

While parties currently participate in the regulatory process by means of a series of one-on-one conversations with the agencies, direct communications among themselves and attempts to negotiate a final rule occur rarely at best. That is not to say, however, that these procedures are radical or unknown. In fact. Congress has on many occasions authorized similarly constituted groups to define rules that have large financial consequences for a particular industry. For example, the Securities Act Amendments of 1975 establishes several boards composed of affected interests to prescribe rules that govern the trading of securities.

In addition, private interests and regulatory agencies regularly negotiate the settlement of lawsuits that were filed to challenge the validity of a regulation. The results of the settlement negotiations frequently define the actual contours of the final regulation. This form of regulatory negotiation lacks the safeguards provided by this act and yet is an everyday occurrence. In addition, there are numerous examples of the use of negotiation and mediation in the settlement of complex environmental disputes, and there are a great number of committees that write technical standards that regulate many aspects of our daily lives.

What is novel is the recognition that the parties in interest may be able to develop a regulation in a far shorter time than has been customary, by bringing to bear first-hand expertise and at far less cost to the American taxpayers if only given the opportunity to do so. We believe we should provide a test to determine whether that is indeed the case, and the Regulatory Mediation Act does just that.

The bill would allow any agency or other interested person to petition the chairman of the Administrative Conference of the United States (chairman) to make a preliminary determination whether the subject matter of the proposed rule is appropriate for using regulatory negotiation procedures. It is important at this stage for someone to conduct discrete inquiries with the agency and with the interested parties (indeed to discover who the interested parties are) to see whether there is enough common ground that an agreement might be reached.

It seems appropriate to have some neutral, third party to do this, as opposed to the agency itself, because the interested parties may be afraid of talking to the agency for fear of retribution if they do not go along or they might begin posturing vis-a-vis the agency as part of an adversarial process. The use of a third party should therefore provide greater candor. The Administrative Conference was selected because of its expertise in administrative procedure, and its neutrality is assured because of the breadth of the Conference's membership, but any other neutral, third party could be used for this purpose.

If the Chairman believes that regulatory negotiation would be feasible, he may recommend to the agency that it be followed. He would also recommend the members, whether or not to employ the services of a mediator, the tentative issues to be discussed, and a schedule for its activities. This information would be based on the informal survey he conducted. The Chairman would be authorized to retain the services of an expert in making that preliminary inquiry and that expert would likely be the mediator because an element of trust would build up as part of that informal process.

It may be, however, that an ongoing organization consisting of representatives of affected interests already exists, and the Chairman could recommend the use of that existing organization as a regulatory negotiation committee. For example, it may be that an agency is interested in an aspect of building safety and the National Fire Protection Association has an existing committee which would fulfill the needs of this statute, in which case it could be so designated.

The Chairman is directed to make reasonable efforts to insure that the committee consists of individuals who are competent in the subject matter of the proposed rule and that it is balanced so that no interest or group of allied interests constitutes more than one-third of a committee's membership. There may be instances, however, where such balance cannot be achieved, and the bill would not impose an artificial requirement that additional people be brought in.

If the Chairman recommends that a regulatory negotiation committee be established, the agency may in its discretion elect to use the procedures established by this act as opposed to the normal rulemaking procedures. The agency may decide not to follow the recommendations of the Chairman and either not issue a rule at all or follow more traditional procedures. It would be ineffective to authorize the Chairman to force the agency to use a particular procedure when in fact it did not want to because the agency would have every incentive to sabotage the results of the committee's work.

On the other hand, if the agency does decide to use these procedures, it would be required to use the committee proposed by the Chairman unless the Chairman and the agency agree otherwise. The reason for this requirement is to take advantage of the findings made by the Chairman as a neutral third party and to make clear to everyone that the agency is not stacking the committee in its own favor. The agency can negotiate any qualms it may have about the committee with the Chairman.

The agency is also directed to appoint a senior official as a representative of the agency on the regulatory negotiation committee. It is contemplated that the agency would participate in the committee as a voting member, just as any other interest. The agency certainly has a perspective and would, of course, be interested in the subject matter of the regulation.

The agency should participate fully in the negotiating group because a number of the other programs in which an agency has agreed to consider the fruits of negotiation by outside groups, even when the agency monitors the proceedings, have failed because the agency was not a substantive, contributing part of the committee itself. The senior official would be able to express the concerns and viewpoints of the agency and have them taken into account by the other parties and interests.

It is not impermissible to have the agency participate in this way because the political integrity of the process comes from the fact that organizations which would otherwise be interested in the regulation are also represented on the committee and the clash of ideas and positions will lead to a politically acceptable result. Moreover, as will be described, sareguards are built into the process.

The agency would publish a notice in the Federal Register describing its intention to use the regulatory negotiation committee and call for comment on the composition of the committee, the interests represented, the issues to be considered, and the schedule. After considering the comments that are received pursuant to the notice, the agency would formally establish the committee and it would begin work.

The mediator is charged with the responsibility of chairing the meetings, aiding the members in conducting discussions and assisting in deliberations of the committee as well as keeping Congress informed of the affairs of the committee. The mediator's responsibility overall is to facilitate communication among the members. The mediator is not to participate in the vote or other forms of agreement.

Under the bill as introduced, a proposed rule of a regulatory negotiation committee must have the support of all members of the committee. No interest therefore need fear being outvoted by its adversaries, and the requirement of unanimity adds pressure for constructive compromise. Whether such unanimity is crucial for the functioning of the process, however, is a question which will be considered by the committee during hearings.

The committee will prepare a report after it completes its work which contains the proposed rule amplified by a brief explanation. It may or may not, depending on the judgment of the committee, explain any issues on which consensus was not reached. The report is to be submitted to the agency, to each substantive congressional committee with jurisdiction over the subject matter, and to the Director of the Office of Management and Budget. Reports are furnished the latter two so they may communicate any substantial concerns they may have with the proposed rule to the agency before it is used as the basis for a notice of proposed rulemaking, although the mediator should have been in touch with each so their concerns should have already been addressed by the committee.

It is then contemplated that the agency will publish the proposed rule in a notice of proposed rulemaking pursuant

to section 553 of the administrative Procedure Act unless the agency has good cause for not doing so. It is, therefore, contemplated that the agency will review the proposal of the regulatory negotiation committee to insure that it conforms with the will of Congress as expressed in the substantive statute and conforms to the policy of the agency. If the agency believes that the proposal falls short of one of these, it may propose a modification of the proposal. However, the agency is directed to publish the regulatory negotiation committee proposal verbatim and the suggestions of the agency to change that proposal are to be separately stated so the public can make appropriate comments.

Following the notice of proposed rule-making, the agency should treat it like any other proposed rule and modify it according to the substantive comments submitted. To the extent the notice of proposed rulemaking reflects a consensus among the respective interest groups, this process should not be time consuming since there should be few surprises. Thus, it is anticipated that the normal rulemaking process may be abbreviated. Publication is to insure that the appropriate interests were in fact represented and to serve as a check on the integrity of the consensus.

Because the political legitimacy of the regulation developed pursuant to a regulatory negotiation committee lies in the agreement among the interested parties, and not on the research of its factual predicate, it is not contemplated that the notice of proposed rulemaking or the statement of basis and purpose would have complex explanations of factual research that has been conducted. Rather, it is hoped that in most instances the parties will be able to narrow the range of research that needs to be conducted before a consensus can be reached and to conduct that research jointly.

To the extent that research Jonus. To the extent that substantial research must be done, the topic is probably not appropriate for regulatory negotiation procedures. That is not to say, however, that anything even as complex as exposure to toxic chemicals cannot be the subject of this procedure, even though the full extent of the chronic hazard posed by the chemicals may not be known; rather, the parties may still be able to agree on the procedures to protect the human environment even without detailed knowledge about the workings of the chemicals.

To the extent this prediction is borne out, the negotiation process should be more expeditious than the traditional rulemaking procedure which is consumed with the delay attendant to research, criticism, and reconciliation of competing contentions over facts and their consequences.

Regulatory negotiation committees would be exempted from the Federal Advisory Committee Act and any restriction on ex parte communications precisely because their function is to facilitate discussions among the interest groups, including the agency. Information and records submitted to the committee are exempt from the Freedom of Information Act. The normal protections are af-

forded by the composition of the committee.

This legislation will terminate after 3 years and the Administrative Conference is authorized to expend \$150,000 annually to fulfill its responsibilities under the bill.

Even where the regulatory negotiation committee is unable to reach an agreement and must disband without offering a recommendation to the agency, the process will still have been of inestimable value to the agency. By narrowing the areas of disagreement and identifying those issues on which each participant feels strongly, the negotiation process will help the agency to develop a regulation which will later meet with popular acceptance. Agencies will also benefit by the expertise of interested parties who will be able to point out flaws in the agencies' analysis and data base thereby improving any regulation which is eventually issued. The regulatory process can only be improved by opening up the initial stage of agency decisionmaking to interested parties for their comments and analysis.

Setting regulations through the use of negotiation and mediation techniques has large promise and embodies the American way of doing things by consensus. We believe it should be tried.

By Mr. HEINZ:

S. 1603. A bill to amend the Internal Revenue Code of 1954 to provide a partial interest exclusion for taxable years beginning in 1983 or 1984; to the Committee on Finance.

SMALL SAVERS INCENTIVE ACT

• Mr. HEINZ. Mr. President, the bill I am introducing today, the Small Savers Incentive Act, is important to both small savers and this country's savings institutions. As a result of the tax legislation recently passed there will be a 2-year period from January 1, 1983 through January 1, 1985 during which there will be no incentive for new investments at savings institutions. The all savers certificates program will have ended and no new incentive will exist until the onset of a \$450 (\$900 for joint returns) exemption for interest income beginning in 1985.

The willingness of Americans to save for their own future and to invest in the future of this Nation has always been an engine of economic progress. Since World War II, family savings have provided for the construction of 57 million units of housing, the creation of millions of jobs and billions of dollars of production.

The importance of family savings to the economic health of this country was a fundamental reason for the tax cuts we enacted. Major disincentives to savings were removed, but there is still more work to be done. I am therefore introducing the Small Savers Incentive Act which provides for an exclusion from taxes of \$200 (\$400 for joint returns) of annual interest income for that period between January 1, 1983 and December 31, 1984. It is vital that the gap left by the recent tax legislation be filled and the flow of new savings be uninterrupted. I shall look forward to the support of my respected colleagues.

By Mr. ROBERT C. BYRD (for himself, Mr. Sasser, Mr. Chiles, Mr. Baucus, Mr. Dodd, Mr. PRYOR, Mr. HART, Mr. MITCHELL, and Mr. Sarbanes):

S.J. Res. 107. A joint resolution to designate the 7th day of October 1981 as "National Guard Day"; to the Committee on the Judiciary.

(The remarks of Mr. ROBERT C. BYRD on this legislation appear elsewhere in today's RECORD.)

JOINT REFERRAL OF A BILL

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senator from Pennsylvania (Mr. Heinz) introduces the nuclear insurance bill, it be jointly referred to the Committee on Energy and Natural Resources and the Committee on Environment and Public Works.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL COSPONSORS

S. 186

At the request of Mr. Dole, the Senator from West Virginia (Mr. Randolph) was added as a cosponsor of S. 186, a bill to provide financial assistance to the States to undertake comprehensive criminal justice construction programs to improve the criminal justice system of the States, to provide that the Secretary of the Treasury is authorized to make interest subsidy payments on criminal justice facility construction bonds, and for other purposes.

S. 391

At the request of Mr. Chafee, the Senator from Pennsylvania (Mr. Heinz), and the Senator from New Hampshire (Mr. Humphrey) were added as cosponsors of S. 391, a bill to amend the National Security Act of 1947 to prohibit the unauthorized disclosure of information identifying agents, informants, and sources and to direct the President to establish procedures to protect the secrecy of these intelligence relationships.

5. 895

At the request of Mr. Mathias, the Senator from Michigan (Mr. Riegle) was added as a cosponsor of S. 895, a bill to amend the Voting Rights Act of 1965 to extend certain provisions for an additional 10 years, to extend certain other provisions for an additional 7 years, and for other purposes.

S. 1080

At the request of Mr. Laxalt, the Senator from Virginia (Mr. Warner) was added as a cosponsor of S. 1080, a bill to amend the Administrative Procedures Act to require Federal agencies to analyze the effects of rules to improve their effectiveness and to decrease their compliance costs; to provide for a periodic review of regulations; and for other purposes.

S. 1131

At the request of Mr. Danforth, the Senator from Colorado (Mr. Armstrong), and the Senator from Oregon (Mr. Packwood) were added as cosponsors of S. 1131, a bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

S. 1171

At the request of Mr. Cochran, the Senator from Indiana (Mr. Lugar) was added as a cosponsor of S. 1171, a bill to repeal the residential conservation service program and the commercial and apartment conservation service program.

S. 1215

At the request of Mr. Kasten, the Senator from Maine (Mr. Cohen), and the Senator from North Dakota (Mr. Burdick) were added as cosponsors of S. 1215, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1448

At the request of Mr. Mathias, the Senator from Pennsylvania (Mr. Heinz), and the Senator from Indiana (Mr. Lugar) were added as cosponsors of S. 1448, a bill to provide for the issuance of a postage stamp to commemorate the 70th anniversary of the founding of the Girl Scouts of the United States of America.

5. 1509

At the request of Mr. Heinz, the Senator from Florida (Mr. Chiles) was added as a cosponsor of S. 1509, a bill to amend title XVIII of the Social Security Act to change the method of medicare reimbursement for competitive medical plans.

S. 1528

At the request of Mr. PROXMIRE, the Senator from Maryland (Mr. SARBANES), the Senator from Alabama (Mr. Heflin), the Senator from Oklahoma (Mr. Boren), and the Senator from Colorado (Mr. Hart) were added as cosponsors of S. 1528, a bill to amend the Social Security Act to provide for improved management of the social security trust funds and increase the return on investments to those funds.

8. 1548

At the request of Mr. Stafford, the Senator from Colorado (Mr. Hart), the Senator from Pennsylvania (Mr. Heinz), and the Senator from South Carolina (Mr. Thurmond) were added as cosponsors of S. 1548, a bill to repeal the Federal outdoor advertising control program, and for other purposes.

SENATE JOINT RESOLUTION 97

At the request of Mr. MITCHELL, the Senator from Pennsylvania (Mr. Specter), and the Senator from Maryland (Mr. Sarbanes) were added as cosponsors of Senate Joint Resolution 97, a

joint resolution to designate the second full week in October as "National Legal Secretaries' Court Observance Week."

SENATE RESOLUTION 200

At the request of Mr. Hollings, the Senator from North Carolina (Mr. East), the Senator from Florida (Mrs. Hawkins), the Senator from Iowa (Mr. Jepsen), the Senator from Georgia (Mr. Mattingly), the Senator from West Virginia (Mr. Randolph), the Senator from South Carolina (Mr. Thurmond), and the Senator from Missouri (Mr. Danforth) were added as cosponsors of Senate Resolution 200, a resolution expressing the sense of the Senate with respect to the scheduled meeting of the Interparliamentary Union in Havana, Cuba, in September 1981.

SENATE RESOLUTION 203—ORIGINAL RESOLUTION REPORTED DURING THE ADJOURNMENT WAIVING THE CONGRESSIONAL BUDGET ACT

Under the authority of the order of the Senate of August 3, 1981, Mr. Roth, from the Committee on Governmental Affairs, reported the following original resolution on August 13, 1981; which was referred to the Committee on the Budget:

S. RES. 203

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 10, to create a Commission on More Effective Government. Such waiver is necessary to permit consideration of an additional fiscal year 1982 authorization of appropriations to carry out the purpose of S. 10.

Such waiver is necessary as S. 10 was not reported before May 15, 1981, as required by section 402(a) of the Congressional Budget

Act of 1974.

Because of the need, however, for a broad review of the operation of government, and because of the constructive contribution that th S. 10 Commission can make to improving governmental performance, the Congress should give early and favorable consideration to the passage of S. 10.

SENATE RESOLUTION 204—ORIGINAL RESOLUTION REPORTED DURING THE ADJOURNMENT EXPELLING SENATOR HARRISON A. WILLIAMS, JR., OF NEW JERSEY FROM THE SENATE

Under the authority of the order of the Senate of August 3, 1981, Mr. Wallop, from the Select Committee on Ethics, reported the following original resolution on September 3, 1981; which was placed on the calendar:

S. RES. 204

Resolved, That the conduct of Senator Harrison A. Williams, Junior, of New Jersey in connection with his agreement to use his official position to further a business venture in which he and others had a financial interest was in violation of the laws of the United States and the Standing Rules of the Senate, was ethically repugnant, and tends to bring the Senate into dishonor and disrepute; and that therefore, pursuant to article 1, section 5, clause 2 of the United States Constitution, Senator Harrison A. Williams, Junior, be, and hereby is, expelled from the United States Senate.

SENATE RESOLUTION 207—RESO-LUTION RELATING TO REFORM OF SEXUAL ASSAULT LAWS IN THE DISTRICT OF COLUMBIA

Mr. DENTON (for himself, Mr. Helms, Mr. East, and Mr. Hatch) submitted the following resolution; which was referred to the Committee on Governmental Affairs:

S. RES. 207

Resolved, That the Senate disapproves of the action of the District of Columbia Council described as follows: The Act entitled "An Act to reform the sexual assault laws of the District of Columbia, and for other purposes," approved July 21, 1981 (D.C. Act 4-69) transmitted to the Congress pursuant to section 602(c) of the District of Columbia Self-Government and Governmental Reorganization Act on July 21, 1981.

 Mr. DENTON. Mr. President, I am today submitting a resolution to disapprove the District of Columbia Council's action in repealing certain aspects of the District's laws governing illicit sexual activity. I am joined by Senators Helms, East, and Hatch.

Under the District of Columbia Self-Government Act, I believe that the District of Columbia should have the right to make and abide by its own laws, except in extraordinary circumstances. In passing bill 4-69, the City Council has created one of those extraordinary circumstances.

The District of Columbia should not be in the forefront in further liberalization of laws regarding sexual behavior. As the Nation's Capital, this city should not be the place where social experiments are performed, where centuries of legal tradition are thrown out the window. Rather, this city should be governed by standards which conform with the long-standing national consensus on these matters.

Recently there have been several episodes involving illicit sexual activity which have tended to bring disrepute on the city of Washington, and Capitol Hill in particular. If we do not object to the legalization of such activity, we will be sending a signal to the American people concerning our own standards of conduct—those of the Congress of the United States. That is a signal which the people will note.

Simply put, the city does not need to look or act any worse in representing this Nation—this "One Nation Under God"—to Americans, or to visitors from abroad

D.C. bill 4-69 would remove criminal sanctions against the practice of sodomy. It would not view as a crime a teacher's seduction of a 16-year-old student. It would permit bestiality. In short, the D.C. bill would legalize virtually all consensual sex for those 16 years of age and older.

In addition, it would reduce the maximum penalty for forcible rape from life imprisonment to 20 years. The time actually served would be an insufficient deterrent to this most heinous crime. The word "rape" would be removed, reducing the stigma of the offense and decreasing the chance that a proper sentence would be imposed. The stark na-

ture of the offense is blurred by a legal euphemism that will confuse juries, and the reduced maximum sentence will in some cases have the convicted rapist back on the streets in perhaps 3 to 4 years.

This bill is offensive in many respects, but the changes with regard to rape are especially offensive to women, and the changes with regard to consent to sexual activity at age 16 would pose a danger to youngsters.

Finally, I would point out that Federal law does not prohibit these activities which would be legalized by the bill. Rather, the Federal Government relies on the local legislative authority, plus the Assimilative Crimes Statute, to set down standards governing conduct in public buildings in the country's seat of Government. In this sense, the D.C. Government has become the rulemaking body for the Federal Government which binds it to a set of standards for conduct.

Mr. President, we are not talking about extending the moral arm of the Government into the unknown. We are talking about whether to repeal statutes that have been on the books 80 years. To the best of my knowledge, there have not been allegations that enforcement has been overreaching or overly intrusive. In fact, recent application of the laws suggest to me that both the Congress and the American people will not support decriminalization of illicit sexual activity.

I would therefore urge my colleagues to join me in expediting consideration and adoption of this resolution.●

NOTICES OF HEARINGS

SUBCOMMITTEE ON TAXATION AND DEBT
MANAGEMENT

Mr. PACKWOOD. Mr. President, the Subcommittee on Taxation and Debt Management of the Senate Finance Committee will hold a hearing at 9:30 a.m. on Friday, September 11, 1981. The subject of the hearing will be the extension of the temporary limit on the public debt.

The debt limit ceiling is currently \$985 billion. On September 3, 1981, the outstanding debt limit was \$980.5 billion.

The Treasury Department will recommend that the public debt ceiling be raised from \$985 billion in fiscal year 1980 to \$999.8 billion in fiscal year 1981 and to \$1,079.8 billion in fiscal year 1982.

The Honorable Roger Mehle, Assistant Secretary of the Treasury for Domestic Finance, will testify on behalf of the administration.

SUBCOMMITTEE ON FEDERAL EXPENDITURES, RESEARCH, AND RULES

Mr. DANFORTH. Mr. President, the Subcommittee on Federal Expenditures, Research, and Rules of the Committee on Governmental Affairs will hold a hearing on Thursday, September 17, 1981, to consider S. 719, the Consultant Reform and Disclosure Act of 1981. The hearing is scheduled to begin at 9:30 a.m. in room 3302 of the Dirksen Senate Office Building. The hearing was previously scheduled for September 15.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public additions to the agenda of the nominations hearing scheduled before the full committee for Monday, September 14 at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

The committee will also consider the nominations of Guy W. Fiske to be Under Secretary of Energy and Robert C. Horton to be Director of the U.S. Bureau

of Mines.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this

hearing, you may wish to contact Mr. David Doane at 224-7144 or Mr. Gary Ellsworth at 224-7146.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Energy and Mineral Resources. The hearing will be held on Thursday, September 17, beginning at 2 p.m. in room 3110 of the Dirksen Senate Office Building to consider S. 1575, the Combined Hydrocarbon Leasing Act of 1981.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy and Mineral Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing, you may wish to contact Mr. Bob Terrell at 224-3086.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, September 10, at 2 p.m., to hold nomination hearings on Robert Monks, Victor Thompson, C. Howard Wilkins, and Victor Schroeder to be Members of the Board of the U.S. Synfuels Corporation.
The PRESIDING OFFICER. Without

objection, it is so ordered.

COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be authorized to meet on Thursday, September 10, at 2 p.m., to hold a confirmation hearing on the nomination of Robert Hunter to be a member of the NLRB.

The PRESIDING OFFICER. Without

objection, it is so ordered.

SUBCOMMITTEE ON CRIMINAL LAW

Mr. BAKER. Mr. President. I ask unanimous consent that the Subcom-

mittee on Criminal Law of the Committee on the Judiciary be authorized to meet during the session of the Senate on Monday, September 14, to hold a hearing on S. 1434, a bill dealing with the Act of State Doctrine.

The PRESIDING OFFICER. Without

objection, it is so ordered.

ADDITIONAL STATEMENTS

WILLIAM J. CASEY

 Mr. GOLDWATER, Mr. President, I submit, for printing in the RECORD, the following information, provided by Mr. William J. Casey, Director of Central Intelligence. This information supplements the list of clients submitted by Mr. Casey at the time of his confirmation hearing, which appears in the RECORD of January 27, 1981.

The information follows:

TRIBUTE TO ROY WILKINS

• Mr. DURENBERGER. Mr. President, yesterday, our country lost a great citizen. All people who celebrate human dignity as a basic right of every man, woman, and child are saddened by the death of Roy Wilkins. Mr. Wilkins dedicated his 80 years with us to the cause of human dignity and all of us are immeasurably better off for his work and accomplishments.

Because of Mr. Wilkins' ties to my State, we in Minnesota have a special sadness. Mr. Wilkins moved to St. Paul when he was 3 and lived there until his graduation from the University of Minnesota. In fact, it was at the University of Minnesota where he received his training in journalism, serving as the night editor of the school paper, the "Minnesota Daily."

All people, though, share the loss left by his death. Many of the most important gains we have made in civil rights

are due in no small part to the lifetime efforts of Mr. Wilkins. While other civil rights leaders may have attracted more headlines, especially in recent years, it was Mr. Wilkins who, decades earlier, had created for them the opportunity to find a national forum.

There is a plaque in my office that I think is especially appropriate in describing the life of Roy Wilkins. It reads, "The sign of God is that we will be led

where we did not plan to go."

Mr. Wilkins planned to be a journalist. But, as he quickly learned, one cannot record the events of a society without being outraged by the abuses that society inflicts on some of its members. It was not enough for Mr. Wilkins to write about the injustice he saw every day; he was compelled by a driving spirit to eradicate that injustice.

As the Washington Post said:

Today's young Americans of all races may read with a certain understandable detachment about life in this country 50 years ago, when Roy Wilkins began his distinguished career with the National Association for the Advancement of Colored People.

That is true. But whether they know it or not, today's generation—as well as all people-will miss Roy Wilkins.

TENNESSEE FARMERS SUFFER FROM HIGH INTEREST RATES

• Mr. SASSER. Mr. President, while the high interest rates we are now experiencing hurt virtually every sector of our economy, they are particularly burdensome for American farmers. Farming is one of the most-credit sensitive sectors of our economy. Farmers must borrow for equipment, fertilizer, and seed. If they do not borrow, they cannot produce; it is often that simple.

And while farmers in Tennessee and the rest of this country are the most productive in the world, they are finding that their very livelihoods are threatened by the excessively high interest rates we

are now experiencing.

The 20-percent prime rates and a prosperous farming community do not go hand in hand in Tennessee or elsewhere and it is time that the administration and the Congress devote considerable attention to bringing interest rates down and easing the fiscal crunch on the farmers of Tennessee and their counterparts throughout the country.

Mr. President, I ask that a recent article from the Nashville Banner, dealing with the impact of interest rates on Tennessee farmers, be printed in the RECORD.

The article follows:

As FINANCIAL SQUEEZE TIGHTENS-HIGH IN-TEREST RATES TAKE TOLL ON STATE FARMS

(By Pete Bird)

Tennessee's \$1.8 billion agriculture industry, battered by stiff interest rates and rising prices for everything from fertilizer to farm equipment, is undergoing its worst period since the Depression.

From the soybean fields of West Tennessee to the tobacco-laden hills of the east, inflation has slashed the profit margins of some farms while plunging others into the red. At the same time, the rising cost of boroved capital was

rowed capital has forced some of the state's 92,000 farms to sink deeper in debt in order to survive another year.

Ironically, farmers are unable to pass along

their cost increases as manufacturers or re-tailers might. That's because those who suffer drought and high borrowing costs have to sell their goods on the same markets as those with plenty of rain and money.

According to the U.S. Agriculture Depart-

ment, prices for crops and livestock rose than 40 percent between 1974 and mid-1981. During the same period, farm operating costs

jumped more than 80 percent.

For those who own their own farms and equipment, the crunch has been merely uncomfortable. For young farmers with heavy debt loads, it has become almost unbearable.

Jerry Rose, president of the Cookeville Production Credit Association, the major source of financing for 9,500 farmers in 12 Midstate counties, said the agency has fore-closed on more than 150 farms during the last 12 months.

In the last two years, the Cookeville PCA has charged off about \$4.5 million of its \$130 million in outstanding farm loans—more than in the previous 46 years combined.

"If we don't have an exceptionally year," warned Jere Griggs, who stepped down July 1 as the state commissioner of agricul-"more farmers will be forced out or forced into bankruptcy."

As the financial squeeze has tightened, farmers have become more business-minded than ever. Some are utilizing computers to project cash flow and keep tabs on production costs. Timing the sale of crops has become critical.

"Out of necessity, farmers have become more aware of farm management tools," said Clark Garland, professor of agricultural eco-

nomics at the University of Tennessee.

But even some of the best farmers, including the 300 or so participating in a UT program designed to demonstrate the imortance of sound farm management, facing financial difficulties, Garland added.
In 1979, the average net income of the

300 farms was \$15,977. But in 1980, the earnings plunged 70 percent to \$4,787. The decline reflected a combination of higher expenses, drought and low prices for livestock and crops.

Suffering the sharpest reversal were cash grain farmers, who lost an average of \$4,102 last year after making an average profit of \$13,949 in 1979. Swine farmers and part-time farmers also lost money.

Dairy farmers, in contrast, experienced only a 32 percent decline in net income to \$19,267 in 1980 from \$28,482 a year earlier. Inflation is the major culprit, most ana-

A cotton picker that cost \$20,000 six years ago now costs \$40,000. Fuel costs have more than tripled, dealing a stinging blow to row croppers dependent on tractors for plowing and planting.

"The cost of equipment has become ridiculous," said Wayne Moss, who farms about 500 acres near Cookeville. "We bought a tractor for \$4,500 in 1972. The same one would cost us \$14,000. I remember when we bought diesel fuel at 17 cents a gallon. We paid \$1.16 this year."

Moss said that in a good year, he'll make \$15,000 to \$20,000 on a gross income of \$100,-000 from corn, soybeans, tobacco and hogs. Last year, he barely broke even.

"This is what I've always wanted to do," the 28-year-old farmer said. "But it's getting discouraging."

Average Tennessee farm net income*

1973	 \$12, 157
1974	 7, 667
1975	 7,905
1976	 10,605
1977	 8,580
1978	 16, 878
1979	 15,977
1980	 4, 787

Data from approximately 300 farms participating in the University of Tennessee's resource management program.

For some, it's worse than that. Griggs said there's a prevailing attitude of pessimism these days in an industry where optimism once abounded.

"I ran into a young man in his early 30s the other day," the former agriculture commissioner said. "He had a good operation but a lot of debt. He told me he was ready to quit. He was tired of fighting the pres sure.

He's not the only one throwing in the towel. Between 1975 and 1980, the number of farms in Tennessee dropped to 92,000 from 102,000, according to the Tennessee Crop Reporting Service.

But at the same time, inflation has boosted the value of the remaining farms, a phenomenon that has increased the net worth of farmers while giving them more borrowing power.

In 1975, Tennessee farmland was worth an average of \$467 an acre. By 1980, this value had soared 59 percent to \$743 an acre, state records reflect.

While farmland inflation has helped some farmers secure larger loans, it has done little to solve their cash flow bind. In some cases, farmers aren't willing to liquidate their land to pay expenses. Even when they are willing to sell their capital assets, it's not always easy finding buyers.

"About 80 percent of the time, those farms end up with someone who's not a full-time farmer," Rose said. "They go to 4-H clubs, speculators, guys who want to build a house and a barn."

Rose said some believe the PCA has turned hard-hearted because of its foreclosures and tough loan standards. "We are made to look like bad guys," he sighed. "But we want farmers to know we're still interested in making loans."

Rose said his agency is working closely with farmers to help them plan their finances. "We're trying to help farmers salvage something instead of let it eat them up," he said.

Griggs said the state Agriculture Department offers a wealth of crop data to help farmers make decisions. "If we get timely rains, I think they'll make it another year," he said. "But they'll be just squeezing by."

Robert Hobson, agricultural statistician with the Tennessee Crop Reporting Service and the USDA's Statistical Reporting Service, said 1981 yields are shaping up as fairly good.

In 1979, the last year for which complete statistics are available, the top agricultural products in Tennessee were soybeans, reaping \$432 million in sales; cattle and calves, \$412 million, dairy products, \$245 million, hogs, \$188 million; and tobacco, \$156 million.

Other important products include chickens, with \$55 million in sales; corn, \$52 million; eggs, \$48 million; cotton, \$47 mil-

lion, and wheat, \$30 million.

According to Hobson, here's what's happening this year to the state's top five agricultural products:

Cattle and calves: Inventories as of July 1 were up more than 4 percent from the same time a year ago, reversing a downward production trend of several years.

Ironically, however, prices as of June 15 for all beef cattle were \$47.60 per hundred pounds, off 7.6 percent from \$51.50 a year ago. Prices for feeder calves in June had slipped to \$60 a hundredweight, against \$70.50 a year earlier.

"It's not a happy situation," Hobson said.

Dairy products: Milk production in Tennessee was up slightly during June—204 million pounds, compared with 200 million pounds the same month last year, and 182 million pounds in June 1979.

Prices as of June 15 were \$13.60 per hundredweight, compared with \$12.80 a

year earlier.

But the higher prices won't be all gravy. Dairy feed prices have jumped during the last year—to \$200 a ton for 16 percent protein feed from \$163 a ton in summer, 1980.

Soybeans: No estimates of production will be available until August, but Hobson said an estimated 2.35 million acres had been planted in beans this year, down 8 percent from 1980 levels.

Part of the decline was due to late harvesting of a record winter wheat crop, which was planted on land that supports soybeans during the summer growing season.

Prices as of June 15 were \$7.12 a bushel, up

18 percent from \$6.05 a year earlier.

Hogs: As of June 1, the inventory of hogs in the state was down to 920,000 head, 23 percent below a year ago. But June prices for hogs were up sharply—to \$47.40 per hundred pounds from \$33.80 a year ago.

Tobacco: An estimated 75,200 acres have been planted in tobacco this year, up 16 percent from a year ago, reflecting higher prices farmers received for the burley crop earlier

Although it's difficult to predict price trends in tobacco, the 1980 Tennessee burley crop sold for an average of \$1.66 a pound, compared with \$1.44 a pound for the 1979

SUPERFUND-JOINT AND SEVERAL LIABILITY

· Mr. STAFFORD. Mr. President, during the nearly 3 years which we worked on the "superfund" legislation, I acquired an enduring and deep respect for the perseverance of the chemical industry in general and the Chemical Manufacturers Association in particular. The association approached the legislation as an adversary which never conceded defeat. Having lost its points at subcommittee, CMA pressed them at full committee, on the Senate floor, and on the House floor. Having lost each of those battles, CMA now seeks to alter the law's implementation with the same adversarial zeal and vigor displayed in the legislative process.

The most recent evidence of CMA's staying power is a letter from an asso-ciation representative to Representative JAMES FLORIO, chairman of the House Subcommittee on Commerce, Transportation and Tourism. The letter is clearly an attempt to cause the law to be implemented in a way which is contrary to congressional intent by indirectly creating a legislative history at variance with the intent of the act's authors. The subject of the letter is joint and several liability. Mr. President, I ask unanimous consent that the letter be printed in the RECORD at this point.

The letter follows:

CHEMICAL MANUFACTURERS

ASSOCIATION. August 13, 1981.

Hon. JAMES J. FLORIO, Chairman, Subcommittee on Commerce,

Transportation and Tourism, Washington, D.C.

DEAR CONGRESSMAN FLORIO: The Chemical Manufacturers Association respectfully requests permission to have included in the hearing record of July 29, 1981 on the oversight of the Superfund program the attached document on the issue of joint and several

Thank you for this opportunity to submit comments on this very important issue.

If you have any questions, please call me at 887-1124.

Sincerely.

TIMOTHY F. BURNS, Legislative Representative. COVINGTON & BURLING,

Washington, D.C., August 13, 1981. Re Joint and Several Liability Under Superfund.

MR. EDMUND B. FROST, Esq., Vice President and General Counsel, Chemical Manufacturers Association, Washington, D.C.

DEAR MR. FROST: You have asked for our views as to the position apparently taken by Assistant Attorney General Carol Dinkins and EPA Administrator Anne Gorsuch at an Oversight Hearing before the House Subcommittee on Commerce, Transportation and Tourism on July 29, 1981 that the Comprehensive Environmental Response, Compensation and Liability Act of 1980, Pub. L. No. 96-510 ("Superfund") authorizes the imposition of joint and several liability.

In our view, the apparent position of Assistant Attorney General Dinkins and Administrator Gorsuch is not only unsupported by the language of the statute and its legislative history, but is in direct conflict with the statutory principles and procedures designed to ensure that the responsibility for and costs of abatement are fairly allocated among private parties, and between them and the fund.

There is no doubt in this case that the failure of Congress to provide in Superfund for "joint and several liability" was intentional. The predecessor bills in both the House and Senate contained explicit provision for such a liability scheme. See, § 3071 (a) (1) of H.R. 7020; § 4(a) of S. 1480. Unlike these predecessor bills, Superfund nowhere provides for joint and several liability. The reason for this is clear from the legislative history: a statute with those provisions would not have been enacted.

As the regular second session of the 96th Congress came to a close, Superfund (S. 1480) was stalled in the Senate because of controversy over a number of issues, including joint and several liability. After the 1980 election, Senator Stafford, the ranking minority member of the Senate Committee on Environment and Public Works, offered an extensive compromise to get Superfund passed before the advent of the new Congress and the new administration. He circulated his compromise bill to all 99 of his colleagues together with a summary which said that the compromise "Eliminated joint and several liability." This summary is recorded at 126 Cong. Rec., p. 30972 (Nov. 24, 1980). Since there is no committee report on the compromise bill that passed, this summary should be considered an authoritative source of Congressional intent. Senator Helms' remarks clearly reflect this understanding of the compromise:

As originally introduced on July 11, 1979, 1480 imposed an unprecedented scheme of strict, joint and several liability....

Retention of joint and several liability in 1480 received intense and well-deserved criticism from a number of sources....

The drafters of the Stafford-Randolph substitute have recognized this unfairness, and the lack of wisdom in eliminating any meaningful link between culpable conduct and financial responsibility. Consequently, all references to joint and several liability in the bill have been deleted, 126 Cong. Rec. p. 30972 (Nov. 24, 1980). In place of the earlier scheme, Congress

enacted a statute that identifies a relatively broad group of parties who may in appropriate circumstances be held liable, under § 107, for response costs incurred by the Government or other persons as long as those costs are consistent with the NCP. Nothing in those provisions suggests the scheme that the Government advances.

Furthermore, joint and several liability is inconsistent with the statutory scheme of

Superfund, which is designed to promote a fair allocation of responsibility among private parties and, even more importantly, between those parties and the fund. Superfund's provisions—particularly § 111(a)(2), which provides for payment by the fund to persons who incur response costs consistent with the National Contingency Plan, and § 112(b)(2)(B), which provides for payment by the fund when the responsible party is unknown or unavailable—belie the notion that Superfund may be used to require any particular defendant(s) to bear the total cost of abatement where other parties are also responsible. Moreover, since the fund is available to pay for abatement costs not attributable to available private parties, the hazard posed by the site or release in question can be adequately addressed without resort to a rigid and inequitable joint and several liability scheme.

Certain of Assistant Attorney General Dinkins' remarks at the Oversight Hearing suggest that the Justice Department may not endorse joint and several liability where available parties caused only a portion of the total harm. For example, in response to a question from Rep. Lent as to the Justice Department's position in cases where some of the contributors to the harm are defunct

or insolvent, Ms. Dinkins replied:
"The hard cases, and the cases that I really cannot give you an answer on, are those where you may have perhaps only 20 or 30 percent of the contributors present and

able to pay.

"And I do not know how we will handle those cases." (Transcript, p. 49)

We would hope that these remarks are a more accurate reflection of the Government's position than other statements suggesting that joint and several liability under Superfund is appropriate. The reluctance of the Justice Department to impose liability where it does not belong is not only sound policy from the standpoint of equity; as we have discussed above, a contrary position is in-consistent with the language and structure of Superfund and with Congressional intent.

Sincerely yours,
THEODORE L. GARRETT, RALPH H. SMITH. DAVID F. WILLIAMS.

Mr. STAFFORD. This letter is important for two reasons. First, it is concerned directly with one of the most important issues likely to arise during su-perfund implementation. Second, and more importantly, it illustrates the persistence and doggedness of superfund's opponents. This letter is an attempt to achieve in the administrative process what the law's opponents failed to achieve in the legislative arena. If they fail here, I have no doubt that their next attempts will be made in a judicial form, and this letter is an attempt to create supportive legislative history out of whole cloth.

I believe it would be instructive to examine some particular statements in the Covington & Burling letter. They illustrate the technique employed re-peately in debates over the meaning of certain superfund provisions.

First, it should be understood that this is a letter prepared by an able and respected law firm on behalf of its client, the Chemical Manufacturers Association. The letter is written and must be understood in the context of advocating a particular position.

With the general caveat, I should like to examine a number of statements contained in the letter.

In its fourth paragraph, the letter states that "there is no committee report on the bill that passed." In fact, the enacted bill represented a drastically slimmed down version of the bill re-ported by the Committee on Environment and Public Works, S. 1480. The enacted compromise was drafted by whittling away sentences, phrases, or pages of S. 1480 to arrive at a politically acceptable bill. Much of S. 1480 was left by the wayside, but a great deal of it remained when the process was completed. Thus, although there was no report per se, the committee report on S. 1480 remains very relevant in construing the compromise law. Similarly, the floor statements which are most relevant are those of the bill's drafters, including myself.

The letter suggests in a variety of ways that a conclusion of the Congress that the imposition of joint and several liability is inappropriate. This assertion is based on my decision to eliminate the term "joint and several liability" from the compromise versions. I never stated or even suggested that elimination of the term should be construed or interpreted as a bar to imposition of joint and several liability as it exists at common law. In fact, I took great care to avoid even the appearance of such a suggestion. The legislative history explicitly states just the opposite: that we were relying on the applicability of joint and several liability under the common law rule.

Regarding the compromise, Senator RANDOLPH stated:

The liability regime in this substitute contains some changes in language from that in the bill reported by the Committee on Environment and Public Works. The changes were made in recognition of the difficulty in prescribing in statutory terms liability standards which will be applicable in individual cases. The changes do not reflect a rejection of the standards in the earlier bill.

Senator RANDOLPH continued:

It is intended that issues of liability not resolved by this act, if any, shall be governed by traditional and evolving principles of common law. An example is joint and several liability. Any reference to these terms has been deleted, and the liability of joint tort feasors will be determined under common or previous statutory law.

To foreclose the possibility that opponents of the bill could later argue that we had somehow precluded the imposition of joint and several liability. phrased my statements very carefully. Frankly, in the confusion which surrounded those final days, I may have slipped up once or twice. But in the vast majority of the cases, I took great care to state that we were eliminating "reference" to joint and several liability or we were eliminating the "term" joint and several liability. We did not eliminate or in any way constrain the concept of its application to lawsuits brought under authority of the superfund law. We left development of the concept and its application to the courts and the common law.

This approach reflected the belief of S. 1480's sponsors that joint and several liability is applicable to many of these cases under the principles of common law. At a markup on April 15, 1980, the

committee invited officials of the Justice Department to discuss joint and several liability with us. Mr. James M. Moorman, Assistant Attorney General for the Lands and Natural Resources Division, testified as follows:

In summary, it is our position that the current case law, and when one reasons by analogy, as the courts do, imposes strict liability and joint and several liability on those generators who contribute to a release. I am convinced that as cases arise, courts will hold such generators jointly, severally and strictly liable for releases of hazardous wastes. While the courts have not yet had adequate opportunity to apply these rules to the full range of activities covered by superfund, I fully expect the courts to apply them to hazardous waste disposal problems.

them to hazardous waste disposal problems. Rather than wait the several years required for that day to come, however, Congress could remove all doubt now by reaffirming the common law in the superfund legislation.

In fairness, there were those who disagreed with Mr. Moorman's statement, and they included the lawyers at Covington & Burling. Indeed, their disagreement was one reason that S. 1480 expressly reaffirmed the doctrine's applicability to superfund cases. As Mr. Moorman testified, because of "the mere fact that they have raised the doubts * * the record is going to be left possibly in a confused state."

Mr. Moorman's prediction that opponents of the law would attempt to take advantage of silence is being realized. It was precisely because of his warnings that Senator Randolph and I exercised care in drafting the compromise and its explanations. We exercised similar care in explaining the compromise orally to colleagues. Indeed, this care manifested itself in the statement of Senator Helms which is quoted with favor in the letter. He did not refer to an elimination of the doctrine of joint and several liability or any prohibition on its application to these cases. He spoke of eliminating "all references to joint and several liability" (emphasis added).

Mr. President, I do not attach any moral blame to these attempts to take advantage of the law's apparent silence. In fact, I anticipated that this would happen. I also expect that if the law's opponents fail in the executive branch as they did in the Congress, the next argument will be presented to a judge. As disappointing as it is to me, I am realistic enough to recognize that it is the role of modern Washington lobbyists and lawyers to press their clients' interests to the bitterest end. Those charged with the responsibility for deciding these issues, however, must bear in mind that such arguments are being advanced with a stated goal in mind, not for the sake of an abstract pursuit of justice or accuracy.

PRINCIPLES OF WAR

 Mr. GOLDWATER. Mr. President, Gen. Donn A. Starry, who is Commander in Chief of the U.S. Readiness Command at McDill Air Force Base, Fla., and who

was former commander of the Fifth Corps U.S. Army Europe and most recently commander of the U.S. Army Training and Doctrine Command at Fort Monroe, Va., has written a most interesting and penetrating article on the principles of war. I have not seen in many years such a comprehensive analysis of the subject as it brings all of the experts up to date and brings our understanding of principles out in clear language that should guide our forces well. It is such a good article, I ask to have it printed in the Record and I urge all of my colleagues to read it.

The article follows:

THE PRINCIPLES OF WAR (By Gen. Donn A. Starry)

Modern warfare requires the application of both the science and the art of war. The science of war is in a constant state of change, driven by new technological developments which can radically change the nature of the battlefield. The art of war, on the other hand, involves the critical historical analysis of warfare.

The military professional derives from this analysis the fundamental principles—their combinations and applications—which have produced success on the battlefields of history. The principles of war thus derived are, therefore, a part of the art rather than the science of war. They are neither immutable or causal, nor do they provide a precise mathematical formula for success in battle. Their value lies in their utility as a frame of reference for analysis of strategic and tactical issues.

For the strategist, the principles of war provide a set of military planning interrogatives—a set of questions that should be considered if military strategy is to best serve the national interest. For the tactician, these principles have provided an operational framework for the military actions he has been trained to carry out.

In the soon-to-be-published revision of Field Manual 100-1, The Army, the U.S. Army has another look at its time-honored and battle-tested principles of war. Readers familiar with principles of war embraced by our Army will recall that they have been traditionally more tactically precise and less strategically perceptive than might have been desired. This fact, among others, occasioned a reevaluation of their relevance in today's world in which large quantities of very high-quality weapons systems are likely to come together in battles. The intensity of these battles may be like nothing experienced before, and the lethality and pace of the battles will surely outreach the most imaginative notions.

First, however, a few words of history might be in order as a background against which to array the principles as they are soon to be set forth. In the United States, our fundamental military heritage derives from the Napoleonic wars. More precisely, it has grown from the writings of two men who reported on Napoleon's campaigns. Each drew inferences which were to have fareaching influences on the U.S. military system. The two men were Baron Henri Jomini and Major General Karl von Clausewitz. We will come back to them but, first, a few words about war in Napoleon's time.

The European monarchs of the time had set out to break the back of the French Revolution and thereby stem its spread throughout Europe. As a result, France's incentive to resist, fight and win became so great that it demanded and stimulated new and revolutionary forms of war. France's stake was high—survival. It is not difficult, therefore, to understand why it was consid-

ered necessary to marshal the nation's total manpower and other resources in defense of the republic. Nor is it difficult to understand why, once the enemy was driven from French he should be attacked in his homeland and brought under French control so that he could not attack France again.

Napoleon found victory by lavishly ex-pending manpower. Imposing even greater losses on his enemy, he forced his foe literally into abject surrender. Napoleon's idea of -annihilation-as later embellished by Jomini and Clausewitz, was abetted by new developments in artillery and innova-tions in organization which formed armies into independent divisions, each capable of acting on its own in execution of assigned missions. It was essentially an operational scheme drawn from the conviction that, to win, one need only to organize forces, fire-power and maneuver in concert to overwhelm—that is, to outnumber and overpower the foe at some unexpected place and time and in some unexpected fashion.

It was Jomini's Napoleon that became the foundation of military tactics and strategy as taught in the U.S. Army. This was so largely because Clausewitz was not translated into English until 1873.

In many ways, Jomini was less-well-equipped to interpret Napoleon than was his Prussian contemporary Clausewitz, for Jomini's intellectual roots were deep in the

18th century. He was repelled by Napoleon's indiscriminate bloodshed; he abhorred armies that lived off the land, leaving destruction in their wake. But he seized on the essential Napoleon-the massing of one's forces to bring the greatest possible weight to bear at a point and time where and when the enemy could bring but part of his force to bear. It was Jomini, too, who recorded Napoleon's conviction that the offensive was the military operation necessary to victory.

While his concentration on the decisive place tended to put Jomini more in the 18th-century tradition of a quest for ter-rain rather than destruction of enemy armed forces, that subtlety was often lost on his American readers. This was all the more so once Clausewitz's more powerful interpretation of Napoleon was available in English.

was not until after World War I that the US Army tried to codify the funda-mental essence of war. This was despite Jomini's early teaching that it was necessary for armies to develop and follow certain principles to guide their operations. The first principles of war espoused by the US Army were set forth in War Department Training Regulation 10-5 of 1921. As noted Figure 1, not much has been done to change them in the ensuing years as their modern counterparts, by title alone, suggest. Whether this reflects the ultimate wisdom of their first drafter, intellectual bankruptcy

or some other circumstance would be hard to say.

FIGURE 1 .- Principles of War

Cooperation

Unity of Command Other armies of the world have codified their experience into principles also. All European armies, including the Soviets, are basically children of the Napoleonic experience, interpreted by both Jomini and Clause witz. It will be further recalled that Jomini reported on Napoleon from both sides— French and Russian—a point not at all lost on modern Soviet strategists. And so, foremost among all European nations perhaps, the Soviets are advocates of classic Napoleonic battle-annihilation.

At the moment, the Soviets can afford both the manpower and the weapons. Time may change that as it has done in our own country. Nevertheless, as Figure 2 reflects, there is a strong Napoleonic flavor in the principles laid down by the Soviets to guide their study and application of the art of war.

Since Napoleon or, more correctly, since Jomini and Clausewitz provided their per-spectives on Napoleon's operations, the history of battle has provided some additional insights. These insights are quite relevant

to reconsideration of principles of war today.

First is the truth that, more often than not, the outcome of battle defies the force ratio's extant at battle's onset. The side that is outnumbered at the beginning is not fore-doomed to defeat. In fact, quite the con-trary is the case. The study of why this is so brings one to some revised viewpoints with regard to principles of war.

Second is the growing importance of the synchronization of all elements of national power in pursuit of national goals. Also, there is the equal imperative of public support for the policies—economic, social, political and military—adopted to achieve the national aims. Traditionally inept at syn-chronizing the nonmilitary facets of na-tional policy, democracies all too frequently turn all too quickly to their military forces. They do this without first having laid the requisite groundwork to attain and sustain strong public support for the policy course

Dramatic demonstration of this fact in the last two decades leads to some further revised viewpoints about principles of war So, without being unfaithful to the useful truths of our Napoleonic heritage and with due acknowledgment of our historical experience since Napoleon, let us postulate some modest revisions to our principles of

OBJECTIVE

Every military operation should be ditoward a clearly defined, decisive and attainable objective.

As a derivative of the political aim, the strategic military objective of a nation at war must be to apply whatever degree of force necessary to allow attainment of the political purpose or aim for which the war is being fought. When the political end desired is the total defeat of the adversary, then the strategic military objective will most likely be the defeat of the enemy's armed forces and the destruction of his will to

It is essential, however, that the political purpose be clearly defined and attainable by the considered application of the various elements of the nation's power. Not until the political purpose has been determined and defined by the president and Congress can strategic and tactical objectives be clearly identified and developed. Once developed, the strategic objectives must constantly be subjected to rigorous analysis and review. This is to ensure that they continue to reflect accurately not only the ultimate political end desired, but also any political constraints imposed on the application of military force.

The strategic military objective focuses on the political ends. So, tactical military operations must be directed toward clearly defined, decisive and attainable tactical objectives which ultimately assist in achieving the strategic aims. Similarly, intermediate tactical objectives must quickly and economically contribute, directly or indirectly, to the

purpose of the ultimate objective. Selection of objectives is based on consideration of the overall mission of the command, the commander's assigned mission, the means available and the military characteristics of the operational area. Commanders must clearly understand and they must communicate clearly to their subordinate commanders the intent of the operation upon which the command as a whole is about to

OFFENSIVE

Seize, retain and exploit the initiative. The principle of the objective requires that all efforts be directed toward a clearly defined "common goal." The principle of the offensive suggests that onensive action, or main-tenance of the initiative, is the most effective and decisive way to pursue and attain that "common goal." This is fundamentally true in both the strategic and tactical sense While it may sometimes be necessary to adopt a defensive posture, this should be only a temporary condition until the necessary means are available to resume offensive operations. An offensive spirit must be inerent in the conduct of all defense operations-it must be an active defense, not a passive one.

Offensive action, whatever form it takes, is the means by which the nation or a military force captures and holds the initiative achieves results and maintains freedom of action. It permits the political leader or the military commander to capitalize on the initiative, impose his will on the enemy, and set the terms and select the place of con-

frontation or battle. It also allows him to exploit weaknesses and react to rapidly changing situations and unexpected developments. No matter what the level, strategic or tactical, the side that retains the initiative through offensive action forces the foe to react rather than act.

Concentrate combat power at the decisive place and time.

In the strategic context, this principle suggests that the nation should commit, or be prepared to commit, a predominance of national power to those regions or areas of the world where the threat to vital security interests is greatest. Some nations, including the United States, have global security in-terest in term of politico-military alliance and commitments and resource dependencies. For such nations, the accurate and timely determination of where the threat to vital national interests is greatest is becoming increasingly more difficult.

In today's volatile world, the nature and source of the threat often change in dra-matic fashion. It is, therefore, incumbent upon military strategists to anticipate the likely areas of concern and develop suitable contingency plans. Since every possible contingency or trouble spot cannot be anticipated, much less planned for, it is absolutely essential for Army planners and Army forces to retain flexibility of thought

and action.

In the tactical dimension, the principle of mass suggests that superior combat power must be concentrated at the decisive place and time in order to achieve decisive results. This superiority results from the proper combination of the elements of combat power at a place and time and in a manner of the commander's choosing in order to retain the initiative. The massing of forces, together with the proper application of other principles of war, may enable numerically inferior forces to achieve decisive battle outcomes.

ECONOMY OF FORCE

Allocate minimum essential combat power to secondary efforts.

As a reciprocal of the principle of mass, economy of force in the strategic dimension suggests that, in the absence of unlimited urces, a nation may have to accept some risk in areas where vital national interests are not immediately at stake. This means that, if the nation must focus predominant power toward a clearly defined primary threat, it cannot allow attainment of that objective to be compromised by unnecessary diversions to areas of lower priority. This involves risk, requires astute strategic planning and judgment by political and military leaders, and again places a premium on the need for flexibility of thought and action.

At the tactical level, the principle of economy of force requires that minimum means be employed in areas other than where the main effort is intended to go. It requires, as at the strategic level, the acceptance of prudent risk in selected areas in order to achieve superiority in the area where deci-sion is sought. Economy-of-force missions may require the forces employed to attack, defend, delay or conduct deception opera-

MANEUVER

Place the enemy in a position of dis-advantage through the flexible application of combat power.

In the strategic sense, this principle has three interrelated dimensions—flexibility, mobility and maneuverability. The first of these involves the need for flexibility in thought, plans and operations. Such flexibility enhances the ability to react rapidly unforeseen circumstances. Given the global nature of US interests and the dy-namic character of the international scene, such flexibility is crucial.

The second dimension involves strategic mobility which is especially critical for an insular power such as the United States. In order to react promptly and concentrate and project power on the primary objective, strategic airlift and sealift are essential. The final strategic dimension involves maneuverability within the theater of operations so as to focus maximum strength against the enemy's weakest point and thereby gain the strategic advantage.

In the tactical sense, maneuver is an essential element of combat power. It contributes significantly to sustaining the initiative, exploiting success, preserving freedom of action and reducing vulnerability. The object of maneuver is to concentrate or disperse forces in a manner designed to place the enemy at a disadvantage, thus achieving results that would otherwise be more costly in men and materiel. At all levels, successful application of this principle requires more than fire and movement. Other requirements are flexibility of thought, plans and opera-tions, and the considered application of the principles of mass and economy of force.

UNITY OF COMMAND

For every objective, there should be unity of effort under one responsible commander. This principle ensures that all efforts are focused on a common goal. At the strategic level, this common goal equates to the political purpose of the United States and the broad strategic objectives which flow therefrom. It is the common goal which, at the national level, determines the military forces necessary for its achievement. The coordination of these forces requires unity of

At the national level, the Constitution provides for unity of command by appointing the president as the commander in chief of the Armed Forces. The president is assisted in this role by the national security organization. This includes the secretary of defense and the Joint Chiefs of Staff at the highest level and, at the operational levels, the unified and specified commands and joint task forces.

In the tactical dimension, it is axiomatic that the employment of military forces in a manner that develops their full combat power requires unity of command. Unity of comand means directing and coordinating the action of all forces toward a common goal or objective. Coordination may be achieved by cooperation. It is, however, best achieved by vesting a single tactical commander with the requisite authority to direct and coordinate all forces employed in pursuit of a common goal.

SECURITY

Never permit the enemy to acquire an unexpected advantage.

Security enhances freedom of action by reducing friendly vulnerability to hostile acts, influence or surprise. At the strategic level, security requires that active and passive measures be taken to protect the United States and its Armed Forces against espionage, sabotage, subversion and trategic intelligence collection. However, implementation of such security measures must be balanced against the need to prevent them from sev ering the link between the American public and its Army.

In addition, such measures should not be allowed to interfere with flexibility of thought and action since rigidity, and dogmatism increase vulnerability to enemy surprise. In this regard, thorough knowledge and understanding of enemy strategy, tac-tics and doctrine, as well as detailed stra-tegic staff planning, can improve security and reduce vulnerability to surprise.

At the tactical level, security is essential to the protection and husbanding of combat power. Security results from the measures taken by a command to protect itself from surprise, observation, detection, interference, espionage, sabotage or annoyance. Security may be achieved through the establishment and maintenance of protective measures against hostile acts or influences. It may also be assured by deception operations designed to confuse and dissipate enemy attempts to interfere with the force being secured. Risk is an inherent condition in war. Application of the principle of security does not suggest overcautiousness or the avoidance of calculated risk.

SURPRISE

Strike the enemy at a time or place and

in a manner for which he is unprepared.

To a large degree, the principle of surprise is the reciprocal of the principle of security. Concealing one's own capabilities and intentions creates the opportunity to strike the enemy unaware or unprepared. However, strategic surprise is difficult to achieve. Rapid advances in strategic surveillance technology make it increasingly more difficult to mask or cloak the large-scale marshaling or movement of manpower and equipment. This problem is compounded in an open society such as the United States where freedom of press and information are highly valued.

However, the United States can achieve a degree of psychological surprise due to its strategic deployment capability. The rapid deployment of U.S. combat forces into a crisis area can forestall or upset the plans and preparations of an enemy. This capability can give the United States the advantage in both a physical and psychological sense by denying the enemy the initiative.

Surprise is important in the tactical dimension, for it can decisively affect the outcome of battle. With surprise, success out of proportion to the effort expended may be obtained. Surprise results from going against an enemy at a time or place and in a manner for which he is unprepared. It is not essential that the enemy be taken unaware, but only that he become aware too late to react effectively. Factors contributing to surprise include speed and alacrity, employment of unexpected forces, effective intelligence, deception operations of all kinds, variations of tactics and methods of operation, and operations security.

SIMPLICITY

Prepare clear, uncomplicated plans and clear, concise orders to ensure thorough understanding.

In both the strategic and tactical dimension, guidance, plans and orders should be as simple and direct as the attainment of the objective will allow. The strategic importance of the principle of simplicity goes well beyond its more traditional tactical appli-cation; it is an important element in the development and enhancement of public support.

the American people are to commit their lives and resources to a military operation, they must understand the purpose which is to be achieved. Political and military objectives and operations must, therebe presented in clear, concise, understandable terms. Simple and direct plans and orders cannot compensate for ambiguous and cloudy objectives. In its military application, this principle promotes strategic flexibility by encouraging broad strategic guidance rather than detailed and involved instruction.

the tactical level, simplicity of plans At the tactical level, simplicity of plans and instructions contributes to successful operations. Direct, simple plans and clear, concise orders are essential to reduce the chances for misunderstanding and confusion. Other factors being equal, the simplest plan executed promptly is to be preferred over the complex plan executed later.

While any set of principles of war adopted was nation has application across the entire

by a nation has application across the entire

spectrum of warfare, it must be understood that the principles are interdependent and interrelated. No single principle can be blindly adhered to or observed to the exclusion of the others, and none can assure victory in battle without reinforcement from one or

more of the others.

Indeed, military forces of each nation conduct operations on the basis of operational concepts which are derived from combinations of principles. For example, an operational concept derived from a combination of offense, mass, surprise and maneuver might suggest a large military force, using large numbers of swiftly moving armored forces. The dominant mode of operation of this force is to overwhelm, disrupt and destroy, using surprise and maneuver to assist in the execution.

The most common application of the principles of war is in the form of operational modes on the field of battle. However, the principles can also be useful when integrated into the military estimate and decision process as an aid to judgment and analysis. The principles of objective and unity of command, for example, can assist in mission analysis both at the strategic and tactical level. They are also valuable aids in determining the purpose and direction of effort.

In like manner, the principle of simplicity can serve as a yardstick for the formulation of tasks. The principles of offense, mass, economy of force, maneuver, security and surprise can assist in the analysis of the situation, as well as in the formulation of courses of action. Again, simplicity can serve as the measure against which various courses of ac-

tion can be compared.

It is essential that practitioners of the military art understand the interdependence of principles. The adroit combination of principles into appropriate operational concepts for winning in battle is the essence of the art of war. The clear understanding of the history of battle which argues conclusively that there is more to winning than just outnumbering the other fellow puts Jomini and Clausewitz on Napoleon in correct perspective.

The soldier has the opportunity to make a unique contribution to his Army and the nation. First, however, he must understand the need to synchronize all elements of national power in coherent national policies. And, second, he must understand the absolute need to marshal and sustain public support for those policies from the outset, especially if they involve military operations.

BILLBOARD DEREGULATION ACT OF 1981

• Mr. STAFFORD. Mr. President, on July 30, 1981, I introduced S. 1548, the "Billboard Deregulation Act of 1981." At that time I was honored to have Senator Abdnor, Senator Chafee, Senator Gorton, and Senator Hatfield join me as cosponsors of S. 1548.

I am very pleased to add as additional cosponsors to S. 1548, the distinguished Senator from South Carolina (Mr. Thurmond), the distinguished Senator from Colorado (Mr. Hart), and the distinguished Senator from Pennsylvania (Mr. Heinz).

Mr. President, as I said when I introduced S. 1548, I strongly supported the Highway Beautification Act when it was passed in 1965. I believe billboards should be controlled along our highways both for safety and esthetic reasons. Because of changes made to the original act, however, it is no longer accomplishing its intended purpose and I have come to

the conclusion that States and localities will have to provide the kind of billboard control they deem necessary.

I ask that an article written by Mr. Frank Shafroth, legislative counsel to the National League of Cities, which appeared in the Nation's Cities Weekly, and an article by Mr. William Steif which appeared in an Evansville, Ind., paper be printed in the RECORD.

Mr. President, I believe both these articles clearly explain what is wrong with the Highway Beautification Act and why it should be repealed.

The articles follow:

[From the Nation's Cities Weekly, Aug. 31, 1981]

STAFFORD PROPOSES MAJOR SHIFT IN BILLBOARD REMOVAL PROGRAM

(By Frank Shafroth)

Sen. Robert L. Stafford (R-Vt.) recently introduced a bill to turn the federal highway beautification program over to state and local governments.

Stafford, chairman of the Environmental and Public Works Committee, intends to consider the bill as part of the committee's markup of the federal highway legislation, S. 1024, and he is interested in NLC members' views.

The highway beautification program requires states to control outdoor advertising devices and junkyards adjacent to Interstate and federal-aid primary highways. If a state has no effective program, the secretary of transportation may withhold 10 percent of that state's federal-aid highway apportionment.

Under a qualified state program, billboards may be erected within 660 feet of Interstate or primary highways only if they are in areas zoned commercial or industrial. Nonconforming signs must be removed.

Traditionally, billboards and junkyards have been controlled under state and local police powers. Removal of billboards and junkyards generally occurred over time with relatively little expenditure of local funds.

In 1978, however, the federal law was changed to require billboard controls as a condition for federal highway aid and to compensate billboard owners and property owners for sign removal—even if the sign is removed for reasons totally unrelated up to the Federal Highway Beautification Act. Amortization, removing signs only after the owners have recouped their costs—the traditional means of compensation—is no longer acceptable.

Prior to 1978, some 420,000 billboards were removed at no cost to local, state or federal taxpayers. Under the 1978 changes it has become virtually impossible to remove billboards because of the prohibitive costs. Since 1978 Congress has appropriated negligible amounts. For instance, in fiscal year 1980, only \$8.5 million was appropriated; moreover, Congress ordered the money to be used as bonus for states that discourage new signs, rather than to pay for sign removal.

The Senate committee is expected to consider the issue in late September or early October.

[From the Evansville (Ind.) Press, Aug. 13, 1981]

HIGHWAY BILLBOARDS ARE STILL AN ISSUE
(By William Steif)

After 16 years of turmoil, almost everyone agrees Lady Bird Johnson's Highway Beautification Act—intended to control billboards on federally funded highways—doesn't work. Almost everyone, that is, except the billboard industry.

So Sen. Robert Stafford, R-Vt., an original backer of Mrs. Johnson's program, introduced a bill just before Congress recessed to scrap the 1965 law. This was a follow-up on the recommendation of the Transportation Department's National Advisory Committee on Outdoor Advertising and Motorist Information, which had been holding meetings for more than a year to decide what to do about the law. At its final meeting recently, the committee recommended 13–11 to repeal the law. The 11 dissenters represented the billboard industry. Stafford, chairman of the Senate Environment and Public Works Committee, would turn billboard control back to the states, saving only:

—A pre-1965 provision giving a 0.5 percent "bonus" of federal interstate highway funds to the 22 states that agreed to curb signs on

the interstate.

—State ability to use interstate and primary highway funds for informational signs in rest areas and other places along the roads. Three Republican members of Stafford's

Three Republican members of Stafford's committee joined him in sponsoring his bill, along with the chairman of the Senate Appropriations Committee, Sen Mark Hatfield, R-Ore.

The chief opponent to the law's repeal is Vern Clark, lobbyist for the Outdoor Advertising Association of America which represents big billboard companies.

Even roadside business groups, which used to go along with Clark, are balking, as their testimony made clear in Senate hearings held recently in Rapid City, S.D. Reason: The big companies have raised billboard prices beyond the reach of many small roadside firms.

Stafford, whose home state controls signs nicely, notes he "strongly supported" Mrs. Johnson's goal of reducing billboard clutter on the interstate and primary highways in 1965. But changes in the law made "attainment of the original goals impossible," Stafford says, "The act has become a protection for billboards rather than the cause for their removal. Not only does the act protect billboards that have any commercial value, but it also permits new signs to be erected."

That's a result of 1978 amendments, pushed by Clark's group, requiring payment of compensation to owners for removal of any signs adjacent to interstate on primary roads. The law restricts local and state authorities, who normally control this kind of billboard clutter, from exercising their powers because they have to pay outrageous prices.

Says Stafford: The effect of the 1978 amendments has been to increase the potential cost for removing non-conforming signs to over \$1 billion"—and a big chunk of this would come out of federal taxpayers' pockets, though Stafford notes that neither the Carter or Reagan administrations have requested funding for the billboard-control program for the past three years.

What the 1978 amendments actually did were to create a kind of gridlock the biliboard industry wants. They protect its monopoly. The Federal Highway Administration office that tried to enforce the law has been disbanded. Local and state officials don't have the money federal law demands to pay off sign owners.

The issue has been debated repeatedly in Congress. If you want to get federal government out of the billboard-control business, the people to write are Sen. Robert Stafford, care of the Senate Office Building, Washington, D.C. 20510, and the committee's ranking minority member, Sen. Jennings Randolph, D-W. Va., using the same address.

HIGH INTEREST RATES WILL KILL OUR ECONOMIC RECOVERY

• Mr. SASSER. Mr. President, high interest rates are killers. They kill initiative. They kill business. They stall housing production. They crush the

automobile industry. They kill farmers' financing plans. They kill the hopes of investors in the stock market and force them to invest in high-interest, short-term obligations.

Economic growth and high interest rates do not go hand in hand.

The administration has justified its program of economic recovery on the basis of spending cuts, reduced taxes, and lower interest rates.

If we cut spending and taxes, so we were told by the administration, we would see the gross national product increase by 11 percent in 1981, 13 percent in 1982, and 12 percent in 1983.

During this time, the gross national product would increase from \$2.6 trillion

to \$3.7 trillion.

But let me tell you now that we are not going to see economic recovery unless and until we see lower interest rates in this country.

Currently, economic experts indicate that the Federal Reserve Board's monetary targets will permit a nominal rate of GNP growth of some 10 percent, not the 12 or 13 percent that is forecast by the Reagan administration.

Consequently, we have tax and spending cuts designed to put more money into the private sector to promote economic growth while the Federal Reserve Board follows a policy of holding down the money supply and shutting off economic growth.

Thus, we have a fundamental contradiction in our economic policy. We want economic growth, but we can not make credit available to help promote that long-term growth.

As we continue along on our policy of high interest rates, we run the further risk of higher and higher deficits, which further undermine our ability to bring interest rates down.

For every time interest rates go up, the Federal budget gets hurt in two ways. We have higher outlays for interest rate costs and the slowdown in economic growth rates reduces the revenues flowing into the Federal Treasury.

So, for a 1-percent increase in interest rates by 1986, we would pay an additional \$8 billion in interest rate outlays, and for a 1-percent drop in our rate of GNP growth by 1986, the Federal Treasury would lose some \$44 billion in revenues.

Simply put, high interest rates can push up Government spending and reduce Federal revenues. Deficits will increase, further adding to the pressure on interest rates.

During the August recess, I traveled the length and breadth of Tennessee, and I found hardly one person who likes or understands why we have such high interest rates.

We now have an interest rate policy, Mr. President, which bears little relationship to our underlying economy. Historically, there has been a 2- to 3-point spread between the rate of inflation and the prime rate. This has reflected the real cost of borrowing money.

What do we find now? We see the inflation rate, as measured by the monthly

consumer price index, dropping as low as 1.2 percent in one case, but the prime rate has never dropped below 11 percent since the Federal Reserve Board instituted its new money supply policy in October 1979. Now it is not uncommon to see a 7- to 10-point spread between the Consumer Price Index and the prime rate. The real cost of money has skyrocketed and our economy suffers as a result.

The economic statistics resulting from high interest rates are truly gruesome. Interest rate yields on the bond market

Interest rate yields on the bond market have reached record levels of 17 percent, and I have seen reports that some \$7 billion in corporate bond offerings is being withheld due to high interest rates.

Business bankruptcies are at their highest levels ever. Housing production is at its lowest level in almost two decades. Farm interest expenses made up almost 10 percent of all production expenses in 1980. The farm debt-to-asset ratio of American farmers has risen to 17 percent in 1980. More and more farmers in this country are simply going out of business rather than face the crushing debt burden caused by high interest rates.

Mr. President, I could go on and on with more detailed statistics about the interest rate crisis we are now facing.

But, it is clear to me that we must face the interest rate crisis head on. We must move to a policy of more stable and lower interest rates in order to bring about a policy of steady economic growth.

The administration and the Congress have already faced the challenges of cutting Federal spending and reducing Federal taxes. We have an equal obligation to address our interest rate problems in the same direct manner so that our economic recovery can proceed as soon as possible.

DR. HERMAN A. BRUSON

• Mr. WEICKER. Mr. President, the Second World War gave us heroes worth remembering—generals like George Patton and Douglas MacArthur, and countless enlisted men who came from America's farms and cities to fight for freedom on the beaches of Normandy, the oceans at Midway, and in the mud at the Bulge. Much has been written about the deeds of these brave men. Yet there were other heroes whose names are not familiar in our homes and whose battlefields were never remembered as gloriously in lore. One such hero was Dr. Herman A. Bruson.

Dr. Bruson was a chemical engineer, one of those men whose devoted work in the laboratory provided the allies with technological breakthroughs that helped knock the Axis off its feet, and bring an end to the war sooner and with less loss of life than could have been possible without them. Prior to the battle of Stalingrad in 1942, the cold of the Russian winter had immobilized both Russian and Nazi tanks, as well as their heavy machinery. The U.S. military called on Dr. Bruson then with an urgent request. They wanted him to produce an oil additive that he had experimented

with earlier, an additive that would function as well in 50 below zero conditions as in the prime of summer. Dr. Bruson set to work and soon shipments of the new miracle additive were arriving in time for the Russian Army to unfreeze their tanks and machine guns, and immediately engage the Nazis whose superior tank force was still stuck with gummed-up oil. Later in the war, another invention of Dr. Bruson's—a fast burning powder—was used by Allied commandos to destroy German coalcarrying freighter.

Once peace had settled on the land again. Dr. Bruson turned his genius toward inventions to improve the quality of American life. His distinguished work in the private sector helped in the creation of plexiglass, bacteriocides, presticides. and flame-retardent polyurethane foam. After his retirement as vice president of the Olin Mathieson Corp. in 1966, he continued to give birth to ideas and inventions. working on coating for aircraft wings and a nonsmearing print-

er's ink, among others.

Dr. Bruson received many awards for the efforts of his lifetime. In 1966. he received the American Institute of Chemists' Chemical Pioneer Award. In 1971, the American Chemical Society awarded him its Gold Medal in recognition of his outstanding creativity and of invention for the benefit of man. The New Haven Section of the American Chemical Society presented him the Maurice R. Chamberland Award for improving the quality of life through chemistry in April of this year. A month later, he was honored with the Eli Whitney Award of the Connecticut Patent Law Association for his contributions to science.

Dr. Bruson devoted tireless energy to his inventions—he had more than 400 patents in his name—but he also found time to raise a fine family with his devoted wife. His three daughters and four grandchildren may be justly proud of his many accomplishments.

Mr. President, Dr. Herman A. Bruson, a long time resident of Connecticut, passed away recently at the age of 79 after a long illness. His name was not a household word, but his work found its way into all our lives, and left them changed for the better.

U.S. POPULATION

• Mr. PACKWOOD. Mr. President, I wish to report that, according to the latest U.S. Census Bureau approximations, the total population of the United States on September 1, 1981, was 229,666,351. This represents an increase of 196,133 since August 1, 1981. In 1 short month we have added enough people to fill the entire city of Roanoke, Va., two times.

Currently in the United States, there is approximately 1 birth every 9 seconds and 1 death every 16 seconds. One immigrant enters this country every 60 seconds and 1 emigrant leaves every 15 minutes. This results in an addition of 1 person to our population every 16 seconds.

CENTRAL ARIZONA PROJECT ASSOCIATION

• Mr. GOLDWATER. Mr. President, it seems that every year, as we go through the budget struggles, the Western States take a verbal beating over water reclamation projects. Because of the vast amount of misinformation that gets aired to the general public, the Central Arizona Project Association put together a detailed response to these unfounded criticisms. But, above all, what I would like to stress is that the costbenefit ratio of these various projects compares favorably to any government-financed program. The return on investment in these water projects vastly exceeds whatever moneys we have allocated to building them.

Mr. President, I ask that the entire response of the Central Arizona Project Association be printed in the Record at this point in my remarks.

The response follows:

RESPONSES TO STATEMENTS BY SENATOR MOYNIHAN

Statement: "The insensate expenditure of Federal moneys on water projects in the western part of the Nation continue unabated."

Response: This statement ignores the fact that, in the case of the Central Arizona Project, a large part of the cost of construction will be non-reimbursable to the Federal treasury because the project will deliver a very substantial amount of water for use on Indian Reservation lands in satisfaction of Supreme Court Winters Doctrine reserved rights. That's hardly an "insensate expenditure of Federal moneys." During the 79 year history of the Bureau of Reclamation nearly \$6.4 billion have been invested in completed project facilities. The expenditure for these facilities, far from foolish, have resulted in many positive benefits, including improved water supply for agriculture and cities in arid regions, reduced flood damage losses, new public recreation facilities, and contributions to urban and rural development.

Project facilities have been completed to deliver annually about 30 million acre-feet, or 10 trillion gallons, of irrigation water.

In 1979, water was delivered for irrigation to 10.2 million acres of land. Full service was supplied to 4.2 million acres, supplemental service was provided for 5.4 million acres, and 571,000 acres received temporary irrigation service. A farm population of 650,000 received all or part of their livelihood from the 150,000 farm units which received irrigation service in 1979.

As an example of the value of irrigation, commercial vegetables grown in the 17 Western States in 1978 accounted for about \$2.3 billion or 63 percent of the total U.S. production. Likewise fruits and nuts grown in the 17 Western States totaled \$3.2 billion or 60 percent of commercial production. Considering the mix of public and private irrigation development in these States, it is estimated that Reclamation project lands provided 28 percent of the value of U.S. production of vegetables, fruits, and nuts. This production is marketed throughout the whole country, and would not have been possible without irrigation.

During 1979, U.S. agricultural exports reached a record \$34.7 billion. While a large portion of these exports are corn, wheat, and soybeans and soybean products; cotton, rice, vegetables, and fruits are also important contributors to this export value. It is estimated that production of these products from Reclamation projects contributed an average of \$1 billion or more to the export market in 1978 and 1979. This is a valuable

contribution to rectifying the trade imbalance created by the country's large imports of oil.

While the above facts show that expenditures for water projects have not been foolish, the following show that the expenditures have not continued unabated.

Congress has not acted on omnibus water resources legislation for 5 years. There have been practically no new project starts in that

Spending on construction projects of the Corps of Engineers is nearly half of what it was 15 years ago in real dollars (1965 dollars). In 1967, the Corps appropriated \$965 million for construction; in 1982 this figure will be \$518 million in constant dollars. Spending by the Bureau of Reclamation during roughly the same period of time has decreased by approximately 25 percent. In 1965, the Bureau appropriated \$246 million for construction; in 1981, this figure is down to \$179 million in real dollars (1965 dollars).

There is a Corps backlog of \$30 billion in unbuilt projects and a Bureau backlog of \$13 billion.

Statement: "We are creating an agriculture in this country that is based upon the growth in arid climates of crops that are only appropriate to areas where there is normal rainfall. . . . We are irrigating vast stretches of the country with water that is not going to be replaced, and creating an economy which is going to collapse with respect to that agricultural economy when this water runs out."

Response: We are not creating an agriculeconomy based on irrigation in arid climates. The irrigated acreage in the 17 Western States (arid climate) is only about 11 percent of the U.S. cropland; less than 52 million acres out of a total U.S. cropland acreage of nearly 462 million acres. Furthermore, the crops grown are obviously not only appropriate to areas where there is normal (adequate) rainfall. On the contrary many of the crops grown in parts of the West with irrigation cannot be successfully grown in most parts of the United States. The West is important nationally for the production of many different kinds of fresh vegetables, fruits, and nuts. Commercial vegetables grown in the 17 Western States in 1977 accounted for about 60 percent of the total U.S. production. Fruits and nuts grown in various parts of the West totaled about 63 percent of the U.S. commercial production. California is the major state in this production and ranks first nationally in avocados, apricots, artichokes, asparagus, lima beans, broccoli, Brussels sprouts, cantaloupes, carrots, cauliflower, celery, garlic, honeydew melons, lettuce, onions, and spinach. The Western States are also recognized as major producers of almonds, beans, dates, filberts, figs, grapes, hops, olives, lemons, peaches, plums and prunes, sweet cherries, and wal-nuts. These are not "crops that are only appropriate to areas where there is normal rainfall."

In terms of crop yields per acre and predictability, irrigated agriculture is more efficient than in areas of "normal rainfall." In Arizona, for instance:

AND THE RESERVE	Ariz.	U.S. Avg.
Barley, bu	75	50.6
Winter Wheat, bu	78	36.9
Alfalfa hay, tons	6. 40	3.18
Cotton, 1bs	1081.0	551.0
Sorghum, bu	71.0	62.9

Crop failures due to drought are unknown.

Statement: "The Bureau of Reclamation is moving away from water for scriculture to water for municipal and industrial uses." The water is being used "to provide extraordinary

intensive industrial and municipal water uses in parts of the Nation where you just do not have that water, where it is not appropriate, and where you never would use it in that way."

Response: This statement is critical of using water in the West for municipal and industrial purposes while the preceding statement is critical of using the water for irrigation. The basis for these statements is that the water will run out or is just not available. A part of any investigation is the hydrology study to determine the availability of the water supply. Although there is a limit to the supply which constrains development, the water supply is continually renewed. In the Middle Ages people believed that the water in rivers flowed magically from the center of the earth, but we now know that water is being exchanged between the earth and atmosphere all the time. The rain feeds the rivers. Rivers carry water to the ocean. Evaporation from land and ocean puts water back in the atmosphere and this exchange goes on continually.

Statement: Quoting a 1978 WPRS report: "Municipal water supply supports economic

growth."

Moynihan: "Well, yes, it does. But how economic is growth based on a Federal subsidy, and how permanent is it based on that precarious set of water resources?"

Response: Economic growth is the same regardless of the source of financing that generates the growth. Granted, the benefits realized from the growth are effected by who pays the costs. But nearly every sector of the American economy is subsidized to some extent. Furthermore, the subsidy for municipal water supplies is quite small if any. Certainly the subsidy is no greater than that provided, NBC, ABC, McDonalds, K-Mart, and others who utilize low interest rate Federal Industrial Development Bonds for creating growth in their business.

Most worthwhile Federal programs involve subsidies in that there is not a direct return of public funds with interest by the beneficiaries. These programs range from school lunch programs to mass transportation systems. Yet we are unaware of any major public investment program that has made a greater proportionate contribution to the than the Reclamation water resource program. This is returning hard currency to the Treasury. Revenues flow from providing needed water supplies to our western cities and farms, and from the production of clean hydroelectric energy utilizing renewable water resources in these days of diminishing fossil fuel supplies. These direct returns do not count the associated income tax returns that also flow to the Treasury or the effect that the production of a wide variety of crops has on food prices in this day of inflationary pressures.

Statement: Quoting U.S. Comptroller General's 1981 report: "Repayments for irrigation are presented to the Congress as full repayment. Since no interest is charged, however, these payments actually cover less than 10% of the Federal Government's actual cost."

Response: The law generally requires that irrigation costs be repaid within 50 years without interest. To claim that this represents a subsidy of more than 90 percent since no interest is charged means that an interest rate greater than 20 percent is assumed. Full repayment is made when the requirements of the law have been met. Any number of varying assumptions regarding the interest rate and the repayment period could be made that could reflect something less than full repayment but these are only hypothetical examples.

Statement: Moynihan: "The singularly most profilgate use of public funds in the Federal Government today is the Bureau of Reclamation." And, "There is no National Water Policy."

Response: The Bureau of Reclamation's budget is subject to the same reviews and approvals as those of other Federal Agencies. The Reclamation budget is submitted by the Secretary of the Interior to the Office of Management and Budget for review in behalf of the President. Following establishment of the President's Budget it is transmitted to the Congress. The budget is then subjected to hearings before the House and Senate appropriation committees. Congress reviews and revises the President's Budget request based on then prevailing objectives and criteria of the Congress.

Even before Reclamation projects are included in the budget for construction funds they are subjected to evaluation criteria as strenuous as any in the Federal government. The investigations conducted under Executive policies and procedures as well as public laws includes, among others, economic and financial analyses, engineering, geologic and hydrologic studies, environmental and social assessments, land classifications and surveys. All of the investigations, reviews, and approvals necessary before a project goes into construction requires an average of 26 years. Statement: "We have converted vast arid

Statement: "We have converted vast arid regions of this Nation to a water intensive agriculture for which they are not suited, and have further used nominally agriculture-based water programs to produce industrial uses, again in arid regions where there is not an adequate amount of water."

Response: The Federal Reclamation Program has operated for 79 years to develop the West. Since its establishment in 1902, over 150 water resource development projects or units have been constructed at a national investment of about \$8.5 billion. This investment has resulted in the construction and operation of 236 reservoirs, 141 diversion dams, 7,097 miles of canals, and 50 hydroelectric powerplants.

Each year, the investment by the public in irrigation facilities constructed by Reclamation pays off handsomely in its contribution to the national and international economics of the United States. The net addition to national economic activity by agricultural production on Reclamation projects totaled about \$8.6 billion in 1979. This, in part, is comprised of an estimated \$4.2 billion net increase in production, i.e., the net additional crop production after subtracting the estimated value of production which would have occurred without the projects. Part of the additional crop production resulted in approximately a net \$600 million increase in the value of livestick production as well as a net increase in the value of output of food processors of \$3.8 billion. Over 10 million acres are irrigated in the West on Reclamation projects and without the irrigation, this land would be an underutilized resource.

Over 56 million tons of food, fiber, and forage with a gross value of nearly \$7 billion are produced annually on lands irrigated. This production would meet the annual food requirements of 37 million people based upon an average per capita consumption of 2,500 calories per day.

calories per day.

Municipal and industrial water deliveries total over 625 billion gallons annually and provide about 47 percent of the average daily requirements of nearly 19 million people.

Nearly 22 million people receive water service, including the 19 million that receive municipal and industrial water service plus another 3 million that receive irrigation service on farms and urban and suburban residential lands.

Fifty hydroelectric plants generate over 40 billion kilowatt hours of electric energy annually. Cumulative gross electricity generated by Reclamation hydroelectric plants total about 1 trillion kilowatt hours. This amount of electricity generated over the years has saved the equivalent of about 1.9 billion barrels of oil, or 500 million tons of

coal, or nearly 11.1 trillion cubic feet of natural gas.

natural gas.
Flood damages prevented average nearly \$60 million annually. Cumulative flood control benefits during the 30-year period 1950-1979 totaled nearly \$1.8 billion, more than twice the cumulative flood control expenditures during the same time period.

Nearly 67 million visitor-days of public recreation are provided annually at over 280 recreation areas.

These benefits translate into very significant economic impacts throughout the Nation. It is estimated that nearly \$17.4 billion in increased business activity results annually from all functions of the Bureau of Reclamation. This is estimated to have generated sufficient income and corporate profits to add nearly \$2.3 billion annually to the Federal Treasury in tax revenues and nearly \$1.5 billion annually in tax revenues to State and local governments. The total tax revenues accruing to the Federal Government since 1940 from this economic activity are estimated at about \$28.4 billion. This increased economic activity has provided over 300,000 jobs annually.

Statement: Sen. Proxmire (D) Wisconsin said: "According to Prof. Thomas Power of the University of Montana 73 percent of the lands irrigated by the CAP are used for growing crops which are eligible for Federal setasides and price supports. He estimates that each farm irrigated by the Project (CAP) is getting a \$1.8 million subsidy. Talk about millionaire farmers."

Response: Regarding the subsidy per farm, there are many factors that influence the derivation of such as estimate. These factors include number of acres served, average acres per farm, the nature of construction schedule and resulting interest during construction, irrigators' repayment schedule, the ad valorem tax schedule, and the selected discount rate.

Based on current information and using a 7 percent discount rate, and approximation of the assistance provided to the average farm would be more in the magnitude of \$535,000. This is based on a service area of 510,000 acres as identified in the State of Arizona's initial allocation of agricultural water and an average farm size of 320 acres. This assumes joint ownership of 160 acres each by husband and wife, in accordance with the Reclamation Act.

Specifically in his report, Dr. Power states that the subsidy in terms of present worth (1977) dollars is \$1.7 billion, and after apparently compounding at 7 percent interest for 50 years into the future, would accumulate another \$3.7 billion of interest, making up his \$5.4 billion estimate. As most economists would agree, the appropriate comparison of economic values is to convert all past and future expenditures and revenues to a common point in time in present worth dollars, inasmuch as decisions are made to commit dollars available in the present not in some distant future. The use of the \$5.4 cumulated 50 years into billion estimate, the future, would be similar to a parent telling his offspring after spending \$10,000 for a college education that this subsidy actually amounted to \$300,000 over the offspring's remaining 50 years average lifetime, because the parent had foregone 50 years of cumulative interest.

It is not possible to confirm Dr. Power's derivation of the \$1.7 billion estimate because of the great number of unspecified assumptions and the variety of computational approaches that can be taken. Although the full construction cost of the irrigation investment is returned by local and regional beneficiaries through water charges, ad valorem taxes, and electricity rates, he apparently calculates the subsidy on the basis that no interest would be paid, which he sets at the current longterm rate of 7 percent. He also considers as part of the sub-

sidy the difference between the 3.342 percent interest rate established by Congress for repayment of municipal water and power allocations, at the time of construction appropriated and the 7 percent rate. To this he adds the construction cost and interest at 7 percent to the nonreimbursable allocations to such purposes as flood control, where benefits have traditionally been considered widespread and of national interest. Nevertheless, not counting the interest subsidy, the CAP will repay 75 percent of the Federal many other public investments in natural resources, is a handsome return indeed.

resources, is a handsome return indeed.
Statement: "Depletion (of groundwater) can and should be restricted. This can be done by limiting the amount of groundwater each landowner can lift. Farmers should have title to their water so they can sel: it."

Response: The desirability of controlling the use of groundwater varies with the cir-cumstance. In some areas, such as the Los Angeles area, the depletion of groundwater resources helped build a healthy economy which allowed the State to build expensive water supply systems to impose water from other areas. In Central Arizona, a viable industrial and agricultural economy has developed using a combination of surface and groundwater supplies. The availability of additional surface water from the Colorado River through the Central Arizona Project will allow the State to reduce the use groundwater. A similar situation exists in the high plains area of the midwest where a viable agricultural economy has developed using groundwater from the Ogaliala aquifer. Without importations of surface water from outside the area, much of the irrigated agriculture in that area may go out of production as groundwater supplies are depleted

Due to the high pumping costs involved in utilizing this groundwater, the amount of water wasted is normally quite small. Farmers can simply not afford to pump large amounts of water that are in excess of their needs. As pumping costs continue to increase, many of the less economically feasible uses of the water will undoubtedly be forced out of production leaving the more economically healthy developments in operation and reducing the level of groundwater pumping.

In addition, it must be noted that the control of groundwater pumping is strictly a State prerogative. Many western States are recognizing the need to impose restrictions on groundwater depletions and have implemented, through legislation or administrative action, groundwater use reforms which impose conservation measures, limits on expanded or new uses of groundwater, restrictions on the amount of water pumped, etc. While much of this reform may be considered to be too little, too late, it is certainly a step in the right direction. Allowing farmers to pump as much water as they desire, and sell the water that is excess to their needs would result in more rapid depletion of the groundwater resource and would only make the present situation worse.

make the present situation worse.

Statement: "The General Accounting Office concluded in a 1976 study that more than 50 percent of all the country's irrigation water is wasted."

Response: The "Digest" of the referenced GAO report states that "... less than half of the water delivered to a farm is productively used by the crops." On page 1, it is concluded that "Irrigation is a relatively inefficient water use, since under present practices less than half of the water delivered for irrigation is actually consumed by the crops." We are not attempting to minimize the problem of inefficient irrigation. However, such statements are misleading to the extent they suggest that use of water in irrigation is always inefficient or wasteful, or that the observed inefficiencies result entirely from poor onfarm water management.

The GAO statements apparently are based

on Bureau of Reclamation and Department of Agriculture studies (cited on pp. 6 and 7) which showed that average farm irrigation efficiency is low in the Western States. However, the report does not adequately recognize that a large portion of the delivered irrigation water that is not consumptively or productively used on farms is returned to stream systems where it is available for downstream diversion and reuse in irrigation or for other purposes. Even though water use on individual farms may be inefficient, cumulative use in a river basin may be highly efficient. Thus, measurements of individual and average farm irrigation efficiencies do not accurately characterize the overall situation. In addition, the report does not recognize that irrigation efficiencies for a significant number of farms and projects already approach the practical maximum levels.

Statement: Subsidies are destroying the water table of the West.

Response: In planning water and related land resource development projects, Reclamation considers the groundwater resource in terms of its utility for conjunctive use with surface water supplies and the potential impacts of the proposed project on the groundwater resource.

In general, Reclamation does not plan projects for the development of ground-water. There are exceptions, however, such as the Spokane Valley Project which is in operation and the Salmon Falls Division of the Upper Snake River Project where the plan calls for pumping groundwater for project use. In addition, in areas where groundwater can be utilized in conjunction with surface water to alleviate groundwater problems or shortages in surface supplies, groundwater pumping is considered as a part of the project plan.

Another groundwater problem area is the situation where groundwater overdrafting is severe and creating significant problems in terms of reductions in water supply, increased pumping costs, and subsidence. Where projects are planned to help alleviate those problems, they generally consist of the use of surface water to supplement the groundwater supply and thus reduce groundwater pumping. In those cases it is difficult to assure that reduced levels of pumping will continue since the involved State controls the use of groundwater. In one case, the Central Arizona Project, the Congressional authorization for the project provided for restrictions of groundwater pumping. That legislation in conjunction with pressure by the Administration to have the State institute groundwater reforms has resulted in controls on the use of groundwater that appear to be quite effective if properly administrated.

The O'Neill and North Loup Units of the Pick-Sloan Missouri Basin Program were planned to provide surface water supplies for irrigation purposes in the project areas was being obtained from groundwater and groundwater levels were declining. The projects were planned to alleviate the overdrafting problem. In addition, the historic use and reuse of groundwater in the areas had resulted in substantial increases in the nitrate levels in the groundwater. The introduction of surface water with much lower nitrate levels is expected to reduce the nitrate levels in groundwater.

In addition, Memorandums of Understanding (MOU's) have been developed and signed which are expected to further reduce the nitrate levels in the groundwater. Those MOU's require the project water users to: (1) Attend a course on irrigation scheduling; (2) Use soil moisture measuring equipment to determine the timing and amount of irrigation water to apply; (3) Institute and maintain an irrigation management system; and (4) Refrain from applying nitrogen

fertilizer in the fall and winter except for minimum starter applications.

The above are examples of the type of Reclamation involvement in groundwater activities. In all cases the projects are designed to protect the groundwater of the area, not to develop and exploit non-renewable groundwater resources.

Statement: Quoting Fortune Magazine:
"The Southwest is not running out of
water—it's running out of cheap water. The
Southwest's reaction to its artificial shortage
is to cry out for even more Federal spending
on projects like the Central Arizona Project."

Response: According to the U.S. Geological Survey, the Salt River Valley groundwater basin has approximately 100 million acrefeet in storage to a depth of 700 feet below land surface. Assuming that all of this water was extractable and of suitable quality for domestic use, which it is not, and further assuming a year 2020 population in Phoenix and Tucson of 4 million, the in-ground supplies could support these cities for more than a century

a century.

Despite the apparent vast amounts of water remaining in Arizona's underground aquifers, the total picture is one of overuse and persistent declines in water tables throughout Central Arizona. Along with this overuse have come the consequences of increased pumping costs, wells going dry, land subsidence and earth fissuring. Rapid completion of the Central Arizona Project will not overcome all these problems, but it can reduce the area's use of water in the near term to manageable proportions. In addition, the State of Arizona has implemented groundwater reform legislation which imposes mandatory conservation measures and restrictions on new or expanded groundwater uses in area of severe groundwater overdrafting.

Therefore, it 's not simply a problem of the price of water in the southwest, but there is not enough water to meet projected needs for more than a few decades. In addition, the water that is available to Central Arizona and some other areas is the "geologic water" that Senator Moynihan was concerned about depleting.

Statement: "All over the West, we are using geologic water which is not replacing itself; we are using water for purposes that ought not ever to be used . . ."

Response: This statement amounts to an attack upon private property rights in groundwater, as well as the right of the states to manage their groundwater resources. Reclamation projects almost exclusively deal with development of surface waters not groundwater.

There are areas of the West where "geologic water" (groundwater which was placed in storage over extended periods of history) are being depleted at very high rates. Because of the low rate of recharge, continued withdrawals of water at present rates will ultimately result in the depletion of those resources. This situation, however, is not as widespread as the statement indicates. Two notable examples are the high plains area of Kansas, Oklahoma and Texas where use of groundwater from the Ogollala aquifer has resulted in declining groundwater levels and increasing pumping costs to the extent that some farms are being forced out of production, and the Central Arizona area where ground levels are declining rapidly.

The use of that water is the prerogative of the involved states. The use of part of that resource has added significantly to the economic growth and food and fiber production of the nation. The States recognized that these resources are finite and many are instituting measures to control the use of non-renewable water resources. Arizona, for example, has implemented groundwater reform legislation which imposes mandatory conservation measures and restrictions on new or expanded groundwater uses in areas of severe groundwater overdrafting.

Statement: Quoting from Wall Street Journal: "New projects could be avoided for years if the price of water were allowed to move toward its replacement cost which is 50 times what some farmers are currently paying. This would happen if all users whose water supplies exceeded their needs were allowed to sell to those who don't have enough. Amazingly, the buying and selling of water is restricted in most of the regions and this encourages those with a surplus to use it wantonly."

Response: It is true that increasing the price of water tends to discourage excess use, and it is also true that some western States do not allow the sale of water for use other than that for which the water right was obtained. However, it should be noted that unlimited water price increases in the range suggested would put many, if not most, of the irrigated farming operations in the West in jeopardy. The people of the Nation have a significant investment in much of that development and have come to rely on the food production from those operations very

As discussed in a previous response, excess diversions for irrigation are not necessarily lost from further use. Much of the water diverted that is excess to crop requirements is lost through canal and lateral seepage or irrigation deep-percolation and returns to the stream from which it was diverted and is used by downstream diverters. If the excess diversions were discontinued much of the water "saved" would have to remain in the stream for use by those that were previously utilizing the return flows from the excess diversions. Little new water would be available for sale to new users.

Another factor that must be considered in the sale of "excess" water is that most western States limit diversions to the amount that can be put to beneficial use. If that requirement were strictly enforced, there would be no "excess" water for sale. However, the measure of beneficial use is difficult to determine and most States allow some flexibility in diversion values and there may be some excess diversion. It is this restriction which normally prohibits the sale of "excess" water since by law the diverter is not allowed to divert more than required for the purpose described in the water right.

ANNIVERSARY OF SOVIET INVA-SION OF CZECHOSLOVAKIA

 Mr. LEVIN. Mr. President, on August 21, 1981, the freedom loving people of Czechoslovakia commemorated the 13th anniversary of the Soviet invasion and occupation of their beloved country.

Not only did the Soviet Union violate the sovereignty of Czechoslovakia by an open act of aggression, it violated the principle of self-determination and intervened in the domestic affairs of an independent state.

The continued occupation of Czechoslovakia strips that country of its basic right to determine its own aspirations and destiny. The people of Czechoslovakia always have been strongly pro-American, and Americans of Czech and Slovak descent have made significant contributions to this country for many generations.

In the past, the Senate and the House of Representatives have introduced resolutions in the Congress requesting that the President call on the Soviet Union to withdraw from Czechoslovakia. In a brave act of defiance and courage, over 1,000 Czechs petitioned their Government to adhere to the Helsinki Final Act. Even though the Government responded

with acts of harassment and oppression, more signatories have come forth.

Mr. President, we remember clearly that day in 1968 when Soviet tanks rumbled into that small country and Soviet troops were installed in the cities. We watched as a puppet government took its place in Prague. And we watch with intense interest now to see if the Polish people will be the ones to stop this kind of unprovoked aggression that has gone unchecked too many times since World War II ended.

I think we should make it clear to the people of Czechoslovakia that we too recognize and support their declaration of August 21, 1981, as the "Day of Soviet Shame." The dream that Czechoslovakia will once again be a free and independent nation is a dream that we can help keep alive and share with our friends of that once proud nation.

TRIBUTE TO CHAIRMAN CLAUDE PEPPER ON THE OCCASION OF HIS 81ST BIRTHDAY

• Mr. HEINZ. Mr. President, as chairman of the Senate Special Committee on Aging, I would like to take this opportunity to pay tribute to Representative and former Senator CLAUDE D. PEPPER, the distinguished chairman of the House Select Committee on Aging and a long-standing advocate for the concerns of the elderly, on the occasion of his 81st birthday. It is, indeed, an honor and a pleasure to commend the chairman at this time for his many fine contributions to our Nation's older citizens.

tions to our Nation's older citizens.

As chairman of the House Select Committee on Aging since 1976, and a staunch supporter of the elderly prior to his chairmanship, Senator PEPPER has given freely of himself and his time to work for a better life for our Nation's senior citizens. Among his major legislative accomplishments on behalf of the elderly was the passage of the Age Discrimination in Employment Act which raised the mandatory retirement age from 65 to 70 in the private sector and eliminated it completely for Federal workers. He also led the Congress in establishing 1982 as the World Year on Aging and in promoting a United Nations resolution calling for a World Assembly on Aging to be convened in Vienna, Austria, in July of 1982.

As chairman of the House Subcommittee on Health and Long-Term Care, Senator Pepper's strong leadership brought about numerous studies and hearings on a broad range of aging issues regarding our Nation's health care delivery system, investigations into fraud and abuse in our medical reimbursement system, and legislation designed to improve the quality of care in our country's long-term care institutions.

While his work on behalf of older Americans is a cause for admiration, his life work—his tircless effort as a humanitarian—is a cause for inspiration. Symbolic of his broader contributions is his leadership on behalf of the National Cancer Institute. Clearly the leading research institute of its kind in the world, it would not have prospered

as it has without his leadership and support.

Chairman Pepper not only has dedicated his life to the service of his fellow human beings, but also he has been successful in truly improying the lives of many. His is, indeed, an example to us all of continuing vitality in service to others. I commend him on the occasion of his 81st birthday.

TRIBUTE TO CHAIRMAN CLAUDE PEPPER ON THE OCCASION OF HIS 81ST BIRTHDAY

• Mr. CHILES. Mr. President, as former chairman and now ranking minority member of the Senate Special Committee on Aging, and fellow Floridian, I would like to take this opportunity to congratuate Representative and former Senator Claude D. Pepper, the distinguished chairman of the House Select Committee on Aging and well-known advocate for the needs and concerns of older Americans, on the occasion of his 81st birthday. It is, indeed, an honor to commend the chairman for his activities on behalf of our Nation's 36 million older persons.

Senator Pepper has served as chairman of the House Select Committee on Aging since 1976. During his chairmanship, the Age Discrimination in Employment Act, which raised the mandatory retirement age from 65 to 70 in the private sector and eliminated it completely for Federal workers, was passed. Further, he led the Congress in establishing 1982 as the World Year on Aging and in promoting a United Nations' resolution to convene a World Assembly on Aging in Vienna, Austria, in July of 1982.

Senator Pepper is still going strong after 14 congressional campaigns, four decades of elected service, and numerous difficult legislative battles. He maintains an office schedule that would exhaust a younger person and worries that there are not enough hours in the day.

While Senator Pepper's work on behalf of older Americans deserves commendation, his efforts as a humanitarian also deserve praise. His leadership on behalf of the National Cancer Institute is but one example of his humanitarian efforts.

Chairman Pepper has dedicated his life to public service—service to his fellow human beings. He is a marvelous example to us all of continuing interest and vitality, I commend him for his untiring and unselfish efforts and congratulate him on the occasion of his 81st birthday.

THE DEATH OF ROY WILKINS

• Mr. LEVIN. Mr. President, all of us mourn the death this week of Roy Wilkins. His life symbolized for many the history of the civil rights struggle in this country. Born in a time when the civil rights of blacks and other minorities were neither respected nor recognized, Roy Wilkins led a lifelong struggle to alter the way Americans thought—and behaved—toward their fellow citizens.

As a leader in the civil rights movement, he participated in and helped to shape the events which ultimately changed the shape of our society. We have not yet realized his dream; not yet come to the time when all people are judged for what they are rather than for how they look or what their origin or religious beliefs are. He died, then, when his work was still uncompleted. But his life was complete and fulfilled. It leaves us a legacy which can, if we are wise enough, lead us to the same kind of peace and perspective which characterized his life and his work.

Roy Wilkins was not a revolutionary, not a particularly powerful orator, not a physically imposing person. But in his quiet way he persuaded those without power to seek it and those with power to share it. His death leaves this Nation poorer, but his life has made us richer. I only hope that as we mourn him we also try to learn from him.

ORDER FOR RECESS UNTIL 9:45 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:45 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CER-TAIN SENATORS ON TOMORROW

Mr. BAKER. Mr. President, I have discussed this with the minority leader. I ask unanimous consent that the time for the two leaders tomorrow under the standing order be reduced to 4 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I ask unanimous consent that after the recognition of the two leaders under the standing order, there be special orders, in this order, in favor of the following Senators: the distinguished Senator from Arkansas (Mr. Pryor) for not to exceed 15 minutes, the distinguished Senator from Wisconsin (Mr. Proxmire) for not to exceed 5 minutes, and the distinguished minority leader (Mr. Robert C. Byrd) for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, is there an order for the Senate to begin consideration of the military pay bill tomorrow at 10:30 a.m.?

The PRESIDING OFFICER. The order states "no later than 10:30 a.m."
Mr. BAKER. I thank the Chair.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering nominations on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I wish to state for the benefit of Senators and for the benefit of the distinguished minority leader that we are cleared on this side to proceed to the consideration of Calendar No. 438, the nomination of Winifred Ann Pizzano, of Virginia, to be Deputy Director of the ACTION agency. I inquire whether the distinguished minority leader is in a position to proceed to the consideration of that nomination at this

Mr. ROBERT C. BYRD. Mr. President, we on this side of the aisle are in position to proceed.

Mr. BAKER. I thank the minority

leader.

ACTION AGENCY

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate the nomination of Winifred Ann Pizzano.

The PRESIDING OFFICER. The nom-

ination will be stated.

The assistant legislative clerk read the nomination of Winifred Ann Pizzano, of Virginia, to be Deputy Director of the ACTION agency.

The PRESIDING OFFICER. Without objection, the nomination is considered

and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the Senate gave its consent to this nomination.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was

agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without

objection, it is so ordered.

DEPARTMENT OF ENERGY

Mr. BAKER. Mr. President, in connection with Calendar No. 344 on today's Executive Calendar, the nomination of James R. Richards, of Virginia, to be Inspector General of the Department of Energy, vice John Kenneth Mansfield, I have a unanimous-consent request I wish to propound at this time.

I ask unanimous consent that when the Senate proceeds to the nomination of James R. Richards, of Virginia, to be Inspector General of the Department of Energy, it be considered on the following time agreement: 2 hours under the control of the ranking minority member of the Governmental Affairs Committee, Senator Eagleton; 1 hour under the control of the chairman of the committee, Senator McClure; and that agreement be in the usual form, with the proviso that the Senate not proceed to the consideration of the nomination prior to Thursday, September 17, 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMOVAL OF INJUNCTIONS SECRECY - TREATY DOCUMENT NO. 97-16, TREATY DOCUMENT NO.

Mr. BAKER. Mr. President, I ask unanimous consent that the injunction of secrecy be removed from two treaties transmitted to the Senate during the ad-

journment of the Senate by the President of the United States on August 6 and September 8:

A Treaty on Mutual Legal Assistance with the Kingdom of the Netherlands (Treaty Document No. 97-16); and The Protocol Amending the Tax Con-

vention with Jamaica (Treaty Document No. 97-17).

I ask that the treaties be considered as having been read the first time; that they be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed; and that the President's messages be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The messages of the President are as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Treaty on Mutual Legal Assistance between the United States of America and the Kingdom of the Netherlands, together with a related exchange of notes, signed at The Hague on June 12, 1981.

I transmit also, for the information of the Senate, the report of the Department of State with respect to the treaty.

The treaty is one of a series of modern mutual assistance treaties being negotiated by the United States. The treaty is self-executing and utilizes existing statutory authority.

The new treaty provides for a broad range of cooperation in criminal matters. Mutual assistance available under the treaty includes: (1) executing requests relating to criminal matters; (2) taking of testimony or statements of persons; (3) effecting the production, preservation, and authentication of documents, records, or articles of evidence; (4) returning to the requesting Party any objects, articles, or other property or assets belonging to it or obtained by an accused through offenses; (5) serving judicial documents, writs, summonses, records of judicial verdicts, and court judgments or decisions; (6) effecting the appearance of a witness or expert before a court of the requesting Party; (7) locating persons; and (8) providing judicial records, evidence, and information.

I recommend that the Senate give early and favorable consideration to the treaty and give its advice and consent

to ratification.

RONALD REAGAN. THE WHITE HOUSE, August 6, 1981.

To the Senate of the United States: I transmit herewith, for the advice and consent of the Senate to ratification, the Protocol amending the Convention between the Government of the United States of America and the Government of Jamaica for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, together with a related exchange of notes, signed at Kingston on July 17, 1981. I also transmit the report of the Department of State with respect to the Protocol.

The Protocol was negotiated subse-

quent to Prime Minister Seaga's visit to this country in January, 1981. It strengthens the provisions of the Convention in order to limit potential abuse of the treaty in certain situations and to make more effective the means of denying treaty benefits to residents of third countries who establish a corporation in one Contracting State in order to obtain treaty benefits from the other Contracting State. The Protocol also permits United States citizens to deduct expenses incurred while attending business conventions in Jamaica.

I recommend that the Senate give early and favorable consideration to the Protocol and Convention and give its advice and consent to ratification.

RONALD REAGAN. THE WHITE HOUSE, September 8, 1981.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

There being no objection, the Senate resumed the consideration of legislative business.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have no further business to transact.

I inquire of the minority leader if he has any matter he wishes to be put before the Senate at this time.

Mr. ROBERT C. BYRD. Mr. President, tnank the distinguished majority leader. I have nothing at this time.

Mr. BAKER. I thank the minority leader

RECESS UNTIL 9:45 A.M. TOMORROW

Mr. BAKER. Mr. President, in that case, I now move, in accordance with the order previously entered, that the Senate stand in recess until 9:45 a.m. on tomorrow.

The motion was agreed to and, at 4:40 p.m., the Senate recessed until tomorrow, Thursday, September 10, 1981, at 9:45

NOMINATIONS

Executive nominations received by the Secretary of the Senate August 11, 1981, under authority of the order of the Senate of August 3, 1981:

THE JUDICIARY

Henry R. Wilholt, Jr., of Kentucky, to be U.S. district judge for the eastern district of Kentucky vice Howard David Hermansdorfer, resigned.

Conrad K. Cyr, of Maine, to be U.S. district judge for the district of Maine vice George J. Mitchell, resigned.

John C. Coughenour, of Washington, to be U.S. district judge for the western district of Washington vice Morell E. Sharp, deceased.

DEPARTMENT OF JUSTICE

Glen H. Davidson, of Mississippi, to be U.S. attorney for the northern district of Missis-sippi for the term of 4 years vice Hosea M. Ray, resigned.

George Landon Phillips, of Mississippi, to be U.S. attorney for the southern district of Mississippi for the term of 4 years vice Robert E. Hauberg, retired.

DEPARTMENT OF EDUCATION

Gary L. Jones, of Virginia, to be Deputy Under Secretary for Planning and Budget, Department of Education, vice Carl William Fischer, resigned.

NATIONAL INSTITUTE OF EDUCATION

Edward A. Curran, of Maryland, to be Director of the National Institute of Education, vice P. Michael Timpane.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. Jack Vincent Mackmull, 294-22-6931, U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. Donald Edward Rosenblum, 089-22-1106, U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. Howard Francis Stone, 447-32-5655, Army of the United States (brigadier general, U.S. Army).

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. James Benjamin Vaught, 449-64-3161, U.S. Army.

IN THE NAVY

The following-named rear admirals of the Reserve of the U.S. Navy for permanent promotion to the grade of rear admiral in the line and staff corps, as indicated, pursuant to the provisions of title 10, United States Code section 5312. Code, section 5912:

Nelson Otto Heyer. Robert Louis Zralek. William Henry Langenburg. Clarence Arthur E. Johnson, Jr. John William Cronin, Jr. Howard Roop. Thomas Albert Stansbury. Lester Robert Smith. Michael Peter Nemchick. Carlos Paul Baker, Jr. Donald Thomas Corrigan. Whitney Hansen. Ted Levy.

MEDICAL CORPS

Henry Turner Edmondson, Jr. Joseph Hardy Miller.

SUPPLY CORPS

Alexander Jackson III. Gerald Clayton Sullivan.

CIVIL ENGINEER CORPS

Roy "L" Dunlap.

JUDGE ADVOCATE GENERAL'S CORPS Julian Robert Benjamin.

DENTAL CORPS

Charles Frederick Schreier, Jr.

IN THE COAST GUARD

The following officers of the U.S. Coast Guard for promotion to the grade of lieutenant (junior grade):

John D. Bogle William C. Richards Daniel A. Cutrer Mark A. Tilford David N. Griffith Harold W. Finch, Jr. Larry R. Hammond Keith L. Patterson Edward G. LeBlanc Walter P. Workman William D.

Baumgartner Kenneth G. Forstmeier Richard B. Burt James C. Preisig Linda Johansen Harry E. Haynes III Robert C. Weil Mark J. Yost William L. Zack Susan K. Donner Dale G. Streyle Curtis A. Executive nominations received by the Secretary of the Senate, September 8, 1981, under authority of the order of the Senate of August 3, 1981:

THE JUDICIARY

Lawrence W. Pierce, of New York, to be U.S. circuit judge for the second circuit, vice Murray I. Gurfein, deceased.

CONFIRMATION

Executive nomination confirmed by the Senate September 9, 1981:

ACTION AGENCY

Winifred Ann Pizzano, of Virginia, to be Deputy Director of the ACTION Agency, vice Mary Elizabeth King, resigned.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the

HOUSE OF REPRESENTATIVES—Wednesday, September 9, 1981

The House met at 12 o'clock noon.
The Chaplain, Rev. James David
Ford, D.D., offered the following
prayer:

Hatred stirs up strife, but love covers all offenses.—Proverbs 10: 12.

Give ear to our prayer, O Lord, and heed our supplications, that we may do those things that bring honor to Your name and praise to Your people. Fill our hearts with the desire to seek justice and do mercy, and keep our eyes open to the needy and oppressed. May our minds not be closed by anger or hatred toward others but instead be cleansed and purified by the gifts of love which You have so manifestly given to all. In Your name we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

THE LATE HONORABLE WILLIAM R. COTTER

Mr. MOFFETT. Mr. Speaker, I offer a privileged resolution (H. Res. 206) on the death of the Honorable William R. Cotter.

The Clerk read the resolution, as follows:

H. RES. 206

Resolved, That the House has heard with profound sorrow of the death of the Honorable William R. Cotter, a Representative from the State of Connecticut.

Resolved, That a committee of such Members of the House as the Speaker may designate, together with such Members of the Senate as may be joined, be appointed to attend the funeral.

Resolved. That the Sergeant at Arms of the House be authorized and directed to take such steps as may be necessary for carrying out the provisions of these resolutions and that the necessary expenses in connection therewith be paid out of the contingent fund of the House.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That when the House adjourns today, it adjourn as a further mark of respect to the memory of the deceased.

The SPEAKER. The gentleman from Connecticut (Mr. MOFFETT) is recognized for 1 hour.

Mr. MOFFETT. Mr. Speaker, at this time I have the sad duty to announce to my colleagues the death of WILLIAM Ross COTTER, and I join with the gen-

tleman from Connecticut (Mr. McKinney), if he could join me in the well, to make a few comments and to recognize our colleagues for a similar purpose.

WILLIAM Ross COTTER was born on July 18, 1926, in Hartford. He was a Hartford person clear through and loved that city. He went to Trinity College. He graduated from Trinity. He was a city councilor, a very active member of the Democratic Party in the city of Hartford, an aide to our recent and great Senator, Abraham Ribicoff. He also, as all of us know, was a valued Member of the House and of the congressional delegation.

Mr. Speaker, I just have one final comment: It is simply that BILL COTTER was a low key, very quiet man, very unassuming, and unpretentious. He loved this House very much.

Mr. Speaker, he had a great deal of love and admiration for the Speaker and for this House. He really wanted nothing more in life than to serve his constituents in Hartford and in the greater Hartford area, and it is a tragedy that he was taken from our State and from this body at such a young age.

Mr. Speaker, I now yield to my good friend and colleague, the gentleman from Connecticut (Mr. McKinney).

Mr. McKINNEY. Mr. Speaker, BILL COTTER and I came to this body together in January of 1971. From that day forward I think BILL had always been one of my closest friends. BILL was, I guess, in the vernacular of the world today seemingly "laid back," seemingly quiet, and yet I never knew of a man who cared more about where this country was going and the obligation that he had to try and help get it there

I remember an anecdote one day that to me expressed BILL COTTER and the way he really was. We were standing, as we so often do, out here on the steps, just looking at the good weather, and this very young choral group, from somewhere in our Nation, singing on the steps, and as usual being ignored by the traffic and by everyone else when BILL looked down at them in the midst of our discussing taxes, which was his committee, and he said to me, he said:

STEW, I wonder if we really know what we are doing to those kids.

That was BILL COTTER.

He cared deeply. I know on my part that this House, this body, will never be the same for me without BILL. BILL put friendship above partisanship. I can remember the times that he used to be asked into my district during a

campaign and that he would simply turn around and say:

I will not go; we do not do that in our State.

I think that the people of the State of Connecticut have had two grievous losses in the last 2 years, a wonderful ex-colleague of ours in Gov. Ella Grasso and now BILL COTTER.

BILL loved the people of the State. He will be missed by the politicians and he will be publicly mourned by the politicians, but in essence the people who are going to miss what BILL COTTER was, are the people of the State of Connecticut, the people about whom he cared above and beyond any other subject.

Mr. Speaker, I know of the gentleman's closeness to Bill and I know that the Speaker feels what we are feeling, and I hope that everyone will realize that we did not lose a politician, we lost a friend and a great man.

Mr. MOFFETT. Mr. Speaker, I thank the gentleman. I hope the gentleman will stay in the well to recognize Members of the minority in a few moments.

At this time, Mr. Speaker, I yield such time as he may consume to the gentleman from Connecticut (Mr. RATCHFORD).

Mr. RATCHFORD. Mr. Speaker, and this especially applies to my colleagues: How do you say goodby to a friend?

BILL COTTER was exactly that to me. I was first elected to the Connecticut General Assembly in 1962, and from then until now, our relationship has been a close, a meaningful, warm one. During that entire period of time this gracious, thoughtful, decent human being was involved in Connecticut's government. He truly was a product of the grassroots. He bragged about getting involved in Hartford politics with the then Hartford city chairman, John Bailey, who went on to become State and national chairman. He drove all over the State of Connecticut with his close friend John Bailey.

When we think of Connecticut politics, we think of BILL COTTER. We think of his involvement at the city level, as commissioner of insurance for the State of Connecticut, of his relationship with our giants in Connecticut government, John Dempsey and Ella Grasso. We know him also as someone who gave a decade as treasurer of his party, the Democratic Party; and as someone who came to the Halls of Congress quiet, considerate,

[☐] This symbol represents the time of day during the House proceedings, e.g., ☐ 1407 is 2:07 p.m.

[•] This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

thoughtful, unassuming, but above all, consistently always decent.

His government, his politics, were personal politics, personal government. He reached out and touched people whether it was a doorkeeper or a Congressman or a President of the United States. BILL COTTER could communicate.

Day after day his life was a life of helping people and today as we think of that life, as we think of that involvement, as we think of that dedication to public service, we know full well that our lives are better for his involvement. As one who was very much touched by this thoughtful and decent man, can I say to BILL COTTER, thank you for this commitment, thank you for this meaningful life, thank you from all of us that you have helped so much. Goodby old buddy, we will miss you.

Mr. MOFFETT. I thank the gentleman for his kind comments.

Mr. Speaker, I yield such time as he may consume to the gentleman from Connecticut (Mr. Gejdenson)

Mr. GEJDENSON. Mr. Speaker, I personally feel very honored to have known Bill. As a freshman in Congress, I found Bill Cotter to be an extremely helpful guide and mentor. He was straightforward and sincere, but never was without a sense of humor. He was a man who was always willing to take the time to help show someone else the ropes.

One of my first memories as a Congressman is of BILL COTTER, swearing me into Congress before a group of constituents on Capitol Hill, telling me what a rewarding experience I was going to have. From then on, no matter how busy he was, he was always available for advice and suggestions.

BILL did not care about making the limelight: He only cared about being a good Representative, one who was both concerned and effective. He led a life dedicated to public service and wanted nothing more than to do justice to his office.

A great Congressman, BILL well deserved the respect he acquired over the years from his colleagues. We will all miss his quiet integrity, his thoughtfulness, and his assistance. I deeply regret that I was able to work with BILL for so short a time.

Mr. MOFFETT. Mr. Speaker, I thank my colleague from Connecticut for his remarks.

I now yield to the gentleman from Connecticut (Mr. McKinney).

Mr. McKINNEY. Mr. Speaker, I yield such time as he may consume to the gentleman from Connecticut (Mr. Denardis).

Mr. Denardis. Mr. Speaker, over the years Bill Cotter and I had seen our relationship grow into one of mutual interest and respect. We shared a love of the legislative process; born in Connecticut where he served as insurance commissioner as I was seeking political office. Although we were of different political parties, I was always impressed with his courteous sense of fairness and his willingness to listen and to help.

BILL was elected to the U.S. House of Representatives the same year I was elected to the Connecticut State Senate. On many visits to Washington, we met and discussed Connecticut affairs and matters of concern to our mutual constituency. He was always articulate, helpful, and available to listen

Shortly after my own election to Congress in November of 1980, I heard from BILL COTTER. He offered himself and his staff to assist me in any way possible. I wisely took advantage of that offer and, during the period between the election and my inauguration, spoke with him often. I learned much

Before Bill's illness, we met regularly on the floor to discuss issues and politics, legislative procedures, people, and problems. He was always helpful to me, a freshman legislator, and always concerned about me and the people I represent.

Perhaps one of his warmest gestures toward me was his appearance at a private very exciting gathering of my friends and supporters held in the Capitol right after I was sworn in as a Congressman. It was certainly an emotional day for me and my family. The visit by the senior Member of the Connecticut delegation although, as I have said, he was not of my party, left an impression not only on me but on all in attendance. It was a warm and caring gesture by a man whose record proves him to have been a warm and caring man who dedicated his life to the people of Connecticut and most especially to all of those who also cared and served our people.

The First Congressional District of Connecticut wisely returned BILL COTTER to office each time he sought their support. He will be missed by them and by all of us who were helped by him and who knew him for the considerate, thoughtful, wise, and compassionate person he always was.

□ 1215

Mr. MOFFETT. Mr. Speaker, I thank the gentleman for his remarks. Mr. Speaker, at this time I want to recognize, for the purpose of making a statement about Bill Cotter, the distinguished chairman of the Committee on Ways and Means, the gentleman from Illinois (Mr. ROSTENKOWSKI).

Before I do, let me say to the chairman that perhaps we do not express our admiration and affection for each other in this body often enough, but it is safe to say that BILL COTTER thought the world of our chairman.

and he was not afraid to express it and to tell anybody about it. He was a very good and loyal member of the chairman's committee, as I am sure the gentleman knows that.

Mr. ROSTENKOWSKI. Mr. Speaker, I thank the gentleman for yielding. I want to express my gratitude to the gentleman from Connecticut for taking this time to pay tribute to his colleague from Connecticut.

There was probably no one closer in the Congress today to me than BILL COTTER. BILL had the knack of being a quiet legislator. He did not grab for headlines. Instead, he spent his years in Washington representing the people and region where he was raised with quiet sensitivity.

Born and raised in Frog Hollow, a Hartford neighborhood known for its political life, Bill was seasoned in the State house and later rose to become Connecticut's insurance commissioner before coming to Congress a decade ago.

BILL came to the Ways and Means Committee in 1975, with the reform wave that gathered after Watergate. Yet his counsel was moderate. I can remember his voice raised only once—advocating energy assistance to the elderly in his hard-hit region of New England. He chose his legislative issues with care and, like his fight to extend the investment tax credit to inner-city renovation, they most often reflected his concern for the working family living in a difficult time.

His most recent, and perhaps his greatest, legislative success was the expansion of the individual retirement accounts (IRA's) in the Economic Recovery Act just signed by the President.

Long ago, BILL recognized that most Americans reached retirement underinsured. Private pension plans had too often collapsed, or been diluted. Transferability was a constant hazard. Social security was never meant to meet the entire needs of retired working families.

Expanding individual retirement accounts not only offered greater personal command over a retirement pension, but also—as Bill forcefully pointed out—a deep pocket for national savings. His campaign over the last year was as determined as it was ultimately successful.

It is so remarkable that a man in the autumn of his own life would be as concerned with the well-being of those whose lives would reach beyond his own.

BILL was a totally committed Member of this body. He would constantly tell me over the phone how the issue ought to be handled during the committee's deliberation. As sick as BILL COTTER was, he wanted to come to Washington to participate in the tax debate last month. It was only

on my insistence that he did not return to Washington.

Workingmen and workingwomen, giant financial institutions, and small businesses owe BILL a broad measure of quiet gratitude for initiating such a monumental economic provision.

As chairman of the Subcommittee on Select Revenue Measures, he left behind an impressive agenda for tax legislation.

BILL was a man of great commonsense. He had a rare sense of what Americans expected from Government. He understood that a steady course was, in the end, wiser and more productive than sudden flights of legislative experiment.

BILL was also a fine politician. He played the game as I like to play the game—straight on. Members of the Committee on Ways and Means knew that when you got a Cotter commitment, it was in stone and when you got BILL COTTER to help or support you in a program, you had a tremendous ally

I am going to miss BILL. He had the knack of brightening a room when he walked into it.

We ate dinner three times a week for the last 7 years in Washington. Many times at the dinner table when the load was pretty heavy, BILL COTTER in his gentle way would come up with the perfect one liner. He would bring light into a dark conversation.

He was almost an uncle to my children. When my daughters came to visit me here in Washington, it was BILL COTTER who would tease and cajole. He never missed dinner with my family. To my wife Laverne, my daughters Dawn, Kristie, Gayle, and Stacy, BILL COTTER was, and will in their memories remain, a special kind of person.

To Betty, to the Members of the Connecticut delegation and to his constituents, I know you will miss him; but I want you to know that I will miss him even more. His good humor, his steadiness, his friendship—and, finally, his bravery—touched us all.

Mr. MOFFETT. I thank the chair-

I yield to the gentleman from Connecticut (Mr. McKinney).

Mr. McKINNEY. Mr. Speaker, I yield to the ranking member of the Committee on Ways and Means, the gentleman from New York (Mr. Conable), who I know realizes the great loss that committee has had.

Mr. CONABLE. Mr. Speaker, we all feel diminished when one of our friends crosses the bar and puts out to sea, despite the memories he leaves behind.

I did not have great experience with BILL COTTER in a wide range of places over a long period of time, but my association with him in the Committee on Ways and Means led me to believe that I could tell what kind of a person

he would be under all circumstances. He was a man who did not immediately grab you. He was quiet. He seemed deliberative, but I quickly found out in my association with him in the Committee on Ways and Means that it was not because of a lack of understanding or a lack of commitment, but because BILL COTTER wanted to do the right thing and wanted to be sure he arrived at the right decision by a careful process. As such, he was a man who defied those ideological and political cubbyholes that many of us crawl into all too easily. Once he made up his mind, as the chairman has said, you could depend on him: but you would also know that if he made up his mind differently from you, he would remain your friend.

BILL COTTER was the kind of person who helped make this House a human institution and as such he leaves a great many friends behind him. In contributing to the House as a human institution, he has also contributed to his country.

I am sure many of his constituents thought of him not just as a Representative, but as a friend, a warm human being, a decent person and the kind of man who should be serving in government and helping his fellow man.

Mr. MOFFETT. We thank the distinguished ranking minority member of the Committee on Ways and Means for his gracious statement.

At this time it is my great honor to recognize for purposes of a statement on the resolution, one of BILL COTTER'S dearest friends in this body, the distinguished Speaker.

Mr. O'NEILL. Mr. Speaker, with a sorrowful heart I join my colleagues today in tribute to my beloved friend BILL COTTER.

I knew BILL COTTER for many years before he came to Congress. He was very active in the politics of the State of Connecticut and I met him through the late, great John Bailey who was the guiding force of the Democratic Party in the State of Connecticut and a national chairman of our party. John was BILL's mentor and they were close personal friends and allies.

He served with distinction as an aide to former Governor Ribbicoff and as the State insurance commissioner before his election to the House of Representatives in 1970.

BILL had an effervescent personality and could light up the room, as DAN ROSTENKOWSKI has said. I guess the Irish in him made him a ribber and a kidder and he loved a good time and he loved fun.

My politics are liberal and BILL was a moderate. He had been a successful businessman and believed that the Government was going too far in many of its programs; yet he was a man of concern and compassion. BILL COTTER truly loved people.

BILL's first love, after his family and his mother who he adored, was politics. He loved the Democratic Party. He loved his native State of Connecticut and the Hartford area from which he came. He loved the life of being with and helping people. He loved the life of working in the background; studying problems, planning solutions. Not often did BILL take the floor, but he was an extremely knowledgeable fellow, and he knew how to move through the committee system, and through the friendships he developed here in the House and the respect and affection his colleagues had for him.

I last talked to Bill just 2 weeks ago. I would call him at least once a week and when they told me that they had stopped the chemotherapy treatments, I became extremely concerned about Bill. So I called him and he told me he was delighted that they had stopped the treatment. He said, "I'm going to lick this."

In my heart I know that BILL truly believed to the end that he was going to lick that dreaded disease of cancer. He was such a beautiful man—he had such personal strength and determination.

We have all been touched by his career here in Washington—by his gentleness, his persuasiveness, his wonderful personality.

My wife, Millie, and the entire O'Neill family joins me in extending to BILL's family our deepest sympathy and our love in this time of great sadness.

Mr. MOFFETT. I thank the Speaker.

At this time I yield to the gentleman from Massachusetts (Mr. Boland).

Mr. BOLAND. Mr. Speaker, yester-day was a sad day for the State of Connecticut, and the House of Representatives. The people of the First District of Connecticut lost their Congressman and the Members of this House lost a colleague and a friend.

BILL COTTER's death comes as a profound shock and leaves me with a sense of deep personal loss. Our districts are served by the same airport and we frequently traveled to and from Washington together. As my colleagues know, commuting is one of the least enjoyable aspects of serving in Congress; but I came to look forward to the trips on which I knew I would have BILL's company. He enjoyed talking about the country, and his keen insights and easygoing manner made it a pleasure to travel with him. I have many fond remembrances of the time we spent together, I am only sorry that those times will be no more.

Many Members of this House knew of BILL's struggle with cancer over the last few months. He accepted his illness as another challenge in his life, and I know that he never lost his desire to conquer it. He never com-

plained, but went quietly about the business of overcoming his illness with the same type of determination that characterized his work in Congress. I received a letter from him just yesterday in which he thanked me for some encouragement he felt I had given him and mentioned some concerns of his constituents that he wanted to address. I think that what bothered BILL most about his illness was not the physical discomfort it brought him, but the fact that it robbed him of the opportunity to be in Washington working for the people of the city of Hartford whom he loved so much.

Mr. Speaker, BILL COTTER served in this House for 10 years. His approach was low key rather than flamboyant but he was an effective spokesman for, and Representative of, the people of Connecticut. He never had a bad word for anyone. The people that sent him here on five occasions, and the people with whom he served, trusted and respected him. His absence will be felt in the days ahead as we attempt to deal with the economic issues on which he was so well versed and in which he took such an interest.

I want to extend my profound sympathies to Bill's sister, Betty, on her loss. That loss is shared by all the citizens of Connecticut. Bill's death, coming within a relatively short time after the death, from cancer, of former Gov. Ella Grasso, deprives Connecticut of two of her best loved and most effective political leaders. It deprives this Congress of one of its hardest working and most dependable Members. It deprives this Nation of an outstanding public official.

Mr. MOFFETT. Mr. Speaker, we in Connecticut thank the gentleman for his kind statement.

I yield such time as he may consume to the gentleman from Connecticut (Mr. McKinney).

Mr. McKINNEY. Mr. Speaker, I yield to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Speaker, I thank my colleague for yielding. I appreciate, as we all do, the time that my colleague, the gentleman from Connecticut (Mr. MOFFETT), and others, have taken for us to express our appreciation of the service that BILL COTTER has given to his congressional district and to this country.

Mr. Speaker, I have known BILL COTTER primarily through my membership on the Committee on Banking, Finance and Urban Affairs and most recently on the Ways and Means Committee. I followed BILL to the Ways and Means Committee in 1978, after having served with him for 4 years on the Banking Committee. I knew him to be an extremely reliable and obviously dedicated member of both of these hard-working and demanding committees.

As has already been clearly stated, BILL COTTER was not an overly flamboyant or, indeed a verbally noisy Member of the House of Representatives, but he was always on the job and consistently provided knowledgeable input to the legislative process.

□ 1230

As a consequence, BILL did not always make the evening news and was not as well known publicly, except in his own district, as some of our other Members. But he was there. He was always on the job. He knew well the laws relating to both of those committees and, of course, all of the issues facing his own congressional district.

He genuinely understood our complex tax laws, as our chairman of the Ways and Means Committee has already stated. BILL COTTER was very much a part of the draftsmanship of the recently passed tax bill. And it is interesting to note that many of his proposals were contained in both the Democratic version as well as the Republican version of the tax bill. And I think that fact speaks well for his legislative craftsmanship and his capability as a active participant in the whole process of our Ways and Means Committee.

BILL, of course, contributed mightily to the understanding that our Americans serving overseas need relief from undue taxation being placed upon them, and he made sure that those changes were contained in our recent tax bill.

He was, as has already been stated by our chairman, very active in incentives for retirement, for our entire American populace, and again made sure that those changes were in our tax bill. He is definitely to be credited for his persistence in that area.

Although these are the most well known, there were many other positions that he took in which he crafted the tax bill.

It has been a genuine pleasure to serve with Bill Cotter. His office, incidentally has been just around the corner from mine. Our offices exchanged not only smiles but ideas in many ways. And, of course, on given occasions we answered the phones for each other. There were just so many ways in which I got to know Bill Cotter as an office neighbor so much better than I had known him even during our close committee work.

I think the best way I can summarize the character of BILL COTTER is to say that he served this Congress, this country, with quiet dignity, and with a sense of dedicated service that you very seldom see among public office-holders. I know that we will all genuinely and sincerely miss BILL COTTER and his service to this fine body. We know our Ways and Means Committee will miss him. We know his family will miss him. We know his district will

certainly miss him. We know the country will miss him. America has lost a fine and dedicated public servant.

I thank my colleagues for yielding. Mr. MOFFETT. We thank the gentleman.

Mr. Speaker, I yield such time as he may consume to the gentleman from Oklahoma (Mr. Jones).

Mr. JONES of Oklahoma. I thank the gentleman for yielding.

Mr. Speaker, it is a great deal of sadness for me to participate in this occasion on the passing of Bill Cotter. I had the privilege of sitting near Bill Cotter. He sat two seats away from me on the Ways and Means Committee. We came on the committee at the same time. From that vantage point, you can size up an individual both as an individual and as a legislator. And in both respects Bill Cotter measured to the very highest degree.

He literally epitomized what former Speaker Sam Rayburn used to described as his favorite legislator, the workhorse. He was a workhorse in every sense of the word. He never lost sight of where he came from. As has already been pointed out, he loved Hartford, the people of Hartford. He did their work here in the Congress and represented them well.

I had an occasion one time to speak at a tax conference sponsored by the university there in Hartford, and met a number of people, Democrats and Republicans alike. Without exception, every one of them had only the kindest thoughts and respect for BILL COTTER. I think that speaks well of him as representing his district.

But he was also a national legislator. He put his Nation first, what was good for his Nation. And in that respect, particularly on the Ways and Means Committee, he added his past experience in business as well as politics to improve the quality of the legislation that affected this Nation.

I recall in 1978, when we in the Democratic Party were somewhat divided over the direction of tax policy, that BILL COTTER was one of those who was of great counsel to me personally in trying to put together the kinds of tax policies that would enable the economy of this country to begin moving again in a direction of real economic growth. So he truly was a national legislator in every respect.

I guess there are many words to describe Bill Cotter that have been used already today. Honesty—clearly his personal and political life was marked by honesty in every way. Decency—whether you were with him on an issue or whether he was opposing you on an issue, you could always count on him being decent and gracious in the political battle that ensued. Thorough—he did do his homework before he made up his mind, and did not shoot from the hip

and make a rash statement that he later had to retract.

I suppose the word that describes him even greater in these last few months was that of courage. Very, very few people had any idea of the agony, of the pain, of the illness that he was going through. He faced that illness with courage, with optimism, and he was always a source of strength to those around him, even in his most painful days in the last few months.

So BILL COTTER will be missed. He is going to be missed by all of us who had the privilege of serving with him. But in having that privilege, we know that he served as a beacon, as a true symbol and example of what public service is all about.

He leaves a very great legacy to this body, to the people of Connecticut and to the United States.

I thank the gentleman for yielding. Mr. MOFFETT. We thank the gentleman from Oklahoma.

Mr. McKINNEY. Mr. Speaker, I yield to the gentleman from Indiana (Mr. Myers).

Mr. MYERS. I thank our colleagues from Connecticut for taking this time and giving us an opportunity to express our deep regrets at the loss of a great friend.

Through the years, with each new elected class, we see a variety of different personalities, different individuals who arrive here to serve their country. We are inclined to judge those individuals and try to project what type of Member they are going to be. I think that is something we all fall victim to.

I remember when BILL arrived here, he was different, different in a very kind and good way. He was not one of those self-assuming, taking the well frequently, speaking on issues that he knew little about. But he was one, as many have said here today, who was concerned about his country and concerned about his responsibility that he was assuming here as he took the role as a Member of Congress from Con-

I never had the opportunity to serve on a committee with BILL, but observing with him here and talking to him on the floor on issues, I found him well founded. As has been said, he was truly a legislator's legislator. He was not a politician, but he was most successful in his own way in Connecticut.

He certainly will be missed by his many friends here. He will be missed by each of us, and I know he will be missed by his constituency in his district of Connecticut, by his State of Connecticut, and he will be missed by the people of our country who have lost a great legislator, and we have lost a great friend.

Mr. MOFFETT. Mr. Speaker, I yield to the gentleman from Georgia (Mr. FOWLER).

Mr. FOWLER. I thank the gentleman for yielding.

I served on the Ways and Means Committee with my friend BILL COTTER. I know no man who wore the mantle of public service without pomp or pretense any more effectively than he did.

He had a quiet disregard for cant and self-promotion. In these days when the best often believe their own press releases and the worst continue to lack conviction, BILL COTTER was steady, smooth as a stone, a great tribute to our representative form of government.

Mr. MOFFETT. I thank the gentleman from Georgia.

Mr. Speaker, I yield to the gentleman from Indiana (Mr. Jacobs).

Mr. JACOBS. I thank the gentleman for yielding.

I think all the members of the Ways and Means Committee would agree that the passing of BILL COTTER has to be reminiscent somewhat of the passing of our dearly departed colleague Bill Steiger. There was something, some quality that was common be-tween them. It has been described here concerning BILL COTTER todaythe quietness, the warmness, and above all the friendliness, the encouragement to disagree agreeably, was very much in both of them. Steiger has been sorely missed, and BILL COTTER will be sorely missed, too.

In the case of BILL COTTER, the man was modest, but the talents were not. When I think of BILL COTTER, I think of the almost perfect balance between the person and the organization man. Nobody I have served with in the years I have been privileged to serve in the House of Representatives better personifies the prayer of Peter Mar-

O God, help us remember that there have been those who have fought their way into oblivion while others have forgotten themselves into immortality.

BILL COTTER usually sat right over in that part of the Chamber. Almost anybody here who knew and loved him can picture right now that quick smile, almost impish smile, at the suggestion of a joke. Even if you got off a bad joke, he was kind enough to grant you a little smile about it because he knew what you were getting at.

Finally, I think of the words of Edwin Markham on the death of Lincoln, considering Bill's tender yearsonly the good die young and all thatwho wrote:

And when he fell in whirlwind he went down, as when a lordly cedar goes down with a great shout upon the hills and leaves a lonesome place against the sky.

There will be a lonesome place in this Chamber forever, or at least so long as any person living now in this Chamber lives in this Chamber.

I express my sympathy to Bill's family, and that includes most notably the chairman of the Ways and Means Committee, Danny Rostenkowski.

I thank the gentleman for yielding. Mr. MOFFETT. I thank the gentle-

Mr. Speaker, I yield to the gentleman from Massachusetts (Mr. Early). Mr. EARLY. I want to thank the

gentleman for yielding.

Let me briefly say that in my 7 years in this body I have met many Members for whom I have great admiration. In my opinion, I have met no legislator at the National or State level whom I held in higher esteem than BILL COTTER. BILL COTTER was a truly effective national legislator. He was a tremendous credit to the people of his First District and the State of Connecticut and an outstanding public servant to the Nation.

He had a very low-keyed style, and was not the public release type of legislator, but no Member of Congress did more for his constituents and for his country than BILL COTTER.

It has been a great honor for me to know BILL COTTER as a friend and colleague. His courageous spirit, his cordial personality, and his wise counsel will be long and deeply missed by all who knew him. The country has lost an exceptionally efficient and dedicated public servant who will be sorely missed in these troubled times.

Mr. MOFFETT. I thank the gentleman from Massachusetts.

Mr. Speaker, I yield to the gentle-

man from Massachusetts (Mr. Shan-NON).

Mr. SHANNON. I thank the gentleman for yielding.

BILL COTTER and I served on the Ways and Means Committee together. When I was a new Member, his help to me was generous, and his advice invaluable. I worked with him on issues that were of particular concern to New England. I always had his guidance and he always had my respect.

Mr. Cotter was a gentleman. When he spoke, his colleagues listened, because they always valued an opinion of his. His death is a loss to me personally, because we were friends. But it is also a loss, a great loss, to the people he represented so well, to his State of Connecticut and to this country.

I thank the gentleman for yielding. Mr. MOFFETT. I thank the gentleman from Massachusetts.

Mr. Speaker, I yield to the gentleman from Illinois (Mr. Russo), a member of the committee.

Mr. RUSSO. I thank the gentleman for yielding.

Today is a sad day. We have lost an excellent Congressman and friend.

As was stated here today, BILL COTTER was a low key individual. You know, there are some individuals who come to Congress who are destined to be the flamboyant, the headline grabbers of the Congress, of the Nation. BILL COTTER was not such an individual-but that does not make BILL COTTER any less effective than those individuals you read about in the headlines. In fact, people like BILL COTTER are what holds this Congress together. Such an individual brings us together. He blends and melds his ideas and opinions from throughout the political spectrum. The Bill Cotters of this Congress are the ones who are able to construct the consensus and shape the necessary compromises. Our political system with its great diversity could not survive without such skillful technicians. He knew how to get a job done and did not demand or need applause or attention-he cared about what he was doing and was simply conscientious.

□ 1245

BILL was effective; BILL was hardworking. He had a great and well-deserved reputation for doing what was in the best interests of this country. He had the innate ability and talent to represent the blue-collar workers of East Hartford and Windsor, and the white-collar workers of West Hartford.

And what greater tribute can you pay—Bill was a man of his word. As the chairman of our committee Mr. Rostenkowski said, once you received a Bill Cotter commitment, it was set in stone. With Bill you knew where he stood and thus he had the trust and confidence of his colleagues.

I considered it a great honor and privilege to have been BILL COTTER'S friend, and as someone who spent some time at the dinner tables with the chairman and BILL, it was certainly good to have someone there who had a great sense of honor.

BILL COTTER will be greatly missed by many people; his family, his friends, his colleagues, and his constituents.

Mr. McKINNEY. Mr. Speaker, I now yield such time as he may consume to the gentleman from Tennessee (Mr. Duncan), the second ranking minority member of the Ways and Means Committee.

Mr. DUNCAN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, this is a sad day not only for the Members of the Congress, but a sad day for America. BILL COTTER was one of the kindest and finest men that it has been my privilege to know since I have been in the Congress.

BILL was chairman of the Select Revenue Subcommittee and I am the ranking Republican member of that subcommittee, Early in the year, BILL called me and wanted to make sure that I was going to serve on the subcommittee, and we discussed various things we might do cooperatively. BILL was a good adversary when it was necessary, but he was also a man who could read through things and work for the benefit of all the people.

We are going to miss BILL and his friendly atmosphere that he always created whenever he came to the committee.

I offer the family my greatest sympathy

Mr. MOFFETT. We thank our colleague from Tennessee.

Mr. Speaker, I yield to the gentleman from California (Mr. STARK).

Mr. STARK. Mr. Speaker, I rise today to pay tribute to a friend and colleague, Hon. BILL COTTER.

I had the privilege of serving with BILL on the Ways and Means Committee since 1975. I came to know him as a quiet spoken man—and forceful advocate for the people of his district and, indeed, for all the people of our country.

BILL COTTER was a man of dignity and a man of honor. I will miss his leadership and his guidance in the days ahead.

Mr. MOFFETT. I thank the gentleman from California.

Mr. Speaker, I yield to our good friend from Florida, a member of the Ways and Means Committee, Mr. Gib-

Mr. GIBBONS. Mr. Speaker, I thank the gentleman for yielding to me. Of course, serving on the Ways and Means Committee with BILL COTTER was a rich experience. BILL was a hard worker, a quiet person, a very capable person and a persistent person. As my colleague from California, Mr. Stark, has said, he possessed a good sense of humor. He was cooperative; he had a special thing about him that is hard to describe, but BILL COTTER was a great man.

He was always one who was punctual to meetings. He never kept one waiting by being tardy himself. He always had something to contribute, and without trying to monopolize the debate or the conversation.

He voted a good, sound vote, one that showed that he understood the issue and understood the problem and represented his people of Connecticut extremely well.

I pay final tribute to him with a great deal of sorrow. We need more people like Bill Cotter in the United States and in government. I am sure that he will be missed by every Member of our House of Representatives who had the opportunity to know him. He will certainly be missed by his colleagues on the Ways and Means Committee, and we extend our deepest sympathy to those who survive him and to his colleagues and personal friends.

Mr. MOFFETT. I thank the gentleman from Florida.

Mr. Speaker, I yield to another Member of our New England delegation, the gentleman from Massachusetts (Mr. Donnelly).

Mr. DONNELLY. Mr. Speaker, I thank my friend for yielding. Those of

us who were friendly with BILLY COTTER knew for some time the inevitability of this day. That knowledge does not reduce the sense of sadness and loss we all feel.

Bill was a good and decent man who served his State and his Nation well, and I know that he was one of the finest people I ever met. He made a substantial contribution to this institution. He brought a human element to his committee work and to his work here on the floor, and even though I just had a short 3 years to get to know Bill, the personal sense of loss I feel today has been articulated by many people who have preceded me at this microphone.

I join my friends in passing on my condolences to Bill's sister and to the other members of the Cotter family.

Mr. MOFFETT. I thank the gentleman.

Mr. Speaker, I yield to the gentleman from New York (Mr. Biaggi).

Mr. BIAGGI. Mr. Speaker, it is with a sense of profound sadness that I pay tribute to our colleague Bill Cotter who succumbed to cancer yesterday at the age of 55. His death deprives this House of one of its most effective and respected Members—and me of a good and valued friend.

BILL COTTER and I became close friends during the years when we had neighboring offices in the Cannon Building. We would see each other on a daily basis and I recall many pleasant moments of conversation and comradery.

For 11 years, BILL COTTER provided the highest quality of representation for the people of the First Congressional District of Connecticut. BILL was a lifelong native of the First District born, raised, and educated in Hartford, Conn., the major city within the district. Prior to his election to the House in 1970, BILL served with great distinction as insurance commissioner for the State of Connecticut.

While in the House, BILL was an invaluable member of the House Ways and Means Committee. He was one of the panel's most trusted members. He was an ardent and articulate advocate of tax reform and played important roles in numerous pieces of legislation which have emerged from that committee in the past decade. From tax reform to medicare and medicaid reform to the establishment of title XX-BILL COTTER made regular and important contributions to all of these legislative products. Further, as chairman of the Subcommittee on Select Revenue Measures, BILL COTTER was a pioneer in the effort to bring fiscal responsibility to the Federal Government.

BILL COTTER'S career in Congress was replete with accomplishments and he will be remembered by many of us as a shining example of what a Member of Congress should be. I mourn his passing, but take solace in the fact that he will be remembered for years by present and future Members of this great body.

Mr. MOFFETT. I thank the gentle-

man from New York.

Mr. Speaker, I yield to the gentleman from South Carolina (Mr. HOL-LAND), a member of the Ways and Means Committee.

Mr. HOLLAND. Mr. Speaker, I thank the gentleman for yielding and

for taking this time.

It has been my privilege to serve with BILL COTTER on the Ways and Means Committee and as ranking member of the subcommittee which he chaired. I came to know him as a man of compassion and understanding shortly after I was put on the Ways

and Means Committee.

I was just walking over here across these Capitol Grounds and thinking about all the great people who have passed through this institution and all the great names and personalities that we have produced for history and for eternity, and I cannot think of one that I knew, loved and respected any more than this great man from Connecticut. We were indeed fortunate as men and women dedicated to the institutions of this great Nation to have him as our friend and our ally. I know that I join the Connecticut delegation in saying that we will miss him grievously, and we hope that his memory and his activities here will somehow continue to level the things we do, to impart his rationality to us by having been one of us

I thank the gentleman again for

yielding to me.

Mr. MOFFETT. I thank the gentleman from South Carolina, and those of us on the Connecticut delegation thank all of our colleagues, especially the members of the Ways and Means Committee whom we know will miss

BILL a great deal.

I think we will recall many things from this colloquy, one of which were the comments about Bill's sense of humor. I think if Bill had his way, he would not want this colloquy to end on some somber, sad note. In order to do my share so that that will not be the case, I would like to relate one brief anecdote.

BILL's district and mine are neighboring districts, and there is a town that is on the border, and every year in Connecticut in this town called Windsor, Conn., we have something called, the Shad Derby Parade.

As has been said, BILL was a low key member of the delegation who had not sought a great deal of media attention. We were marching in that parade just a couple of years ago, and there was a tremendous round of applause as BILL and I, out in front of the parade, went down the street. I soon became aware that the applause was for BILL

COTTER, and that BILL COTTER had people yelling out, "Hey, BILLY, nice to see you, BILLY."

It was an interesting lesson for me. I remember what he said. He said jokingly, "I guess it is because of my tremendous media coverage."

He had that kind of humor, a kind of self-depreciation, if you will, that

could be very, very pleasant.

Mr. Speaker, I yield to my colleague from Connecticut, and I thank my colleague, Mr. McKinney, for his help in the drafting of the resolution and in

this colloguy.

Mr. McKINNEY. Mr. Speaker, I thank the gentleman for yielding. I thank all of my colleagues in this House. As a classmate of BILLY's, as a good friend, as a member of the Connecticut delegation, he would want us to remember him with a sense of humor. He used to quite often say to me after a Ways and Means Committee meeting, "You know, we have our superstars," and obviously the Ways and Means Committee had a lot of those.

I remember after Dan Rostenkowski and Barber Conable had been on television on one great debate or another, Billy used to say, "Remember me, I am Bill Cotter," when I talked to him on the phone. He missed being here! He was that kind of guy. Do not worry Bill, we always will remember you; there is no question about that.

Mr. MOFFETT. I thank the gentle-

man.

Mr. Speaker, I would like to announce that plans are now being worked on for an Air Force plane to fly out of Andrews Air Force Base, probably at 10 o'clock on Friday, with some arrangements for Members to leave from the Capitol at 9 or 9:30. Other details on the funeral itself will be forthcoming and will be available for any of the Connecticut delegation members.

• Mr. MOAKLEY. Mr. Speaker, all of us are deeply saddened to learn of the death of the gentleman from Connecticut. Bill Cotter was a fine and decent man and a dedicated public servant; his constituents and this House have suffered a great loss.

His brave struggle over recent months has been watched with admiration and sympathy by his many friends. Although his fight against death has ended, we will all remember him for facing death with the dignity and bravery for which he was known in life.

BILL made an outstanding contribution to the House during the decade he served here and was an exceptionally able and useful member of the Committee on Ways and Means. His selection at the beginning of this term as chairman of the subcommittee responsible for tax measures enabled him to bring the full weight of his knowledge and judgment to bear on this important area and it is indeed tragic to see his career cut short when his leadership in this area was so vitally needed.

Mr. Speaker, the House has lost one of its finest Members and I hope his family can take some comfort from knowing the esteem and fondness with which BILL will always be remembered here.

• Mr. ANNUNZIO. Mr. Speaker, I rise in tribute to the Honorable William R. Cotter, who represented the First District of Connecticut since 1971. The death of my distinguished colleague has left a void in this House, for he served his Connecticut constituents and the American people with devotion and dedication.

BILL COTTER was my friend and I had the privilege of serving with him when he was a member of the House Banking, Finance and Urban Affairs Committee, where he was one of the most capable members of that committee. His distinguished career of public service will long be remembered by all of us who had the good fortune of knowing him and working with him.

Congressman Cotter compiled a splendid record of excellence, and his diligent efforts as a member of the House Ways and Means Committee and as its chairman of the Subcommittee on Select Revenue Measures were both fruitful and beneficial to the citizens of this Nation, and indeed, these successful efforts have made America a stronger and better country.

Few men gave more of themselves to good Government, or had a more compassionate understanding of human problems than did BILL COTTER. He began his career of leadership as a member of Hartford's Court of Common Council, and then served as an aide to Gov. Abraham Ribicoff from 1955 to 1957. In 1957 he became Connecticut's deputy insurance commissioner, and from 1964 to 1970, when he was elected to the 92d Congress, he served as the State's commissioner of insurance.

BILL was a fine legislator and a distinguished leader of becoming personal modesty, and he will be missed here in the House of Representatives.

Mrs. Annunzio and I extend our deepest sympathy to his sister, Betty, and her husband, Mr. Joseph Adinolfi.

• Mr. RODINO. Mr. Speaker, the Nation has lost one of its most conscientious and compassionate statesmen. BILL COTTER'S death yesterday was a terrible blow to me and to all of us who knew this kind and gentle man.

For 10 years he devoted himself to being the best possible Congressman for the people of Connecticut. He was deeply committed to the highest ideals of public service—honesty, integrity, and sensitivity for the needs of all the people. Bill's sincere dedication to his

work earned him the trust and confidence of his colleagues and his constituents

As a Congressman he was unpretentious yet highly effective. His work on the Ways and Means Committee was marked by his concern for the average American instead of the special inter-

As a man he was warm and friendly.

He cared about people.

BILL COTTER was a friend who I respected and admired. I am deeply saddened by his death. My sympathies go

Mr. CONTE. Mr. Speaker, I would like to join with my colleagues in paying respects and expressing my deep sorrow on the passing of my good friend and New England colleague, BILL COTTER. A Member of this body for 11 years, BILL was an effective legislator and conscientious member of Ways and Means Committee, where he chaired the Subcommittee on Select Revenue Measures.

I had the opportunity to work with BILL through the New England Congressional Caucus, where he exhibited his concerns for his constituents, needs in Connecticut, for those in the wealthy suburbs of Hartford, those in the blue-collar communities ringing the city, as well as the inner-city poor of Hartford. He represented his people with an even hand and an open mind. and he will be sorely missed by his colleagues in the House.

I would like to extend my deepest sympathy to his family and his district on the loss of his voice in this Con-

Mr. GILMAN. Mr. Speaker, I rise to join my colleagues in paying tribute to our late colleague, the gentleman from Connecticut, Hon. WILLIAM COTTER.

BILL COTTER, was an able, dedicated, and knowledgeable Member of the House. He provided unparalleled service to his colleagues and conscientious attention to the need for responsible legislation for the Nation as a whole, achieving the kind of fine balance between those two responsibilities that all of us continually seek to shoulder. His outstanding mastery of tax legislation and tax policy has been noted by his colleagues on the Committee on Ways and Means who worked closely with him.

Coming to the House of Representatives in 1970, BILL COTTER's election followed a distinguished career in State government, culminating in his service as the commissioner of insurance where he had to oversee his State's large and important insurance industry. Before State service, BILL served as a member of the Common Council at Hartford, Conn. His service in State and local government helped mold him into the fine legislator that

I join with my colleagues in expressing sincere condolences to the Cotter family. BILL has left a significant imprint on his colleagues in the House. Those of us who held him in high personal regard will miss him very

. Mr. MILLER of Ohio. Mr. Speaker, I am saddened today as I join with my colleagues in this Chamber since we have lost a dedicated public servant, and good friend, BILL COTTER of Connecticut. I was shocked to learn of his death, and I know that I am expressing the sentiments of all who knew him in stating that America has lost the service of an able legislator and an

effective leader.
Bill came to the House in 1971, and served as a member of the important House Ways and Means Committee. As such, he was in a position to carry the concerns of the working American family straight to the one committee in the House with probably the most impact over the day-to-day economic problems facing this Nation's people. He was a quietly effective advocate of policy and legislation that would help Americans secure the lifestyle they wanted and deserved. He never lost touch with the truly needy, and exhibited a keen sense of appreciation for the interests of those people confronting the economic difficulties so apparent in our society.

I was always impressed by his attitude and sense of purpose. He was a legislative workhorse who welcomed a tough task and worked diligently to find a solution benefiting this Nation and its people. He will be missed greatly in this Chamber, just as his example will be missed. It would be a fitting tribute to him that we dedicate ourselves to the continuation of the good work he epitomized in the House.

Mr. STOKES. Mr. Speaker, it is with profound sadness that I learned of the death of BILL COTTER who was one of the most able legislators I have ever known. He was a man whose everyday demeanor not only made him many friends in this body but it was a demeanor that engendered respect.

I personally admired him and enjoyed an excellent friendship with him. I admired him for the stand that he took on liberal issues in this body. He was not afraid to stand up for what was right and in standing up for what was right he was always on the side of minorities, the poor, the disadvantaged, and others who needed help.

In recalling my own personal relationship with him, I remembered the interest he took in the investigation into the assassination of President John F. Kennedy. After I was appointed chairman of the committee which conducted the investigation, I recall the interest he took in our work in several conversations we had relative to the investigation. In those conversations, he expressed a real hope that we would be able to solve many of the rumors, many of the lingering and

troublesome questions surrounding that assassination. He had tremendous love and admiration for President John F. Kennedy.

I suppose the characteristic about BILL COTTER which most sticks out in my mind was his sincerity. Whenever I talked with him about any matter, his sincerity always impressed me.

I did not have the opportunity to personally know the other members of his family. However, I would like to take this opportunity to extend to each of them my sympathies and condolences in memory of this distinguished legislator. They can be proud of the life and accomplishments of BILL COTTER. He will be remembered by all who knew him as an outstanding legislator and a great American.

Mr. GUARINI. Mr. Speaker, today I join my colleagues in the House in mourning the death of Congressman WILLIAM COTTER of Connecticut.

BILL COTTER served with distinction on the Ways and Means Committee for many years. As a member of the upper tier of senior members of the committee, he was someone I learned early on to look to for counsel and guidance. We shared some of the same legislative interests: in tuition tax credit and pension reform bills.

The Ways and Means Committee is a contentious assembly, with vigorous exchanges on every issue before the committee. Such was BILL COTTER'S stature in the committee that, although he had been ill for some months, his ideas continued to be a force in the committee's deliberations on the tax bill. In what is an enviable measure of the man, portions of his comprehensive pension reform legislation were included in the tax bill just signed by the President.

My only regret, and it is one that I share with all of my colleagues on the Ways and Means Committee, is that BILL COTTER did not remain with us We will deeply miss his longer. thoughtful contributions in our legislative work and I join my colleagues on extending deepest sympathies to his family and friends.

• Mr. RANGEL. Mr. Speaker, I rise to pay tribute to our departed colleague WILLIAM Ross Cotter better known as BILL to those of us who knew him and had the honor of working closely with him. BILL and I both came onto the Ways and Means Committee at the beginning of the 94th Congress and it is certainly going to be strange for me to go back into the committee room knowing my good friend will no longer be there to provide his wise counsel on the issues which will come before us.

We went through many a battle together. The Tax Reform Acts of 1975, 1976, and 1978, the Windfall Profit Act, the Estate and Gift Reform Act of 1976, the Mortgage Revenue Bond Act, and so forth. To each of these,

BILL brought his unique insights which almost always centered around a compassion for working class and middle-income Americans. He was certainly proud of the reforms that we instituted prior to the Economic Recovery Tax Act of 1981. I know that what the Congress passed this year was a great disappointment to him. He had spent so much of his time in Congress working to close loopholes for the rich, and the legislation we passed this year which not only undid the work he had dedicated the last 7 years of his life to, but also went further to place a greater proportion of the tax

burden on the middle class. By the time we began work on the Economic Recovery Tax Act of 1981, Bill was already too sick to participate in the direction of the legislation. However, one area of the bill does very much reflect BILL COTTER's thinking and serves as a fitting memorial to this dedicated public servant. Prior to being elected to Congress in 1970, BILL served from 1957 to 1970 in the Connecticut Insurance Department becoming commissioner in 1964. During that time he became extremely sensitive to the financial needs of retired Americans. From the time he came on the Ways and Means Committee, he was an outspoken advocate for tax deductions for individual and employer retirement plans. In the 97th Congress, he introduced legislation to reform the system and expand its availability to more Americans, thus insuring a secure financial picture for retirees. Many, if not the bulk of his suggestions were adopted by the committee and finally became law when the President signed the bill just a few weeks before BILL COTTER died.

We on the Ways and Means Committee who have worked so closely with Bill are certainly going to miss him. The Congress as an institution has lost one of its key Members. I know that I have certainly lost a dear friend and respected colleague.

• Mr. NATCHER. Mr. Speaker, in our time, giants have walked the face of the Earth. My friend, William R. Cotter was one among them. He distinguished himself in the service of his country and to all mankind. He labored with dedication, devotion, and with a passion on the ramparts of individual freedom, honesty, and constitutional government.

He served in the House of Representatives with distinction and honor. He loved the House of Representatives and he believed that our country is the greatest country in the world.

BILL COTTER established a record as a Member of Congress that will long be remembered in the State of Connecticut and throughout this country. His name will be known in all time to come, at home and in the far corners of the Earth for his monumental works in behalf of representative government which is the source and the protectant of all human liberties in all nations where freedom prevails.

Our friend had become an inspiration, a symbol of power, and an outstanding member of his Committee on Ways and Means, one of the major committees in the House of Representatives. His character, his achievements and his faithful service will be an inspiration to generations yet to come.

I have lost a true friend and this country has lost a great statesman. I extend my deepest sympathy to the members of his family.

• Mr. ZABLOCKI. Mr. Speaker, I was deeply saddened to learn of the untimely death of our distinguished and beloved colleague, the Honorable WILLIAM R. COTTER of Connecticut, and I would like to associate myself with the sentiments expressed by numerous Members of this body—about his life, his rare personal qualities, and his outstanding legislative accomplishments.

There is little of substance I can add to the very eloquent tributes to BILL COTTER, which were made earlier by a number of his closest friends—on both sides of the aisle.

His contribution as a senior and highly respected member of the Committee on Ways and Means is well known—particularly his most recent, successful effort to expand the individual retirement accounts in the Economic Recovery Act just signed by the President. As Chairman Rostenkowski has pointed out, Bill Cotter was a voice of reason and moderation on that important committee—always working toward a judicious and meaningful compromise, in the full knowledge that there is no substitute for quiet, patient and persistent negotiation in the legislative process.

As many of our colleagues have noted, BILL COTTER was devoted to the House as an institution and embodied its most honored and exalted traditions. Above all, however, he was a loyal and effective representative of his Hartford constituency which he has served for over a decade with great dedication and distinction.

To those constituents, to his family and many admirers throughout the Nation I extend my deepest and most profound sympathy.

• Mr. FORD of Michigan. Mr. Speaker, a loyal and distinguished Member has left us. In his 11-year House career, many of us came to depend on the wisdom and thoughtfulness of WILLIAM COTTER. As the chairman of the Subcommittee on Select Revenue Measures, he held a great affection for his home city of Hartford and the citizens of Connecticut. He was a loyal Democrat of whom many of us could rely for steady and able direction and a strong sense of what the grassroots was feeling.

His commitment to his country and service in this House were unmatched. It is with a great deal of pride and sorrow that I join my colleagues in mourning our beloved friend, BILL COTTER •

GENERAL LEAVE

Mr. MOFFETT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the resolution.

The SPEAKER pro tempore (Mr. NATCHER). Is there objection to the request of the gentleman from Connecti-

There was no objection.

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CUT WINDFALL PROFIT TAX, SAVE EDUCATION PROGRAMS

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, over the recess period I learned of the administration's plan to make further deep cuts in the education programs of our country. There has been no denial of that from the administration, and publicly since then they have indicated the need for more money in order to eliminate the deficit that is now looming in this present budget.

In view of that, and in trying to constructively answer this problem, I have introduced a resolution, a sense-of-the-House resolution, today that calls for the amending of the windfall profit tax reduction provisions that were contained in the Economic Recovery Act of 1981.

It seems to me, Mr. Speaker, that we in the House can agree to this measure, remove the windfall profit tax windfall that we gave to the oil companies and restore nearly \$11 billion to this budget and save many of these programs, such as education, that have been so severely slashed.

I hope, Mr. Speaker, we will have the opportunity within the next 2 weeks to vote on this resolution.

□ 1300

BIG DEFICITS, HIGHER INTEREST RATES PREDICTED

(Mr. VOLKMER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, I, too, spent part of the recess in my district in Missouri, as other Members have done, and I find the largest problem facing the people in my district, except for a local matter of disaster

due to rains and floods, is high interest rates. The people are concerned. They want to know, when are we going to have lower interest rates?

My only answer to them is that not in the foreseeable future will we see lower interest rates because we are going to have a very large budget deficit, in fact, a huge deficit in the coming year. We are going to have to continue excessive Government borrowing in the markets, and, therefore, that will continue to increase the interest rates. We may not yet have seen the highest of the interest rates yet to come.

What does this mean? This means that we will continue to have stagnation in our industry, we will continue to have unemployment, and we will continue to have homebuilders, farmers, small businessmen, car dealers, and others going out of business.

High interest rates? Yes; we are going to continue to have them. High deficits? It now appears that in 1982 we will have the largest budget deficit in the history of this country.

Mr. Speaker, I say to the Members and to the administration that the only way we are ever going to balance the budget is through a constitutional amendment, and I ask that the Members of the House support my constitutional amendment for a balanced budget now.

DONATION OF SURPLUS FEDER-AL PROPERTY FOR PRISON MODERNIZATION AND CON-STRUCTION

(Mr. ZEFERETTI asked and was given permission to address the House for 1 minute and to revise and extend

his remarks.) Mr. ZEFERETTI. Mr. Speaker, today I am introducing a bill that I hope might prove to lessen the burden that States currently face as the crime rate spirals upward. This bill would authorize the donation of surplus Federal property to any State or locality for the construction and modernization of criminal justice facilities.

Recently, the Attorney General's Task Force on Violent Crime endorsed this type of legislation in their final report which was issued on August 17, 1981. The report cites continuously documented public testimony and reports pointing to a higher conviction and prosecution rate for violent crime. This, combined with the public's demand for harsher, longer sentences for the perpetrators of these crimes, has resulted in correctional systems facing unprecedented increases in prison populations.

Presidential Counselor Edwin Meese III, addressing the Criminal Justice Section in New Orleans last month, promised prompt administration action on the task force recommendation, indicating priority would be given

ing.

Mr. Speaker, the crisis of overcrowding in the American prison system has reached alarming proportions. The national correctional population of adult offenders is more than 329,000 and rising. To my knowledge, no single State has experienced a decline in correctional populations in the past 5 years, with the brief exception of California in 1975. Increases range from 4 percent in Vermont to upward of 70 percent in Wyoming.

Despite this skyrocketing rise in the number of prisoners, the facilities available for confining these convicted criminals have not kept pace. Conditions in many State prisons have reached such shocking levels that Federal courts in 12 States have ruled that conditions of confinement in the entire system were such as to constitute violations of rights guaranteed by the eighth amendment. The courts have interceded in 7 more States and 12 States face pending court challenges. All total, as of April 1, 1980, prisons in 32 States were under court order to end overcrowding.

The problem of overcrowding goes beyond corrections. Potentially, it leads to a circumvention of the overall public and criminal justice system's intent to deal with the violent offender in a manner consistent with the gravity of the offense. Probation is meted out instead of incarceration simply because the judges are aware that there is currently no prison space available for the offenders in prison.

Society cannot permit crime to go unpunished for want of prison space, and for the present, prison is the only sanction available for violent crime.

Specifically, this bill would authorize the Administrator of the General Services Administration, upon the recommendation of the Attorney General, to donate the property after the State had submitted its drawings and specifications for criminal justice facilities. This would of course include the extension or improvement of an existing facility.

Similar legislation has been introduced by Senators Grassley, Domen-ICI, MOYNIHAN, COCHRAN, and JACKSON. I hope that many of my colleagues will support this bill in light of this Nation's current prison space emergency. To do nothing, in the face of what we know to be the facts, is a gross abdication of our responsibility.

IMMEDIATE HOUSE VOTE ON AWACS SALE URGED

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, as one who is adamantly opposed to the administration's proposed sale

to the question of prison overcrowd- AWACS aircraft to Saudi Arabia-I am urging that the House schedule a vote on the issue immediately.

> I consider it vital that this body go on record and not wait for the Senate vote which may preclude us from ever being able to vote. I believe the House will reject the sale-and if this happens it could give momentum to opponents in the Senate who may be able to muster enough support to block the sale.

> It would be most appropriate if the House were to act this week while Prime Minister Begin is in Washington and vote to reject the AWACS sale. Many of us share Prime Minister Begin's profound concern about the implications of this sale on Israel's security.

> For more than 30 years and through seven different administrations, the United States has been Israel's staunchest ally. I contend that the sale of AWACS to Saudi Arabia is a serious weakening of that commitment. Saudi Arabia has consistently refused to endorse the Camp David peace accords-and they have in the past been financial supporters of the PLO. Further, this sale is being proposed without any real guarantees that Saudi Arabia will not convert AWACS into offensive weapons against Israel. This sale if approved, will establish a dangerous precedent in U.S.-Middle East policy which may have serious consequences on our own national security which is inexorably tied to a strong and sovereign Israel.

SMALL BUSINESS VICTIMIZED BY HIGH INTEREST RATES

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, I, too, am concerned about the interest rates which climb higher and higher every

As we survey the state of our economy, there can be no doubt that a prime rate of 201/2 percent is crippling our economy. There can be no doubt that venture capital-which is of critical importance to the healthy expansion of business-has all but dried up.

Our buying power is shrinking. Our ability to expand the base of the Nation's industry is shrinking. And, our hope that the future will bring us a true economic recovery is all but gone.

Perhaps the best example of the impact of continued high interest rates on business in America can be found in the plight of small business today.

The facts are very simple: Small business-the backbone of business in America-is going out of business. All across our land, our Nation's small businessmen are simply being forced to close their doors, having fallen victim to soaring interest rates.

High interest rates dry up the money supply and thus the availability of capital for small business. The availability of capital for small firms is perhaps the most important factor in determining whether or not a small company can survive in the 1980's.

Recent polls indicate that small businesses are more gloomy about the future than ever before. According to a poll conducted by an Atlanta-based research firm, more than 60 percent of small businessmen say that they will close down at the end of the year if interest rates do not go down. The bad news is—if you believe our economic experts—interest rates may go even higher in the coming years.

It is obvious that an extended period of higher interest rates will cripple the backbone of American industry, as more and more small firms go under.

It is obvious to me that our Nation simply cannot depend on the wishful thinking of Reaganomics to solve our economic problems. The continued high interest rates are certainly proof of that.

IMPOUNDMENT—RETREAT FROM THE BUDGET ACT

(Mr. PANETTA asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. PANETTA. Mr. Speaker, it is remarkable, to say the least, that 1 month after the congressional budget process has proven itself in responding to the initiatives of the President there are those who are now prepared to raise the white flag and surrender that process and that power to the President and to give him the power to impound. The power to impound is the power to legislate, the power to decide, and that power rightfully belongs to the Congress.

The reality is that the President has the power to rescind and defer, if he wishes to attack the appropriations passed by the House and by the Congress. The reality is that the Congress has been responsive—indeed some would say too responsive—to every element of the administration's economic program. All the major recommendations of the President have largely been accepted in the budget resolution, the reconciliation bill, and the tax cut. Now, somehow, that is not good enough.

I recognize the short-term political safety net of simply handing all of that responsibility over to the President, but it would be wrong. It is wrong politically, because the American public would know that the Congress is retreating from its budget and appropriations responsibilities; it is wrong economically because the Congress must play a role in deciding what

our spending priorities must be; and it is wrong constitutionally because it would be a serious retreat from the terms of the Budget Impoundment Act which are intended to correct the abuses of the President on impoundment and to preserve to the Congress its legitimate responsibility to determine how taxpayer dollars will be spent.

This is our job—to make use of our budget powers and our legislative powers on behalf of the people and not to avoid or surrender those important powers or responsibilities to any other branch of government.

PRESIDENT URGED TO RECONSIDER DECISION ON AWACS SALE

(Mr. SCHUMER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, today the Prime Minister of Israel is visiting our Nation's Capital, and, of course, he has visited our President. This morning at the White House the obligatory words of friendship between the two nations were exchanged. It is a friendship which I believe is very real to the President, to Prime Minister Begin and to both nations.

But those of us who believe the interests of our Nation, both strategic and moral, are best served by a strong Israel, urge you, Mr. President, to reconsider your decision to sell the AWACS to Saudi Arabia. We hope, Mr. President, that today with the visit of Prime Minister Begin to our Nation's Capital you will reconsider your decision to sell AWACS to Saudi Arabia. Such a sale can hurt Israel severely without really aiding Saudi Arabia. Mr. President, I urge you, as a showing of good will, do not thwart the will of this Congress to block the sale of those sophisticated weapons to the Saudis

A POSITIVE VIEW ON CHARITIES

(Mr. CONABLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONABLE. Mr. Speaker, I want to urge my colleagues not to fall into the trap of deploring the decline of incentives to give to charities implicit in a reduced tax rate. There is more to the American charitable movement than tax avoidance. Very high marginal tax rates do cause people to take refuge in public benefits of their own choosing, but very high marginal rates also give rise to the misconception that philanthropy is for the rich only. The next step is to believe that the charitable deduction is a loophole, and we were headed in that direction before passage of the 1981 Tax Act.

There are many paradoxes in the interrelation of our public institutions, our semipublic institutions and our private incentives. Nobody should feel guilty about reducing the peoples' taxes because it also reduces the incidence of legitimate tax avoidance. This 1981 law includes valuable structural changes which the charitable movement earnestly desired, including an increase in the maximum of charitable contributions for corporations, greater flexibility in the payout requirements for foundations, and a phase-in of above-the-line charitable deductions for those also claiming the standard deduction. This last provision gives charitable tax benefits to lower income people which were available previously only to the 30 percent of the taxpayers who itemized their deductions, and it greatly expanded the numbers of people with tax incentives to give to charity.

Carried to its illogical extreme, the argument that lower tax rates damage charity would also find detriment to the work of the International Rescue Committee in an end to the persecution which causes refugees.

A TRIBUTE TO THE LATE HON-ORABLE FRANK J. BECKER, FORMER MEMBER OF CON-GRESS

(Mr. McGRATH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McGRATH. Mr. Speaker, it is my sad duty to inform my colleagues of the death on September 4 of a former member of this body, Hon. Frank J. Becker. Mr. Becker served with distinction from the 83d through the 88th Congress as a representative of the Third then the Fifth Congressional District of New York.

A long-time resident of Lynbrook, U.S.A., Mr. Becker began his political career in the New York State Legislature in 1945 and was elected to the first of six terms in Congress in 1952. He retired from public life in 1965 in order to devote more time to his family which, at the time of his death, numbered 3 children, 21 grandchildren, and 3 great-grandchildren.

Frank Becker was respected by all who knew him. His reputation for integrity, courage, and forthrightness earned him the well-deserved nickname "The Little Giant." Although my political career was only beginning when his was ending, I got to know Frank Becker very well and to respect all he stood for. I will miss his wisdom and friendship.

I want to extend my sympathy to Frank's wife of 58 years, Claire, his children Robert, Francis, and Elizabeth, and the other members of his family.

Mr. STRATTON. Mr. Speaker, will the gentleman yield to me?

Mr. McGRATH. I yield to the gen-

tleman from New York.

Mr. STRATTON. Mr. Speaker, I want to commend the gentleman from New York (Mr. McGrath) for taking the well to pay tribute to our former colleague, Frank Becker. I had the privilege of serving with Frank Becker on the House Armed Services Committee. He was indeed a fighter and a very feisty guy. He stood up for what he believed in, and as the gentleman from New York (Mr. McGrath) may well imagine, he and I usually saw eye to eye on defense matters and on other matters as well. We were sorry when Frank Becker left the Congress, Mr. Speaker, and I know that he will be missed by the people of New York State.

Mr. McGRATH. Mr. Speaker, I thank the chairman of our delegation for his kind words.

A NATIONAL TRAGEDY

(Mr. MOLINARI asked and was given permission to address the House for 1 minute and to revise and extend

his remarks.)

Mr. MOLINARI. Mr. Speaker, since the beginning of the year, three members of my staff have been assaulted here in Washington, D.C. During the recess, a member of my staff stopped at a red light, and before he knew what was happening, three hoodlums entered his vehicle, beat him severely, and drove his car to an isolated area. There he was beaten again and thrown into his trunk, where he remained for a couple of hours. He finally managed to pry open the trunk and escape, which conceivably could have saved his life.

A couple of months ago, the wife of one of my staff members was riding the Metro with her two children in broad daylight and was held up by

hoods armed with guns.

These are not isolated instances, but typical of criminal activity that occurs daily in the Nation's Capital. Indeed, there is a substantial number of Members of Congress who have been mugged and held up over the last

couple of years.

Violent crime is a national problem, especially in our big cities. But, to have the situation be as severe as it is in the Nation's Capital, is a national disgrace. To think that the Capital of the richest country in the world is ridden with violent crime, and to think that the millions of visitors each year that come to Washington to view the beautiful exhibits must do so at the risk of their lives, is a situation we simply cannot accept.

We can no longer bury our heads in the sand, hoping that this problem will go away. In my judgment, it is getting worse, and we are going to have to declare war on crime in the Capitol FAA DECISION ON ELIMINATION district

Mr. Speaker, I am calling upon Congress to carefully review this serious problem and come up with new ideas. Perhaps the Justice Department should set up a separate and special unit that could come under the jurisdiction of the FBI. The D.C. Police could be integrated into that unit, and we could add additional police if reguired, and at the same time have the sophisticated capability of the FBI to assist in making the Capitol area a safe place to reside and to visit.

I am going to send a copy of this statement to the members of the D.C. Committee in this House as well as in the Senate. I am also going to urge my colleagues to join me in this effort and to work together to come up with a reasonable solution to this problem as quickly as possible.

□ 1315

REAGAN'S ECONOMIC PROGRAM IS THE SALVATION OF THE RE-PUBLIC

(Mr. EVANS of Delaware asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS of Delaware. Mr. Speaker, we are all back from vacation, recess, district work period, or whatever whoever wants to call our recent absence. We should be rested, and ready for the task ahead and that task is tremendous, nothing less than the economic salvation of the Republic.

What this country needs most is for everyone to stop playing politics with the livelihoods and the lives of millions of Americans and set to work to implement the President's economic program.

Some, including myself, might have preferred a program of a slightly different construction. But the major thrust of the economic plan suggested by President Reagan and adopted by this Congress is a good one. The program can work, and it will work if all of us take a positive attitude about its

The first steps in the economic recovery program go into effect on October 1. October 1 is 3 weeks in the future, yet critics are already saying it has not worked. Of course it has not worked: It has not started.

But it is going to work and its success is more important than President Reagan, and more important than the Democratic and Republican Parties. It is really a question of whether or not we are going to preserve the basic freedoms we have always enjoyed in the United States of America.

OF CHICAGO/DES PLAINES RE-GIONAL OFFICE

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks)

Mr. PORTER. Mr. Speaker, I am very pleased to learn that FAA Administrator, J. Lynn Helms, has decided against a plan to move the Des Plaines, Ill., FAA office in my district of Kansas City. In view of the growing need for air safety management, the necessity of rebuilding our air safety control systems, and for upgrading the resources of our existing structure in the Chicago area, I was opposed to the proposed FAA consolidation from Chicago to Kansas City. I was also concerned that the good working relationship between the Suburban O'Hare Commission and the Chicago regional FAA office on the important issue of aircraft noise abatement would be lost in such a move.

The fact that Mr. Helms, after a careful study of the costs and benefits of the proposed move, has concurred with this analysis, serves to underscore the importance of these concerns.

With Chicago as the principal hub of our air transportation system and O'Hare as one of our Nation's busiest airports, we should be improving not taking from the basic air safety management resources available at this location.

I am deeply gratified that Administrator Helms has seen the wisdom of not going forward with the proposed elimination of the Chicago/Des Plaines regional FAA office.

Also, I want to thank personally all those individuals and organizations who assisted in establishing the necessary focus and in developing the facts on this important air safety control matter in Chicago/Des Plaines.

TAX-CUT-NO-STRINGS GRANT TO WEST VIRGINIANS

(Mr. STATON of West Virginia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STATON of West Virginia. Mr. Speaker, one of the benefits of being a Member of this body is that one gets an opportunity to announce grants to constituents on a timely basis. I would like to take this opportunity to thank this body for allowing me to go home to West Virginia and announce that beginning on October 1, we will be able to return to the citizens of my State \$40 million. The next year we will be able to return an additional \$160 million, bringing it to a total of \$240 million. Thereafter, beginning in 1984, there will be a \$400 million per year grant, at the very minimum, because this is the amount of money that will be left in the hands of West Virginia taxpayers because of President Reagan's 25-percent tax reduction.

The best part about this grant is that it has no strings attached. There are no auditors to be concerned with and no regulations to follow. They can use this money to spend as they wish without fear of intervention from the Federal Government.

A State the size of mine will have a much smaller grant than many of our larger States. I firmly believe this is the kind of grant that Congress should offer to its citizens. To be able to continue to do this without absconding with the citizens' money is the real purpose of this body.

TRIBUTE TO ROY WILKINS

(Mr. STOKES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STOKES. Mr. Speaker, today, I and a host of Americans across this Nation, mourn the loss of a great leader and a great American. The premiere civil rights leader in this country, former NAACP Executive Director Roy Wilkins, died yesterday at the age of 80.

The grandson of a Mississippi slave, Roy Wilkins grew up in a segregated America, one in which black Americans were abused and where lynchings and racism were rampant. He committed his life to dismantling every last vestige of discrimination, segregation, and injustice to blacks which engulfed this Nation in his own deliberate and methodical style.

Mr. Speaker, Roy Wilkins was the quiet storm against those who attempted to keep the cruel and unjust walls of segregation and inequality intact against blacks. He carried this battle with unswerving vigilance and vigor from the fields of Mississippi to the Halls of Congress and to the White House.

Mr. Speaker, Roy Wilkins was the sentinel and guiding force in the historical civil rights movement in this country. We will remember him eternally for being a man of great vision, profound commitment to his people, and a leading strategist for the important civil rights decisions and legislation of our time.

In his last speech as executive director of the NAACP, Roy Wilkins said:

Let us use every tool at our disposal, every hand on deck, black and white, young and old, for there is still unfinished business to take care of.

Mr. Speaker, Roy Wilkins put the business of equality for black Americans on this Nation's agenda. Because of him, we are closer to finishing that unfinished business.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled bills on Thursday, August 4, 1981:

S. 547. An act to enable the Secretary of the Interior to erect permanent improvements on land acquired for the Confederated Tribes of Siletz Indians of Oregon.

S. 694. An act to authorize supplemental appropriations for fiscal year 1981 for the Armed Forces for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles and for research, development, test, and evaluation to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for such fiscal year, to authorize supplemental appropriations for such fiscal year for construction at certain military installations, and for other purposes.

S. 875. An act to authorize the generation of electrical power at Palo Verde irrigation district diversion dam, California.

And the following enrolled bills on Tuesday, August 11, 1981:

H.R. 3982. An act to provide for reconciliation pursuant to section 301 of the first concurrent resolution on the budget for fiscal year 1982.

H.R. 4242. An act to amend the Internal Revenue Code of 1954 to encourage economic growth through reductions in individual income tax rates, the expensing of depreciable property, incentives for small businesses, and incentives for savings, and for other purposes.

S.J. Res. 87. Joint resolution to authorize and request the President to designate September 13, 1981, as "Commodore John Barry Day."

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

Washington, D.C., September 9, 1981.

Hon. Thomas P. O'Neill, Jr., The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, I have the honor to transmit sealed envelopes received from The White House as follows:

(1) At 1:48 p.m. on Tuesday, August 25, 1981 and said to contain a message from the President wherein he transmits a report on a loan guarantee agreement as required by the Defense Production Act of 1950, as amended.

(2) At 1:10 p.m. on Friday, August 28, 1981 and said to contain a message from the President wherein he transmits a report as required by Sec. 803(c) of the Military Construction Authorization Act, 1981, on Community Impact Assistance.

(3) At 3:10 p.m. on Monday, August 31, 1981 and said to contain a message from the President wherein he transmits a report on the Federal Pay Comparability Alternative

(4) At 3:35 p.m. on Tuesday, September 1, 1981 and said to contain a message from the President wherein he transmits a report ex-

cluding selected agencies and units of agencies from coverage under the Federal Merit Pay System.

(5) At 1:28 p.m. on Friday, September 4, 1981 and said to contain a message from the President wherein he transmits a report for fiscal year 1979 on mine safety and health activities.

(6) At 1:28 p.m. on Friday, September 4, 1981 and said to contain a message from the President wherein he transmits the 17th annual report on the National Wilderness Preservation System.

(7) At 1:28 p.m. on Friday, September 4, 1981 and said to contain a message from the President wherein he transmits the annual report of the Rehabilitation Services Administration for fiscal year 1980.

With kind regards, I am,

Sincerely

EDMUND L. HENSHAW, Jr., Clerk, House of Representatives.

LOAN GUARANTEE COMMIT-MENT AGREEMENT WITH THE OIL SHALE CORPORATION— MESSAGE FROM THE PRESI-DENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, without objection, referred to the Committee on Banking, Finance and Urban Affairs:

To the Congress of the United States:

The Defense Production Act of 1950 (50 U.S.C. App. 2061 *et seq.*), as amended, provides that loan guarantees in excess of \$38 million be transmitted to the Congress for its review.

The Department of Energy has negotiated a loan guarantee commitment agreement, identified as Synthetic Fuel Action 1981-1, with The Oil Shale Corporation in the amount of \$1.112 billion for its participation in the Colony Project pursuant to the authority of Section 305 of the Defense Production Act. I am pleased to transmit for review:

1. an Executive Summary of the transaction;

2. a Major Terms and Condition sheet:

3. the loan guarantee transaction documents; and

4. the Operating Agreement between The Oil Shale Corporation and Exxon Corporation for the Colony Project.

RONALD REAGAN. THE WHITE HOUSE, August 25, 1981.

PRESIDENT REAGAN'S DENIAL OF MEETING WITH VICE PRESIDENT OF NIGERIA

(Mr. CONYERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONYERS. Mr. Speaker, this morning a number of us met with the Vice President of Nigeria, Mr. Alex Ekwueme. To my amazement I must report to my colleagues that he was denied a meeting with the President of the United States, this on the heels of our Vice President's journey to Nigeria last year, at which time our Vice President held meetings with top Nigerian leaders, including its President, and was extended all of the courtesies and amenities of a high-level exchange.

For the Vice President of Nigeria, on the other hand, there were no Secret Service accompanying him when he was here in the House, or the other courtesies normally extended to leaders of other nations. There were no police escorts.

The whole thing, to use the phrase, was pretty tacky. The Vice President, privately was very shocked by the administration's behavior. On behalf of a number of Members of Congress who met with the Vice President of Nigeria and other high-ranking officials of the largest country on the African Continent, I want my colleagues to know that an apology is in order from the administration.

I think the administration's failure to respond to the Vice President of Nigeria is contrary to the diplomatic courtesies that we normally extend to our friends and leaders of the great nations that visit us.

PRESIDENT REAGAN'S DENIAL OF MEETING WITH VICE PRESIDENT OF NIGERIA

(Mr. WASHINGTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WASHINGTON. Mr. Speaker, I wish to join my colleague, Representative John Conyers of Michigan, in protesting the apparent treatment by the Reagan administration of a high-ranking representative of a government which has always been close to our own. It is inconceivable to me what reason our President would have to refuse to meet with as high ranking an official as the Vice President of Nigeria.

I just learned of this incident this morning. I am certain that the President, upon further consideration, will do whatever he can to redress any insult, however unintended. I urge him, in particular, to consider the necessity for tightening up the relationship between this country and certain black African countries, particularly in light of the support our Government gave to South Africa at the United Nations. Unless this is done, I fear there may be an irretrievable breach of our relations with Nigeria.

Frankly, we are in no position to harm our historically close relations with Nigeria, particularly in light of the fact that we still run our cars on oil. FINAL REPORT ON STUDY CONDUCTED BY AN INTERAGENCY TASK FORCE OF ECONOMIC ADJUSTMENT COMMITTEE—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Armed Services:

To the Congress of the United States: Section 803(b) of the Military Construction Authorization Act, 1981 (P.L. 96-418) called for "a thorough study of the adverse impact on communities in areas in which major, new military facilities are constructed with a view to determining the most effective and practicable means of promptly mitigating such impact." On March 23, 1981, I submitted a preliminary report on this study which has been conducted by an interagency task force of the Economic Adjustment Committee, At that time, I indicated that additional portions of the study were underway and would be reflected in a final report which would be forwarded to the Congress as early as practicable. I am herewith submitting the final report of this study.

The final report augments the preliminary report by including further analysis of the ability of communities to absorb growth; analyzing and additional budgeting and organizational alternative; and updating information on existing Federal assistance programs to reflect the Administration's budgetary revisions.

The report examines various organizational and budgeting mechanisms for providing assistance to communities impacted by the nearby construction of major, new military bases. The report concludes that, with rare exceptions, local and State resources and normal Federal domestic agency assistance should be used to provide public facilities and services supporting military bases. Special Federal assistance should only be warranted in highly unusual circumstances where a sudden population influx and the resulting demand for public services from a major, new military base could overwhelm State-local fiscal capacities and impede achievement of critical national security objectives. As the report states, the need for any special Federal assistance must be evaluated on a case-by-case basis.

In those rare circumstances where special Federal assistance would be warranted, we will want to attain a high degree of responsiveness to State and local concerns together with sufficient accountability and control of Federal funds associated with critical national security projects. In this regard, the Special Impact Assistance

alternative appears to be a promising approach. However, the selection of the preferred organizational and budgetary mechanism will depend upon the particular circumstances in each case. I will look to the Secretary of Defense and the Director of the Office of Management and Budget, in consultation with affected States and communities, to advise me in this regard. I will request additional statutory authority when it is required.

I have been gratified by the excellent cooperation among all levels of Government in the preparation of this study. We intend to continue working closely with affected States and communities to reach satisfactory outcomes on national security projects which affect their interests.

RONALD REAGAN. THE WHITE HOUSE, August 28, 1981.

□ 1330

ADJUSTMENT IN FEDERAL WHITE COLLAR PAY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-83)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Post Office and Civil Service and ordered to be printed:

To the Congress of the United States:

Under the Pay Comparability Act of 1970, an adjustment in Federal white collar pay will be required in October, 1981.

That Act requires that calculations be made annually of the adjustments that would be required in Federal statutory pay systems to achieve comparability with private sector pay for the same levels of work. My pay advisers have made those calculations and indicated that an average 15.1 percent increase would be required to achieve comparability as the concept and process were defined in the Pay Comparability Act of 1970.

While I fully support the comparability principle as the best basis for determining Federal pay, I believe that significant changes are required in the way that principle is currently defined and implemented. Therefore, last March we transmitted to the Congress proposed legislation to revise and strengthen the comparability process. At that time, we estimated that the revised process would result in an average increase in Federal pay of 4.8 percent in October, 1981.

The reform proposal has not yet been acted upon in Congress, but in accordance with our economic recovery program, the Congress included in the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35) a provision which limits this October's Federal white collar pay adjustment to the same 4.8 percent. Accordingly, I am submitting to the Congress an alternative plan which would implement that limitation on Federal white collar increases.

Current law provides that annual increase for the military be the same as the average Federal white collar increase. This year, however, the Congress is expected to provide for a larger military pay increase as a part of the Defense Authorization Act for FY 82. The larger increases proposed under that legislation will supersede the increases that military personnel would otherwise receive under the alternative plan.

RONALD REAGAN. THE WHITE HOUSE, August 31, 1981.

AGENCIES EXCLUSION OF 44 UNITS OF **AGENCIES** AND FROM COVERAGE UNDER THE MERIT PAY SYSTEM-MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-84)

The SPEAKER pro tempore laid before the House the following message from the President of the United States: which was read and, together with the accompanying papers, without objection, referred to the Committee on Post Office and Civil Service and ordered to be printed:

To the Congress of the United States: Supervisors and mangement officials in GS-13, 14, and 15 positions throughout the Federal Government will be converted to merit pay this October as required by Chapter 54, Title 5, U.S. Code, unless otherwise ex-

cluded by law.

Upon proper applications from the heads of affected agencies and upon the recommendation of the Director of the Office of Personnel Management, I have, pursuant to 5 U.S.C. § 5401(b)(2)(B), excluded 44 agencies and units of agencies from coverage under the Merit Pay System on account of size and efficiency, emergency conditions, and comity with the Legislative and Judicial branches.

Attached is my report describing the agency or unit to be excluded and the

reasons therefor.

RONALD REAGAN. THE WHITE HOUSE, September 1, 1981.

FISCAL YEAR 1979 ANNUAL REPORT ON MINE SAFETY HEALTH ACTIVITIES AND MESSAGE FROM THE PRESI-DENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together

out objection, referred to the Committee on Education and Labor:

To the Congress of the United States:

In accordance with Section 511(a) of the Federal Mine Safety and Health Act of 1977, as amended (30 U.S.C. 958(a)). I transmit herewith the Fiscal Year 1979 annual report on mine safety and health activities during the previous Administration as submitted by the Secretary of Labor.

RONALD REAGAN.

THE WHITE HOUSE, September 4,

SEVENTEENTH ANNUAL REPORT ON STATUS OF THE NATIONAL WILDERNESS PRESERVATION SYSTEM FOR CALENDAR YEAR 1980-MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Interior and Insular Affairs:

To the Congress of the United States:

In accordance with the Wilderness Act of 1964 (Public Law 88-577), I herewith transmit the Seventeenth Annual Report on the status of the Wilderness National Preservation System for the calendar year 1980. The period covered by the report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, September 4. 1981.

ANNUAL REPORT OF THE REHA-BILITATION SERVICES ADMIN-ISTRATION FOR FISCAL YEAR FROM 1980-MESSAGE THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor:

To the Congress of the United States:

In accordance with Section 13 of the Rehabilitation Act of 1973, as amended, I hereby transmit the Annual Report of the Rehabilitation Services Administration for Fiscal Year 1980 as submitted by the Secretary of Education. The period covered by this report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, September 4, 1981.

with the accompanying papers, with- COMMUNICATION FROM CHAIR-MAN OF COMMITTEE ON PUBLIC WORKS AND TRANS-PORTATION

> The SPEAKER pro tempore laid before the House the following communication from the Chairman of the Committee on Public Works and Transportation, which was read and referred to the Committee on Appropriations:

> > COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION, Washington, D.C., July 24, 1981.

Hon. Thomas P. O'Neill, Jr.,
The Speaker, House of Representatives,

Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of the Public Buildings Act of 1959, as amended, the House Committee on Public Works and Transportation approved the following projects on July 23, 1981:

LEASES

Arlington, Virginia: Pomponio Plaza Building.

Dallas, Texas: Department of Housing and Urban Development, Federal Trade Commission.

Chicago, Illinois: Department of Housing and Urban Development.

Chicago, Illinois: DOD—Army Corps of Engineers, Office of Personnel Manage-ment, Small Business Administration, Drug Enforcement Administration.

Philadelphia, Pennsylvania: Treasury Department, Department of Transportation.

The original and one copy of the authorizing resolutions are enclosed.

Sincerely.

JAMES J. HOWARD, Chairman.

GENERAL LEAVE

Mr. SMITH of Iowa. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill, H.R. 4169, and that I may be permitted to include extraneous and tabular material.

The SPEAKER pro tempore. there objection to the request of the gentleman from Iowa?

There was no objection.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JU-DICIARY, AND RELATED AGEN-CIES APPROPRIATIONS, FISCAL YEAR 1982

Mr. SMITH of Iowa. Mr. Speaker, I move that the House resolve itself into the Committee on the Whole House on the State of the Union for the consideration of the bill (H.R. 4169) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 2 hours, the time to be equally divided

and controlled by myself and the gentleman from Illinois (Mr. O'BRIEN).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Iowa (Mr. SMITH). The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 4169, with Mr. Brown of California in the chair.

The Clerk read the title of the bill. By unanimous consent, the first

reading of the bill was dispensed with. The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from Iowa (Mr. SMITH) will be recognized for 1 hour, and the gentleman from Illinois (Mr. O'BRIEN) will be recognized for 1 hour.

The Chair recognizes the gentleman

from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the total amount of new budget authority in this bill for fiscal year 1982 is \$8,754,633,000. This amount is a net reduction of \$868,246,000 from appropriations enacted for these departments and agencies for fiscal year 1981, and is \$6,469,000 below the total budget estimates submitted to the Congress. The amount recommended in the bill is also \$367,000 below the allocation to the Subcommittee on Commerce, Justice, and State under section 302 of the Budget Act.

The net decrease of \$864,246,000 from appropriations enacted for fiscal year 1981 is due primarily to substantial reductions in funds recommended for the Bureau of the Census, the Economic Development Administration, the Maritime Administration, the Small Business Administration, and the Legal Services Corporation.

total of \$2,806,055,000 is provided in title I of the bill which includes the Department of Commerce and related agencies. This amount is an increase of \$275,798,000 above the budget rebut is a reduction \$1,295,732,000 from appropriations provided for fiscal year 1981. The principal reason that the amount recommended for title I is above the budget request is that the committee restored funding, at least in part, for several important programs for which there were no budget requests or which were targeted for substantial reductions. These programs include the Economic Development Administration which the bill includes \$313,500,000, compared with only \$50,000,000 requested by the administration, and the public telecommunications facilities grants program for which the bill includes \$16,000,000. The President's budget did not include any request for this program. In addition, title I of the bill provides \$37,780,000 above the budget request for several programs of the National Oceanic and Atmospheric Administration, which are of vital interest to many Members, and which were not included in the President's budget or were targeted for substantial reductions. These include the Fisheries Loan Fund, Sea Grant, fisheries grants to States, and anadromous grants.

Title of the bill also restores \$2,500,000 and 97 positions for the Federal Trade Commission in order to maintain a regional office structure for the FTC. The FTC regional offices have a major role in working with small businesses, in identifying local anticompetitive problems, in enforcing antitrust laws, and in protecting consumers from deceptive practice. The level in the bill still will require a sizable reduction in positions from the current authorized strength and will require the FTC to reevaluate the configuration and placement of its regional offices in order to achieve the most cost-effective regional structure.

The bill also contains language relating to the cereals proceedings which prohibits the Federal Trade Commission from preparing or issuing any initial decision in the administrative proceeding (Docket No. 8883) until 60 days after the Commission makes a decision on the recommendation of the Independent Administrative Judge on the pending inquiry ordered by the Commission on February 13, 1981. No action of the parties relative to the decisions on this procedural matter will result in delaying the initial decision beyond such 60 days. The language also provides that this limitation shall not prohibit the completion of such inquiry nor the dismissal of Docket No. 8883. The language does not in anyway attempt to affect the decision of the Commission on the substantive case.

Finally, title I of the bill includes a total of \$612,580,000 for the Small Business Administration. While this total is \$11,500,000 below the budget request, it does provide for the program level of \$260,000,000 in direct loans and \$3,150,000,000 in loan guarantees for the Business Loan and Investment Fund, requested by the President and a program level of \$733,500,000 for the Disaster Loan Fund, an increase of \$293,500,000 above the President's request.

The bill provides a total of \$2,839,821,000 in title II for the Department of Justice and related agencies. Although this amount is \$39,382,000 above appropriations for fiscal year 1981, it is a reduction of \$61,500,000 from the budget requests. The amount recommended for the De-

partment of Justice, \$2,447,114,000, includes funding for several critical programs for which there were either no budget requests or for which significant reductions were proposed. The most significant of these is the Juvenile Justice and Delinquency Prevention Program for which \$70,000,000 is included in the bill.

In addition, the bill includes \$25,000,000 above the budget request for the Immigration and Naturalization Service to maintain 973 positions for the Border Patrol and the areas of inspections, investigations and adjudications. It is apparent that money alone will not solve all of the problems of the INS and that changes are needed in the law. However, pending those changes, the committee felt that this additional funding may be of help in the most critical areas.

The bill also includes \$7,500,000 for the U.S. trustee pilot program under U.S. attorneys and marshals. This program was proposed for elimination in 1982, and the amount recommended will permit this experimental program to continue as originally planned in all 18 pilot districts.

The bill reflects an increase of \$3,255,000 above the budget request for the Drug Enforcement Administration to restore the current program level for the State and local task force program, State and local training, and the compliance and regulation program.

Title II includes \$241,000,000 for the Legal Services Corporation. This amount is \$158,700,000 less than the amount requested by the Corporation for fiscal year 1982, and is \$80,300,000 less than the appropriation provided for the current fiscal year. The law provides that the Corporation makes its requests directly to Congress. No funding was requested for the Legal Services Corporation in the President's budget for fiscal year 1982.

The amount recommended by the committee is consistent with the \$241,000,000 authorized for appropriation to the Legal Services Corporation for fiscal year 1982 in H.R. 3480, as passed the House. It is intended that the funds provided in the accompanying bill be used strictly in accordance with the terms of the authorizing legislation as approved by the House. The House recently spent 3 days developing a bill which passed and the committee sees no reason to believe the majority have changed since that time. In order to achieve that objective, the committee inserted language in the bill which would prohibit any of the funds from being spent for any purpose which is prohibited or limited by any of the provisions of H.R. 3480. The committee deleted provisions which were included in the bill last year concerning lobbying, minimum access, representation of illegal aliens,

and homosexuality since all of these provisions are included in the authorizing legislation as passed the House and under the language in the bill, all limitations in the act as passed by the House will apply.

The bill provides a total of \$2,392,595,000 for title III which includes the Department of State and related agencies. While this amount is \$318,585,000 above appropriations for the current year, it is a reduction of \$195,126,000 from the budget requests for the Department of State and such agencies. The increase over the current appropriations are due primarily to wage and price increases and increased requirements for international organizations and international peace-keeping activities.

The decrease from the budget rereflects deferral quests a \$82,100,000 requested for a new Embassy complex in Riyadh, Saudi Arabia in order to give the Congress the opportunity to consider certain changes in the Tax Code and other laws governing foreign commerce which could remove disadvantages suffered by American firms that may wish to bid on this project. In addition, the amount reflects reductions the budget requests from \$23,700,000 for payment of assessed contributions to the International Labor Organization (ILO), \$4,000,000 for anticipated currency gains in the overseas operations of the Department of State, and \$15,000,000 for establishment of a buying power maintenance fund. The committee felt that only \$5,000,000 was needed to capitalize this fund, given the strong position of the dollar against foreign currencies. The bill also reflects a reduction of \$10,000,000 from the budget request for the Board for International Broadcasting due to anticipated currency gains and a total reduction of \$61.8 million for the International Communications Agency. Most of this reduction is associated with a request for new transmitter facilities. We did not feel that it was necessary to provide the full amount requested for these new facilities at this time since most of the funds would not be obligated during fiscal year 1982. Therefore, we have deferred without prejudice the remainder of the funds requested for these facilities and expect the submission of a budget request for the additional funds that are needed in future

The bill includes a total of \$716,162,000 in title IV for the Judiciary. This amount is a decrease of \$25,641,000 from the total amount requested for the Judiciary for fiscal year 1982. This reduction is associated primarily with additional positions requested but not allowed, as well as space and furniture requirements related to those positions.

Mr. Chairman, I believe that I have discussed the highlights of the bill. Further details on each item are included in the report.

In closing, I would like to thank each member of our subcommittee for their cooperation and hard work in putting this bill and report together. This has been a difficult year and I want to express my personal appreciation to every member of the subcommittee for their dedication and support.

Mr. O'BRIEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the gentleman from Iowa has done his usual good job in describing the contents of the bill. We have had it available to us, of course, since about a month past.

I would like to comment on the way we arrived at this bill. The subcommittee, consisting of the chairman and myself, and Messis. Handler of Ohio, Early, Campbell, with the considerable help of the full committee chairman and ranking member Mr. WHITTEN and Mr. CONTE, worked long and hard, taking into consideration everything that we felt was appropriate and some things that we did not. We have been extremely serious about every representation made before our committee. We have tried to strike a balance between the needs of our constituents, the concerns of the Members of the body and, indeed, the requests of the administration.

Obviously, it is not a perfect bill. No bill is. But, in my judgment, it is a good one. It is one that we can respectfully present to the House. And if I may, I would offer one final comment, and it concerns amendments. I have an amendment that I would like to add to this bill. I think it is in order, and I think it is important. But I intend not to offer it until we get to conference. I make that suggestion to the membership respectfully, in the hope that the gentleman from Iowa (Mr. Smith) and myself and the members can go to conference with the package that we have presented here today. We can assure the membership that every serious amendment will get full and complete attention in the conference, although we cannot, of course, guarantee passage.

Mr. SMITH of Iowa. Mr. Chairman, I yield 3 minutes to the gentleman from Louisiana (Mr. Breaux).

Mr. BREAUX. Mr. Chairman, I take this time, first of all, to thank the members of the subcommittee from both sides of the aisle for their patience and consideration. As the chairman of one of the authorizing committees that this subcommittee has to deal with, I find that they have been very cooperative and indulgent in those of us from the authorizing committee and have worked with us in

trying to resolve our differences in many areas.

I would point out a couple of things which I think need to be said at this time. I would say that I appreciate particularly the members of the subcommittee, the chairman, particularly, very carefully examining the fishermen's loan fund that our Fish and Wildlife Subcommittee authorized this past year. Particularly, they granted our request for additional funding for this particular program, and I am thankful for that.

The members of the appropriations subcommittee, however, pointed out to those of us on the authorizing committee that they would like to have been even more accommodating but for the fact that the authorization language in the American Fisheries Promotion Act, which was overwhelmingly adopted by this Congress last year, included an off-budget item which we made subject to the appropriations process. We are going to be relooking at the language. I think that Mr. Stockman, from the Office of Management and Budget, indicated that it is clearly an off-budget item. The money for this program is funded from tariffs levied on imported fish products into the United States. It truly is an item that is not subject to appropriations in the normal sense. It is coming from foreign countries as a privilege of selling fish products in the United States. We are going to be looking at this language to see if perhaps it does need some changes in order to see that this particular program, which is very important, does receive sufficient fund-

The last thing that I will mention. which I think is extremely important, is that I will be offering an amendment during the 5-minute rule which will not affect the bottom-line figure on how much money is being appropriated by the Appropriation Committee for programs under the National Marine and Fisheries Service. What my amendment will do is, very simply, to take from a number of programs that we feel are low-priority items, some \$6,081,400, and reduce that amount from five categories of programs that, while we think they are good programs and would be nice to have, they are programs that in this budgetary crunch we simply cannot afford.

My amendment would take that \$6 million that we take from these five programs and add it to two programs that the authorizing committee thinks are absolutely critical and essential. Those are the Saltonstall-Kennedy program and the Commercial Fisheries Research and Development Act.

□ 1345

Mr. Chairman, I think the whole point of the budget process is to let

the Budget Committee set some ceilings and I say fine, these are what we can spend and say to the Appropriations Committee, "All right, we need these amounts of money." But to say to the authorizing committee, "We want your help and assistance," and where the funds can best be spent, and that is what our subcommittee embarked upon and we came up with a recommendation to the Budget Committee and to the Appropriations Committee that said, "All right, we are willing to take a \$6 million cut, but we would like to say let us take it from these areas that are less important."

I think it is very important that the subcommittee that has the members who have really devoted a lifetime in Congress to studying these programs to really listen to the advice of the subcommittee.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. Breaux) has expired.

Mr. SMITH of Iowa. Mr. Chairman, I yield 2 additional minutes to the gentleman from Louisiana.

Mr. BREAUX. The principal program that is for fish promotion is the Saltonstall-Kennedy program; we need the funds for the program and we are willing to cut somewhere else but the authorizing committee thinks this program is so important we need the money to promote fishery development in the United States.

Also, the commercial fisheries research and development program gives moneys to the States so the States can use those funds within their boundaries and it is a critically essential pro-

What are we cutting? We are cutting a newsletter from the National Marine Fishery Service. It is nice to have a newsletter, but we ought to let the industry pay for the cost of the newsletter. So we reduce the market news report by \$641,000. We reduce the coastal zone and fisheries advice program by \$490,000. That program gives advice to a State fishing agency so they can advise another State agency. That we can do without. That is what

am saving. We have a marine resources monitoring and assessment program. They basically count fish. I am glad they are doing it, but a lot of other people are doing the same thing. What I am saying to the chairman of the subcommittee and the chairman of the full committee and the ranking minority member is that what we are doing by my amendment is not increasing or decreasing the bottom line. We are just making a suggestion of how we feel \$6 million can best be spent in two critical programs and reducing five other programs and come up with the same figure.

We think it is a good suggestion. We think it is reasonable, and I think it has the support of the American fishing industry and we will have Members from various parts of the country speak in favor of the amendment.

I think it makes a great deal of sense and I thank the gentleman.

Mr. O'BRIEN. Mr. Chairman, I yield 3 minutes to the gentlewoman from Nebraska (Mrs. Smith).

Mrs. SMITH of Nebraska. Mr. Chairman, I rise to express my concern about some of the priorities involved in this bill, H.R. 4169, in which eventual closing of 38 part-time weather service stations in 26 States is contemplated. One of these stations, at Valentine, Nebr., is in my district.

I commend my good friend and colleague, the gentleman from Iowa, Chairman Neal Smith, and the members of this subcommittee for their handling of the administration's proposal to close these stations.

The gentleman's subcommittee has given our stations a 6-month reprieve. While this is less than I had hoped for, passage of this bill would give us time to seek reconsideration by the executive branch. So the issue is a live one that is continuing to cause many Members grave concern.

Accurate and timely weather forecasting is of utmost importance in my district. Farmers, ranchers, and pilots all stake their lives and their livelihoods on information from our National Weather Service offices.

These part-time weather service offices are vital to rural areas and since this is true, I think several important factors should be known about them for the record. I feel strongly about the proposed closing, and 27 other Members of Congress who share this concern joined me in writing to the President urging him to reconsider and review his proposal to close these part-time stations.

I do believe we can reorder our priorities and save many of these stations without increasing spending, because it should be our primary goal to insure that life and property are adequately protected before continuing to fund expensive and esoteric programs such as weather modification.

I would like to point out to my colleagues more specifically why our station at Valentine, Nebr., must be continued: Why it is unique, vital to the people in the area, and absolutely necessary for the protection of their lives and property.

At present, Nebraska's Valentine weather station covers an area north of Pierre, S. Dak., east to Lake Andes, south to North Platte, Nebr., west to Gordon, Nebr., and up to Mount Rushmore, S. Dak.—vast area of 5,000 square miles almost exactly the same size as the entire State of Connecticut. The station also makes reports to other regional stations, to farmers, to ranchers, to pilots, and to all others in the area.

I believe the uniqueness of this station is not fully understood even by the weather service professionals who have been trying to close it for years. Indeed, I have become persuaded that instead of being closed, the station should be upgraded to full-time human staffing—as it once was—24 hours a day and that radar should be added to it.

I understand that the Members of the other body are leaning toward first closing those stations with only one full-time Federal employee and allowing those stations with more than one employee to continue. I cannot agree that this is good logic: To cut stations, such as Valentine, by 100 percent before cutting others by some lesser percentage is not only folly but patently unfair.

Furthermore, the Washington bureaucrats would let you believe that a human being is present at such a station only 40 hours a week, leaving the citizens to the tender mercies of automated equipment the other 128 hours of the week. This is false. In Valentine, for example, three contract observers stretch the human staffing to as much as 18 hours daily, including Saturdays, Sundays, and holidays.

Valentine's weather station has operated effectively since 1880. There has been no change in the weather, but the need for reliable, detailed local weather reporting service has increased enormously. To reduce service, when better service including radar is desperately needed, is Government indifference at its worst.

Let me list for the record the other reasons to make the best possible case for at least continuing the Valentine station as is, recognizing that my own committee has agreed to continuing the 38 stations only the first 6 months of fiscal year 1982 without indicating what happens after March 30, 1982.

First. Human staffing versus automation.

Automatic equipment cannot spot tornadoes or other severe storms in time to warn the populace. And Valentine, Nebr., is in the heart of tornado and blizzard country.

Human staffing is needed for tornado spotting and reporting of conditions for aircraft. Valentine is at the very edge of effective radar coverage, and NWS has announced plans to withdraw even that coverage in fiscal year 1983. Coverage from the new station in Scottsbluff, Nebr., will miss Valentine by 25 nautical miles.

Automation cannot report conditions for aircraft. This automation is called AMOS and RAMOS. These are partial reports that tell dew point, temperature, wind, altimeter setting, and rainfall. There must be humans to complete these reports to make them effective by adding data on sky and

ceiling, visibility, and sea level pressure.

Second, Valentine has the most unpredictable and harshest weather in the country, and the people need to be warned in advance.

For example, Nebraska still has oneroom schools and those teachers need to be warned of bad weather so they can send the children home before the roads close.

Ranchers in that area need hours of warning for severe weather so they can bring in their livestock from thousands of square miles.

Valentine area radio stations depend on its forecasts to keep its people in-

Up to 6,000 people vacationing at Merritt Dam, about 25 miles away, depend on Valentine's reports about sudden severe weather.

Third, the regional offices cannot provide adequate weather information without the Valentine station.

Only Valentine's weather station covers an area of 5,000 square miles in north central Nebraska and south cental South Dakota.

The closest regional station is 130 miles away. It cannot possibly provide accurate forecasts.

Pilots flying in the area need more than the hourly reports given by the regional offices since bad weather can develop within the hour. Valentine gives two reports within the hour.

The regional stations in North Platte and Omaha, Nebr., need weather updates from Valentine. On March 17, 1979, Omaha predicted rain for Valentine. Actually, Valentine had 4 inches of snow at that time and more coming down.

Fourth, other agencies depend on the Valentine station for research and data

Nebraska Public Power District uses Valentine as one of seven key weather stations for load analysis and forecasting. Without Valentine data, a large tract of service area will go unrepresented.

The University of Nebraska in Lincoln, Nebr., uses Valentine's reports for climatology since it experiences winds up to 60 miles per hour and wind chill of 50° below zero.

Valentine is part of the National Forestry Weather information service system to forecast range fires that are a threat to cattle production and people in the sandhills of Nebraska.

Valentine is a vital part of a new University of Nebraska computer program for monitoring and assessing crop weather conditions in Nebraska.

Fifth, it could cost more to close the small stations than to continue them.

Valentine is in the heart of tornado and blizzard country, and if even one should go unsighted by a regional station, the resulting loss of life and devastation of property could cost the Government enormously more than the \$1.9 million that would be saved by closing these stations.

Weather professionals acknowledge that many severe blizzards in winter and thunderstorm-tornado activity in the summer actually form in an area just northwest of Valentine—an area at the edge of effective radar detection

Sixth, the Valentine station's employee's hours have already been cut on Saturdays, for overtime, and for relief. This saves \$9,000 annually. This leaves an annual operational cost of only \$22,000.

Seventh, in Kansas City, Mo., the Weather Service underspent its budget in fiscal year 1980 by \$200,000. The bureaucrats used the money to buy some microwave ovens and film projectors. Maybe Kansas City could take the cut next year instead of the part-time stations.

In closing, here is what Richard Hallgren says about our weather field offices, Mr. Hallgren being the present director of the National Weather Service and the man who wants more than any other person to close the 38 part-time stations:

Each individual has a lot to contribute and must be given a chance to do so. This is particularly true of those at operational field offices for this is where our basic mission is carried out. The rest of us are simply supporting these units * * .—Richard Hallgren, Director, National Weather Service, message to all employees, February 1979.

I fully support this bill, but I wish my own committee, my other colleagues here in the House, and the administration, to know that I will take every legitimate and reasonable step to make sure that the Valentine weather station continues and to try to persuade the National Weather Service to add radar to the station and to upgrade it to 24-hour staffing. At this point I include the aforementioned letter:

House of Representatives, Washington, D.C., July 27, 1981.

Hon. Ronald W. Reagan, President, The White House,

Washington, D.C.

Dear Mr. President: In our effort to work with you in addressing the nation's major economic problems, we have postponed until now asking you to reconsider the proposed closing of the 38 part-time Nationl Weather Service Offices as proposed on page 67 of your April 1981 Budget Revisions for fiscal year 1982 entitled: "Additional Details on Budget Savings."

It is our understanding that the Office of Management and Budget has ordered the National Weather Service to reduce its personnel by 213 persons by September 30, 1982, and that the weather service administrator is determined to achieve a substantial part of that reduction by closing down these vitally needed weather stations that are the protectors of thousands of people and millions of dollars of property.

Many of these stations are located in areas of frequent, severe storms, including tornadoes. If just one tornado goes unsighted and unreported, the resulting loss of life and devastation of property could cost the Federal Government enormously more than the paltry \$1.9 million that would be saved by closing these stations.

We find it extraordinarily difficult to explain to our constituents why they must do without the crucial weather forecasting service in the name of economy while we are at the same time voting to increase funding for such esoteric and expensive programs as weather modification.

We have internal evidence showing that the parent agency, the National Oceanic and Atmospheric Administration, has dozens of personnel vacancies and is even now recruiting people to fill them—while it orders the Weather Service to reduce its small payroll.

We have endeavored, futilely, so far, to persuade the National Weather Service Director to change his priorities so that the truly vital nature of the field offices will be adequately appreciated and recognized. We urge that this matter be reconsidered, that the 213 bodies be trimmed from the large weather offices around the country, and that the 38 stations be continued. Surely a 10 percent reduction in Washington or even larger reductions elsewhere would not even begin to approach the 100 percent reduction contemplated with respect to our 38 parttime stations. The ideal situation being, of course, to lift the personnel ceiling by the 85 positions that it takes to man the 38 part-time stations.

The House Appropriations Subcommittee on Commerce, State, Justice and Judiciary has heeded our appeal to the extent that on June 24, 1981, the subcommittee directed that the 38 stations be continued for six months, or until March 31, 1982. While this continuation was good news indeed, any vabe denied replacement personnel by the Weather Service on the ground that reassignment is not justified for such a short term should the Congress ratify the Subcommittee's action. Such stations would face immediate closure. The continuation does give some additional time, nevertheless, to ask OMB to review and reconsider its proposal to terminate a service deemed so valuable by the people it shields and pro-

Because the appropriations bill affecting this matter will reach the floor of the House very soon, we ask prompt action on our request.

Thank you for your consideration.

With best wishes, we are,

Sincerely,
Virginia Smith, Ray Kogovsek, Robert
H. Mollohan, Christopher H. Smith,

Goldwater.

Mr. O'BRIEN. Mr. Chairman, I yield 3 minutes to the gentleman from Arkansas (Mr. Bethune).

Mr. BETHUNE. Mr. Chairman, I and members of this committee and the Congress generally have been concerned about the budgetary aspects of loan and loan guarantee programs, the whole area of Federal credit assistance

programs. And without reviewing and belaboring the history of this recent effort, which of course includes the sense of Congress resolution whereby we agreed that we would try to make sense out of credit programs and establish something approximating a credit budget for Congress, without going through all of that which is very familiar to members of the Appropriations Committee and the chairman and distinguished ranking minority member, I would just like to pose a couple of questions to the gentleman from Iowa, if I could get his attention.

I have just laid out the history of the credit budget in the Congress and our stage of development whereby we are now sensitive to the growing Federal credit assistance programs, and that brought me to the point where I was going to engage the gentleman in a colloquy about some of the credit programs in the committee bill.

The reason that I wanted to bring this up is that the gentleman from California (Mr. Mineta) and I have cosponsored a bill which would establish a credit budget for the Congress. The idea being, to try to make sense out of what seems to be a runaway situation.

We have done a good job with Federal spending lately, but the Federal credit assistance programs seem to be out of control and we need to do something about it.

In any case, in looking at the gentleman's bill, I noticed that the gentleman placed a limit on the International Trade Administration's direct loan and loan guarantee programs, but later on, in the bill, when we come to the Merchant Marine Act of 1936, where there is an authorization for Federal ship financing credit in the neighborhood of \$12 million, there is no limit.

I am wondering if the gentleman could reconcile for me the apparent inconsistency here, why the committee would cap one program and not another?

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. BETHUNE. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. For example, in the trade adjustment assistance program, the authorizing legislation requires us annually to set those limits. In some other authorization legislation, this is not required. So we annually do set the limit where the authorizing legislation says we should.

The CHAIRMAN. The time of the gentleman from Arkansas (Mr. Beth-

UNE) has expired.

Mr. O'BRIEN. Mr. Chairman, I yield 2 additional minutes to the gentleman from Arkansas (Mr. BETHUNE).

Mr. BETHUNE. Then in the case of disaster loans, there is no annual limit on any of the four small business lending programs and I wonder what is the reasoning there?

Mr. SMITH of Iowa. If the gentleman will yield further, the reason is that we have no way of knowing how many disasters there will be or what the cost will be. We had no way of anticipating Mount St. Helens. So, I do not know how we can estimate in advance. Several administrations have tried various ways. What we have done is provide SBA with the budget authority, and they have to operate within that authority. If they cannot operate within that dollar authority, then they have to come back with a supplemental request.

Mr. BETHUNE. I appreciate the gentleman's thoughts.

Here is the thing: On the Budget Committee we are trying now, as the gentleman knows, to do some score-keeping so that we can keep better track of the Federal credit assistance programs, and one of the ideas we had was that the Appropriations Committees could put caps on some of these programs. In fact, we were even going to require that.

Mr. SMITH of Iowa. If I may say so, let me suggest something better. Nobody in the Federal Government knows what dollar level these loans constitute, good hard loans. To the extent they do, they ought not to be counted against the deficit the same as expenditures of other kinds.

I have asked OMB for 3 years in a row to get me these figures. They say they cannot do it. If a bank makes a loan, they do not consider they have had outlays of so much money and nothing to offset it. In the Federal Government we do. We make good hard loans. Then we say we just spent so much money. We consider such loans the same as money spent for welfare or anything else and we ought to keep that amount separate and not consider it as being just an ordinary outlay of money.

Mr. BETHUNE. I think the gentleman makes a good point.

We want to work with the Appropriations Committee as we try to develop the credit budget, so we know it will work.

The CHAIRMAN. The time of the gentleman from Arkansas (Mr. Bethune) has again expired.

Mr. O'BRIEN. Mr. Chairman, I yield 1 additional minute to the gentleman from Arkansas.

Mr. BETHUNE. Mr. Chairman, we have been operating on the assumption that the Appropriations Committee would, where possible, put limits on the credit packages. So, I am trying to determine what we can realistically expect from the gentleman and his committee as the days wear on.

Mr. SMITH of Iowa. If the gentleman will continue to yield, if the authorizing legislation requires us to set an annual limit, then we would try to comply. Mr. BETHUNE. I thank the gentleman very much.

Mr. HUGHES. Mr. Chairman, I rise in strong support of that portion of H.R. 4169 which appropriates funds for the law enforcement activities of the Department of Justice and the Drug Enforcement Administration. The committee bill appropriates some \$230,849,000 for the Drug Enforcement administration. That figure is some \$2,325,000 more than requested by the Administration for three vital programs that had been targeted for cuts last March by the Office of Management and Budget.

H.R. 4169 follows the Department of Justice authorization bill H.R. 3462 adopted by the House on June 9. H.R. 3462 contains the increased authorization for DEA as a result of an amendment, offered by our colleague, HAL SAWYER, and myself, that was adopted in the Judiciary Committee markup.

These three programs, the State and local task force program directed against street-level drug dealers, the compliance and regulatory affairs program that prevents the diversion of dangerous controlled substances from legitimate medical channels of distribution to the street, and the State and local police training program, are all very important.

A little more than 2 weeks ago, the Attorney General's Task Force on Violent Crime released its final report which contained recommendations that bear on this portion of the bill. Recommendation 37 called for a substantial increase in personnel resources for Federal law enforcement to enable it to effectively perform their present responsibilities.

H.R. 4169 will restore some 94 positions out of the 208 positions that had been cut from the State and local task force program.

The appropriation also restores a 10-percent cut in the compliance program that oversees the activities of 600,000 registrant doctors, hospitals, and pharmacies that handle dangerous drugs. This amounts to some \$249,000. According to DEA an estimated 200 million dosage units of these drugs annually are diverted to the streets which results in emergency room treatment for thousands of persons for drug overdose treatment. This program is a key public health protection program in the drug abuse area.

The third area of greater appropriation is for the training of State and local law enforcement officers in the sophisticated techniques of drug law enforcement. Recommendation 44 of the Attorney General's task force called on the Attorney General to seek additional resources for specialized training programs for State and local law enforcement personnel. The original administration request would have cut the 1982 DEA training program in

half from the 1981 level. The committee restored some \$487,000.

commend the Appropriations Committee for making the difficult choice to appropriate more money for law enforcement at this time of discriminate budget cutting. I urge my colleagues to support these needed additions to the Drug Enforcement budget.

Mr. GOLDWATER. Mr. Chairman, I rise in support of H.R. 4169. The Departments of Commerce, Justice, and State, the judiciary, and related agencies appropriation bill, fiscal year

1982.

I am especially pleased by the committee's decision to delay for 6 months the elimination of the fruit frost forecast and advisory program. This vital program is especially needed by fruit and row crop farmers who depend on accurate weather forecasting to protect their crops.

By retaining this program for 6 months, agriculture can survive the coldest months of the growing season and have sufficient warning to enter, after that time, into a cooperative agreement with the National Oceanic and Atmospheric Administration to retain the expensive fruit frost forecast and advisory program equipment.

As a concerned member of the Sciand Technology Committee ence which has authorizing jurisdiction over this program, it is the authorizing committee's intent to insure that the National Oceanic and Atmospheric Administration enter into such a fair and equitable cooperative agreement with our country's farmers after this 6-month grace period. I wish to stress the need for NOAA to make immediate preparations to enter into such an agreement so that there will be an uninterrupted transition in the fruit frost forecast and advisory program.

Our farmers must tame nature herself in their battle against crop disease, escalating production costs, soil loss, and variable weather conditions. To reduce our struggling farmers' chances still further by eliminating their first line of defense against an approaching cold front or a destructive rain is like expecting a sand castle on the beach to withstand the on-

slaught of the ocean.

As long as we in Congress provide some measure of aid to our agriculture community, agriculture can continue to produce enough food not only to feed this country, but most of the rest of the world as well. I might suggest to my colleagues that that is not such a bad tradeoff.

I urge my colleagues to support the fruit frost forecast and advisory pro-

gram by passing H.R. 4169.

• Mr. ALEXANDER. Mr. Chairman, the bill before us today provides funding for a wide array of programs vital to our Nation's interest. The decisions the committee has had to make have been more than usually difficult this year because of the growing need for austerity in Federal spending.

Throughout my service in the Congress, I have urged that we as a nation take a closer and more thorough examination of our national spending policies. I helped lead the efforts that resulted in the passage of the Congressional Budget Control and Impoundment Act in 1974 which has helped us progress toward the capability for comprehensively considering the Federal budget as a whole before we begin processing its separate parts. This act has been a landmark in congressional and executive branch approaches to the Federal budget.

Also throughout my service in the

Congress, I have urged that we as a people be ever vigilant in our efforts to insure that wherever possible Federal spending be directed at strengthening our private sector economy and its ability to generate job opportuni-

ties for our people.

Both these views are central to my belief that no program funded under this bill now before us is more important than those of the Economic Development Administration. EDA's investments are intended to and have successfully helped strengthen our private sector economy and produced private sector jobs. The holders of these jobs not only repay the EDA investment through their taxes, their economic independence from Federal welfare programs helps reduce pressure for Federal spending in this area

I have believed in the value of EDA's programs since the time nearly 15 years ago when I was privileged to help organize one of Arkansas' substate economic planning and develop-

ment districts.

I believe in EDA because it gives grassroot Americans the opportunity to make the decisions that are a vital force in shaping the destinies of their hometowns and regions. No one knows better the dreams, hopes, aspirations, abilities, and determination of local communities than those men and women who live and work in them every day.

I believe in EDA because it is a proven example of how an effective partnership for development can be forged between Americans and their government at local, State, and nation-

al levels.

I believe in EDA because we have documentation of the power its seed money approach has had in leveraging local and State government and private sector investments which create or maintain private sector jobs in local communities and in bringing about a revitalization that history teaches us was not possible before the establishment of EDA.

It is, therefore, with deep regret that I have watched the administration's determined and continuing efforts to dismantle EDA and its eco-

nomically effective and efficient programs. Programs that, through the taxes paid by holders of jobs EDA's investments create or maintain, more than pay for themselves, which is a rare thing in Federal programs.

It has been gratifying this year, in the fight to keep EDA in operation, albeit at a lower level in the recognition of the need for increased control of Federal spending, to see that Congress also believes in EDA. Congress has carefully examined the administration's proposal to abolish EDA in the coming year and rejected it. Even with the clear expression of intent from the Congress, the administration is continuing to pursue its decision to end EDA.

One of the first and hardest blows the administration has directed at EDA has been to remove the agency's close liaison with the local communities by abolishing, or attempting to abolish the State-based economic development representative system. This is being done in direct contravention of congressional intent as expressed in the committee reports on the fiscal year 1981 supplemental appropriations and rescission law, Public Law 97-12. The administration is attempting to change national policy adopted by the Congress despite numerous existing Federal court decisions that the President does not have this power under the Constitution.

This is particularly true when we recognize that the agency that is the target of the administration's efforts had been and is focused on achieving a major goal which the administration has repeatedly put forward. That of strengthening the ability of the private sector to provide jobs to all ablebodied persons.

We know that the \$5 billion EDA invested in America since the programs began, 16 years ago, have generated or maintained 1.4 million jobs in the private sector and leveraged \$9 billion in private sector investment. Equally important, the evidence shows that the total EDA investment is more than repaid annually by the \$6.5 billion in local, State, and Federal taxes paid by holders of those jobs.

Administration opponents of EDA have said that there is no evidence that the jobs would not have been created or saved without EDA. Those of us whose lives are bound up in the fate of the rural communities, small towns and midsized cities of the countryside hold in living memory the frustrating lessons of fruitless efforts to develop. expand, or, indeed, even maintain the economic base of our home regions in the days before EDA. Our younger generations had few options except leaving home for bigger cities when looking for a job.

In States like my own, Arkansas, the emptying-out process began in the

1940's and went on unabated until the late 1960's. Even the 1970 census showed slight reversal of the population trend in Arkansas. Our rural communities, small towns, and midsized cities were still in trouble. Per capita income was far below the national average. Unemployment rates in most countryside regions were higher than the national average. Agricultural jobs were disappearing with farm mechanization. Jobs in business and industry were not developing because local communities did not have the infrastructure facilities needed, nor the economic base necessary to finance them through the private capital markets.

Then EDA's seed money investments began making themselves felt. Our per capita income is still lower than the national average, but we are gaining. Our unemployment problems are still severe, but we have been making progress. EDA investments totaling \$127 million in Arkansas have generated or maintained 67,000 jobs, with an annual payroll of \$500 million and annual tax payments of \$107 million.

I am not contending that there are not changes that could be made to improve EDA program operations. Nor am I saying that we should not give the President's enterprise zone program a trial. But, the proven success of EDA makes its programs well worth retaining even if, in recognition of the need for cutting Federal spending, we have to reduce these investments.

EDA programs are productive. They produce and maintain private sector jobs. They produce private sector investment. They produce tax revenues for the Federal Treasury that more than pay back EDA's investment every 2 years.

We don't know what the enterprise zone program will produce. We do know that in testimony before the Committees on Appropriations in the House and Senate and administration's witnesses have said they now recognize that the proposal as currently designed does not address all the problems that need addressing, particularly in the absence of an EDA. We do know that the administration's witnesses have said they are struggling to fashion compromises in the enterprise zone concept to eliminate its current weaknesses.

And, most certain are the harsh lessons of the past 50 years of our Nation's history which have demonstrated to us the reluctance of the private sector to invest in rural communities, small towns, and mid-sized cities of the countryside in the absence of programs like those administered by EDA.

We need to continue EDA. Even with the enterprise zone concept in place, I believe we would need EDA for rural communities, small towns and mid-sized cities of the countryside—

the places where the majority of our Nation's people live.

 Mr. BROWN of California. Mr. Chairman, I rise in opposition to the The Sensenbrenner amendment. United States is a country which prides itself on securing equal justice under law for all citizens, and which prizes respect for the law above all other civic virtues. If this body denies poor people access to our legal system, by failing to appropriate funds for the Legal Services Corporation, then we have failed to secure equal justice under law.

The poor, as well as other Americans, must respect the legal system and perceive that it is fair. Essential to that perception is that everyone, including the poor, enjoy effective access to it. And the key to access to the legal system is a lawyer; without such access few rights are granted and none are secure. As the Supreme Court has stated: "The right to be heard would be, in many cases, of little avail if it did not comprehend the right to be heard by counsel."

Providing the poor with a lawyer, through the Legal Services Corporation, does nothing more than provide them with the right to be heard; it does not guarantee the right to win. Can we, in good conscience, deny them this simple right to be heard? Deny them access to the legal system? Deny them equal justice under law?

Many of my colleagues contend that while equal justice is certainly a laudable goal, a balanced Federal budget should take precedence. No one can deny that the goal of a balanced budget should be a high priority, but we cannot, and should not, sacrifice everything to it. The comparatively tiny \$241 million budget for the Legal Services Corporation is dwarfed by the \$12 billion in tax deductions for corporations alone in 1978. This represents just as real a cost to taxpayers as do expenditures of money from the Treasury. If we do not continue to fund LSC, we will not only be denying the poor legal counsel, but we will be continuing to subsidize the legal counsel of the rich. This imbalance of justice must not be tolerated.

We cannot ration equal justice. To do so would invite chaos and anarchy. It would undermine the intent of every law and principle enacted by Congress during its nearly 200 years of existence. As Judge Learned Hand stated:

If we are to keep our democracy, there must be one commandment: Thou shalt not ration justice.

In 1974, Congress took a giant step toward eliminating the rationing system of justice. Shall we, in a moment of budget cutting fury, take a giant leap backward? No. We shall not.

One proposed alternative to Federal funding of this vital service is to incorporate the LSC into a block grant, let-

ting each State determine the ultimate outcome of its poor citizens. But this would undermine the very intent of LSC to provide legal services for all Americans, no matter where they reside. The principle of equal justice is too great, too fundamental to be left to the States' discretion. The Pledge of Allegiance ends with justice for all—no matter where one lives within the United States.

The history of State and local government involvement is dismal. Virtually no interest in providing legal services was demonstrated before the Federal funding effort started in 1965, and very little has been forthcoming since that time to supplement the Federal program. Currently, State and local governments contribute only a little more than \$5 million to legal services programs, a sum equivalent to 1.65 percent of the LSC budget. Finally, an approach of this type would surely cause more politicization than we will ever have under the present Federal arrangement.

Instead of placing the financial burden back on the States, we should be proud that the Legal Services Corporation is one of the Federal Government's best examples of effective and efficient administration. Of the 1.5 million legal matters handled by Legal Services attorneys, only 15 percent actually resulted in litigation. In my own district, the Inland Counties Legal Services has brought this figure down to a mere 10 percent. In 1981, it is expected that only 1.8 percent of the LSC budget will be used for central management and administration. Nearly all the rest will go directly to field programs to provide legal services, with the remainder being spent on program support, field monitoring, and the like.

The elimination of the Legal Services Corporation would not serve to reduce waste in Government, to get the Government off the backs of the people, or to return local programs to the States. Nor would the elimination of LSC in any way help balance the budget or reduce inflation.

I urge my colleagues to vote in favor of the Legal Services Corporation, and against this amendment, and to maintain our pledge of justice for all. If equal justice is to be more than an idea, there must be a means to assure it. The LSC is an integral mechanism for achieving this fundamental concept. Without it the poor of this country will have no remedy to achieve the rights entitled to every American citizen—and rights without remedies are no rights at all.

• Mr. AuCOIN. Mr. Chairman, after listening to this debate over the Legal Services Corporation, I would like to share with you three convincing reasons why LSC programs are truly es-

sential to needy people in my district, and elsewhere.

Early last year, 13 indigent nursing home patients, all over 70 years of age, were issued eviction notices from one of the largest nursing homes in the district. One patient, a woman of 100, died shortly after the notices were issued. Legal Aid was asked by numerous family members to provide legal assistance to the patients. Legal Aid did not file a lawsuit. But it entered into negotiations with the nursing home owners, and learned that the home had promised many of these patients that they could remain indefinitely. The situation was resolved, in these negotiations and all of the patients were allowed to remain.

Meanwhile, in another part of my district, a private reforestation contractor, under contract to the U.S. Government, hired 24 low-income tree planters, transported them to remote forest area, housed them in squalid conditions, and when their work was done, abandoned them in the wilderness without transportation, food, or water. With Legal Aid's help, these men received just wages. Another example: Concerned with the widespread problem of domestic violence, a Legal Aid office in my district sponsored a community forum to discuss the problem. Police departments, district attorneys, social work agencies and private attorneys were invited. As a result of this community discussion, the practices and procedures of the law enforcement agencies and courts were changed to better protect victims of domestic violence.

What these examples tell me is that we need Legal Aid; 75 percent of all funding for legal services in my district comes from the Legal Services Corporation. In one rural office alone, last year, approximately 750 persons were accepted as clients, over 500 more received informal advice and assistance, another 500 were able to receive telephone information on housing problems, and another 240 were assisted by another agency under Legal Aid supervision. During this time, less than one-tenth of 1 percent of the office clientele was involved in any form of class action litigation.

In closing, I would like to pass on to my colleagues in the House an urgent telephone call I received today from the Attorney General of the State of Oregon, Dave Frohnmeyer. Frohnmeyer is an active Republican and former counsel in HEW under Robert Finch. He reminded me today of his strong support for legal services. I am also informed that Oregon's Republican Governor Vic Atiyeh, a strong supporter of the Reagan administration, has personally written to President Reagan to express his opinion that continued funding for legal services is essential to the well being of the truly needy in our State.

• Mrs. CHISHOLM. Mr. Chairman, I rise in opposition to the Mottl amendment. Although, as I understand it, the amendment was drafted to address a longstanding housing discrimination case in Parma, Ohio, I am convinced that its language would severely weaken the Justice Department's ability to enforce the Fair Housing Act anywhere in the Nation.

By preventing the use of Federal funds by the Justice Department to seek the use of federally assisted housing to overcome patterns of racially segregated housing, the amendment would give local governments free rein to continue discriminatory zoning and housing practices.

The Parma situation is certainly not unique. Other localities have been found guilty of geographic racial discrimination; and other localities, voluntarily or under duress, have made use of public housing and other Federal housing programs to allow minority families to live in areas that formerly had only white residents.

Frankly, Mr. Chairman, I am puzzled by this amendment, since its sponsors have also been outspoken critics of school busing which courts have ordered as a result of persistent patterns of housing discrimination. Effective enforcement of the Fair Housing Act—which is threatened by this amendment—helps to eliminate the residential segregation that leads to those busing orders; so I believe that busing opponents, as well as strong fair housing supporters, will want to vote against the Mottl amendment.

• Mr. MAZZOLI. Mr. Chairman, I rise in support of H.R. 4169, the State, Justice, Commerce, Judiciary appropriations for fiscal year 1982. The Appropriations Committee has done an excellent job developing spending levels for the programs that fall under the jurisdiction of this bill.

I want to draw particular attention to the appropriation for the Immigration and Naturalization Service, and to commend the chairman of the subcommittee, the gentleman from Iowa (Mr. SMITH) and his colleagues for their decision to increase the appropriation by approximately \$25 million over the request made by the administration.

This increase is the same as that recommended by my Subcommittee on Immigration, Refugees, and International Law, approved by the full Judiciary Committee, and strongly supported by the full House when it passed H.R. 3462, the fiscal year 1982 Department of Justice authorization bill

We must all be extremely vigilant in our efforts against wasteful Government spending, but any attempts at this point in time to reduce funding for the INS would be penny wise and pound foolish. Both in its role of enforcing the provisions of the Immigra-

tion and Nationality Act and providing service to the public, the INS needs more resources.

The \$387 million appropriated for the INS in this bill will provide funding for 973 positions that the administration had proposed to eliminate. This funding will mean 160 additional Border Patrol positions, and vehicles and new equipment to help them in their important task of patrolling our borders. There is also money for 200 inspectors positions, the people who work at our land, sea, and ports of entry to determine who is and who is not legally admissible to the United States.

The additional funding will provide for 403 additional investigators to assist in apprehending illegal aliens who are in the country. There will also be 200 more adjudicators than proposed by the administration, which will mean more efficient processing of requests for benefits that people are entitled to under our immigration laws.

Finally, the bill before us provides \$1 million for continued development of a meaningful arrival/departure system, which, when in place, will allow the INS to know whether nonimmigrants who come to our country have overstayed the conditions of their admission.

In July the President announced his immigration policy formulated after months of study by a Cabinet-level task force. Among his proposals was a commitment for strengthening enforcement measures of immigration laws. One aspect of this enhanced enforcement program included an increase of \$40 million for INS in fiscal year 1982, an amount of \$15 million above the authorized and appropriated levels of our legislation.

I am pleased that my subcommittee, the full Judiciary Committee, Chairman SMITH's subcommittee, and the full Appropriations Committee anticipated the need for stronger enforcement by increasing the recommended authorization and appropriation levels for the INS.

Again, I want to commend the chairman of the subcommittee and the full Appropriations Committee, as well as other members of their committee for supporting this increase for INS.

• Mr. SAWYER. Mr. Chairman, the appropriation bill, H.R. 4169, currently before the House, provides \$241 million for the Legal Services Corporation and incorporates by reference the terms of H.R. 3480, the LSC authorization bill passed by this body by a vote of 245 to 137. Some question has arisen regarding the compatibility of H.R. 4169 appropriations for LSC and the terms of the reconciliation budget. As my distinguished colleague from Wisconsin, ROBERT KASTENMEIER, so eloquently explained in the RECORD on

July 31, 1981, the reconciliation budget and the proposed appropriations for LSC are consistent.

On June 11, 1981, the House Committee on Appropriations filed its budget allocation totals under section 302(b) of the Budget Act (H. Rept. 97-139). The Appropriations Subcommittee on Commerce, Justice, State, Judiciary assumed \$241 million of its totals for fiscal year 1982 would be for LSC. The budget cannot, therefore, be interpreted as zero-funding the Corporation because funds for the program are included in the totals. Ultimately, however, the conferees of the reconciliation plan, H.R. 3982, decided to extend LSC through the normal route of authorization and appropriation. H.R. 4169 is the LSC appropriations bill that will complete this process in the House.

As the Members prepare to vote on the appropriations for Federal legal services, I would like to share with them the following letter, which brought home to me the mission of LSC and our society's continuing need for this program:

> CHRISTOPHER L. CAMPBELL, Lansing, Mich., June 24, 1981.

Representative Harold Sawyer, Cannon House Office Building, Washington, D.C.

Dear Representative Sawyer: I understand that you were very influential in the recent debates and votes on the reauthorization of the Legal Services Corporation. As a staff lawyer at Legal Aid of Central Michigan, I want to express my appreciation for your activities in support of LSC at what were apparently crucial junctures in the House votes on LSC amendments and the final vote.

My vote for the concept of legal assistance to the poor is cast in the form of six years' employment in work which is often tedious, constantly repetitive, hardly prestigious in the eyes of my peers and colleagues, but crucial to a nation of laws. The real reward comes when a client recognizes, perhaps for the first time ever, that he or she not only has a chance to win in court, but has actually won. A recent client was so prepared to lose in a landlord-tenant dispute, that she did not understand that she had won until I explained the result in the corridor. The ruling was not complex or inconclusive, it was simply (to her) completely unexpected and almost incomprehensible. Too many of my clients have learned the unfortunate lesson that the courts offer no relief for them. It is vitally important that we demonstrate that the courts, our official mechanism for the peaceful resolution of disputes, are available to all citizens.

The work of the LSC cannot be performed by the private bar. The private bar cannot afford at present to offer affordable services to the large number of people who are ineligible for our services but unable to afford lawyers for any but the most pressing mat-

I would hope that you will continue to support the Legal Services Corporation in the Congress and elsewhere. To the extent that your votes suggested some concern about the functions and operations of the LSC and its local grantees, I hope that you will seek further information from LSC in Washington, or from the excellent legal aid

program in your district. Once again, thank you for your important support.

Sincerely,

ies. Vermont Legal Aid expects to serve 9,000 Vermonters during fiscal

CHRIS CAMPBELL.

The access to the legal system provided by LSC allows the poor and elderly to resolve their basic legal disputes fairly and peacefully. I firmly believe that the ability to participate in the court system is essential to acquiring equal justice and to maintaining a healthy society. To this end, I encourage the passage of LSC appropriations provided in H.R. 4169, which are consistent with the reconciliation activities of the House.

• Mr. JEFFORDS. Mr. Chairman, I rise in opposition to the amendment to H.R. 4169 offered by the gentleman from Wisconsin. Adoption of this amendment would leave the Legal Services Corporation bereft of funds, and thus unable to continue with its extremely important and worthwhile function. Equal access to justice is one of the principal underpinnings of our democracy, and we must not compromise our commitment to this noble standard.

The legal services program was first conceived during the Johnson administration, and emerged under the umbrella of the semiprivate LSC in 1974, at which time it had strong bipartisan support and the endorsement of then-President Nixon. The LSC is governed by an 11 member board appointed by the Senate.

Last year, 1.5 million cases were handled by the 323 separate legal aid programs around the country. Legal-aid lawyers have spent the great majority of their time handling routine civil cases, such as divorce work, utility cutoffs, housing, welfare, and medicaid complaints. They work on will drafting and breach of warranty and entitlement benefit cases.

In 1980 alone, more than half a million elderly persons who otherwise would have been denied access to justice were provided with legal assistance through the Federal program. They were represented on a broad spectrum of vital issues, including housing, food assistance, social security, medicare, medicaid, age discrimination in employment, nursing-home regulation, taxes, fuel assistance, and retirement benefits. As a member of the Select Committee on Aging, I have seen how difficult it is for our elderly to cope with these serious problems. some of which are most acute in the Northeast and Midwest, where the winters can be harsh.

Vermont Legal Aid, of which I am one of the original incorporators, has been able to provide low-income Vermonters with invaluable assistance over the years. It operates 6 offices and employs 34 lawyers, including those who work on special projects for the elderly and contracts with the State, 12 paralegals, and 19 secretar-

ies. Vermont Legal Aid expects to serve 9,000 Vermonters during fiscal 1981 in appeals on social security disability and SSI matters, defense of foreclosures of federally insured housing loans, special education and employment rights secured by Federal law, and other cases.

If the LSC does not receive appropriations, half a million elderly people will be denied access to justice. In addition, innumerable other people will be denied legal advice and legal action for their problems that arise from everyday living. They will not be able to get a will drafted, a divorce, a fair deal in their housing and utility use, or a prosecution for a breach of warranty. In short, these people will be denied their basic rights as citizens of the United States. No longer can we say that our Nation has justice for all.

I urge a vote for the defeat of this amendment.

Thank you very much, Mr. Chairman.

• Mr. FRENZEL. Mr. Chairman, H.R. 4169, the Commerce, Justice, State, and Judiciary appropriations bill is described in the House Budget Committee early warning report for the week of July 27, as over the total budget target when mandatory items are fully funded.

Although the bill as a whole is currently equal to the 302(b) target in budget authority, and \$18 million below in outlays, when amounts assumed in the budget resolution, but not yet considered, are added, and mandatory items are fully funded, the bill will be over its target by \$129 million in budget authority and \$101 million in outlays.

In addition, while the bill is below the President's requests for discretionary items by \$5 million in budget authority and \$251 million in outlays now, I believe it will be over the President's requests once the mandatory items are fully funded. Because it has been and continues to be my belief that the spending restraints of the budget resolution must be upheld, I do not see how I can support this bill.

After making an initial courageous step toward fiscal sobriety, the Congress has taken two steps backward with several of the recently passed appropriations bills. The Interior and the Energy appropriations were afflicted with the same flaws. They also gave a surface appearance of conformity to budget authority, while containing hidden obligations for supplemental appropriations for funding the mandatory budget entitlements next spring.

I do not assume that the overspending has been intentional. I know that reasonable people differ on their interpretations of budget ceilings. And this Commerce and Justice bill is less out of line with budget authority than

some of the others. Nevertheless, I feel that, because the probability of overspending does exist, this bill should not be passed, and therefore I shall not vote in support of this bill. • Mr. DERWINSKI. Mr. Chairman, I rise in support of H.R. 4169, State-Justice-Commerce-Judiciary appropria-tions for fiscal year 1982. As a member of the Committee on Foreign Affairs, I am especially interested in the appropriations for those agencies that fall within the purview of that committee-the Department of State, the International Communication Agency (ICA) and the Board for International Broadcasting (BIB), the last named which contains the funding for Radio Free Europe and Radio Liberty.

I support this bill because it provides for funding these very necessary activities of the executive branch but I would prefer to be voting for the full amounts as recommended by the Com-

mittee on Foreign Affairs.

ICA is this Government's principal public diplomacy resource. It operates in real dollar terms with less than half the funding the same programs had in the mid-1960's. It is not adequately staffed or funded.

Radio Free Europe and Radio Liberty provide the only unsensored news to the truth-starved peoples behind the Iron Curtain. Their role has been well described by a former director of the RFE Polish Language Service in these terms:

Without the Western radios in recent years, Soviet dissidents would have been deprived of one of their main communication lines with the broad masses of people. The solidarity of Polish workers was made possible by Western radio, acting as a communications link between strikers in various parts of the country. Without Radio Free Europe, the authorities would have been able to isolate and suppress local strikes before the news spread to the rest of the country. Western radios remain the prime source of information about Polish developments for other countries of the Soviet bloc. They also provide the means of comparison with life outside the bloc necessary to generate dissatisfaction and pressure for

This is not a time to change this Government's programs to disseminate the truth to the world. Through ICA's programs, particularly the Voice of America, and RFE, and RL.

I support these appropriations but they are not enough. In fact, to cut the funding for ICA and BIB is penny

wise and pound-foolish.

• Mr. WALGREN. Mr. Chairman, I want to commend the gentleman from Iowa (Mr. SMITH), and his subcommittee for the excellent work they have done on this bill, and especially for their action with respect to the science and technical research programs of the Department of Commerce, for which \$125.5 million would be appropriated.

The main activity in this category is the National Bureau of Standards which conducts a wide-ranging series of research activities aimed at improving technical measurements and standards and, in more general terms, aims at advancing the Nation's technological base.

I would like to single out one or two specific activities within this program which have been of special interest to the authorizing committee, the Committee on Science and Technology and its Subcommittee on Science, Research and Technology, of which I am privileged to serve as chairman.

The automated manufacturing test facility at the National Bureau of Standards was initiated 2 years ago with the strong support of both the Bureau itself and our committee. The chairman of the Appropriations Subcommittee (Mr. SMITH) will recall that we worked with him and his subcommittee last year on the floor of the House to insure the funding for this project, which will make a most valuable contribution to the advancement of productivity and efficiency in many areas of manufacturing in American industry.

The bill would provide an increase for this project in the amount of \$1.5 million. The administration has asked for an increase of \$3 million which would have permitted the project to reach its full operating potential. So while I commend the committee for granting part of the increase for the automated manufacturing test facility, I regret that it was not found possible

to fund the full increase.

Another item in the category of "Science and Technical Research" is the upgrading of the Bureau of Standard's central computer facility. The need for this has long been evident. My committee is well satisfied that the Bureau is doing a careful and indepth job of analyzing its needs in the data processing area and will make good use of the \$8.7 million in the bill for this purpose. I note that a smaller amount is included in the bill for the equally important computer replacement at the National Technical Information Service.

One particular aspect of the bill is. in my view, regrettable. As the gentlemen from Iowa will recall, last year this bill provided a breakdown by line items of the eight or nine main categories covered by the "Science and Technical Research" heading. This breakdown by line item served to clarify substantially the intended funding levels for all the main activities in this category. It also permitted the discussion and subsequent amendment which the Appropriations Committee was able to agree to with respect to the relative priorities of these programs. Unfortunately the control provided by this breakdown is not included in this year's legislation.

These line items followed the line items of the authorization bill, and

while the Department of Commerce has informally requested certain minor adjustments in this line item structure, I believe that they serve both the House and the Department well in making clear the purposes and distribution of these small but significant research and development programs. I believe we should consider the inclusion of this kind of breakdown in the bill in future years.

My subcommittee recently held 3 days of hearings on the Stevenson-Wydler Technology Innovation Act of 1980. It was clear from hearings that the Department of Commerce is not implementing the act fully. In fact no funds at all were requested by the new administration for implementing several key provisions of the act at the Department of Commerce. In particular, the Centers for Industrial Technology, the Center for the Utilization of Federal Technology, and the Office of Industrial Technology all had a budget request of zero. Members of the Committee on Science and Technology believe it is important to fund these programs because of their potential for improving the national economy, and we have been trying to convince the Appropriations Committee to fund these programs. Unfortunately, this would have required an addition of funds to the bill we are debating, and the Appropriations Committee was not able to add on funds. I urge the committee to reconsider the merits of the programs I have mentioned at the earliest legislative opportunity.

I urge the House to support this bill. As always the gentleman from Iowa has done a thorough and workmanlike job in sorting out the many programs covered in the bill and we owe him, his committee, and staff our thanks for a job well done.

 Mr. COUGHLIN. Mr. Chairman, I rise in support of H.R. 4169 which appropriates funds for the Departments of Commerce, Justice, State, the Judiciary, and related agencies for fiscal year 1982.

I want to take this opportunity to commend the distinguished chairman of the State, Justice, Commerce Appropriations Subcommittee, Mr. SMITH of Iowa, and the distinguished ranking minority member, Mr. O'BRIEN, for their excellent work in developing this bill. In particular I want to congratulate them and the subcommittee for restoring funds to the Justice Department's Drug Enforcement Administration which had been cut back in the the budget request. Of the \$3,255,000 that has been restored in this bill to various DEA programs, \$2,519,000 is for the State and local task force programs. These funds will retain 94 existing positions in the program and prevent the dismantling of 7 of the 20 task forces now in operation.

As a member of the House Select Committee on Narcotics Abuse and Control, I was alarmed at the dramatice upsurge in drug traffic, drug abuse, and drug-related crime reported during committee hearings this summer by law enforcement officials from areas of our country most seriously affected by drug problems. Uniformly these officials were quick to praise the DEA State and local task forces for their important role in combating illegal drug activities.

In Philadelphia, which has become a major target for heroin smuggled from Southwest Asia and is now the Nation's Capital for production of illegal methamphetamines (speed) the DEA State and local task force has made possible a broad, coordinated attack on these problems. By operating across local jurisdictional boundaries in the tristate, multicounty area and by sharing manpower, equipment, information, and financial resources, the Philadelphia task force has been effective in conducting coordinated investigations which have led to major drug prosecutions.

Although local law enforcement is an important element in the war against illegal drug trafficking, it is clear that local officials, acting alone, cannot be expected to combat what is essentially a problem of national and international dimensions. I strongly support the restoration of the DEA State and local task force funds included in H.R. 4169 and urge that this

legislation be passed.

Mr. FIELDS. Mr. Chairman, I rise in support of the amendment of the gentleman from Wisconsin (Mr. Sensenberenner), striking the \$241 million appropriated for the Legal Services Corporation.

Since the creation of the Legal Services Corporation as an indepenent agency in 1974, the stories of abuse and transgression have multiplied. While I am all in favor of providing civil legal assistance to the poor, I am adamantly opposed to the social engineering and political activism being espoused by the Legal Services Corporation. The continued existence of a Federal-level legal service program will only exacerbate this abuse and I feel it is now time for Congress to return the administration of such a program to the States.

The judicial idealogues who, subsidized by taxpayers dollars, are using the Legal Services Corporation as a means to greater political status, should be stopped. Under the guise of protecting the poor, these lawyers have capitalized on this opportunity to use this agency as a forum in which to bring about social and political change. The active participation of legal services' grantees in class action suits against State reapportionment plans, school busing cases, and affirmative action, raises serious questions of

legal propriety. By seeking judicial solution of social and political policy, Legal Services Corporation is usurping the very power of this institution.

Mr. Chairman, I venture to say this abuse runs counter to the intent of congressional mandate. In order for the poor and indigent to receive proper legal counsel, we must terminate the Legal Services Corporation and let the States and local government decide on what legal aid programs are needed. I urge the adoption of this amendment as an important step in restoring the original intent of a legal services program.

Thank yor Mr. Chairman.

Mr. SMITH of Iowa. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. O'BRIEN. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The Clerk will read.

Mr. SMITH of Iowa. Mr. Chairman, I ask unanimous consent that the bill be considered as read through line 8, page 5.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The CHAIRMAN. Are there any points of order against this section of the bill?

Are there any amendments to this portion of the bill? If not, the Clerk will read.

The Clerk read as follows:

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

OPERATIONS, RESEARCH, AND FACILITIES (INCLUDING TRANSFER OF FUNDS)

For necessary expenses of activities authorized by law for the National Oceanic and Atmospheric Administration, including maintenance, operation, and hire of aircraft; 399 commissioned officers on the active list; construction of facilities, including initial equipment; alteration, modernization, and relocation of facilities; and acquisition of land for facilities; \$781,413,000, to remain available until expended, of which so much as may become available during the current fiscal year shall be derived from the Pribilof Islands Fund, and, in addition, \$11,700,000 shall be transferred to this appropriation from the fund entitled "Promote and develop fishery products and research pertaining to American fisheries".

AMENDMENT OFFERED BY MR. BREAUX

Mr. BREAUX. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Breaux: Page 5, line 21, strike out "\$11,700,000" and insert in lieu thereof "\$6,700,000".

Page 5, line 23, insert the following immediately before the period: "Provided, That of the funds appropriated in this paragraph, \$4,010,400 shall be available, for fisheries grants to States, not more than \$27,564,600 shall be available for the Marine Resources Monitoring Assessment Program, not more than \$5,220,000 shall be available for Fisheries Habitat Investigations and not more

than \$2,276,000 shall be available for Environmental Impact Analysis; Provided further, That none of the funds appropriated in this paragraph shall be used for Coastal Zone Management Fisheries Advice or Market News Reports".

Mr. BREAUX. Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the Record.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. BREAUX. Mr. Chairman, I take this time to offer this amendment because I think it is critically important.

The first point that I would make is that my amendment does not increase the total budget and total appropriations, nor does it decrease the total appropriations in this category.

What we are offering here today is a suggestion coming from me as chairman of the Subcommittee on Fish and Wildlife that we feel while we are constrained to follow the budgetary constraints of this very tight fiscal budget, that the money could best be spent in the critical areas that we are suggesting.

What I am saying is that we are recommending an increase in two programs totaling \$6,008,400.

□ 1400

To offset that, and to end up with the same bottom line figure, we are recommending a decrease of the same amount in five other programs that we feel are not critical nor are they essential.

Now, I think the decision that we have to make in 1981 in this fiscal year that we are approaching is not whether a program is nice and we would like to have it, but whether it is a good program and whether we can afford the program. The answer, I think, is that there are some areas where we need to cut.

We have cut \$6 million basically out of five programs.

Let me kind of quickly run through what we are recommending reductions in. We are recommending a reduction in the Market News Report. Do you know what the Market News Report is? It is basically a newsletter. It is basically a newsletter that NMFS sends out. It informs constituents of what is happening in the fishing business. It is nice to have, but I would rather see the money spent somewhere else.

We are recommending elimination of the Coastal Zone Fisheries Advice Service. Do you know what that does? NMFS tells the State fishing agency in a State, a State agency, about fish conditions in their area. That State fishing agency is then supposed to give some advice to the State coastal zone management office, which is supposed to make fishery decisions. Well, they should do that without the Federal Government having to advise some agency in the State, who in turn will then advise another agency within the State. They can do without that. It might be nice to have, but I think the money could be spent better elsewhere.

We are recommending a reduction in the MRMAP program, which is the marine resources monitoring and assessment program, which basically counts fish; but a lot of their fish counting is done within State waters. It is also duplicating efforts that the States are making in these areas. Again, it would be nice to have that program, but the money can simply be better spent in other areas.

Another program that we are recommending a reduction in is the fisheries habitat investigtion. Do you know what that program does? It is basically a monitoring program, an assessment program. It does not produce any more fish. It does not have any enhancement values. It basically monitors and counts fish and presents a status report. Nice to have, and I agree with that, no problem with that; but I think in 1981 it is a program that we can reduce. I think it is one that we have to reduce.

Where do we want to add the money to? We want to add it to some programs that are key, essential programs.

The first program we want to add to is the Saltonstall-Kennedy program. That is one of the basic fish programs in the United States for the fishing industry. Industry comes in and makes proposals on how we can increase commercial fishing in this country and the money is used to fund some of those programs. Even with the additional \$5 million, we would bring the program only up to a level of funding from last year, but it is absolutely essential.

The second area we are asking for an increase is the commercial fisheries research and development program. Even with the increase I am asking for today, we are still talking about it being cut 20-percent less than they had last year; but I say to the members of the Appropriations Committee, our subcommittee lives with this on a day-to-day basis. I am not saying that the Subcommittee on Appropriations does not give it the same intelligent and competent review, but we deal with these constituents every day. As chairman of the subcommittee and with the ranking minority member, the gentleman from New Jersey (Mr. FORSYTHE), we work with these constituent groups on a day-to-day basis. They have indicated to us that they do not like to be cut anywhere, but if they are going to be cut, that they would appreciate having these additional two key programs funded at a level that we are suggesting. They are willing to have these other programs cut to make up the increase that we are suggesting.

So I am saying to the members of the Appropriations Committee that we are not trying to mess up the budget. We are not trying to mess up the appropriations process. We are just trying to offer as a suggestion that we think these moneys can best be spent in another area.

Now, I know most members of the Appropriations Committee will say, "Well, we don't want any amendments. We don't want to mess with it here."

But if we do not mess with it here, I am afraid that it is going to get lost in the shuffle. It will not get the attention that it needs. I think we would be in a much stronger position to accept this amendment and let us go to conference and if we can work it out in conference with the Senate.

Mr. FORSYTHE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, this amendment that my colleague and chairman of the sub-committee, the gentleman from Louisiana (Mr. Breaux) has just introduced I think is a very good amendment.

Mr. Chairman, I rise in strong support of the gentleman's amendment. The amendment accomplishes three things: It increases funding for the Saltonstall-Kennedy Act, the primary fisheries development program in the National Marine Fisheries Service, adds money for the Commercial Fisheries Research and Development Act, a principal source of funds for state commercial fisheries research programs, and makes an equal amount of offsetting cuts in other programs.

The Saltonstall-Kennedy Act is a prime example of a program which should be maintained at an adequate funding level. Pursuant to this act, the Secretary of Commerce receives 30 percent of the revenues derived from the taxes on certain imported fishery items. These revenues are used to assist the development of the U.S. fishing industry. H.R. 4169 provides \$15 million for this program. The fiscal year 1981 funding level was \$20 million and I believe that this level of appropriations must be maintained in fiscal year 1982.

It is essential that this program be maintained at the \$20 million level because it is the principal program for the development of the U.S. fishing industry-and let there be no mistake about it, full development of this industry is in the best interest of the United States. Full development of the U.S. fishing industry would, by 1990, increase this Nation's gross national product by \$1 billion, increase our exports by \$1 billion, and add 43,000 new jobs to the economy. Equally important, full development of the industry would reduce the U.S. fisheries trade deficit of \$2.7 billion annually by 50 percent by 1990. This is an extremely important point because the current U.S. fisheries trade deficit is approximately 10 percent of the net U.S. deficit. Improving our fisheries trade deficit would reduce one of the factors which fuels our current inflationary spiral.

The purpose of the Saltonstall-Kennedy program is to provide seed money to assist the industry in developing new markets, in researching and testing new harvesting and processing technologies, and in developing and test marketing new product forms. The question which must be addressed, however, is whether these activities should be performed by the industry without Federal assistance. The answer is that the U.S. fishing industry in general lacks the financial and research capability to undertake the developmental activities which are necessary to insure that our country receives the full benefits of an expanded fishing industry. The average processing plant, for example, employs only 21 people and, according to the General Accounting Office, 42 percent of the processing plants have gross annual sales under \$100,000. In fact. only 17 percent of U.S. fish processing plants have gross annual sales of more than \$1 million. The U.S. fish processing industry is largely composed of small businessmen who have a limited ability to generate research and expansion capital. Similarly, the average fisherman owns a single vessel and lacks the capital necessary to undertake major research and market development programs. A recent report by the General Accounting Office which analyzed the ability of the U.S. fishing industry to generate research and expansion capital concluded that-

Lending institutions often perceive the development of non-traditional fisheries as a high risk endeavor. As a result, financing can be difficult to obtain.* * Nearly all lenders we interviewed thought those intervested in non-traditional fisheries development would have trouble getting funds.

The substantial research and capital investment required to develop our industry will not come from the many businessmen who together comprise the U.S. fishing industry. It is for this reason that these independent entrepreneurs have looked to the Federal Government for matching which provide the seed capital for the full development of the U.S. fishing industry-development which means additional jobs, a reduction in our balance of payments deficit, and an increase in our gross national productand I point out again that these funds are not derived from taxes levied on the U.S. taxpayer, but from duties collected under the customs laws.

The next area in which the gentleman's amendment changes H.R. 4169 is to increase the funding for the Commercial Fisheries Research and Development Act from \$2.9 million to \$4,010,400. This act provides matching grants to the States which are used to conduct research on, and to manage, fisheries. Forty-six percent of these funds are used directly for research related to the implementation of the Federal Fishery Conservation and Management Act. A substantial percentage of the remaining funds are used indirectly for this purpose. If these moneys were eliminated, it would be impossible for the Federal Government to implement the FCMA. In fact, many State fishery programs would be severely crippled. This act provides an average of 37 percent of the total marine fisheries budget of each State and an average of 48 percent of the marine fisheries staffs of the States.

The Commercial Fisheries Research and Development Act has a proud history of accomplishment, and continuation of this program will provide substantial benefits to the Nation. The programs established by this act have provided research laboratories and fish culture facilities that have had lasting benefits in enhancing commercial fisheries. The act has enabled the States and the Federal Government to secure needed information to better manage important traditional commercial fisheries, and it has provided funds to permit increased utilization of underdeveloped resources.

Mr. Chairman, both the Saltonstall-Kennedy program and the Commercial Fisheries Research and Development Act are vital to the management and conservation of our fisheries resources and to the development of our U.S. fishing industry. Substantial economic benefits will flow from adequate conservation of our resources and from the full development of our industry. We are not asking for a subsidy, we are asking for matching funds to provide seed money for our severely undercapitalized fishing industry.

Mr. Chairman, I would like to note for the Members of this House that the amendment offered by the gentleman does not simply propose an increase in funding. Our amendment provides for an equal amount of offsetting reductions in the budget of the National Marine Fisheries Service. These reductions, which affect the marine resources monitoring and assessment program, fisheries habitat investigations, and the Market News Report, were the official recommendations of our subcommittee to the Budget Committee. The decreases reduce funding for programs which duplicate existing State programs and streamline certain other programs. Mr. Chairman, we are not asking to simply increase the appropriations level. Rather, we are asking to reorder the priorities in the bill to more accurately reflect the needs of the fishing industry and the priorities established by the authorizing committee. I give in the United States and in the world this amendment my strongest endorsement and urge its immediate adoption.

Mr. SMITH of Iowa. Mr. Chairman, move to strike the last word.

I am opposed to the amendment.

With regard to the Saltonstall-Kennedy program, the administration asked for \$10 million. We gave them \$15 million because the authorizing committee made an argument in favor of it; so we bent over backward to be at their level. What they are asking to do is make it at about last year's level.

I point out that many, many good programs in this budget are not going to get last year's level of appropriations, no matter how good those pro-

With regard to commercial fisheries R. & D., we put in \$2.9 million. The Breaux amendment would make it \$4 million. The administration wanted zero for that program and they have not changed their request, as far as I

Now, we just bent over backward to comply with all the requests that we possibly could from the authorizing committee; but after all, there is a slight variation here. The authorizing committee, of course, is very friendly to the commercial fishing trade. That is understandable. They are important, but on the other hand, ordinary sportsmen are not in the commercial fishing business and would like to have some information, too. This information they are talking about denying by this amendment not only is available to the commercial fisheries, it is the kind of information we are told that is used by sportscasters and others from time to time and in sports magazines, so that noncommercial fishermen have this information and know where the schools of fish are.

So what the amendment would do is to take every last drop and give it to the commercial fishermen. Here we have this good information but we would not make is available to anybody other than commercial fishermen.

The other thing is that this amendment would cut marine resources monitoring and assessment program by \$5 million. Well, it is said that the States can count fish; but you know something, the fish do not know where the State line is. I do not know how you are going to educate them to know where the State line is.

Mr. BREAUX. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Louisiana.

Mr. BREAUX. With regard to the distinguished chairman about the Market News Survey, of which the subcommittee is authorizing \$640,000, that is not information that is helpful to sports fishermen. The Market News Survey tells commercial fishermen the price at which the fish are selling for and where those markets are.

Right now the Government is giving that to the commercial fishing industries free of charge. We are merely suggesting if it is that valuable, the commercial fishing industry is more than willing to pay for it.

Mr. SMITH of Iowa. It also tells where the schools of fish are.

Mr. BREAUX. It does not. It merely quotes prices in commercial transactions, where the markets are, where they are being bought and where they are being sold, strictly information good for commercial fishermen.

Mr. SMITH of Iowa. As you know, in the Florida market there are small fishermen not considered commercial fishermen. They have small catches. They go to wholesale markets and sell their fish. They get information, too.

I think we bent over backward to go along with the authorizing committee. We did 98 percent of what they requested.

I would hope the gentleman would withdraw the amendment.

Mr. O'BRIEN. Mr. Chairman, I rise in reluctant opposition to the amendment, not necessarily on its merits.

I would like first to suggest that it seems to me appropriate that we have some comments from the administrator of the agency with respect to these changes, even though they seem not to be necessarily out of line.

I would like to point out to my friend, the sponsor of this amendment, that he is not alone in the situation confronting him here. I have an amendment of my own, which I am holding back until the conference.

I believe in the integrity of our bill. but I do not necessarily question the integrity of the gentleman's amendment. I would be very willing to be a voice in favor of it in that conference, but I would like to see us get through the House with the bill in its present shape and suggest that the amend-ment be added in the Senate when this bill is taken to the other body.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. BREAUX).

The amendment was rejected.

The CHAIRMAN. The Clerk will

Mr. SMITH of Iowa. Mr. Chairman, I ask unanimous consent that the bill be considered as read through page 13.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was not objection.

The CHAIRMAN. Are there any points of order to that portion of the

The Clerk will read.

The Clerk read as follows:

SECURITIES AND EXCHANGE COMMISSION SALARIES AND EXPENSES

For necessary expenses for the Securities and Exchange Commission, including services as authorized by 5 U.S.C. 3109, and not to exceed \$60,000, for official reception and representation expenses, \$81,706,000: Provided, That no part of this appropriation shall be available for moving any of the offices of the Securities and Exchange Commission in the District of Columbia from their present locations.

AMENDMENT OFFERED BY MR. FARY

Mr. FARY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Fary: Page 14, line 6, strike out the colon and all that follows through and including line 9 and insert in lieu therof a period.

Mr. FARY. Mr. Chairman, the amendment I offer relates to the long-standing need for consolidation of the Securities and Exchange Commission headquarters into one building in the Washington, D.C., area. At the outset, I would like to point out that my amendment simply deletes a prohibition contained in the bill on the use of appropriated funds during fiscal year 1982 by the Securities and Exchange Commission for moving from their present locations in Washington, D.C.

While technically the language seek to delete in the bill, which is found on page 14, line 6 through 9, reads as follows: "No part of this appropriation shall be available for moving any of the offices of the Securities and Exchange Commission in the District of Columbia from their present locations," could be defined as a limitation on the use of funds in an appropriations bill, I feel the language in fact negates the action of the authorizing committee; namely, the House Committee on Public Works and Transportation, charged with the jurisdiction concerning the housing of Federal agencies, which heretofore has thoroughly examined the housing needs of the SEC and approved the consolidation in Washington, D.C., pursuant to existing law on August 16,

For the benefit of all Members, I would like to point out that the management and procurement of office space for Federal Government activities are governed by the Federal Property and Administrative Services Act of 1949, as amended, and the Public Buildings Act of 1959, as amended. The primary purpose for enactment of those laws was to centralize in a single Government agency responsibility for the housekeeping functions of the executive branch—procurement, management of real property, records management, and other functions. The rationale behind establishing the General Services Administration in 1949 as the central service agency for the Government is still valid.

History has shown economies are realized in vesting one agency with responsibility for housekeeping functions, such as building acquisition and the leasing of office space. For example, recently the General Accounting Office, in response to a request from our committee, completed a report concerning a lease the Federal Communications Commission proposed to enter into utilizing what they perceived to be independent leasing authority granted the Commission by language in an appropriations bill. The GAO concluded that, due to the lack of expertise by the FCC in the field of leasing, the lease the FCC proposed to enter into over a 20-year period would have cost the Government approximately double the cost for space which GSA would normally acquire in the FCC's behalf. Our committee immediately held hearings on the matter, which resulted in the FCC not signing the extremely unfavorable lease in the Government's behalf.

Traditionally, Congress has been concerned about the cost of providing lease space to house Government agencies and, as such, has placed limitations on GSA's leasing authority. The Public Buildings Act of 1959, as amended, requires that a GSA request for space be approved by the congressional Committees on Public Works for any lease in excess of \$500,000 annually prior to the appropriations of funds to secure such space.

With respect to the need for consolidation of the SEC, the acquisition of suitable space for a new headquarters has thus far required over 11 years of effort on the part of the Congress, the SEC, and GSA. After in-depth hearings, the House Committee on Public Works and Transportation approved the acquisition by lease of 320,000 occupiable square feet at an annual rental of up to \$20 per square foot to house a consolidation of operations for the Securities and Exchange Commission in Washington, D.C. The approved prospectus resulted in a solicitation by GSA which has resulted, finally, in the lease award in mid-August for a building called Judiciary Square, located at Fifth and D Streets NW. The cost of the space is extremely favorable to the Government, precisely \$18.40 per square foot, or \$5.7 million annually.

Currently, the SEC activities in the Washington, D.C., area are scattered between four locations. The Commission will pay \$2.7 million in rent for its four office buildings during fiscal year 1981. The language in the bill which I seek to delete would mandate that the Commission remain in these locations supposedly at the same rental rates. However, to support such a dormant housing situation for the SEC will actually cost the American taxpayers an additional \$2.5 million over the \$5.7 million annual cost associated with consolidation.

The savings I speak of have been previously identified in various reports; however, most recently brought to light by a House Appropriations investigative staff report, as well as information submitted to the committee from the General Services Administration.

Specifically, the Appropriations Committee report states:

Along with many Federal agencies, SEC has a justifiable need for space which provides a safe, accessible place to work. The investigating staff believes that a consolidation of SEC headquarters office locations into one suitable location could cut SEC operating costs and increase the agency's productivity.

Further the report states that studies commissioned by SEC indicate that a consolidation of headquarters facilities would result in direct annual savings of \$400,000 and reduce SEC's indirect operating costs of over \$3.5 million annually by cutting turnover and increasing the staff's productivity. According to the studies, splintering SEC's headquarters operations among several locations in Washington, D.C., duplicates facilities and equipment, increases overtime and guard services. lowers employee morale, and increases the turnover of the professional and technical staff.

Further, lease costs for the SEC in their current space will increase from \$2.7 million annually to \$3.8 million annually. As such, fiscal year 1982 direct costs—\$3.8 million—and indirect costs—\$3.9 million—associated with housing and SEC in a status quo situation totals \$7.7 million, while costs for fiscal year 1982 associated with consolidation of SEC headquarters totals \$5.7 million.

To state it quite simply, to require the SEC to remain in a status quo housing situation will cost the taxpayers an additional \$2.4 million annually.

Mr. Chairman, unfortunately when the language was inserted in the appropriations bill concerning the SEC, such facts regarding lease costs were not available for review. Thus, I am pleased to bring these new facts to the attention of the Congress.

I feel it is important to comment on language in the Appropriations Committee report accompanying this bill which questions the need for SEC to be located in the Washington, D.C. area due to the excessive costs for lease space. In this regard, the House Appropriations investigating staff found the delineated area for which space was surveyed to house SEC activities by GSA contained office space which is generally less costly than some areas in Washington, D.C.

Further, the area delineated within the District of Columbia currently under consideration for consolidation of SEC activities was developed in direct response to Executive Order 12072, the Intergovernmental Cooperation Act of 1968, current HUD policies regarding housing and transportation, and with the concurrence of the National Capital Planning Commission and city officials, as well as the Securities and Exchange Commission, which testified to its need for collocation within the District.

To conclude, Mr. Chairman, the consolidation of the SEC in Washington, D.C., has the strong support of the House Committee on Energy and Commerce and the Office of Management and Budget under this and the previadministration. Again, studies have indicated that a consolidation of the SEC headquarters facilities in Washington would result in savings of \$2.4 million annually.

Executive data are available which demonstrates that authorizing, indeed encouraging, the Commission to consolidate its headquarters will be both cost effective and promote the best interest of this sphere of our Government and the public whom it serves. I do not wish to belabor the case to be made for the SEC, as I believe it is overwhelmingly favorable on its face. There is a recognized need for this move, a suitable building has been obtained by GSA on very favorable terms, and the public will benefit greatly.

I urge my colleagues to support this amendment and thus resolve a problem which has been growing for many

□ 1415

I yield back the balance of my time. Mr. SMITH of Iowa. I move to strike the requisite number of words.

I vigorously oppose this amendment. I want to point out that with regard to the SEC, there has been no question or no difference of opinion on the fact that they need a better building or, let us say, a building where they can get all of their operation together. We are all in agreement on that.

When they started seeking space, we asked them how much space they needed and what they were going to pay for it. These are proper appropria-

tions matters.

We found that they had limited, in making their request for a new building, the area in which GSA could look for a space to within a few blocks. This is similar to having a sole-source bid. GSA did not go along with that. They expanded the area in which they looked for space. But we are not even questioning the area now. That is not a good practice at all, because that is what escalates prices.

We have prices for space escalating like you would not believe in the downtown Washington, D.C., area at the present time. We do not think that they ought to be limiting areas in which they can lease space or acquire

a building.

In addition to that, we became even more conscious that there might be something wrong here when it seemed that some of the SEC staff members and perhaps some on the Hill were anxious to have this lease approved before GSA had even secured the lease and not had any opportunity to review it. Well, this is a highly inappropriate way to operate. We want to see this lease. We want to know how much it is going to cost, how many square feet they are going to have per employee, and these kinds of things that are usually appropriations matters.

I do not think there is going to be any problem with this lease. At the time we wrote the bill, and as a matter of fact, until recently, the lease had not even been signed and GSA had not had time to approve it. I understand that they have now signed a lease, but we have not gotten the details on it, and I just say that this is the kind of thing that should not go on. It is no wonder we have scandals in the GSA when people want to approve leases before the appropriate committees have even had an opportunity to look at the lease, and to look to see how many square feet they are going to have per employee.

Now, this is not going to be a 1-year lease. Although the SEC has told us they are not going to be in the space within the next year, and thus the provision would not limit them, the fact is it will be a long-term lease. If we, in advance, approve this lease, we will feel obligated to approve the same amount of money that they ask every year for the next 10 or 15 years.

This is the way to have a scandal. If you want to participate in the kinds of scandals we have had in GSA, just participate in this bypass of the usual process in the House, where we have the Appropriations Committee look at these things before we approve the amount that is required for a lease.

I am opposed to the amendment. The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. FARY).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. FARY. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

The CHAIRMAN. The Clerk will

Mr. SMITH of Iowa. Mr. Chairman, ask unanimous consent that the bill be considered as read through line 13, page 17.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The CHAIRMAN. Are there any points of order against the section referred to?

The Clerk will read.

The Clerk read as follows: LEGAL ACTIVITIES

SALARIES AND EXPENSES, GENERAL LEGAL ACTIVITIES

For expenses necessary for the legal activities of the Department of Justice, not otherwise provided for; and not to exceed \$20,000 for expenses of collecting evidence, to be expended under the direction of the Attorney General and accounted for solely on his certificate; \$125,896,000, including rent of private or Government-owned space in the District of Columbia.

AMENDMENT OFFERED BY MR. MOTTL

Mr. MOTTL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Mottl: Page 17, line 22, strike out the period and insert in lieu thereof the following: ": Provided, That none of the funds appropriated by this title may be used to require, request, or recommend, in connection with any cause of action that is or may be brought for a violation of the Fair Housing Act of 1968, that a State or a unit of local government make available, or permit to be made available, housing with respect to which Federal financial assistance is provided under the United States Housing Act of 1937, section 235 or 236 of the National Housing Act, section 101 of the Housing and Urban Development Act of 1965, section 202 of the Housing Act of 1959, or title V of the Housing Act of 1949."

Mr. MOTTL. Mr. Chairman, I am offering this amendment on behalf of myself and my cosponsor of the amendment, the gentleman from Ohio (Mr. ASHBROOK).

Mr. Chairman, this amendment is intended to achieve one simple purpose. It is intended to prevent the Justice Department from forcing subsidized housing on unwilling communities under the pretext of enforcing the Fair Housing Act.

What we have seen in my own city of Parma, Ohio, is a one-two punch against local government by the Justice Department and the Federal judi-

The Justice Department filed suit against Parma in 1973, alleging racial discrimination in local housing practices. A Federal district judge found the city guilty in 1980.

But what has followed since is mind boggling in its implications for local control of zoning and housing. The district judge has sought to appoint a special master to virtually take dictatorial control of housing policy in Parma. And most outrageous of all, the judge has actually ordered Parma to have government-subsidized hous-ing built, to the tune of 133 units per vear.

The so-called remedy for the alleged misdeeds of a few city officials is ridiculous, unreasonable, and arbitrary.

It is one thing to enjoin or punish public officials because of discrimination, and strictly enforce that remedy.

It is totally different to use alleged racial discrimination by officials as a basis for destroying the housing policies supported by local citizens to assure that a community is attractive, high in service, low in density, and stable in property values. These are the normal concerns of any homeowner. These concerns apparently mean nothing to Justice Department lawyers and power-crazed judges.

Parma is a proud, middle-class city full of people who have worked and saved all their lives to be able to live in a nice neighborhood in a safe, decent, and well-maintained city. All they ask of their neighbors is that, whatever their color, they carry their fair burdens of Parma citizenship. Simply forcing subsidized, low-income housing projects into a city runs counter to everything we are taught in America about working and struggling to get abead, and about the role of local people in deciding what kind of community they wish to have.

This amendment would stop this kind of Washington meddling. It would bar the Justice Department from requiring or recommending that a local government be forced to authorize federally subsidized housing in connection with a Fair Housing Act lawsuit.

I believe the mood of the country is strongly opposed to a Federal big brother in Washington and in the Federal courts looking over the shoulders of States and cities as they carry out their traditional functions. This amendment helps to draw the line and take a stand against ever-growing Federal interference in local affairs.

There are Members of this fine body who at one time opposed banning court-ordered busing, but who later changed their minds when busing came to their districts. This could very well be the same type of issue. Parma is the first community in America to fall victim to this intervention of the Justice Department on local housing jurisdiction. If you do not support this amendment, your constituents could be next to fall prey to the Justice Department.

The crucial issue is whether a city through its designated elected mayor and city council and its people will determine the local housing and zoning patterns, or will the social scientists in Washington and the Federal judiciary usurp this function. If you believe in local control of zoning and housing, you will enthusiastically support this amendment.

Mr. ASHBROOK. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in strong support of this amendment which I offered along with my distinguished colleague from Ohio, Congressman Mottl. If we are to fulfill our obligation to the American people to get the Federal Government off of their backs, it is imperative that we adopt this amendment. A vote in favor of the

Mottl amendment is a vote to allow our municipalities to make their own decisions with regard to subsidized housing.

Congressman Mottl cites perhaps one of the most blatant examples of Justice Department meddling in the housing area. He cites the chaos caused by Federal interference in his own hometown of Parma. I am very familiar with the Parma case as that city lies not far from my own congressional district. The Parma case should be studied by all of my colleagues who are concerned about the erosion of local control of the decisionmaking process. It is a frightening example.

In the Parma case, we are not just talking about bureaucratic overreach. We are talking about an obvious case of bureaucratic/judicial tyranny. In 1973, the U.S. Department of Justice filed a suit against the city of Parma, charging that the city was practicing racial discrimination in its housing policy, citing Parma's refusal to build subsidized housing. In 1980, U.S. District Judge Frank J. Battisti found the city guilty and ordered it to build new, subsidized housing at the rate of 133 units per year.

Those of my colleagues who are familiar with some of the troubles experienced by the Greater Cleveland area will recognize the name of Judge Battisti. He is the same Federal judge who has taken over the Cleveland schools only 2 weeks ago jailing the president and treasurer of the elected school board for refusing to dip into the already bare coffers of the school fund to pay for salaries for his appointed desegregation officials. As in the case of the school system, this tyrannical Federal jurist has appoint, sought to or should I say annoint, a special master empowered by the court to control the creation of public housing in the city of Parma.

President Reagan and a great many other elected Federal officials have pledged to get the Government in Washington off of the backs of the States and municipalities. We have created block grants for that reason. We have eliminated Federal programs and regulations for that reason. The Mottl amendment is consistent with this pledge. By adopting this amendment, we will be prohibiting the Justice Department from using the courts to force an unwilling community to build subsidized housing against its will.

The Parma case is not an isolated example. Each of us has been told of the problems associated with forced subsidized housing in our communities. In fact, I will discuss one such instance of Justice Department interference during consideration of another amendment I intend to offer later in this debate.

Mr. Chairman, I know that detractors of this amendment will intimate

that opposition to forced subsidized housing is racially inspired. We often hear that same, tired argument when we debate the issue forced busing. The argument holds no water. It is not a racial issue. It is an issue of local control. We are not suggesting that the Fair Housing Act be gutted to deprive the poor of affordable housing. We are simply trying to return the decisionmaking authority to the cities where it belongs. Defeat of the Mottl amendment will be a signal to the social engineers in the Justice Department and the liberal activist judges on the Federal bench that they may proceed to continue their takeover of the local decisionmaking process.

I realize that there are many Federal officials who believe in the concept of local control and I know that there are many Federal judges who would not even consider using the dictatorial tactics of our Judge Battisti but I can assure my colleagues that if we defeat this amendment, the Judge Battistis in our Federal courts will take our vote to mean that they can continue to usurp the authority of the elected officials of our communities. And the lawyer/activists in our Government will do the same.

Mr. Chairman, I would guess that our liberal friends in government and in the media will scream bloody murder at this amendment. That, I would expect. But I would like to ask them this: Why is this appropriation bill so controversial? Why do my colleagues find it so necessary to offer amendments? The Collins amendment which would prohibit the Justice Department from shoving forced racial busing down the throats of our communities. The Sensenbrenner amendment which would eliminate funding for the social activists in the Legal Services Corporation. The amendment which I intend to offer later which would prohibit the Justice Department from seeking to overturn local elections.

Obviously, there is a probem here. It all comes down to this question: Do we want the taxpayers and their elected local officials to make the decisions or do we want the Federal Government and the Federal judges to make those decisions? From this Member's perspective, the anwer is simple.

We have experimented with social activism in the Federal Government and it has been a miserable failure. Our Nation has survived for more than 200 years, most of them without the help of Justice Department lawsuits. By allowing unelected Federal officials to trample over local government entities, we are making a serious error. It is time to correct that error.

I urge adoption of the amendment.
Mr. SMITH of Iowa. Mr. Chairman,
I move to strike the last word, and I
am opposed to the amendment.

I do not know a lot about this case. I understand there is this case in Ohio in the district court. I believe it is the district court that has rendered this decision. The case is currently in the appeals process. I do know that ordinarily we do not interfere with the judicial process. On that basis I would be opposed to the gentlemen's amendment regardless of what the specific ruling of the district court was. I ask that the amendment be defeated.

Mr. EDWARDS of California. Mr. Chairman, I move to strike the requi-

site number of words.

Mr. Chairman, I would like to add a little light to this amendment and

urge that it be defeated.

It is really a very bad amendment. With all due respect to the gentleman from Ohio (Mr. MOTTL) I think he is trying to resolve a local problem with a very important amendment that goes a long way to do away with the

1968 Fair Housing Act.

Both the gentleman from Ohio (Mr. MOTTL), and my good friend, the gentleman from Ohio (Mr. ASHBROOK), are strong opponents of busing. They do not like busing, and they have constitutional amendments that they have introduced, and so forth. But they forget apparently that busing is result of segregated housing. which causes segregated schools. The best way to get rid of segregated housing and, therefore, segregated schools, is to have integrated neighborhoods. It is something that we all want in America, where Americans of all colors and religions can live comfortably and at peace with each other in integrated neighborhoods.

Now, this amendment, if it is apwill encourage segregated proved. housing. A local housing authority or city can discriminate against minorities with absolute impunity, because the Federal Government, through its enforcing agent, the Attorney General, would be prohibited from enforcing

the law.

There is Federal money to assist low-income people in providing housing. All Americans are entitled to have somewhere decent to live. But the minority poor could be discriminated against in this federally assisted housing and the Attorney General of the United States could do nothing about it by this amendment.

I think it is a very bad amendment, Mr. Chairman, and I urge that it be

defeated.

Mr. MOTTL. Mr. Chairman, will the

gentleman yield?
Mr. EDWARDS of California. I yield to my friend, the gentleman from

Mr. MOTTL. I certainly appreciate the gentleman yielding.

Let me set the record straight.

□ 1430

The issue here this afternoon that we are debating is, who controls local

housing and zoning? Is it the dulyelected officials in the community, in the city or village, or is it the social scientists in Washington or the Federal judiciary?

We have proper remedies for those who violate the Fair Housing Act. We can either fine those people or put them in jail. I deplore discrimination just like my colleague from California, but this remedy of forcing a community to have low-cost subsidized housing when it does not take HUD funds in the first place or it does not choose to have low-cost subsidized housing is repugnant to all local government advocates throughout the United States.

For these reasons I submit that we should support my amendment here this afternoon to reaffirm our belief in local control over housing and zoning.

Mr. O'BRIEN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the

amendment.

Mr. Chairman, I can understand how this amendment deals with the problem faced by the two gentlemen, our friends from Ohio. Candidly, I do not really know what else it does. I believe an amendment of this weighty import really ought to have a hearing before the committee. It might well be that we would all support this, but at this stage of the game, as I read it, I think the implications are really unknown to me, and I would hesitate to support it on that basis.

The CHAIRMAN. The question is on the amendment offered by the gentle-

man from Ohio (Mr. MOTTL).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. ASHBROOK. Mr. Chairman, I demand a recorded vote, and pending that. I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Evidently a quorum is not

present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The committee will resume its busi-

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Ohio (Mr. ASHBROOK) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were-ayes 188, noes 202, not voting 43, as follows:

Messrs. WIRTH, RICHMOND, PER-KINS, ALEXANDER, DERRICK, ZE-FERETTI, and COURTER, and Mrs. ROUKEMA changed their votes from 'aye" to "no."

WOLF, SAWYER. Messrs. LEWIS changed their votes from "no" to "ave."

So the amendment was rejected. The result of the vote was announced as above recorded.

□ 1500

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SALARIES AND EXPENSES, ANTITRUST DIVISION

For expenses necessary for the enforcement of antitrust, consumer protection and kindred laws, \$45,000,000.

Mr. PORTER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to speak for a program that has successfuly ad-

dressed one of the festering social ills besetting our Nation—the interconnected plagues of drug addiction and drug related crime.

Treatment Alternatives to Street Crime-or TASC, Inc.-was originated and funded by the Law Enforcement Assistance Administration (LEAA) in previous years. It is a program that has provided alternatives to prosecution, to pretrial detention, or to posttrial incarceration. Operated through State and local governments, the program identifies and places into treatment the drug and alcohol abusing of-

TASC has had a significant favorable impact on the recidivism rate of those who have participated in the programs. This measure of reduced tendencies to continue criminal behavior is the single most valuable yardstick of a crime program's success with offenders. So here is one program that has performed as it was intended toone that has given the people their money's worth in a critical area of social responsibility.

LEAA Federal funding will be discontinued in the years ahead, but I have no doubt that TASC will be a program that many of the States will

choose to pick up.

In the meantime, I have joined with my colleagues on the Appropriations Committee in voting for a \$4 million appropriation to fund this program through the transition from being federally directed to State guaranteed. The intention of the committee is to continue the program through fiscal year 1982 and provide the States with the time to consider legislation which would fund the program completely from State resources in future years.

Mr. Chairman, the dramatic transition in many areas of policy from National to State responsibility will require some enlightened accommoda-

tions and some flexibility.

The States will prune the unsuccessful and inappropriate programs while good ones like TASC will flourish under State funding. My State of Illinois, expects to take over the funding of this program in fiscal year 1983. I urge my colleagues to join the Appropriations Committee in supporting the funding for TASC in this final year. Let us not allow this very widely beneficial program to become a casualty because it fell through the cracks between fiscal timetables.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. PORTER. I yield to the gentle-

man from Illinois. Mr. McCLORY. Mr. Chairman, I thank the gentleman for yielding. want to concur in the remarks of the gentleman from Illinois (Mr. PORTER) in support of this program and attest to its effectiveness. It certainly is a program that we should appropriately fund and it should be continued.

Mr. Chairman, the program known as, TASC, Inc.—treatment alternatives to street crimes-is one of the more successful programs originated by the LEAA.

Under the projected fiscal year 1982 budget, it is possible that funds will be provided to keep this program operating. In addition, it is expected that the State of Illinois will take over the actual funding for this program fiscal year 1983. However, during should this program become a casualty of budget cuts in the meantime, it is unlikely that Illinois would be able to provide the necessary funding to restructure this ongoing program.

As the LEAA is phased out and money already in the pipeline is returned, I hope that high priority consideration to providing funds to TASC. Inc., to insure that this program will not have to close its doors before the time when it begins receiving full funding from the State of Illinois.

Only transitional funds are volved-and not appropriations which would have to be renewed in any suc-

ceeding year.

This valuable program has contributed substantially to reducing drug related crimes by providing an alternative to incarceration for addicted offenders.

As noted on pages 38 and 39 of the committee report the funds to accomplish the continuation of TASC should be available under this bill.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

IMMIGRATION AND NATURALIZATION SERVICE SALARIES AND EXPENSES

For expenses, not otherwise provided for, necessary for the administration and en-forcement of the laws relating to immigration, naturalization, and alien registration. including not to exceed \$50,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General and accounted for solely on his certificate; purchase for policetype use (not to exceed five hundred ten, of which four hundred thirty shall be for replacement only) and hire of passenger motor vehicles; acquisition, lease. mainte-nance and operation of aircraft; and research related to immigration enforcement; \$387,136,000, of which not to exceed \$400,000 shall remain available for such research until expended: Provided, That none of the funds available to the Immigration and Naturalization Service shall be available for administrative expenses to pay any employee overtime pay in an amount in excess of \$20,000, except in such instances when the Commissioner makes a determination that this restriction is impossible to implement

AMENDMENT OFFERED BY MR. FASCELL Mr. FASCELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FASCELL: Page 20, line 24, immediately before the period, insert the following; "Provided further, That none of the funds made available by this paragraph may be expended by the Immigration and Naturalization Service for the processing or detention of any entrant, applicant for political asylum or refugee status, or other alien, at the facility known as Krome North if more than 525 aliens are being detained there or at any detention center for aliens awaiting exclusion, deportation, or resettlement which is in Dade or Monroe County, Florida, and which is not being used as such on the date of enactment of this Act."

Mr. FASCELL. Mr. Chairman, this a simple amendment. It attempts to deal with the problem of overcrowding that we have in one of the detention centers down in south Florida. The actual population which it will withstand properly from a humanitarian, sanitary, and security standpoint is 525 people. Unfortunately we have had to put a lot more people than that in there.

Because of conditions, there have been continuing problems at the camp. But the INS is moving in the right direction. They are trying to get people in other places which are more habitable and secure. This amendment puts a cap on the number of people allowed in that camp so it will be a guideline for INS to keep striving to do what they are trying to do.

□ 1515

I would hope my colleagues would go along with this, and that the Committee would not have to oppose it.

Mr. SMITH of Iowa. Mr. Chairman, I move to strike the last word.

Mr. Chairman, as I understand it, these entrants are detained, and it is a real problem.

To start with, they have to be detained long enough to go through a health examination and to find out a number of things about them. It is a very real problem. Nobody denies that. What to do about it, I do not know.

I understand that if they cannot be detained in Florida where they are entering the country illegally, INS would have to immediately put them on an airplane, or some other form of transportation, to transport them to another place before they had an opportunity to detain them.

I understand the INS is working on this. I do not know if this amendment is the answer or not. I still stand by what I originally said. I think this is a good bill the way it is, and I do not want to be in a position of accepting amendments, but I am certainly in sympathy with the problem they have there. I will abide by whatever a voice vote indicates on this.

Mr. O'BRIEN. Mr. Chairman, I move to strike the requisite number of words

I would like to address myself to the gentleman from Florida for a moment. I have two questions. First, is this generally an antiriot provision? Second, what is the significance of the last clause which begins "and which is not being used * * * "?

Would the gentleman explain? Mr. FASCELL. Yes, I would be

happy to

The problem is not just security. The problem is that the place is not fit for human habitation, notwithstanding the fact that efforts have been made to bring it up to standards. I am talking about living conditions, sanitary conditions. This is an old missile site on the edge of the Everglades. And it just never was right to start with. But they were stuck. They had to do something. So they just started pouring people in there. The place is designed, maybe now, for about 525 people, and they have had 1,500, or more people in the camp at one time. So that is one problem.

The other problem is, there are six more missile sites in south Florida and other Federal properties. And if we do not have some language like that last clause, there will be constant pressure to take the overflow and put people in some other Federal site. From a humanitarian standpoint, a sensible standpoint, people ought not to be in tents out in the middle of the Everglades. Some of the staff were just down there over this last weekend and saw the riots; and, of course, I have been there. But I want to tell the Members that, with all of the rain we have had, it is not a pleasant, hospitable, healthy, or safe campsite.

As I say, INS is making a good-faith effort to deal with this problem. This is not intended to get in their way.

Mr. O'BRIEN. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. FASCELL).

The amendment was agreed to.
The CHAIRMAN. The Clerk will read.

Mr. SMITH of Iowa. Mr. Chairman, I ask unanimous consent that the bill be considered as read through page 24.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The CHAIRMAN. Are there any points of order on the bill up through page 24?

Are there any amendments to that portion of the bill?

The Clerk will read.

The Clerk read as follows:

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

Appropriations for "Salaries and expenses, general administration", "Salaries and Expenses, United States Attorneys and Marshals", "Salaries and Expenses, Federal Bureau of Investigation", "Salaries and Expenses, Immigration and Naturalization Service", and "Salaries and Expenses, Federal Prison System", shall be available for uniforms and allowances therefor as authorized by law (5 U.S.C. 5901–5902).

A total of not to exceed \$35,000 from funds appropriated to the Department of Justice shall be available for official recep-

tion and representation expenses in accordance with distributions, procedures, and regulations established by the Attorney General.

AMENDMENT OFFERED BY MR. WALKER
Mr. WALKER. Mr. Chairman, I
offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Walker: Page 25, after line 14, insert the following new paragraph:

No funds appropriated under this act may be used to prevent the implementation of programs of voluntary prayer and meditation in the public schools.

Mr. WALKER. Mr. Chairman, the issue in this particular amendment is school prayer. It is an issue which this House had addressed on several other occasions and has always treated in a favorable way.

Previously, when we have addressed this issue, we have done so in the education appropriation, saying that the Education Department cannot interfere with a school district that wishes to implement a program of voluntary school prayer. This would extend that same language into the Justice Department.

Let me explain why I think it is appropriate that we do so. The Supreme Court made very clear at the time when they outlawed mandatory school prayer exercises that voluntary school prayer was perfectly appropriate. That option has existed since the early 1960's, when the edict came down from the Supreme Court.

Many schools did not implement voluntary school prayer because they felt that there was a problem in any kind of a program being implemented by the schools.

Now we have recognized, and there have been a number of efforts here in the Congress and across the country, the propriety of encouraging school districts to go to purely voluntary school prayer programs.

By putting language in the education appropriation bill, we in effect said that the Education Department could not interfere with that movement. However, many school districts who were looking at that option said, "Well, it is true that the Education Department cannnot interfere with us, but it still does have the, perhaps, cooling effect of the Justice Department getting involved at some point and suing us over some program that we establish of a purely voluntary nature." And so, therefore, if the language was extended to the Justice Department as well, it would pretty much clear the decks for schools to implement voluntary school prayer programs. That is precisely what the language does that I am offering here today. It is precisely the same language that this House approved on the education appropriation, and it would simply say that the Federal Government could not in any way interfere

with a school district that is implementing a program of voluntary prayer and meditation in the public schools

Mr. O'BRIEN. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentle-

man from Illinois.

Mr. O'BRIEN. Mr. Chairman, am I correct that this amendment would be anticipatory, in a way? It is not because the gentleman is concerned about an existing condition, but the gentleman is sort of cutting them off at the pass, before they get a chance

to do this. Is that correct?

Mr. WALKER. I would say to the gentleman from Illinois that he is precisely correct. I know of no suits that have been put together of this kind. but it is simply sending a signal to local school districts that if they decide to move in the direction of implementing a voluntary prayer program that they would not have interference from the Department of Jus-

Mr. SMITH of Iowa, Mr. Chairman, I move to strike the last word.

Mr. Chairman, I am a little bit intrigued. I do not know of any program that the Justice Department has implemented or will be implemented that would prohibit voluntary prayer in the public schools. I would have to assume that there is a fear that the Reagan administration is going to develop a program and is going to implement it that will prohibit voluntary prayer, otherwise there would be no need for the amendment. And I guess that if there are enough people who are afraid that the Reagan administration is going to do this, maybe people will support this amendment. But that can be the only purpose, that they are afraid that the Reagan administration is going to have a program and implement a program to prohibit voluntary prayer.

If the Members are afraid that is going to happen, vote for the amend-

ment.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I appreciate the gentleman's comments. I do not think that it refers to any particular administration or to any particular intent.

As the gentleman from Illinois stated, there is no action that is underway at the present time. But it does serve, as I stated before, as a chilling effect on some school districts that might wish to do this-not because of the administration's intent. This administration has made itself fairly clear that it favors school prayer. But it also has the problem of some U.S. attorneys that might be operating out of the scope of the intent of the ad-ministration. This would assure all of those school districts that they could

in fact go ahead with voluntary school prayer programs without having any kind of a problem.

Mr. SMITH of Iowa. Does the gentleman agree that, as far as he knows. the Justice Department does not now have any such program in mind?

Mr. WALKER. If the gentleman would yield, I would say that that is absolutely the case. I know of no such program, except that what we are doing is, we are seeing a movement toward school districts doing this, but they are afraid that there might be a program implemented if it became wide enough spread. So this is an attempt to anticipate that problem and deal with it in the appropriation

I thank the gentleman for yielding. The CHAIRMAN. The question is on the amendment offered by the gentle-

man from Pennsylvania (Mr. WALKER). The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were-ayes 333, noes 54, not voting 46, as follows:

[Roll No. 192]

Messrs. GORE, VENTO, and OBER-STAR changed their votes from "aye" to "no."

Messrs. GARCIA, WOLPE, RAILS-BACK, LELAND, OTTINGER, FORD of Michigan, AUCOIN, WIRTH, FIND-LEY, and RODINO changed their votes from "no" to "aye."

So the amendment was agreed to. The result of the vote was announced as above recorded.

□ 1545

The CHAIRMAN. The Clerk will read.

Mr. SMITH of Iowa. Mr. Chairman, I ask unanimous consent that the bill be considered as read through line 6, page 26

The CHAIRMAN. Is there objection to the request of the gentleman from

Iowa?

There was no objection.

The CHAIRMAN. Are there any points of order in that section of the bill?

Are there any amendments in that section of the bill?

The Clerk will read.

The Clerk read as follows:

LEGAL SERVICES CORPORATION

PAYMENT TO THE LEGAL SERVICES CORPORATION

For payment to the Legal Services Corporation to carry out the purposes of the Legal Services Corporation Act of 1974, as amended, \$241,000,000: Provided, That none of the funds appropriated in this paragraph shall be expended for any purpose prohibited or limited by any of the provisions of H.R. 3480, as passed the House of Representatives.

AMENDMENT OFFERED BY MR. SENSENBRENNER

Mr. SENSENBRENNER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Sensenbren-Ner: On page 26 strike out line 7 and all that follows through line 14.

Mr. SENSENBRENNER. Mr. Chairman, this amendment deletes funding for the Legal Services Corporation. I will not go through all the arguments pro and con on the activities of the Legal Services Corporation, since that would only serve to rehash the debate that this committee had several weeks ago during the consideration of the Legal Services Corporation reauthorization bill; however, due to a quirk of the calendar and some action by the committees other than the Appropriation Committee, this bill, in effect, will become the authorization and appropriations bill for the Legal Services Corporation for fiscal year 1982.

Earlier in the consideration of the reconciliation legislation, the House twice supported the Gramm-Latta amendment which contains no funding whatsoever for the Legal Services Corporation; however, the conference committee on the reconciliation bill just omitted all the language relating to the Legal Services Corporation and

due to the silence of the reconciliation bill, this means that the language that is contained in the bill that is now before the committee will provide the Legal Services Corporation with the \$241 million contained in the reauthorization legislation and also will include the restrictions that were passed by the House in the reauthorization legislation several weeks ago.

Frankly, that is a derogation of the legislative process. The Legal Services Corporation has been operating without authorization since the end of fiscal year 1980. The failure of the Congress to reauthorize the Legal Services Corporation has left a hole in that Corporation's activities and since the budget deficit appears to be growing and since expenditures appear to growing beyond that which was projected at the time of the initial budget submission by the President to the Congress, it appears to me that the Legal Services Corporation would be a good place to save almost a quarter of a billion dollars.

Let me conclude my remarks by reemphasizing the point that the bill that is before the committee does not go through the usual authorization process of a bill being passed by both Chambers, considered in conference, and then enacted into law. It merely adopts the provisions of the House bill verbatim as far as the operational charter of the Legal Services Corpora-

tion is concerned.

I believe that we ought to make this bill silent as far as the Legal Services Corporation goes, just like the reconciliation bill was.

Mr. SMITH of Iowa. Mr. Chairman, I rise to oppose the amendment.

Mr. Chairman, I hope we can dispose of this amendment without hours of debate.

Let me tell you very simply what we did and what the issue is. The issue is whether or not there shall be a Legal Services Corporation funded for the coming year. Now, let me state very frankly, I am for a Legal Services Corporation. I thought it was one of the better programs that the Nixon administration proposed. They said, "Let's do away with these government agencies. Let's set up a private corporation and let it deliver the services."

I am a little surprised when we had 3 days of debate in the House on the extension of the authorizing legislation for the Legal Services Corporation, almost all the opposition came from the Republican side of the aisle. I had always heard Republicans love corporations. Well, here is a corporation. It was set up by the Nixon administration saying that if it is a corporation it can do no wrong. There ought to be a corporation and let it administer this program. That is what we have, and in my judgment it has been rather successful, so I am for it.

We spend \$500 million in Federal dollars every year to give criminals

access to justice, but now we cannot spend half that much to give law-abiding, many of them elderly citizens, access to the justice system. Many of these people are elderly people who are merely trying to get what they are entitled to under the social security law or some other law. They get one of these notices that is so legalistic, they do not understand it. They need a Legal Services Corporation attorney to interpret it for them and go to the agency involved.

Now, some Members will say, "Well, my office takes care of that." Let me tell you, there are not five Members of this House that represent elderly citizens seeking social security before the administrative agencies. What they usually do is refer it back to the Social Security Administration or the Legal Services Corporation. The Corporation finds that one of its most active referral systems is congressional offices. They get the job in the end. So this

Corporation is needed.

Well, now, it is said that we did not have any authorization for this for fiscal year 1982. That is true of 50 percent of the bill. The authorizations have not yet been passed; but what is not true of most of the other items in this bill is that this authorization has passed the House after 3 days of debate; so what we in the Appropriations Committee said was instead of substituting our judgment for what the House wants, even though the committee is opposed to some of the provisions that are in this Legal Services authorization bill as it passed the House, we incorporated the entire bill as it passed the House, lock, stock, and barrel, limitations and all. We said we are going to give you the same amount of money that the House decided after 3 days of debate and we are going to say not \$1 can be spent in anyway that would be prohibited under the House bill. Now, that ought to take care of the matter. After 3 days of debate we should not have to have 3 minutes of debate on this bill. So what I am saying to the Members of the House is I hope you will stand by the committee. Let us not have another 3 days of debate on the same subject matter that we have covered already this

Mr. Chairman, I yield to the chairman of the Judiciary Committee.

Mr. RODINO. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the \$241 million appropriation for the Legal Services Corporation contained in H.R. 4169. I oppose any amendments which would eliminate or reduce this funding.

Americans have indicated their widespread support for the Legal Services Corporation. In a New York Times poll, April 30, 1981, taken around the Nation, 83 percent of those polled favored increases in Legal Services Corporation funding or agreed that funding should remain the same. This appropriation bill, H.R. 4169, as did the House-approved authorization bill, represents a 25-percent reduction in funding for Legal Services Corporation. This Nation cannot afford any more reductions or the elimination of legal services to the poor.

It is cost effective to continue the Legal Services Corporation which has among the lowest administrative costs of any corporation or Government agency. Over 93 percent of its appropriation goes directly to local programs. The rest is used for training, monitoring, and support. Block grants to the States are not viable alternatives; they would create costly State bureaucracies and would siphon off money for local programs and clients. The block grant approach as a primary mechanism for legal services has already been rejected by this Congress. Nor can the private bar carry the burden alone.

As Americans committed to a democratic system of government and a system of justice for all, we all share the burden of insuring access to our legal system. As President Nixon noted in 1973 when he supported the creation of the Legal Services Corporation:

Legal assistance for the poor, when properly provided, is one of the most construcways to help them to help themselves (and) justice is served far better and differences are settled more rationally within the system than on the streets.

We are all budget conscious, and this appropriation of \$241 million is consistent with the budget process. The funds in H.R. 4169 fall within the budget allocation totals which were required to be met. This appropriation does not violate the Budget Act.

I have received correspondence from thousands of persons-including many distinguished judges and leaders in my own State of New Jersey, such as Governor Brendan Byrne, Attorney General Zazzali, Public Advocate Stanley Van Ness. Most importantly I have heard from clients who have been serviced by legal services programs.

It is a wise investment to continue adequate funding for the Legal Services Corporation. We taxpayers subsidize billions of dollars annually for the legal expenses of businesses. A \$241 million annual investment for 30 million of our most powerless and vulnerable citizens is a modest investment indeed. We will pay dearly if we fail to do so.

Mr. SMITH of Iowa. I just want to point out that the authorizing bill passed the House by a large bipartisan vote. It was not like the reconciliation bill or some of these other bills. There was a very large bipartisan vote in favor of this bill as it passed the House.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. Yes, I yield.

Mr. ROEMER. Mr. Chairman, I thank the gentleman from Iowa for yielding.

I would like to ask two questions. No. 1, did not the House in the earlier debate cut the budget proposed for this agency by some 25 percent?

Mr. SMITH of Iowa. The gentleman is right, but it is also actually only two-thirds the program level, because after you figure inflation in, they would only have two-thirds the program they had last year.

The CHAIRMAN. The time of the gentleman from Iowa (Mr. Smith) has

expired.

(By unanimous consent, Mr. SMITH of Iowa was allowed to proceed for an additional 5 minutes.)

Mr. SMITH of Iowa. After you figure inflation in, they will only have two-thirds the program they had last year.

Mr. ROEMER. In addition, would the gentleman respond to the charges made by some that to adopt the committee language here would, in effect, be busting the budget somehow? Could the gentleman deal with that

for a minute, please?

Mr. SMITH of Iowa. We have taken care of that, because we are within the allocation that our subcommittee was given under the budget resolution. We have done some shifting of money from other sources. In several places, such as the Fisheries Loan Fund, we added some money. We have also reduced salaries and expenses accounts throughout the Federal Government in certain instances. So this bill is not over the budget allocation target.

Mr. ROEMER. If the gentleman will continue to yield, are you telling the House that by passing this we do not affect the budget in a deficit manner?

Mr. SMITH of Iowa. This bill is under the total budget requests by \$6 million.

Mr. ROEMER. Thank you.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Minnesota.

Mr. OBERSTAR, I thank the gentle-

man for yielding.

I join the gentleman from Iowa (Mr. SMITH), the chairman of the subcommittee, in opposition to this amendment to strike the funding for the

Legal Services Corporation.

This is a bad amendment because it also strikes at the constitutional right to equality of opportunity under the law for all Americans. Liberals and conservatives alike have supported Legal Services because they recognize that the right to counsel in legal proceedings is fundamental to the principal of equality of opportunity.

Opponents of Legal Services would have us believe that the program is supported by only an out-of-touch, liberal establishment.

While I was home in Minnesota, I read an excellent, concise editorial in the Cambridge Star, which offered a strong, commonsense endorsement of the legal services program. Commenting on the Reagan administration proposal to eliminate the Legal Services Corporation, the editorial focused on the "Good Old Days" when-

Seniors were subject to high pressure sales taxes and fly-by-night fix up operations-with no recourse to seek legal

Mr. Chairman, it just is not senior citizens in the five-county area of east central Minnesota who benefit from this program; it's senior citizens and low-income people throughout this country who need Legal Services.

If the House adopts the Sensenbrenner amendment, we will have taken a mean-spirited action fraught with great potential danger to our constitutional rights.

While I recognize that it is not always possible to compare domestic spending programs with defense spending programs, I must ask how many centuries of the Legal Services Corporation could we fund with the total appropriations that Congress will be forced to vote if the MX system is developed and deployed, or with the cost of just one B-1 bomber. I strongly urge the defeat of this amendment.

Mr. SMITH of Iowa. The gentleman is right. If we lived in a dictatorship, we would not need this program, because all you would do is go down to whoever is in authority and he tells you what your rights are and that is the end of the question. But in this country we live under the rule of law, not men, and we have to apply that law to determine what our rights are. That is the kind of a system we have.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Oregon.

Mr. AuCOIN. I appreciate the gentleman yielding and I rise to associate myself with the excellent remarks he has just made, as well as the remarks of my colleague from Minnesota (Mr. OBERSTAR). I think the exchange the two gentleman just had frames the issue precisely and well. That simply is: Do we believe that we are a nation of laws or do we not? If we do believe that we are a nation of laws, then we ought to provide an opportunity for the poor to have the redress of their grievances through the system of justice this country provides for all citizens. If we do not, we are not going to solve those grievances. We are going to say to the poor, to the disadvantaged, that if they want those grievances redressed, they must go to the streets, they must pick up a brick; they cannot have access to the courts.

I do not think that is the kind of signal this body wants to give to the American people, to the poor or to the world. And for that reason, this amendment, pernicious as it is, ought to be defeated.

Mr. Chairman, let me share with my colleagues an example of what is at stake here.

Early last year, 13 indigent nursing home patients—all over 70 years of age—were issued eviction notices from one of the largest nursing homes in my district. This happened even though they and their families had been told that they could remain indefinitely. One patient, a woman of 100, died shortly after the notices were issued.

The legal aid people in my district were asked to come into the case by numerous family members to try to provide obviously needed legal assistance to the patients. Legal aid entered into negotiations with the nursing home owners, the situation was resolved through those negotiations and the patients were allowed to remain.

None of these patients could afford an attorney on "the private market." Legal aid was their only hope. This story is but one of hundreds of thousands each year in which the difference between justice and injustice has been legal aid.

I urge my colleagues to soundly defeat this amendment.

Ms. FIEDLER. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentlewoman from California.

Ms. FIEDLER. Mr. Chairman, there was a comment made before in the exchange of the gentleman from Iowa (Mr. Smith) with the gentleman from Louisiana (Mr. Roemer) wherein the gentleman from Iowa responded to a question by the gentleman from Louisiana when he said would it affect the budget and the gentleman from Iowa indicated it would not affect the budget.

Mr. SMITH of Iowa. I said it is within the budget allocation. The bill is within the budget allocation.

Ms. FIEDLER. I disagree. I think it would affect the budget because it would affect it by the amount of the appropriation for the Legal Services Corporation.

Mr. SMITH of Iowa. No, that is not correct. We were allocated under the budget resolution \$8,755,000,000. We are within that limitation. What we did was reduce other programs in order to provide the money for this program. It is a matter of shifting of funds in accordance with our priorities.

Ms. FIEDLER. I understand that. But what I am saying is if it were cut from the budget, if this bill were to pass, then it would reduce the amount of money appropriated by the amount

of the budget for the Legal Services Corporation.

Mr. SMITH of Iowa. It would unless something else were increased by that amount which was asked for by the administration. That is probably what would happen. This is a matter of setting our priorities. We have set our priorities by reducing some other things to make room for this program.

Ms. FIEDLER. I understand that. But I just wanted to clarify the record, because if this bill does pass, and there is no other change in the existing appropriation bill, it will reduce the appropriation by the amount of the Legal Services Corporation.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Illinois.

Mr. RAILSBACK. I thank the gentleman for yielding.

Mr. SMITH of Iowa. I want to thank the gentleman for what he has done to support the Legal Services Corporation. The gentleman has been a very ardent supporter of the program.

Mr. RAILSBACK. I thank the gentleman. I feel very strongly that the Members of the House also ought to be aware that during that 3 days of debate there was something like 12 additional amendments that were adopted to further tighten and restrict the program after the subcommittee and the Judiciary Committee adopted something like 18 amendments.

The gentleman has put his finger right on the issue that confronts us: Do we believe that the poor people in the country are entitled to some kind of equality of justice? That is the point that has been made.

As far as the cost, let me just mention, as somebody who believes in national security, that now they are estimating that one B-1 bomber will cost \$200 million. We are talking about a program that has been reduced from something like \$321 to \$241 million. That is a little bit more than the cost of one B-1 bomber.

Mr. McCLORY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to speak on this issue because in the debate that we had here, the extensive debate we had on the floor regarding the authorization, I offered a motion to recommit at the conclusion of the debate which recommended that legal services should be provided as part of a block grant program. I did get assurance from the administration, from the White House, that an additional \$100 million would be made available if legal services were added as one of the social service block-grant-type programs.

Now, it is my understanding that if legal services are to be provided and are going to be approved by this administration, it is going to be because they are funded in the area of \$100 or

\$150 million. I do not think that the funding which is provided in this appropriation bill is going to receive the approval at the other end of Pennsylvania Avenue.

I likewise support legal services. However, I feel that they could be far better administered, and I think they would be more fairly distributed to those in need if we had it as a part of a block grant program. There is a kind of a hodgepodge now. There is dissatisfaction with the program. Otherwise it would not have taken on, I think, 18 amendments in the Judiciary Committee and 12 more on the floor of the House.

In trying to overcome all of the arguments that are made against the Legal Services Corporation, as it is being administered now, we have substantially revised the law. I have the feeling that if we can somehow resolve the differences that we have, that eventually we can have a legal services program through block grants and funded at a level which the administration would support.

Mr. SENSENBRENNER. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. I thank the gentleman from Illinois for yielding.

I think the gentleman has hit the nail precisely on the head. Those who are in opposition to this amendment would have you believe that the Legal Services Corporation is the only game in town to provide legal services to the poor. That is not the case. There are many other ways of providing legal services to the poor, including the block grant program, which I personally support, as does the gentleman from Illinois.

So a vote in favor of this amendment is not a vote against denying the use of Federal funds to provide legal services to the poor. What it is a vote for is a vote in favor of alternative ways of providing legal services to the poor, rather than through the embattled Legal Services Corporation, which has become so controversial that it did require 3 days of debate and 30 amendments.

Mr. McCLORY. I thank the gentleman. I just want to add, in response to a statement made by the gentleman from Iowa, that actually this measure has strong bipartisan support. It had overwhelming support from my colleague from Illinois (Mr. Railsback), and from the gentleman from Michigan (Mr. Sawyer), and the gentleman from Virginia (Mr. Butler), and others. So this side of the aisle is not in any way not in support of legal services for the poor and for all those that are in need. But we do feel that it is a measure which requires not only all of the amendments that were

adopted in H.R. 3480 but also funding at a level which will be approved by the administration and which is consistent with the budget cuts and with the limitations that we are imposing on expenditures for all kinds of social services. I think that we should include, in that respect, legal services as well. Perhaps we can encourage local communities and counties and States and bar associations to contribute a greater measure of support in behalf of legal services which also would be very beneficial to the Nation.

Mr. SAWYER. Mr. Chairman, move to strike the requisite number of

Mr. Chairman, I rise in opposition to the amendment.

I would just, Mr. Chairman, suggest that the three Members on this side of the aisle who happen to be in opposition to this amendment are the only three Members on this side of the aisle on the subcommittee that got into and went into this whole picture. So I think that while they may be only those three singled out, I am sure there are many more. We had some 50 or 60 vote that way. The three Members who were on the subcommittee were unanimous on it. Not one of us had any division.

The gentleman from Iowa was very correct. We spend a half a billion dollars a year to make sure that the criminal has access to all the advantages provided to him under our method of justice. We would now say to the noncriminal, a law-abiding citizen who cannot afford lawyers, that he cannot have access to the whole civil side of the legal justice system.

Now, we tell people, "You don't go out on the streets with your grievances, you don't throw bricks through windows, or you don't set neighbors' houses on fire; you go into a court of

□ 1610

You go into a court of law, and if you are right justice will be done. If you cannot afford to hire the lawyers to get you there, we just as well provide you with those necessities such as medicaid when you need it and qualify for it under some pretty tough restrictions. We will give you access to that system. Therefore, stay off the streets, do not light the matches to your neighbor's house, do not take the law into your own hands. The system is there to be used, and we will make it

Just to show the Members the magnitude of this problem, in the State of Michigan alone, my State, they have today 53,000 open files and 27 lawyers working on them at present funding levels. This represents a reduction; not an inflationary reduction, but an additional 25 percent reduction, and 53,000 open files, 15,000 of which involve litigation. Even if we wanted to abolish Legal Services, we cannot do it this way. We cannot just say, bang, overnight the situation is closed, all the litigations default, the whole thing is thrown up into the air into an absolutely unholy mess. There is no way it can be done.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. I yield to the gentleman from New York.

Mr. GREEN. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Wisconsin.

In a democratic society, it is essential that all individuals have access to legal representation. The concept of equal justice under the law is a principal upon which our Nation was founded; and, if it is to have real meaning, we must continue to provide legal representation to all persons so that they can enforce their rights and redress their grievances. Since 1965, the Legal Services Corporation and its predecessors have moved this Nation closer to realizing this principle by making assistance available to those unable to

afford legal help.

On June 18, 1981, the House of Representatives voted 245 to 137 to continue legal services for another 2 years. through 1983. This legislation authorized \$241 million for fiscal year 1982, approximately \$80 million less than the current year. There were also restrictions placed on the activities of Legal Service lawyers, such as prohibiting them from bringing action" lawsuits against local, State, or Federal governments and a tighter ban on cases involving homosexual rights and lobbying by Legal Service attorneys. While I did not favor some of these provisions, I supported the bill as it assured the poor of continued access to the U.S. legal system, though at a somewhat reduced level.

It is of great importance that the House pass this appropriations bill with the Legal Services section intact. Without this program, the poor will have few resources to fall back on. The private legal system will not absorb the cases handled by Legal Services which, by the way, totaled 1.5 million in 1980. Those eligible for Legal Services cannot afford private legal help, nor is it realistic to expect pro bono efforts to fill the void. Further, it is also unrealistic to expect the States to come foward to help. Their contribution to Legal Services has been minimal, and there has been no indication it will increase. The legal community is aware of the need for Legal Services and recognizes the inability of private attorneys to adequately serve the poor. Every president of the American Bar Association since 1965 has endorsed the program.

Contrary to claims made by opponents of Legal Services, the 6,200 attorneys who staff the 1,450 offices of Legal Services Corporation are almost intirely involved in the same type of legal cases which the average person in our society finds himself or herself needing legal help to resolve. Over 30 percent of the cases involve family law cases such as adoption, custody, and divorce. Housing problems account for almost 18 percent of the caseload, income maintenance 17.2 percent and consumer problems-contracts, warranties, credit, and debt collectionnearly 14 percent. Little time has ever been spent on class-action lawsuits, and that can be expected to decrease if the provisions of the House Legal Services authorization bill are enacted into law.

One final point should be made concerning Legal Services and the budget process. There is nothing that prohibits the House from approving appropriations for a program which it has reauthorized. Further, there was nothing in the Reconciliation Act which prohibited appropriating money for Legal Services Corporation. In fact, while the conferees on the reconciliation bill considered reauthorizing Legal Services Corporation, they decided to extend Legal Services Corporation through the normal authorization and appropriations process. As I understand it, the other body has just about reached a consensus on reauthorizing Legal Services and is expected to act within the next several weeks.

I again urge my colleagues to reject this amendment. If Legal Services is not continued, we will return to a double standard of justice, one for those able to afford lawyers and another for the poor.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. I yield to the gentleman from Virginia.

Mr. BUTLER. Mr. Chairman, I just want to be associated with the gentleman's remarks and join him in opposition to this amendment. The appropriation is a modest effort to continue a worthwhile program, and I am proud of the effort we have made to bring it around to the point where it is a meaningful program consistent with the intentions of Congress if it goes forward with the limitations we have placed on it, and I insist that it is a worthwhile appropriation.

Mr. CAMPBELL. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. I yield to the gentle-man from South Carolina.

Mr. CAMPBELL. Mr. Chairman, I just wanted to ask one question, a point I think the gentleman made that was very important. He mentioned that we spend some half billion dollars on criminally indigent.

Mr. SAWYER. Yes.

Mr. CAMPBELL. How do we spend that? Where is it expended? I would like the gentleman to explain that.

Mr. SAWYER. That the States do, because 90 percent of all that is in the State courts—anyway, 90 percent of all criminal, the States handle it. The problem we have here is that no State has ever had any agency to administer civil legal aid, and a block grant would just eliminate one very small Federal agency with a 3-percent overhead factor but mandate the immediate establishment of 50 brandnew agencies out in every State, and that is not very good economizing or very good reduction in force by Government, in my opinion.

Mr. KRAMER. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. I yield to the gentleman from Colorado.

Mr. KRAMER. Mr. Chairman, I thank the gentleman for yielding. I just wanted to express my appreciation to the members of the subcommittee, who I know have labored hard to improve what I would have considered to be before the time the reauthorization bill was an intolerable situation, and one that still needs improvement and is vastly improved from where it has once been.

But, I also would like to give special thanks I think, perhaps, to one other individual I think credit should be directed to, the gentleman from Wisconsin, who I think has crusaded long and hard in an area that is extremely important, one that has been in direneed of reform. I think through his diligent efforts the matters that are being debated here today and were debated during the reauthorization process have been brought to the attention of the Members of the House.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(At the request of Mr. Kramer and by unanimous consent, Mr. Sawyer was allowed to proceed for 2 additional minutes)

Mr. KRAMER. Through his efforts the matters that are being debated here today before the Members of the House and the committee, and which were fully aired and debated during reauthorization process, have really seen the light of day and have had a full public hearing. I know the gentleman from Wisconsin, through my own contacts in our own offices, has labored very hard and long in this area, and so whatever reforms I think that do come out of this debate process and out of this reauthorization and appropriation process, even though not perfect, are due not only to the hard work of the members of the subcommittee, which I appreciate, but also because of the very tireless efforts that have been put forth by the gentleman from Wisconsin. I really think the members of the committee owe the gentleman from Wisconsin real gratitude for bringing these matters to our attention.

Mr. SAWYER. I appreciate the gentleman's comments, and certainly the gentleman from Wisconsin has worked hard and had 3 hours of debate on these issues before occupying the whole House. The only reservation I have is, how many times we have to go through this same argument with the gentleman from Wisconsin.

Ms. FIEDLER. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. I yield to the gentlewoman from California.

Ms. FIEDLER. Mr. Chairman, I rise in support of the bill. I have done a good deal of study on it. I believe that the intent of Congress was to provide legal services to the poor. I am not convinced that that is what is the outcome of this enormous expenditure of resources, and that instead we have developed a very suspect and very large political organization.

I think it is important that the resources we bring to the American people come in a very direct way. I would have supported a block grant concept, but since I believe there has been so much abuse by the Legal Services Corporation and lobbying activities and other activities directed toward certain social change, I do not believe I can vote for the existing appropriation.

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

(At the request of Ms. Fiedler and by unanimous consent, Mr. Sawyer was allowed to proceed for 1 additional minute)

Ms. FIEDLER. I further would like to bring to the attention of the House that after calculating the number of poor in this country and after accepting the number of attorneys, we could provide these services on a pro bono basis, which is consistent within the profession, if one out of three attorneys took one poor client in this country. So, we are not only not using our funds effectively, but we are providing a good deal of resources for special class action suits and other efforts that are not consistent with the needs of the poor themselves.

Mr. SAWYER. If the gentlewoman will review the amendments that have been put in the act, they have pretty well taken away all of those arguments under the present activities. As to a pro bono basis, for 30 million people below the poverty line, this is absolutely impossible. It would be impossible even to take care of those in the lower middle class on a legally affordable basis, and they have trouble now doing that.

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

(By unanimous consent, Mr. Sawyer was allowed to proceed for 2 additional minutes.)

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I thank my colleague for yielding. I am not a member of the committee. I had not expected to speak, but I was moved by what my colleague had said, the gentleman in the well, Mr. Sawyer, and I would like to associate myself with his remarks.

I was president of our County Legal Aid Society and am still a member of the board of Legal Services. The corrections we have made in the bill have made it a good piece of legislation, in my opinion. If we should back away from adequate protection of our laws and adequate legal advice for our very poor, it would be a disgraceful thing to do. I thank the gentleman for yielding.

Mr. SAWYER. I thank the gentlewoman.

Mr. O'BRIEN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, as ranking minority member I would like to sort of bring the debate to a close and indicate that I think we should support Legal Services. That was not my previous conviction when I came to Congress, but the committee has done a remarkably good job in cleaning up this Corporation. The request has been reduced by \$158 million. It is \$80 million below the current appropriation. It is true that we are trying to get one lawyer per 10,000, when we are dealing with the poor American citizen.

The notion that this would be taken care of in the block grant program is one that one can argue, but it is just not going to happen. In most of those situations, let us say in social services, there has been a certain amount of allocation in there less the percentage.

□ 1620

But with respect to Legal Services, it has been tucked in without any percentage. I think the poor private citizen deserves it as well as the criminal, and I urge the House to oppose the amendment.

Mr. RICHMOND. Mr. Chairman, I rise in opposition to the Sensenbrenner amendment, which would eliminate all Federal funding for the Legal Services Corporation.

On June 18, the House passed the Legal Services Corporation reauthorization bill, which authorized \$241 million for Legal Services in fiscal year 1982. This legislation contained stringent restrictions to answer the criticisms—justified or not—which had been directed at the Corporation.

The Legal Services Corporation is already one of the most efficient Federal programs in existence. Last year,

approximately 6,000 Legal Services attorneys handled over 1.5 million legal problems, the vast majority of which dealt with family law, housing, and other problems that were crucially important to the clients' lives.

The reduced funding provided for in this year's authorizing legislation will support only the barest minimum of legal access for this Nation's poor. The States have repeatedly shown that they will not provide adequate funding for legal aid, and the pro bono work of private attorneys has never come close to meeting the need.

Continued Federal funding for Legal Services is essential if we are to guarantee the equal protection of the laws to all citizens, as required by the Constitution.

Mr. Chairman, the Sensenbrenner amendment would destroy the principle of equal justice upon which this Nation was founded, and I urge the defeat of this amendment.

Mr. WEISS. Mr. Chairman, I rise in opposition to the amendment offered by Mr. Sensenbrenner to eliminate funding for the Legal Services Corporation.

In March, the President announced his proposal to eliminate Legal Services, a program essential to insuring equal justice in this country. Several months later, Members of the House overwhelmingly rejected this recommendation, and in doing so, reaffirmed our Nation's commitment to justice for all our citizens, rich and poor alike. Now we are being asked to reconsider this far-reaching decision. We are being asked to back down from our pledge to guarantee equal protection under the law for 30 million poor people across this country. I find this request abhorrent, and urge my colleagues to once again vote against this unconscionable proposal.

Since its creation in 1974, the Legal Services Corporation has played a crucial role in fulfilling our country's promise of equal opportunity and justice for all. Last year, Legal Services handled 1.5 million cases for disadvantaged Americans through its 300 locally administered programs. The vast majority of services offered by legal services attorneys involve routine matters concerning family law, health care, administrative benefits, housing problems, and consumer protection. Although routine in nature, many of these cases are matters of survival to legal services clients. These citizens have nowhere else to turn when faced with illegal evictions from their homes, sudden cutoffs of social security and food stamp benefits, physical abuse at home. Last year in New York City alone, Legal Services handled 50,000 civil law cases, providing invaluable assistance to the elderly, physically handicapped, foster children, battered women, and other community

counsel.

The modest sum of \$321 million appropriated for Legal Services in 1981 amount to six times as much financial support for legal aid as all State, local, and private sources combined. This provided only minimum access to legal protection by funding 2 lawyers for every 10,000 low-income people. In contrast, the ratio of attorneys to the rest of the population is 1 to approximately 334 people. Clearly we still have a long way to go to insure equal access under the law. Legal Services has only been able to address a fraction of the need for legal protection that exists among the most powerless in our society. History reveals that private attorneys cannot be counted on to provide this desperately needed access to the legal system.

1982 appropriation provides The only \$241 million for this program, a figure which represents a substantial cut from last year's funding and from the \$400 million requested by the Corporation. In addition to streamlining the budget, the House has approved measures which impose numerous, and I might add, unwarranted restrictions on the kinds of services that legal services attorneys may provide. Thus, we have already severely undermined the ability of legal services programs to carry out its mandate for poor people in America. Today, we are voting only to support minimal funding for the basic and essential services this program provides.

In the spirit of justice, I call upon my colleagues to stand firm in their original commitment to preserving legal services, and to reject this devas-

tating amendment.

• Mr. BIAGGI. Mr. Chairman, as I have on other occasions-I rise to urge support for the Legal Services Corporation and therefore in strong opposition to the Sensenbrenner amendment.

On June 17, 1981, when the House passed H.R. 3480—I spoke at some length in defense of the Legal Services Corporation. My position has not changed—if anything it has intensified by virtue of the many letters and other indications of support I have received from my constituents in sup-

port of the program.

Today, many thousands of poor Americans have been helped by the Legal Services Corporation. I do not consider it appropriate that we terminate this important relationship using the abused excuse of trying to save money. The pursuit of economy with no regard for its impact in human terms is at best very callous public policy. For us to support an elimination of funds for the Legal Services Corporation would be a most regrettable example of that type of policy.

I would not for a minute suggest that the Legal Services Corporation is

members who could not afford private not without its faults. However vigorous congressional oversight and the provisions built into H.R. 3480 go a long way toward rectifying some of the more glaring problems. The issue is clear-do we simply discard more than 7 years of progress in opening the legal system up to the poor and downtrodden or do we work to continue and improve the commitment. I urge the latter course of action and urge my colleagues to join me in rejecting the Sensenbrenner amendment.

Mr. KASTENMEIER. Mr. Chairman, I rise in opposition to the amendment of the gentleman from Wisconsin, Mr. Sensenbrenner. The gentleman's amendment is unwarranted and inconsistent with prior actions by this body. Contrary to arguments made by the gentleman the \$241 million appropriation for the Legal Services Corporation (LSC) is consistent with the budget process and is in fact a very cost effective investment for the American people.

The Legal Services Corporation is and should remain the primary vehicle for providing professional legal services in civil matters for those persons unable to afford them. The structure of the Legal Services Corporation Act has been carefully developed and improved by Congress in 1974, Public Law 93-355; in 1977, Public Law 95-222; and now in 1981 through the authorization bill. H.R. 3480, which passed this body on June 18, 245-137, after 3 days of deliberations. changes made by this body have been incorporated by reference into this appropriation bill. There is no need to reargue those issues today. Over 20 changes were made in H.R. 3480 including restrictions on class actions, lobbying, abortion matters, representation of aliens, and homosexual matters. New procedures were instituted to increase the accountability of the Corporation and its recipients to the General Accounting Office, the Congress, the local officials, and bar associations. Many of the amendments of the gentleman from Wisconsin (Mr. SENSENBRENNER) have been adopted. The real question is, Does he want to execute the program now that most if not all his concerns have been resolved in his favor? I believe most of my colleagues want to continue legal services to the poor.

The \$241 million appropriation for fiscal year 1982 represents a 25-percent reduction in funding. If you count inflation, the reduction would be at least one-third. Any further cuts will have a devastating impact on the Nation's poor who need these services often for the basic necessities of life. Thousands of persons-including clients, judges, business leaders, and others-have written me of the critical need for these services and of the professional actions of legal services lawyers. Respect for the law can only be promoted if all segments of the population are given access to the legal system. Legal services is a wise and modest investment of our limited resources. Pro bono and reduced rate representation by the private bar must continue and expand, but they cannot replace the basic need for a publicly supported legal services program. The local program serves as a catalyst for multiplying volunteer services. Its elimination would diminish these volunteer services as well. The private bar cannot bear this burden alone.

The \$241 million for LSC is the same amount authorized for each of the next 2 fiscal years in H.R. 3480. That amount was assumed by the appropriations subcommittee when it filed its budget allocation totals under 302(b) of the Budget Act on June 11, 1981 (H. Rept. 97-139). The total—which includes funding for the other agencies and departments in H.R. 4169—is \$8.7 billion of budget authority. The Committee on the Budget has noted that this total is well within the budget allocation targets.

The amendment of the gentleman from Wisconsin (Mr. Sensenbrenner), should be rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. Sensenbrenner).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. SENSENBRENNER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 122, noes 272, not voting 39, as follows:

□ 1630

The Clerk announced the following pairs:

On this vote:

Mr. Hance for, with Mr. Rangel against. Mr. Philip M. Crane for, with Mr. Ford of Tennessee against.

Mr. Johnston for, with Mr. Florio against.
Mr. Fields for, with Mr. McKinney against.

Mr. WAMPLER and Mr. JENKINS changed their votes from "aye" to "no."

Messrs. HOLLAND, BADHAM, and GINGRICH changed their votes from "no" to "aye."

So the amendment was rejected. The result of the vote was announced as above recorded.

□ 1640

AMENDMENT OFFERED BY MR. COLLINS OF TEXAS Mr. COLLINS of Texas. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Collins of Texas: Page 26, line 14, insert immediately before the period the following ": That none of the funds appropriated in this paragraph shall be expended to provide legal assistance or representation to any individuals in cases or controversies involving the Immigration and Naturalization Service".

Mr. COLLINS of Texas. Mr. Chairman, today we are considering whether or not to fund the Legal Services Corporation. I have supported President Reagan and my colleague from Wisconsin (Mr. Sensenbrenner) in their effort to eliminate funding of this agency.

However, if a majority of my colleagues want to continue to fund the Legal Services Corporation, I believe one limitation must be placed on these federally funded lawyers. They should no longer be able to bring lawsuits on behalf of aliens against the United States. Therefore, I am introducing an amendment which states:

That none of the funds appropriated in this paragraph shall be expended to provide legal assistance or representation to any individuals in cases or controversies involving the Immigration and Naturalization Service.

For 2 years we have passed amendments that prohibited Legal Service lawyers from representing illegal aliens. The legal aid lawyers ignored this language and claimed that they could not tell which of their clients were illegal aliens. In my State, Legal Services lawyers were representing illegal aliens in immigration suits against the United States out of at least four different offices. One legal aid lawyer went to a building where illegal aliens were held pending deportation and solicited clients.

My amendment would put an end to this practice. Many of my colleagues have said that the American poor need the help of Legal Service lawyers. If that is true, then let us make sure that these lawyers are representing Americans not aliens who are involved in lawsuits against the United States.

Mr. SMITH of Iowa. Mr. Chairman, I rise in opposition to the amendment.

I hope we can dispose of this rather rapidly. I want to point out that the authorizing bill for the Legal Services Corporation carries one and one-half pages, specifying in exactly what cases illegal aliens can be represented. Now, if this amendment does anything at all, it just confuses what is already in the authorizing bill. We have incorporated the limitations in the authorizing bill by reference into the appropriations bill. So all the limitations that are in the authorization bill that passed the House apply here.

If this amendment does anything at all, it confuses what is already in the bill. If it does nothing, then it is not needed. So this is a safe "no" vote.

Mr. RODINO. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the

gentleman from New Jersey.

Mr. RODINO. Mr. Chairman, I would like to point out that, explanation of the gentleman from Texas of the effect of the amendment refers to illegal aliens, the actual words of his amendment refers to individuals the term "Individuals" would include all American citizens and would thereby limit their right to be represented by the Legal Services Corporation in any matter or controversy involving the Immigration and Naturalization Service.

Mr. SMITH of Iowa. I thank the gentleman. I am sure he is right.

We have this amendment and three other amendments. We ought to be able to dispose of them rather rapidly. I hope that the Members will vote "no" on this amendment.

Mr. COLLINS of Texas. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Texas.

Mr. COLLINS of Texas. The gentleman says that it is very clear in his mind, and in the bill it has been writ-

ten up with great clarity, as I understand it.

Now, how does the gentleman understand that the Legal Services get involved in these illegal alien cases? What right do they have to be in illegal alien cases?

Mr. SMITH of Iowa. The only exceptions are set forth in the authorization bill. The gentleman talks about what has already happened in Texas. The limitations and exceptions in the bill that passed the House are not effective this fiscal year. The only limitation in existence currently is the limitation that is in the appropriations bill. Now we very clearly specified in the authorizing legislation in what instances the Legal Services Corporation could get involved. I cannot do any better than to refer the gentleman to pages 14 and 15 of H.R. 3480 that passed the House.

Mr. COLLINS of Texas. It is the gentleman's feeling—and, of course, the gentleman has made a great study of this—that in the future they will not be involving themselves on the question of whether they are an illegal alien or not when they inject themselves into these cases?

Mr. SMITH of Iowa. They should not be involved in any case that is prohibited under the provisions which are included in line 16 on page 14 through line 2 on page 16 of H.R. 3480. In no case.

Mr. COLLINS of Texas. Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The Clerk will read.

Mr. SMITH of Iowa. Mr. Chairman, I ask unanimous consent that the bill be considered as read through line 6 on page 29.

The CHAIRMAN. Is there objection to the request of the gentleman from

There was no objection.

Mr. CHAIRMAN. Are there any points of order to the material in that section of the bill?

Are there any amendments? The Clerk will read. The Clerk read as follows:

PAYMENT TO THE FOREIGN SERVICE RETIREMENT AND DISABILITY FUND

For payment to the Foreign Service Retirement and Disability Fund, as authorized by law, \$73,197,000.

INTERNATIONAL ORGANIZATIONS AND CONFERENCES

CONTRIBUTIONS TO INTERNATIONAL ORGANIZATIONS

For expenses, not otherwise provided for, necessary to meet annual obligations of membership in international multilateral organizations, pursuant to treaties, conventions, or specific Acts of Congress, \$470,891,000.

□ 1650

AMENDMENT OFFERED BY MR. M'DONALD Mr. McDONALD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McDonald: Page 29, line 16, strike out "\$470,891,000" and insert in lieu thereof "\$400,257,350".

Mr. McDONALD. Mr. Chairman, contained within title III of the legislation now before us is an appropriation of \$470,891,000 for membership obligation in international organizations and conferences.

This figure represents an increase of over 18.5 percent from the fiscal year 1981 level, an increase of nearly \$74 million.

I find it exceptionally difficult to ask the citizens of the United States to make sacrifices while we vote to increase the appropriation for international organizations. It is for this reason that I have introduced this amendment which would reduce the appropriation for the fiscal year 1982 by 15 percent or from \$470,891,000 to \$400.257.350.

Every year the United States spends millions of taxpayers' dollars in the form of membership assessments and voluntary contributions to international organizations. In 1980 alone, the United States paid the United Nations more than \$500 million in voluntary contributions in addition to the \$350 million paid as membership assessment.

In addition, billions of dollars are spent in the form of direct and indirect foreign aid, dollars that frequently find their way into coffers of international organizations since various member nations are dependent upon the United States for the money by which they pay their dues.

The overall effect is that the United States pays far more than its fair share in maintaining these organizations.

Prior to the August recess, we concluded work on the budget and tax reduction bills. With these reductions in the Federal budget, we have given notice to the American people that leaner appropriations will become a fact of life and that with those leaner appropriations our citizens must become less dependent upon the Federal Government and sacrifices must be made.

The bottom line is simply this: Are we prepared to ask our constituents to make these sacrifices and to expect less in the way of domestic programs and assistance while we vote to increase the number of their tax dollars for international organizations?

I think not, and for that reason I urge my colleagues to support this amendment to reduce the funding to international organizations by a mere 15 percent. That is 15 from the planned increase of almost 19 percent.

So, even with this amendment, it will be an increase of almost 4 percent over that of last year.

Mr. ROUSSELOT. Mr. Chairman,

will the gentleman yield?

Mr. McDONALD. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gen-

tleman for yielding.

Now when my colleague says "international organizations," that does not include the Export-Import Bank or any of those operations; is that correct? Does this only relate to the United Nations organizations?

Mr. McDONALD. Seventy-four percent of this is related to the United Nations, but it also includes such fascinating international organizations that about 26 percent goes to international organizations such as the Inter-American Indian Institute or the Inter-American Institute for Agricultural Sciences or the Pan-American Institution of Geography and History, the Pan-American Railway Congress, et cetera.

Mr. ROUSSELOT. What was the

Mr. McDONALD. The Pan-American Railway Congress Association.

Mr. ROUSSELOT. The Pan-American Railroad?

Mr. McDONALD. Congress Associa-

Mr. ROUSSELOT. And we have got

money in here for that?

Mr. McDONALD. Yes, we have money for that and numerous other agencies as found on pages 44 and 45, most of which I think would be totally foreign to the constituents throughout this country.

Mr. ROUSSELOT. I compliment my colleague for this amendment and he is stating to us that his amendment does not totally reduce the appropriations for these organizations as it relates to last year. There is still a 4-percent increase?

Mr. McDONALD. I say to my colleague from California, an almost 4-percent increase over last year.

Mr. ROUSSELOT. The gentleman is merely trying to slow down this horrendous increase—did the gentleman say it was almost 19 percent?

Mr. McDONALD. Almost a 19-percent increase over what we spent last year.

Mr. ROUSSELOT. So the gentleman is just trying to hold down the increase in these agencies?

Mr. McDONALD. That is correct.
Mr. ROUSSELOT. Well, I compliment my colleague. This sounds very reasonable and I cannot really see why anybody would oppose the gentle-

man's amendment.

Mr. McDONALD. I thank the gentleman from California.

Mr. SMITH of Iowa. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

I want to point out that voting for this amendment will not save any money. We owe the money for these contributions to international organizations under treaties and agreements that have already been signed. The only question is, When do we pay the money?

We have a planned program for gradually deferring up to 1 year of our assessments. The second quarter of that one year deferral is in this bill. In the supplemental bill that we passed just 2 or 3 months ago we deferred \$84 million.

In this bill we have deferred \$160 million. This program was proposed to us by this new administration and we felt it was a reasonable program and we think that it is generally a good

proposal.

Next year they plan to defer a similar amount and the next year another amount so that we would then be in a position to pay our assessment for the year in question in the fourth calendar quarter of that year which would be the first quarter of our fiscal year. If we go too fast, we are really upsetting things in the proposal budgets, as for example, in the Inter-American organizations where our contribution is a much greater percentage than it is in some of the other organizations.

If we go too fast on this planned slippage it will cause great trouble. I think the slippage that is reflected in this bill is all the slippage that we can afford to have or these organizations can afford to have, and it would not save any money to have a bigger slippage.

Mr. McDONALD. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Georgia.

Mr. McDONALD. I thank the gentleman for yielding.

I would like to ask the gentleman in the well, is it true that the Congress and not the international organization is constitutionally vested with the power to appropriate funds?

And the second question is, would it not be true that if the other member nations of international organizations paid their fair share, with regard particularly to overdue assessments, that we really could perhaps reduce our funding allotments to the United Nations?

For example, I understand the Soviet Union is almost \$200 million in arrears, or possibly even more?

Mr. SMITH of Iowa. Well, the plan is to defer over \$600 million. That is the plan. This is going to be done on a systematic basis. There is \$84 million in the supplemental bill we just passed a couple of months ago. We are going to go another \$160 million in arrears in this bill and additional amounts in 1983 and 1984. We will not be \$200 million in arrears, we will be over \$600 million in arrears. That is our planned

deferral for the payment of our assessments. We are notifying the international organizations in advance to expect this.

Mr. McDONALD. If the gentleman will yield further, in the calendar year 1980 it is my understanding we had a voluntary contribution to the U.N. of over half a billion dollars in addition to the matter of assessments and peacekeeping funds. This was a voluntary contribution of half a billion dollars over and above the assessments and peacekeeping functions,

Mr. SMITH of Iowa. That may have been. I am telling the gentleman what we did in 1981. We dropped \$84 million behind in this bill for 1981. We are dropping another \$160 million for 1982 and I think that is dropping behind our assessments as fast as we can expect to go.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. McDonald).

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

Mr. SMITH of Iowa. Mr. Chairman, I ask unanimous consent that the bill be considered as read through line 17 on page 43.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The CHAIRMAN. Are there any points of order with regard to the material in that section?

Are there any amendments to the remainder of the bill?

□ 1700

Mr. SMITH of Iowa. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. Brown of California, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4169) making appropriations for the Departments of Commerce, Justice, and State, the judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to. The SPEAKER. The question is on

the engrossment and third reading of

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. MILLER OF OHIO

Mr. MILLER of Ohio. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. MILLER of Ohio. Yes, in its present form, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. MILLER of Ohio moves to recommit the bill, H.R. 4169, to the Committee on Appropriations.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.
The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were-yeas 245, nays 145, not voting 43, as follows:

Mr. Weaver with Mr. Hollenbeck. Mr. Wilson with Mr. Hillis.

Mr. Jones of Tennessee with Mr. Santini.

Mrs. MARTIN of Illinois. Messrs. HERTEL, RUSSO, and BLANCHARD changed their votes from "yea" "nay.

Mr. DUNN changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was nounced as above recorded.

A motion to reconsider was laid on the table.

TO ENABLE SECRETARY OF AG-RICULTURE TO ASSIST, ON EMERGENCY BASIS, IN ERADI-CATION OF PLANT PESTS AND CONTAGIOUS OR INFECTIOUS ANIMAL AND POULTRY

Mr. DE LA GARZA. Mr. Speaker. I ask unanimous consent that the Committee on Agriculture be discharged from the further consideration of the bill (H.R. 4416) to enable the Secretary of Agriculture to assist, on an emergency basis, in the eradication of plant pests and contagious or infectious animal and poultry diseases, and

ask for its immediate consideration in the House.

The Clerk read the title of the bill.
The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.
The Clerk read the bill, as follows:
H.R. 4416

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Agriculture may, in connection with emergencies which threaten any segment of the agricultural production industry of this country, transfer from other appropriations or funds available to the agencies or corporations of the Department of Agriculture such sums as the Secretary may deem necessary, to be available only in such emergencies for the arrest and eradication of plant pests or contagious or infectious diseases of animals or poultry, and for expenses in accordance with section 102 of the Act of September 21, 1944, as amended (7 U.S.C. 147a), and the Act of February 28, 1947, as amended (21 U.S.C. 114b).

SEC. 2. The provisions of this Act shall become effective upon enactment.

The SPEAKER. The Chair recognizes the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Speaker, the outbreak of the Mediterranean fruit fly in California has received nationwide attention—and deservedly so. This pest poses a grave threat not only to the great fruit and vegetable industry of California—but to the production of other States as well. The implications for farmers and consumers are

Federal authorities are working with State officials and others in California to eradicate the Medfly. Needless to say, the effort takes money. But the investment of funds necessary for control and eradication pales in comparison to the costs which would be borne by producers and consumers should the Medfly not be checked.

Presently, through a provision in an appropriate measure, the Secretary of Agriculture has authority to transfer funds otherwise available to the Department for use in the arrest and eradication of infectious or contagious diseases of animals or poultry. He has no parallel authority with respect to the arrest and eradication of plant pests. Under current urgent circumstances posed by the Medfly, it is critical that the Secretary be in a position to immediately give further emergency assistance in combating the outbreak.

This is the purpose of the bill (H.R. 4416) which I introduced for myself and Mr. Brown of California, Mr. Coelho, Mr. Fazio, Mr. Matsui, Mr. Panetta, Mr. Thomas, and Mr. Wampler, which I urge you to adopt today. It would put into permanent law authority to transfer funds otherwise available to the Department for use in emergency situations that threaten agricultural production. As I have

said, the funds may, under current law, be transferred and used for the arrest and eradication of infectious or contagious diseases of animals or poultry. Our bill would retain this authority and would extend it to cover the emergency arrest or eradication of plant pests. It in no way limits or restricts the Secretary's existing transfer authority; it simply extends that authority to transfer funds in emergency outbreaks of plant pests such as the Mediterranean fruit fly or the Khapra beetle.

Provisions substantially identical to those in the bill under consideration are contained in H.R. 3603, the Food and Agriculture Act of 1981, reported by the Committee on Agriculture. It was carefully considered by the committee and was adopted without opposition.

It is the intent of this provision to give the Secretary broad discretionary authority to address outbreaks of this nature. The authority is to extend to combating animal and poultry diseases and plant pests in the broad sense of those terms, and includes combating causative factors such as insect infestations that cause animal diseases.

The bill also provides that the emergency transfer authority extends to cooperation with nations of the Western Hemisphere in addressing animal and poultry diseases and plant pests that threaten any segment of American agriculture.

The bill will insure that the Department has the flexibility to move immediately to address situations that in the judgment of the Secretary are emergency in nature and thereby mitigate their effect on the agricultural industry of this country. It does not provide for increased funding. Rather, it should result in significant savings because it will allow USDA to control outbreaks and eradicate their causes before they become a major catastrophe for American producers and consumers.

Time is of the essence in this matter. The Department of Agriculture has agreed with the State of California to share certain expenses related to the program being undertaken in that State to eradicate the Medfly. However, within the next day or two, all funds of the Department to carry out its responsibilities under the agreement will have been expended. It is crucial that the eradication program be pursued without interruption. The funding by the State for its share of the program costs is also a severe problem. It is, therefore, essential that this bill be adopted at the earliest possible date to continue the program now underway in California.

I am informed that the administration strongly supports the speedy adoption of this legislation. I implore you to adopt it. It will give immediate assistance to eradication of the Medfly infestation. In addition, it will give the Secretary the tools to move with dispatch in the future in helping to stamp out emergency threats to our food supply posed by plant and animal pests.

Mr. WAMPLER. Mr. Speaker, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Virginia (Mr. WAMPLER) as much time as he may require.

Mr. WAMPLER. Mr. Speaker, I rise in support of H.R. 4416. This legislation would give authority to the Secretary of Agriculture to transfer funds if the need arises for use in emergency pest control. The current Mediterranean fruit fly outbreak in California has created the need for this legislation; consequently, it has become necessary for us to expedite this legislation. No one could argue that the Federal Government should not step in and do everything possible to eliminate this plant pest. The economic impact of the Medfly is both national and international. If steps were not taken immediately to start eradication, the economic losses would be astronomical. Consequently, USDA elected to proceed with its efforts and request the Congress to back them in this effort by passage of this legislation, which gives the authority to transfer USDA funds, already available, to this worthwhile project. According to my information, the funds presently available to the USDA for this purpose are almost exhausted and unless this legislation is moved along rapidly, current efforts will cease. I don't believe any Member is willing to see that happen.

I would point out that the language of this legislation was included in H.R. 3603, the farm bill, and was accepted by the House Committee on Agriculture in its passage on May 18. I would also at this point like to mention legislation introduced by Congressman THOMAS of California, H.R. which is presently scheduled for a hearing on October 1, 1981. This legislation would give further authority to USDA in this all-important fight to control plant pests and I would urge my colleagues to review this legislation. It provides authority for the Secretary to take direct intrastate remedial action, under certain circumstness. to control plant pest outbreaks, thus paralleling USDA authority to control animal disease outbreaks. Currently, the law allows the Secretary to act only when plant pests are moving

Mr. Speaker, I reiterate my support for H.R. 4416 and urge its passage.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. de la GARZA. I yield to the gentleman from California (Mr. Panetta).

Mr. PANETTA. Mr. Speaker, as you and my colleagues know, the vast agricultural industry of California as well

as that of many other fresh fruit and vegetable producing States in the Union is seriously threatened by the present infestation of the highly destructive Mediterranean fruit fly. The Chairman of the House Committee on Agriculture, Mr. Kika de la Garza, has been asked by the administration to lead a bipartisan effort with Representative Wampler to enact on an emergency basis vitally important legislation to address this problem.

Since the outbreak of the fruit fly in California last year, the U.S. Department of Agriculture has been working closely with the California Department of Food and Agriculture in a cooperative effort to rid our State of this pest. That cooperative effort as well as other efforts to eradicate the fruit fly is in jeopardy because the Department has exhausted all the funds available to it for these efforts. To avoid termination of Federal assistance at a crucial point in the comprehensive eradication program presently underway, Congress must act by unanimous consent to give the Secretary of Agriculture authority to tap new sources of funds within his Department to use in the fruit fly eradication effort.

Earlier this year, I introduced legislation which would give the Secretary the authority he now seeks. The chairman, Mr. de la Garza, offered this basic provision as an amendment to the farm bill during committee consideration of that measure. The amendment was adopted without a single dissenting voice after careful consider-

ation and debate.

Circumstance compels us to separate this provision from the farm bill and enact it today by unanimous consent. The sad fact is that the battle against the fruit fly has grown faster than anyone expected. We cannot be certain at this point the extent to which this battle will escalate. We can, however, be certain in our resolve to give this administration the weapon it needs not only to fight this battle, but ultimately to win the war against this insect that has invaded our land.

It is equally important that we make quite clear that our intention in enacting this emergency measure is to insure that the Department of Agriculture will meet its obligation to pay half the costs of the entire fruit fly eradication program. This obligation runs not only to reimbursing for past and future costs of aerial spraying of malathion, but also to trapping and monitoring costs, quarantine and detection efforts, and preventive measures taken in agriculture areas bordering the quarantine zone.

The current problem is compounded by the fact that larval finds keep popping up in new areas. For that reason we appear to be chasing the fruit fly all over the place, rather than containing it within the quarantine area. We must encourage preventive measures in agricultural producing areas in and around the quarantine areas. This will help us stop the fruit fly once and for all. The legislation we are going to enact today will give the Secretary the authority to use Department of Agriculture funds for its portion of the entire effort, including preventive spraying.

I urge my colleagues to support this measure and to join together in a unanimous request to the Senate that it be immediately enacted into law.

Mr. WHITTEN. Mr. Speaker, will

the gentleman yield?

Mr. DE LA GARZA. I will be happy to yield to the gentleman from Mississippi.

Mr. WHITTEN. Mr. Speaker, I would like to commend the gentleman for bringing this bill to the floor. This bill provides authority for an emergency funding mechanism to combat emergency animal and plant diseases and infestations. I would point out that we have worked together on this problem after our friends from California made us familiar with the problem they face with the Medfly.

In the agriculture appropriation bill which passed the House on July 27 and which the Senate has not yet passed, provision is made to add emergency authority for "plants." For many years the Department has had emergency authority with respect to animals. The continuing resolution which we will bring up in a few days will also include emergency authority for plants along with the existing authority for animals. So, we have followed through.

It is good that we work together on the problem not only in California, but in the Northeastern United States where they have the gypsy moth. It may not be as apparent at the moment, but the damage is just as great in that part of the country.

So, there are many reasons why the word "plant" can be put in there as well as animals so that these emergencies can be met.

Mr. DE LA GARZA. I thank the distinguished chairman for his continuous cooperation and assistance in all these matters. It is always a great help to us.

Mr. FAZIO. Mr. Speaker, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from California.

Mr. FAZIO. Mr. Speaker, I would like to congratulate and thank the chairman of the Agriculture Committee as well as my chairman, Mr. Whitten, for their very sensitive assistance to California. Both Mr. Wampler and Mr. Smith also deserve our thanks for the bipartisan cooperation we have seen here at the Federal level.

We had, however, run out of borrowing room, and we cannot find any more funds in the account. This bill the gentleman is offering in coopera-

tion with Mr. Panetta is the solution we are seeking. We thank the gentleman very much.

Mr. Speaker, it has been over a year now since the Medfly first made its appearance on the floor of this House, a year marked by victories for it and some setbacks for us. However, with this extraordinary emergency action today I think we will have once again, gone on the offensive against the Medfly, this tiny elusive pest which threatens not only California's fruit and vegetable industry but agriculture in all our warm weather States.

This authority to borrow from the USDA's other accounts, in particular from the Commodity Credit Corporation which has hundreds of millons in budget authority on its books, basically means that the Federal and State governments can plan and implement sufficient campaign against the Medfly. The immediate purposes for the money are for the Federal side to assume a full half of the costs associated with eradication of the fly incurred during fiscal 1981. USDA officials acknowledged last week in California that the Department has not been able to maintain the 50-percent level to which Secretary Block committed it several months ago. In fact, they said, the USDA would not even be able to sustain the reduced level of effort it has been able to make thus far without emergency funds. They said they needed \$1 million to keep going; between \$6 to \$7 million more to assume full share.

Beyond restoring the imbalance, however, the availability of funds will hopefully allow Animal and Plant Health Inspection Service personnel to plan and carry out a vigorous eradication program. It may take some time, because the extent to which the Medfly has spread and the extent of the infestations where it exists are unfortunately great. Halfway measures will not work. APHIS needs the freedom to commit and the funds to implement eradication programs against all existing and any new infestations. APHIS cannot be hindered by lack of funds or the mere fear of lack of funds. We have yet to determine how much it will cost to finally rid ourselves of this pest, but the costs will be far cheaper than the alternative which is failure to control it.

Mr. COELHO. Mr. Speaker, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from California.

Mr. COELHO. Mr. Speaker, I would like to congratulate the chairman of my committee and also the chairman of the Appropriations Committee for their joint effort in regard to this problem. I applaud the chairman basically because it appears that we are making substantial progress, and with the joint cooperation that is now going

on we can slow down the movement of this particular pest which is now moving into the San Joaquin Valley, which is the grape-producing area in California. So, we applaud the gentleman's effort.

• Mr. MITCHEL. Mr. Speaker, I rise in support of H.R. 4416. This legislation would give the Secretary of Agriculture authority to transfer within the Department of Agriculture the necessary funds for use in the emergency pest control program. The bill does not provide increased funding, just a transfer of moneys within the USDA. Such authority could and must be used now to fight the Medfly outbreak in California.

The Medfly has already done millions of dollars worth of damage to California's agricultural industry. The femal Medfly in its 4- to 6-week life can produce 800 offspring, 400 of which will be female, capable of producing another 800 Medflies. The tremendous reproductive capacity of this insect is truly staggering.

The costs of allowing continuation of this cycle are unacceptably high. It is estimated that if eradication fails and the Medfly becomes a permanent fixture in California, crop losses and containment efforts would total \$1.2 billion the first year and at least \$750 million per year after that.

The problem is not just California's. There is concern that the Medfly may infest other fertile agricultural areas of the United States. Fertile fruit flies have already been found in Florida.

The cost to the farmers are enormous and very little of it has been covered by insurance. The cost of produce at the market will also rise and that will adversely affect American consumers everywhere. Finally U.S. agricultural efforts are endangered. As you know, Japan has threatened to embargo all California agricultural products. Last year, Japan imported over \$100 million worth of California agricultural products. I understand that an agreement was recently reached which for the moment has diffused that problem. But, if the Medfly continues to spread, exports will surely be imperiled.

As a Member from the agricultural State, and a district with many farms in it, I know how devastating an out break like this can be-to the farmer the consumer and to the national economy. H.R. 4416 should be passed without delay.

Mr. DE LA GARZA. Mr. Speaker, I yield back the balance of my time.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Mem-

bers may have 5 legislative days within time all Members may join with me in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

THE LATE HONORABLE CATHERINE DORRIS NORRELL

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, it is my sad responsibility to advise our colleagues of the death of Catherine Dorris Norrell, a former Member of the House from our great State of Ar-

Mrs. Norrell died August 30 in Warren, Ark., following a brief illness. She served Arkansas and the Nation as a Member of this body from April 1961 through 1962. Mrs. Norrell was named to the House in a special election called to fill the vacancy created by the death, in February 1961, of her husband, William Frank Norrell, who had been a Member of the House since 1939. She leaves one daughter, Julia J. 'Judy" Norrell of Washington.

I intend to take a special order on Tuesday, September 15, in memorial to Mrs. Norrell and invite those of our colleagues who wish to speak at that time to join with me.

□ 1730

A TRIBUTE TO THE LATE ROY WILKINS

(Mr. ADDABBO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ADDABBO. Mr. Speaker, Roy Wilkins was a good friend as well as a valued constituent during most of the years I served in Congress. His death yesterday at 80 years of age saddens all of us who worked with him through the years to end racial prejudice by working within the system that needed changing. Throughout his lifetime Roy Wilkins resisted those who would have gone outside of the system in order to bring about change. He lived long enough to know his viewpoints were justified; millions of Americans today have the chance to live richer, more fulfilling lives because of the intensity of Roy Wilkins' concern for our country, and his belief in the inherent decency of the American people.

Roy Wilkins was a good man, Mr. Speaker, and one who grew to be a legend during his lifetime. Because of the many Members who will want to pay tribute to this outstanding personality of our era, I have asked for a special order for next Tuesday at which

paying tribute to this great American.

APPOINTMENT OF CONFEREES ON H.R. 4034, DEPARTMENT OF HOUSING AND URBAN DEVEL-OPMENT, AND SUNDRY INDE-PENDENT AGENCIES, BOARDS, COMMISSIONS, CORPORA-TIONS, AND OFFICES APPRO-PRIATIONS, 1982

Mr. BOLAND, Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4034) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes, with Senate amend-ments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore (Mr. MOAKLEY). Is there objection to the request of the gentleman from Massachusetts? The Chair hears none and, without objection, appoints the following conferees: Messrs. Boland, Trax-LER, and STOKES, Mrs. Boggs, and SABO, WHITTEN, Messrs. COUGHLIN, YOUNG of Florida, and CONTE

There was no objection.

GENERAL LEAVE

Mr. KOGOVSEK. Mr. Speaker, I ask unanimous consent that all Members be permitted to extend their remarks, and to include therein extraneous material, on the subject of the special order speech today by the gentleman from Wisconsin (Mr. ZABLOCKI).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

SOCIAL SECURITY TRUST FUND REFORM ACT OF 1981 INTRO-DUCED

(Mr. SHAMANSKY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHAMANSKY. Mr. Speaker, today I am introducing (along with Congressmen RoE and Won Pat) the Social Security Trust Fund Reform Act of 1981, designed to improve the investment practices and increase the rate of return on the social security trust funds. This legislation was recently introduced in the Senate by Senator PROXMIRE and my fellow Ohioan, Senator METZENBAUM.

This bill is the direct result of the scandalously low return which was earned by the three social security trust funds in fiscal year 1980. The recent annual report of the social security trust fund board of trustees revealed that the combined earnings were a scandalously low 8.3 percent in fiscal 1980 on the \$47 billion in the trust fund. Others, investing exclusively in Government or Governmentbacked securities, earned as much as 13.5 percent in 1980. An additional \$2 billion would have been generated if the trust funds had earned more realistic yields. So far this year, financial institutions investing exclusively in Government or Government-backed issues have earned more than 15 percent. The bill will do four things.

First, provide that the interest rate of the Treasury's special issues will be calculated on the basis of the interest rates paid on all the securities the trust funds are allowed to purchase if the Treasury continues to invest in special issues of the Treasury.

Second, charge the trustees with the responsibility to secure the maximum possible interest yield commensurate with the safety of the trust funds.

Third, require the trustees to modernize their equipment and seek the active advice of such experts that will allow them to maximize the return on the funds' investments.

Fourth, expand the board of trustees of the trust funds from three to seven adding four public representatives to the existing board.

Recently we have been told that because of the dire condition of the social security trust funds, we would either have to cut back on benefits or raise social security taxes. However, if the social security trust funds had been earning more realistic rates of return on their investments, at least an additional \$2 billion would have been generated into the trust funds.

The recent annual report of the social security trust funds board of directors reported that on June 30, 1980, there was \$46.845 billion in those three funds-\$23.565 billion for old age and survivors insurance (OASI); \$7.68 billion for disability insurance (DI); and \$14.6 billion for hospital insurance (HI).

But the report also showed that the interest rate or rate of return on those funds for the year was shockingly low. The combined earnings were only 8.3 percent.

The OASI fund earned 8.3 percent; the DI fund earned 8.8 percent; and the HI fund earned only 8.2 percent. The average was 8.3 percent. This was no accident. It was done by design.

There are at least three reasons for the low rate of return on the trust

First, the conflicts of interest and responsibility at the highest level of the trust fund management. The actual management of the funds is at the Treasury. The managers and trustees of the funds have put the interest of the Treasury; that is, keeping Government borrowing costs down, before the interests of the trust funds; that is, earning high yields;

Second, poor management techniques and equipment; and

Third, outmoded regulations and laws. This bill would correct the situation.

First, by assuring a higher rate of return, it would bring in several bil-lions of dollars a year into the social security trust funds, helping to insure the continued solvency of the social security system.

Second, the trustees must act as trustees, be divorced from conflicts of interests, and put the interests of the trust funds before the interest of the Treasury or any other group.

By enlarging the board of trustees to include four public members and by charging all seven trustees with the duty to maximize the return to the social security funds, this bill will insure that the Treasury no longer continues to run the funds in its best interest instead of in the best interest of the social security funds.

At the present time there are three trustees. They are the Secretary of the Treasury, the Secretary of Labor. and the Secretary of Health and Human Services.

The four new trustees, to be appointed by the President with the advice and consent of the Senate for 4year terms beginning on January 1, 1982, would be as follows:

One would be a representative from the employers who contribute to the funds.

One would be a representative of the beneficiaries of the trust funds.

One would be a highly skilled investment counselor or manager with experience in investing funds for an insurance company or money market fund.

Third, this bill requires the trustees to use the most technologically advanced management techniques available to maximize the return to the trust funds.

Some have said that this reform of the social security trust funds could have a disruptive effect on the securities markets as a whole if the social security trust fund investments are taken out of the low-yield Treasury special issues. The trust funds' conversion to higher yielding Government and Government-backed securities from the low-rate special issues can and should be accomplished gradually. A gradual shift in the trust funds' investments simply will not have a disruptive effect on the securities mar-

Why should social security recipients and the social security system bear the burden of subsidizing the Treasury debt? It is most unfair to force the social security system to subsidize the Treasury in order that the Treasury Department can reduce the interest paid on the public debt. If the President wants to lower the level of public borrowing and reduce the interest paid on the public debt, then reduce the level of expenditures by the Federal agencies; do not rob the social security trust funds to pay the Treasury.

AIR CONTROLLERS STRIKE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina (Mr. HARTNETT) is recognized for 5 minutes. • Mr. HARTNETT. Mr. Speaker, during the August congressional recess, there has been considerable discussion and media attention to President Reagan's decision to give the Professional Air Traffic Controllers Organization (PATCO) 48 hours to return to work from their strike or face the consequences of losing their jobs.

I would like to share with my colleagues a letter which I received from Mr. Vernon B. Strickland, chairman of Hawthorne Aviation in my district of Charleston, S.C.:

HAWTHORNE AVIATION, Charleston, S.C., August 11, 1981. Mr. WILLIAM C. WILSON,

Chief, ATC Tower, Federal Aviation Administration, Charleston, S.C.

DEAR BILL: I have been flying off the Charleston Airport since 1942, and feel I have some qualifications to judge the quality of service being offered by our air traffic control facility. As you may recall, I have on occasion remarked that I feel that the Charleston facility has traditionally been

one of the best in the nation. Since the PATCO strike began, I have had

two occasions to fly one of our aircraft out of Charleston. I can truthfully say that I found the service from our Charleston air traffic control facility to be as good, if not better, than I have received in the past.

Following my experience, I checked with our Operations Department here at Hawthorne and found that everyone I talked with had had a similar experience.

It occurs to us at Hawthorne that, amid all the press coverage that is being afforded the strikers, someone should take the time to say "thank you" to the people who are allowing our aviation industry to continue to function at a high level of capacity and safety, in spite of the illegal actions that have attempted to disrupt it.

I hope that you will express our thanks and appreciation to all of the people of the Charleston facility who are still working so diligently to provide the aviation industry and the Charleston community with their usual fine service. We know that this has required considerable extra effort on the part of all of the personnel, and we want them to know that we appreciate it. We are still convinced that Charleston has the best facility in the country.

Sincerely,
VERNON B. STRICKLAND,
Chairn

Chairman.

DEFENSE APPROPRIATION BILL FOR 1982 WILL BE DELAYED THIS YEAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO)

is recognized for 10 minutes.

ADDABBO. Mr. Speaker, I regret to inform the House that the Department of Defense appropriation bill for fiscal year 1982 will not be before the House prior to the beginning of the new fiscal year on October , and that the Department of Defense will, therefore, be funded for some period of time under the continuing resolution.

The Defense appropriation bill is the largest apropriation bill which the House considers each year. The workload in preparing the bill for the House is the greatest of any of the annual appropriation bills. We always plan and hope that the bill will be enacted into law by the beginning of the new fiscal year so that the various programs may proceed in an orderly way.

In a year when there is a new administration which has made a number of changes in the budget, it is not surprising that there would be some delays, but the delay we are faced with this year is greater than would be usually expected. All of us who read the newspapers are aware of the fact that the size of the Defense budget is an issue under active debate at the highest levels of the administration at this time. We are aware that major weapons systems decisions such as how to proceed with a new intercontinental ballistic missile and a new intercontinental strategic manned bomber have not yet been made.

Before the August recess, I had requested, as chairman of the Subcommittee of Defense Appropriations, that the Secretary of Defense appear before the committee on the 15th and 16th of this month to present the administration's final position on the Defense budget. The Department had agreed. I have now been informed that the Secretary does not anticipate that firm decisions will have been made by the administration at that time and, at the Secretary's request, that hearing has been postponed until September

24, 1981.

Not only is the fiscal year 1982 Defense budget still under consideration, but the administration is having great difficulty in deciding on the level of Defense spending in fiscal years 1983 and 1984. At a hearing held by the Defense Appropriations Subcommittee on July 21, 1981, I asked Dr. DeLaurer, Under Secretary of Defense for Research and Engineering, when the 5year Defense plan, which is the standard planning document of the Defense Department, would be completed and available. I was told that it would be available by the first of September, but it is not. Along with many of the other members of the committee, I do not feel that we can mark up the fiscal year 1982 Defense appropriation bill until we know what the administration's plans for future years may be. At a time when we are being asked to cut back on many essential people programs, it would be extremely unwise to appropriate money in fiscal year 1982 for defense programs which the administration plans to cancel in fiscal year 1983 or 1984.

I well understand the difficulties they are facing having wrestled with the problem of Defense appropriations for many years. I hope that they are realistic and that they become aware that we do not always improve our military power by throwing more money at the Defense Department. Wise planning and prudent management will always be necessary factors in an adequate defense posture.

I merely want to point out to the Members that the delay in the Defense bill is not caused by the Congress or any of its committees, but by

the administration.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gen-

tleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I want to commend the gentleman from New York (Mr. ADDABBO) for his fine statement and associate myself with his remarks. I wish to make only one correction, though, and that is that the Health, Education, and Welfare bill is the largest bill in the budget.

Mr. ADDABBO. Mr. Speaker, I yield to the gentleman on that. I thank the gentleman from Massachusetts (Mr. CONTE), and I thank him also for his help on the Appropriations Commit-

COMMEMORATION OF THE AN-NIVERSARY OF THE INVASION OF POLAND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. Annunzio) is

recognized for 5 minutes. •Mr. ANNUNZIO. Mr. Speaker, 42 years ago a tragic event occurred in the history of Poland and the world's free nations. It was during September 1939, that the peaceful State of Poland was invaded by the forces of Nazism from the West and the forces of communism from the East. Poland became a tyrannized and persecuted country, deprived of half its territory

and millions of its people.

Often forced to survive for months, or even years, in forests and mountains, members of the resistance and the Polish populace at large reacted consistently with spirit and conviction. Refusing to betray their national honor and collaborate with the enemy, 6 million Poles preferred self-respect and death to capitulation and cringing life. The nation lost close to one-quarter of her population, and the romantically beautiful city of Warsaw, the Polish capital, was leveled to the ground.

As we again observe this anniversary in the House of Representatives, I am honored to join Americans of Polish descent in Chicago and all over the Nation in their hopes and prayers for the reentry of Poland into the community of free nations. The long-suffering people still look to a strong America for moral support in their continuing struggle to achieve their just aspirations to national liberty.

Mr. Speaker, excerpts from an article on the present situation in Poland entitled, "The Campaign Against Poland Continues," forwarded to me by the Polish American Congress, Aloysius A. Mazewski, president, follow:

[From the New York Times, May 18, 1981]

THE CAMPAIGN AGAINST POLAND CONTINUES

Since the conclusion of the Gidansk Agreement in August 1980, Soviet media have been waging a campaign that misrepresents and vilifies the efforts of the Polish people to achieve democracy, justice, and stability in their country. The trade-union federation "Solidarity," the Social Self-Defense Committee KOR, and those within the Polish Communist Party who wish to create a genuine partnership between the government and the rest of society have all been targets of extravagant allegations, all of them demonstrably false. This campaign, echoed by Czechoslovak and East German media, continues despite the determination of Poles from all walks of life to avoid further confrontations and to solve their problems by peaceful and constructive means Here are but a few of the many allegations. together with the facts:

ALLEGATION

"Solidarity wants to declare war on the people's power." (Radio Moscow, March 26) "Opponents of socialism are influencing Solidarity, conducting political activity against the Polish Constitution, usurping the powers of state, flouting laws and trying to plunge the country into economic and political choas." (Literaturnaia gazeta, Moscow, April 29.)

Both Solidarity and KOR have consistently asked the Polish Government to be responsive to the needs of the people and have offered to cooperate fully with the authorities in implementing reforms that would benefit society as a whole. They have opposed abuses by the police and the security apparatus, but have not questioned the need for these bodies to exist and perform their functions in accordance with Polish

ALLEGATION

"Solidarity leaders are strongly influenced by the counterrevolutionary organization KOR which seeks to topple the socialist system in Poland and wrest the country from the community of socialist countries. (Pravda, April 2)

Lech Walesa, head of Solidarity: "We are not against the Government, the Party, socialism and Poland's military alliances. We will never want to be a political party or an organization attempting to do away with the Party. We don't want this to happen and will not try to bring it about." (Radio Warsaw, March 27.)

ALLEGATION

"KOR is setting Poles against Poles and calling them to the barricades of fratricidal struggle."(Literaturnaia gazeta, April 16)

Jacek Kuron (one of the leaders of KOR) "talks of destroying the state structure of Poland." (Radio Moscow, May 7, also Literaturnaia gazeta, May 6)

FACT

Jacek Kuron, in an interview published in Le Mondo (Paris), January 9: "The decision-making power on important questions such as foreign policy, army, security, must remain in the Communist Government's hands," but "it should be exercised within a strict legal framework . . . All domestic questions . . . should be subject to negotiations between society and the government. It is ridiculous to accuse us of aspiring to a dual-power system."

ALLEGATION

"Local Solidarity chapters are trying to intimidate workers. Lists of persons who are to be removed are being prepared in a number of districts... Subversive elements operating in the Kielce voivodship (province) have set up roadblocks... In Warsaw and other cities, anti-socialist forces attempted to seize post offices. In Warsaw they managed to seize for some time a television transmitter." (TASS dispatch from Warsaw, March 29, repeated several times subsequently.)

FACT

All these statements have been categorically denied by official media—e.g., Radio Warsaw and Polish Television on March 29: "There have been no obstacles, roadblocks, or any other traffic obstruction." "The work of television stations has been going on uninterruptedly." Also, Solidarity denied any instructions "to remove people," adding that such lists "would be absolutely useless". The reports about roadblocks are "absolutely false." (March 29)

ALLEGATION

"On the eve of the events in Bydgoszcz, Jan Rulewski Ione of the Solidarity leaders brutually beaten up on March 191," "while driving a car, knocked down a 33-year old pedestrian, causing his death . . . The traces of 'beating up' were received as a result of this accident." (TASS dispatch from Warsaw, April 2.)

FACT

The press spokesman for the General Procurator's office in Warsaw stated that Rulewski had been exonerated of any criminal responsibility in the death of a pedestrian involved in a car accident on March 15. According to the spokesman, Rulewski sustained no injuries whatsoever during the accident. (Report in *Kurier Polski*, Warsaw, March 24.)

ALLEGATION

"Former Nazis," "White Russian emigre circles," and "neo-fascist groups in Western Europe" are sending "instructions to antisocialist forces in Poland." (Literaturnaia gazeta, Moscow, April 8.)

Among the "activities of revenge-seeking quarters in the Federal Republic of Germany" is "the distribution of German-language leaflets in the Western regions of Poland, in which claims are made to this part of Poland." (Pravda, April 2; also Radio Moscow, April 14, TASS, May 5.)

FACT

In a telegram to Prime Minister Wojciech Jaruzelski and in a statement of April 9, Solidarity reported the results of a thorough investigation which clearly established that "the various leaflets circulating in Poland do not emanate from West Germany, but have been produced locally," some of them "in the presses of the military plant in Warsaw."

LEGISLATION AUTHORIZING U.S. PARTICIPATION IN MULTINA-TIONAL PEACEKEEPING FORCE IN THE SINAI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. Zablocki) is recognized for 5 minutes.

• Mr. ZABLOCKI. Mr. Speaker, I am today introducing, by request, legislation proposed by the executive branch authorizing U.S. participation in a multinational peacekeeping force in the Sinai. This force, known as the Multinational Force and Observers (MFO), is an extension of and intended to implement the Egyptian-Israeli

Peace Treaty.

Because of its serious purpose this proposed legislation has several significant implications. It therefore requires intense review and thorough consideration. Hearings intended to accomplish that end have already been held by two subcommittees of the Foreign Affairs Committee; additional hearings and even more scrupulous examination of the question will take place

Together with other members of the committee, I have certain concerns regarding the proposal. At the same time, I remain fully committed to the Camp David Accord, and believe it should be extended to a comprehensive peace in the Mideast.

In the meantime, the Foreign Affairs Committee can be expected to continue its review of the question and ultimately work its will in a manner preserving the best interests of the United States.

United States.

• Mr. BROOMFIELD. I am joining with the chairman of the Committee on Foreign Affairs, Mr. ZABLOCKI, in introducing, by request of the administration, legislation on the Sinai Multinational Force. In so introducing this legislation by request, I note that sevthe committee, eral members of myself included, still have reservations on certain aspects of the issue. There is not doubt that some type of a multinational force is part of the Camp David agreement, and therefore, assists the Israelis and Egyptians in furthering the peace process. I believe, nevertheless, that we cannot take lightly the introduction of American combat troops into any area

It is noteworthy that Fiji has already agreed to supply a battalion of approximately 500 men for the Sinai Multinational Force. In view of the small population of Fiji and the 12 troops they have already lost in Lebanon with UNIFIL, I have the utmost praise and respect for Fiji. I believe

that if other countries would follow Fiji's sterling example in furthering the cause of peace worldwide, our own burden in the Sinai would be more equitably distributed among the family of nations.

The Subcommittees on International Security and Scientific Affairs, and Europe and the Middle East have already begun to examine this issue. It is now appropriate for the full committee to address the concept and detailed implementation of a Sinai Multinational Force. I know that the full committee will conduct its examination of the proposed legislation in a thorough and responsible manner.

ANNOUNCING PASSING OF FORMER CONGRESSMAN JAMES A. HALEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. IRELAND) is recognized for 5 minutes.

• Mr. IRELAND. Mr. Speaker, it is with great sadness that I come before you today to announce the passing of former Congressman James A. Haley, who passed away in his sleep at home in Sarasota, Fla., on August 6. He was 82 years old.

Jim was elected to the Congress on November 4, 1952, and served his constituents for 24 years, until he retired in 1976. His constituents were well aware of his efforts on their behalf and overwhelmingly reelected him every 2 years.

During his tenure in Congress, he was chairman of the House Interior and Insular Affairs Committee, chairman of the House Subcommittee on Indian Affairs and chairman of the House Subcommittee on Hospitals, of the House Veterans' Affairs Committee.

Prior to coming to Washington, Jim was elected for two terms to the Florida House of Representatives where he became known as Mr. Economy and was voted most outstanding member.

Before he served in the Florida Legislature, he served as president and director of Ringling Bros., Barnum & Bailey Combined Shows from 1946 to 1948. He was also instrumental in the establishment of the John & Mable Ringling Museum of Art in Sarasota, Fla., as a Florida State museum.

Jim was a hard-working and conscientious Congressman who served our country and district well. He was a personal friend to me and I feel a deep loss at his passing.

I have asked that on Wednesday, September 23, we will have a special order so that the Members will have an opportunity to eulogize our friend, Jim Halev.

A TRUE WORLD VIEW

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CROCKETT) is recognized for 5 minutes.

• Mr. CROCKETT. Mr. Speaker, several weeks ago, I sent to many of my constituents copies of my remarks in the House opposing the Reagan budget cuts, increases in military spending, and the tax cuts. I asked for response to these remarks, and have been very pleased by the overwhelmingly supportive comments I have received.

Among these responses, none is more eloquent, none better states the worldwide issues involved in our national spending priorities than that of Sister Joanette Nitz, of the Sisters of St. Dominic.

I would like to share her letter with my colleagues in the House, and enclose it in the RECORD for their information:

SISTERS OF ST. DOMINIC, Detroil, Mich., August 31, 1981. Representative George Crockett, Jr., 1531 Longworth, Washington, D.C.

Dear Representative Crockett: I have just received your statements made on the House floor relative to war, peace, and budget cuts. I am writing to thank you for your ability to get at the heart of the matter and speak this truth clearly at a time when so many legislators have forgot-

ten the people and their needs.

have written to each and all of our lawmakers my position on El Salvador and also on Angola and South Africa. I am now appalled with the developments in Libya and North Korea, I am convinced that possible 'Soviet" communist aggression is a screen" to divert our attention from budget cuts and efforts to keep military spending as proposed by Reagan et al. I agree with you and others who are well aware that if communists make gains it is the result of our involvement with dictatorial, repressive governments in both Latin America and Africa; governments who oppose freedom, human rights, the equality of the poor and working class people in nations seeking development.

Recently I attended a two-day seminar against apartheid sponsored here in Detroit with excellent input by the UN. This was a serious attempt to alert our community of the part Detroit big business plays in the furthering of oppression and unrest in the African world. (Similar to what has been happening in Latin America). And the impact of that same big business taking jobs to the extremely poverty-stricken nonunionized workers of those countries and leaving U.S. workers unemployed.

I recently discovered a pro-Reagan publication sent to a prominent Detroiter. It was the Namibian Gazette. The boogey-man of communism was found in most every line of

this paper.

I support the proposals of the UN membership which is struggling to bring us to recognize racism here and abroad; recognize the reality of apartheid and our feeding into it through involvement with the government of South Africa. We must stop money and military arms/advisors in El Salvador, Africa, Lybia.

In any vote taken on such matters, I trust you will stand in opposition to those endeavoring to kill liberation of the common

people through our unwarranted cry of "communism" and our provision of military aid to the militant, racist government in nower.

I do not deny Soviet and Cuban involvement. We must, however, recall that we turned Cuba toward the Soviet Union 21 years ago. And now we are doing the same thing in Central America; Nicaragua and El Salvador are Christian based countries seeking to initiate democratic socialism. As in Cuba, we are trying to kill the movement of the people. Our present response to Namibia, SWAPO, etc., is using anti-Cuban, anti-Soviet propaganda as a cover rather than facing the reality of our alignment with South Africa and big business enslaving people there and at home.

We need tax money for human services in our own country and in the developing nations. We do not need more military expenditures.

Sincerely,

Sister JOANETTE NITZ, OP.

LEGISLATION TO IMPROVE MANAGEMENT AND THE RATE OF RETURN ON INVESTMENTS TO SOCIAL SECURITY TRUST FUNDS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Dakota (Mr. DASCHLE) is recognized for 5 minutes. Mr. DASCHLE. Mr. Speaker, there has been a great deal of uproar in recent weeks over suggestions to reform social security. The Reagan administration, in my opinion, has seen fit to unnecessarily alarm the elderly population in our society with dire predictions that the system will go broke unless immediate and drastic changes are made. The fact of the matter is that this Government is not going to let the social security system go broke. This is not to say, however, that changes are not necessary. It is simply stating that we can come up with better solutions to reform the system than cutting benefits or threatening the immediate retirement plans of millions of Americans. One change I feel would be of immediate significance would be to improve the management and return on investment of the three social security trust funds.

By law, the three trust funds—OASI, HI, DI—must be invested only in Government or Government-backed securities. Last year, Government securities on the average earned around 13½ percent, some of them paying as high as 15 percent. Yet, the three social security trust funds only earned on the average 8½ percent. This might lead one to ask why is there such a discrepancy and could not the trust funds be receiving a greater rate of return on their investments.

First of all, it is important to keep in mind that most of the trust fund money is invested in special issue Treasury securities. In 1960, Congress approved legislation which prevented the trust funds from earning on these special obligations more than the aver-

age market yield on all interest-bearing marketable obligations of the United States not due or callable for 4 years or more. Thus, in effect, the trust funds can only receive interest based on long-term securities. In years of low interest, this is sound investment policy, but in years of high interest, as is now the case, the trust funds are accruing interest at an artificially low rate below what other investors are receiving on Government securities.

Thus, I have introduced legislation (H.R. 4382), identical to a bill introduced by Senator William Proxmire, which would make the necessary changes in the social security laws and allow the trust funds to receive a higher rate of return on their investments. The bill would achieve this goal through the following steps.

The board of trustees responsible for investing the trust funds is currently composed of the Secretaries of Labor, Health and Human Services, and Treasury. My legislation would expand the board to include a representative of employers, employees, and beneficiaries. In addition, an investment counselor would also be included on the The investment counselor would be responsible for advising the board of the most prudent and lucrative investment possibilities consistent with the law limiting investments to Government or Government-backed securities. By expanding participation on the board, the views of those affected by social security will be better represented.

Second, this legislation charges the trustees with the responsibility of securing the maximum possible interest yield commensurate with the safety of the funds.

Third, the bill would amend the law Congress passed in 1960 and require that if the trustees continue to invest in special Treasury issues the interest rate paid on the special issues will be based on the interest rates paid on all the securities the trust funds are allowed to purchase, and not just the rate of return on long-term investments, as has been the case.

Finally, this legislation allows the trustees to modernize their equipment and seek the advice of such experts that will allow them to maximize the return on the funds and give them the flexibility necessary to enter and invest in both long- and short-term securities.

Mr. Speaker, I have calculated that if this legislation had been in effect over the last 3 years, and that if the trust funds had been invested optimally, an additional \$5 billion in interest could have been accrued on the trust fund investments. Last year alone, \$2 billion could have been added to the trust fund coffers. I would like to note that this figure is equal to 60 percent

of the \$3.3 billion combined deficit the trust funds suffered in 1980. I would surmise that there might not have even been a need to eliminate the minimum benefit had these savings been achieved over the past few years.

This legislation is not a panacea. But it is an important step and should be a part of any plan devised to straighten out the financial problems currently imperiling the OASI account. The fact of the matter is that we have now embarked on a series of new economic policies which appears likely to maintain high interest rates. I certainly hope that high interest rates will not continue, but we should at least be prepared to take advantage of the situation while it still exists by giving the Social Security Board of Trustees the flexibility and capability to invest a larger portion of the trust funds into Fannie Mae (FNMA), Ginnie Mae (GNMA), or other short-term Government-backed securities which are now paying 16 to 18 percent.

It is purely and simply a case of improved management and investment practices, a policy that is stressed to achieve cost savings throughout our Government and a policy the new administration as well as the Congress has taken to heart. Mr. Speaker, I can think of no other step that is as painless as this to improve the financial condition of the social security system. I reemphasize that my bill does not propose raising FICA taxes, raising the retirement age, or cutting benefits. I am hopeful that the administration will see the merits of this bill and that my colleagues will become cosponsors.

The bill follows:

H.R. 4382

A bill to amend the Social Security Act to provide for improved management of the social security trust funds and increase the return on investments to those funds

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 201(c) of the Social Security Act is amended-

(1) by inserting "(1)" after "(c)";

by redesignating paragraphs through (5) as subparagraphs (A) through (E), respectively;

(3) by striking out "in paragraph (2) above" and inserting in lieu thereof "in sub-

paragraph (B)";

(4) By striking out "the Secretary of Health, Education, and Welfare, all ex offi-cio" and inserting in lieu thereof "the Secrecio" and inserting in lieu thereof tary of Health and Human Services, all ex officio, and four individuals appointed by the President, by and with the advice and consent of the Senate, in accordance with paragraph (2)"; and

(5) by adding at the end thereof the fol-

lowing new paragraph:

"(2)(A) The President shall appoint, by and with the advice and consent of the Senate, four individuals to be members of the Board of Trustees for terms of four years, beginning in 1982. The four individuals shall be-

"(i) one representative of employers; "(ii) one representative of employees; "(iii) one representative of individuals re-

ceiving benefits under this title; and "(iv) one individual who is highly qualified in the field of management of investment funds.

"(B) Vacancies occurring on the Board of Trustees shall be filled in the same manner as original appointments, and any individual so appointed shall serve out the unexpired

term of his predecessor.

(C) Each member of the Board of Trustees who is not a full-time employee of the 'ederal Government shall be entitled to per diem compensation at rates fixed by the President, but not more than the current per diem equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day (including traveltime) during which the member is engaged in the actual performance of duties vested in the Board, and all members of the Board of Trustees shall be allowed, while away from their homes or regular places of business in the performance of service for the Board, travel expenses (including per diem in lieu of subsistence) in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.".

(b) Section 201(d) of such Act is amend-

(1) by striking out the first sentence and inserting in lieu thereof the following: "It shall be the duty of the Board of Trustees to invest such portion of the Trust Funds as is not, in its judgment, required to meet curwithdrawals, and such investments shall be made so as to secure the maximum possible interest yield, commensurate with the safety of the Trust Funds.";

(2) by inserting immediately after "then forming a part of the public debt" the fol-lowing: ", all marketable interest bearing obligations which are not obligations of the United States but which are guaranteed as to both principal and interest by the United States, and all marketable federally sponsored agency interest-bearing obligations that are designated in the laws authorizing their issuance as lawful investments for fi duciary and trust funds under the control and authority of the United States or any officer of the United States".

(3) by striking out "which are not due or

callable until after the expiration of four years from the end of such calendar

month"; and

(4) by adding at the end thereof the following new sentence: "The Managing Trustee shall secure such equipment and enlist the services of such experts as may be necessary for the purpose of allowing the Board to make investments which will secure the maximum possible interest yield.

(c) Section 1817(b) of such Act is amended by striking out "composed of the Secretary of the Treasury, the Secretary of Labor, and the Secretary of Health, Education, and Welfare, all ex officio" and inserting in lieu thereof "composed of the same individuals who compose the Board of Trustees of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund (as specified in section 201(c))"

(d) Section 1817(c) of such Act is amend-

(1) by striking out the first sentence and inserting in lieu thereof the following: "It shall be the duty of the Board of Trustees to invest such portion of the Trust Funds as is not, in its judgment, required to meet current withdrawals, and such investments shall be made so as to secure the maximum possible interest yield, commensurate with the safety of the Trust Funds"

(3) by striking out "which are not due or callable until after the expiration of 4 years from the end of such calendar month"; and

(4) by adding at the end thereof the following new sentence: "The Managing Trustee shall secure such equipment and enlist the services of such experts as may be necessary for the purpose of allowing the Board to make investments which will secure the maximum possible interest vield.

(e) Section 1841(b) of such Act is amended by striking out "composed of the Secretary of the Treasury, the Secretary of Labor, and the Secretary of Health, Education, and Welfare, all ex officio" and inserting in lieu thereof "composed of the same individuals who compose the Board of Trustees of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund (as specified in section 201(c))"

(f) Section 1841(c) of such Act is amended-

(1) by striking out the first sentence and inserting in lieu thereof the following: "It shall be the duty of the Board of Trustees to invest such portion of the Trust Funds as is not, in its judgment, required to meet current withdrawals, and such investments shall be made so as to secure the maximum possible interest yield, commensurate with the safety of the Trust Funds."

(2) by inserting immediately after "then forming a part of the public debt" the fol-lowing: ", all marketable interest bearing obligations which are not obligations of the United States but which are guaranteed as to both principal and interest by the United States, and all marketable federally sponsored agency interest-bearing obligations that are designated in the laws authorizing their issuance as lawful investments for fiduciary and trust funds under the control and authority of the United States or any officer of the United States"

(3) by striking out "which are not due or callable until after the expiration of 4 years from the end of such calendar month"; and

(4) by adding at the end thereof the following new sentence: "The Managing Trustee shall secure such equipment and enlist the services of such experts as may be necessary for the purpose of allowing the Board to make investments which will secure the maximum possible interest

IMPLEMENTING THE CONVEN-TION ON THE PHYSICAL PRO-TECTION OF NUCLEAR MATE-RIALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. Rodino) is recognized for 5 minutes.

• Mr. RODINO. Mr. Speaker, the worldwide proliferation of terrorist groups intent in achieving their goals through blackmail, extortion, and violence renders it essential that the United States pursue every possible measure to protect its people against this growing threat. We simply can no longer afford the luxury of believing that terrorist activity is something that happens in foreign lands, but could never happen here. It can happen here, and we must be prepared to deal with it.

The terrorist threat is magnified by the increasing numbers of nuclear weapons and the fact that the number of countries with nuclear capabilities continues to grow. Should a nuclear weapon-or the materials needed to build a nuclear weapon-fall into the hands of an extremist group, the potential for widespread destruction and death would be alarming.

As a step toward dealing with this threat, I am today introducing legislation which would amend title 18 of the United States Code by imposing a maximum penalty of 20 years imprisonment and a \$250,000 fine on anyone who without authorization possesses or uses, or steals, extorts, or threatens to use nuclear materials in a way causing or likely to cause death or serious injury to any person or substantial damage to property. Conspiracies and attempts to perform such acts are likewise punishable under this proposal.

This bill, which has been endorsed not only by this administration, but also by the prior administration, implements a key provision of the Convention on the Physical Protection of Nuclear Materials. The convention, which was a U.S. initiative, requires State parties to impose criminal sanctions upon persons who commit nuclear materials-related crimes of the type addressed in this bill. To date, 26 nations, including the U.S.S.R., France, and Great Britain have signed the convention. Further, by a recent vote of 98-0, the Senate has agreed that the convention should be ratified.

This proposal thus serves a twofold purpose: Deterring and punishing extremely dangerous conduct and insuring that the United States lives up to its international commitments. The bill follows:

H.R. 4442

A bill to amend title 18, United States Code, to implement the Convention on the Physical Protection of Nuclear Material, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Act for the Implementation of the Convention on the Physical Protection of Nuclear Material"

SEC. 2. Title 18, United States Code, is amended by inserting after chapter 69 thereof the following new chapter:

"Chapter 70.-NUCLEAR MATERIALS "Sec

"1445. Prohibited transactions involving nuclear materials.

"§ 1445. Prohibited transactions involving nuclear materials

"(a) Whoever intentionally-

"(1) receives, possesses, uses, transfers, alters, disposes, or disperses any material in fact containing plutonium or uranium in combination or otherwise without lawful authority which act causes or is likely to cause death or serious injury to any person or substantial damage to property;

"(2) commits a theft or robbery of any such material:

(3) embezzles any such material or obtains any such material by fraud:

'(4) attempts to commit any of the foregoing offenses;

'(5) conspires to commit any of the foregoing offenses, if any act to effect the object of the conspiracy is done;

"(6) demands such material by threat or use of force or by any other form of intimidation; or

"(7) threatens-

ernments.

"(A) to use any such material to cause death or serious injury to any person or substantial property damage; or

"(B) to commit an offense described in paragraph (a)(2) of this section in order to compel action or inaction by a natural or legal person, international organization, the United States or a foreign government or any political subdivision within those gov-

shall be fined not more than \$250,000 or imprisoned not more than twenty years, or

"(b) There is federal jurisdiction over an offense described in this section if-

"(1) the offense is committed in any area under the jurisdiction of the United States, including any of the places within the provisions of sections 5 and 7 of this title and section 101(38) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1301(38));

'(2) the offense is committed by a nation-

al of the United States:

'(3) the material containing the plutonium or uranium concerned was in use, storage, or transport for peaceful purposes and the alleged offender is present within the United States: or

"(4) the material containing the plutonium or uranium concerned was at the time of the offense in shipment via any mode-

'(A) to the United States: or

"(B) from the United States and had not arrived at a facility of the receiver within the country of ultimate destination.

"(c) For the purpose of this section

'foreign government' and 'international organization' shall have the same meanings as those provided in section 1116(b) of this title;

'(2) 'national of the United States' means (A) a citizen of the United States, or (B) a person who, though not a citizen of the United States, owes permanent allegiance to the United States;

"(3) 'plutonium' means plutonium with an isotopic concentration not in excess of 80 per centum plutonium 238; and

"(4) 'uranium' means-

"(A) uranium not in the form of ore or ore-residue that contains the mixture of iso-

topes as occurring in nature;

"(B) uranium that contains the isotope 235 or 233 or both in such amount that the abundance ratio of the sum of those isotopes to the isotope 238 is greater than the ratio of the isotope 235 to the isotope 238 occurring in nature; or

"(C) uranium 233

"(d) In the course of enforcement of this

"(1) the Attorney General may request assistance from any Federal, State, or local agency, including the Army, Navy and Air Force, any statute, rule, or regulation to the contrary notwithstanding, and

'(2) the Federal Bureau of Investigation shall investigate all alleged or suspected violations of this chapter.".

SEC. 3. Paragraph 1116(b)(5) of title 18. United States Code, is amended by inserting the following before the period at the end thereof "or a public organization created pursuant to treaty or other agreement under international law as an instrument through or by which two or more foreign governments engage in some aspect of their conduct of international affairs'

SEC. 4. The analysis of part I, title 18. United States Code, is amended by inserting after the entry therein for chapter 69 the following new item:

70. Nuclear Materials.".

THE RETIREMENT OF A FINE PUBLIC SERVANT-ROBERT OUYE, MAYOR OF MARINA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

Mr. PANETTA. Mr. Speaker, it is with both pride and sadness that I bring to the attention of my colleagues the retirement of a fine public servant, the mayor of Marina, Calif., Bob Ouye. Bob has been an indispensable asset during the early years of Marina's existence as a city-it was incorporated only in 1975-and the city, which is in my district, will not find it easy to replace him.

Bob served his Nation for many years before he returned to the service of a more local constituency. He served in the U.S. Army for some 20 years and was wounded in both Korea and Vietnam. In 1972, he was discharged from the Army after his second tour of duty-and second

injury-in Vietnam.

When Bob returned to California for good, he was hired as sheriff's deputy for Monterey County, and he has served in that capacity ever since. In 1975, when Marina was incorporated, Bob was selected as a charter member of its new city council, and in 1978, he was chosen by the council as the city's second mayor. When the citizens of Marina voted for their mayor for the first time, in 1980, Bob was again elected.

Under Bob Ouye's tenure, the city of Marina has made tremendous strides in several important areas, particularly in its efforts to improve public safety and enhance its recreational facilities. Bob has been instrumental in focusing attention on these important goals.

In addition, Bob has set and example of integrity and public service by not accepting a salary for his job as mayor. This has been a sign of his dedication to working for the public, and it is that spirit of selflessness that will be missed most by the people of Marina.

Mr. Speaker, I know all of my colleagues join me in wishing Bob the best of luck in the years ahead. It is my hope that the health problems that have forced him to resign will be eased considerably by his stepping down and that he will continue to devote at least some of his time to the public good, as he has now for so many years.

LEAVE OF ABSENCE

By unanimous consent, leave of ab-

sence was granted to:

Mr. Jones of North Carolina (at the request of Mr. WRIGHT), for September 9, 10, and 11 on account of a necessarv absence.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted

(The following Members (at the request of Mr. Wolf) to revise and extend their remarks and include extraneous material:)

Mr. DANNEMEYER, for 30 minutes

today

Mr. HARTNETT, for 5 minutes, today. (The following Members (at the request of Mr. Kogovsek) to revise and extend their remarks and include extraneous material:)

Mr. Addabbo, for 10 minutes, today. Mr. STOKES, for 5 minutes, today,

Mr. Gonzalez, for 30 minutes, today. Mr. Annunzio, for 60 minutes, today.

Mr. Zablocki, for 5 minutes, today.

Mr. IRELAND, for 5 minutes, today.

Mr. CROCKETT, for 5 minutes, today. Mr. DASCHLE, for 5 minutes, today.

Mrs. Collins, of Illinois, for 5 minutes, today.

Mr. Rodino, for 5 minutes, today. Mr. PANETTA, for 5 minutes, today.

Mr. ADDABBO, for 60 minutes, September 15, to lead memorial tributes to the late Roy Wilkins.

Mr. ALEXANDER, for 60 minutes, September 15.

Mr. Dixon, for 60 minutes, September 16.

Mr. IRELAND, for 60 minutes, September 23, to lead memorial tributes to the late Honorable James A. Haley of Florida.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was

Mr. Weiss, immediately prior to the vote on the Sensenbrenner amendment to H.R. 4169 in the Committee of the Whole today.

Mr. Hughes, at the conclusion of general debate on H.R. 4169 in the Committee of the Whole today.

(The following Members (at the request of Mr. Wolf) and to include extraneous matter:)

Mr. VANDER JAGT in two instances. Mr. Broomfield in two instances.

SENATE ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to enrolled bills and a joint resolution of the Senate of the following title:

S. 547. An act to enable the Secretary of the Interior to erect permanent improvements on land acquired for the Confederated Tribes of Siletz Indians of Oregon;

S. 694. An act to authorize supplemental appropriations for fiscal year 1981 for the Armed Forces for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles and for research, development, test. and evaluation to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for such fiscal year, to authorize sup-plemental appropriations for such fiscal year for construction at certain military installations, and for other purposes;

S. 875. An act to authorize the generation of electrical power at Palo Verde Irrigation

District Diversion Dam, Calif.; and

S. J. Res. 87. Joint resolution to authorize and request the President to designate September 13, 1981, as "Commodore John Barry Day."

ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 3982. An act to provide for reconciliation pursuant to section 301 of the first concurrent resolution on the budget for fiscal

year 1982; and

H.R. 4242. An act to amend the Internal Revenue Code of 1954 to encourage economic growth through reductions in individual income tax rates, the expensing of depreciable property, incentives for small business, and incentives for savings, and for other

BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on the following days present to the President, for his approval, bills and a joint resolution of the House of the following title:

On August 5, 1981: H.R. 1100. An act to amend title 38, United States Code, to improve certain benefit programs of the Veterans' Administration for veterans who are former prisoners of war, and for other purposes; and

H.J. Res. 141. A joint resolution authorizing and requesting the President to issue a proclamation designating the period from October 4, 1981, through October 10, 1981, as "National Schoolbus Safety Week."

On August 12, 1981:

H.R. 3982. An act to provide for reconciliation pursuant to section 301 of the first con-current resolution on the budget for fiscal year 1982; and

H.R. 4242. An act to amend the Internal Revenue Code of 1954 to encourage economic growth through reductions in individual income tax rates, the expensing of depreciable property, incentives for small businesses, and incentives for savings, and other pur-

ADJOURNMENT

Mr. WILLIAMS of Montana. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 40 minutes p.m.), pursuant to House Resolution 206, the House adjourned until tomorrow, Thursday, September 10, 1981, at 10 a.m. in memory of the late WILLIAM R. COTTER of Connecticut.

REPORTS OF COMMITTEES ON BILLS AND RESOLU-PUBLIC TIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[Pursuant to the order of the House on August 4, 1981, the following report was filed on August 14, 1981]

Mr. DELLUMS: Committee on the District of Columbia. H.R. 1807. A bill to authorize the District of Columbia to issue and sell general obligation bonds for the purpose of paying certain liabilities of the District, and for other purposes; with an amendment (Rept. No. 97-219). Referred to the Committee of the Whole House on the State of the Union.

[Submitted September 9, 1981]

Mr. DE LA GARZA: Committee on Agriculture. Report on allocation of budget totals for fiscal year 1982 (Rept. No. 97-220). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. de la GARZA (for himself, Mr. Brown of California, Mr. Coelho, Mr. Fazio, Mr. Matsui, Mr. Panetta, Mr. Thomas, and Mr. Wampler):

H.R. 4416. A bill to enable the Secretary of Agriculture to assist, on an emergency basis, in the eradication of plant pests and contagious or infectious animal and poultry

diseases; to the Committee on Agriculture. By Mr. AKAKA: H.R. 4417. A bill to amend chapter 67 of title 10, United States Code, to grant eligibility for retired pay to certain reservists who did not perform active duty before August 16, 1945, and for other purposes; to the Committee on Armed Services.

By Mr. ARCHER: H.R. 4418. A bill to amend the Internal Revenue Code of 1954 to repeal the provision which prohibits individual retirement accounts and certain other retirement plans from investing in collectibles; to the Committee on Ways and Means.

By Mr. BRINKLEY: H.R. 4419. A bill to amend title 28 of the United States Code to modify habeas corpus procedures; to the Committee on the Judici-

By Mr. RANGEL (for himself, Mr. Gibbons, and Mr. Moore): H.R. 4420. A bill to amend section 103 of

the Internal Revenue Code of 1954 with respect to the small issue exemption; to the Committee on Ways and Means.

By Mr. DUNCAN:

H.R. 4421. A bill to amend the Federal Aviation Act of 1958 to require airlines which cancel flights to compensate passengers for the increased costs of taking alternative flights; to the Committee on Public Works and Transportation. By Ms. FIEDLER:

H.R. 4422. A bill to enforce the 14th article of amendment to the Constitution with respect to certain law enforcement misconduct by providing a substitute remedy for the existing remedy of exclusion of evidence, and for other purposes; to the Committee on the Judiciary.

H.R. 4423. A bill to amend title 18 of the United States Code to waive sovereign immunity and create a cause of action with respect to gross negligence in granting Federal parole; to the Committee on the Judici-

ary. H.R. 4424. A bill to amend section 2254 of title 28 of the United States Code to limit release of State prisoners by Federal courts pending Federal habeas corpus consideration; to the Committee on the Judiciary

H.R. 4425. A bill to amend section 2254 of title 28 of the United States Code to provide for conclusive rebuttal of certain allegations made by applicants for Federal habeas corpus if the record of State proceedings contradicts such allegations; to the Commit-

tee on the Judiciary. H.R. 4426. A bill to amend section 2254 of title 28 of the United States Code to limit Federal habeas corpus proceedings based on State convictions in certain cases where State courts remedies may not be properly exhausted; to the Committee on the Judici-

H.R. 4427. A bill to amend section 1979 of the Revised Statutes of the United States to limit the use of civil actions under that section to review the conditions of imprisonment of State and local prisoners; to the Committee on the Judiciary

By Mr. GEPHARDT (for himself and

Mr. Bailey of Missouri):

H.R. 4428. A bill relating to the duty-free entry of certain scientific equipment imported for the use of the Ellis Fischel State Cancer Hospital, Columbia, Mo.; to the Committee on the Judiciary.

By Mr. HARTNETT: H.R. 4429. A bill to amend the Labor Management Relations Act, 1947, with respect to suits for damages brought against individual defendants acting not in behalf of their union but in their personal and nonunion capacity for violating a no-strike provision of a collective-bargaining agreement, and for other purposes; to the Committee on

Education and Labor.

H.R. 4430. of Panama, used by the Commission, of which the United States retains use pursuant to the Panama Canal Treaty of 1977 and related agreements; and (6) not more than \$50,000 shall be available for expenses of the supervisory Board established pursuant to section 1102 of Public Law 96-70 (93 Stat. 456), including travel and transportation expenses under section 5703 of title 5, United States Code: Provided further,"

Page 28, line 3, change the colon to a

Page 28, line 3, change the colon to a period and strike out the remainder of line

14 and all of lines 4 through 7.

Page 28, line 20, after the comma following the words "Provided, That" insert the following: "of the sums referred to in this paragraph, not more than the following amounts shall be available for the following purposes:

(1) for transit projects, \$13,764,000;

(2) for general support projects, \$3,252,000;

(3) for utilities projects, \$1,870,000; and (4) for quarters improvement projects:

\$880,000: Provided further:".

Page 28, line 22, change the colon to a period and strike out the remainder of line 22 and all of lines 23 and 24.

Page 29 strike out lines 1 and 2 in their entirety.

By Mr. OBERSTAR:

—Page 14, line 24, strike out the period and insert in lieu therof a colon and the following: "Provided further: That of the funds appropriated under this heading, \$1,000,000 shall be available only for the operation of the National Driver Register.".

By Mr. SNYDER:

-Page 38, after line 15, add the following new Section:

SEC. 322. None of the funds in this Act shall be used to implement any change in the policy or rules governing the operation of aircraft at Washington National Airport (14 CFR 93, Subpart K; 14 CFR 159, Subpart C) as such policy or rules were in effect on July 31, 1981. This limitation shall not apply to any change in 14 CFR 159,60 nor shall it apply to Special Federal Aviation Regulation No. 44, amendments thereto or orders issued thereunder.

-Page 38, after line 15, add the following new section:

SEC. 322. None of the funds in this Act shall be used to implement any change in the policy or rules governing the operation of aircraft at Washington National Airport (14 CFR 93, Subpart K; 14 CFR 159, Subpart C) as such policy or rules were in effect on July 31, 1981. This limitation shall not apply to Special Federal Aviation Regulation No. 44, amendments thereto or orders issued thereunder.

-Page 38, after line 15, add the following new section:

SEC. 322. No funds appropriated by this Act shall be used to pay any salary or other expense for the purposes of putting into effect or enforcing any rule which requires any reduction in the total daily number of flights by (a) air carriers except air taxis, (b) or air taxis, at Washington National Airport below the number operated on July 31, 1981; except that this limitation shall not apply to Special Federal Aviation Regulation No. 44, amendments thereto or orders issued thereunder.

By Mr. STUDDS:

-Page 3, line 9, strike "\$1,402,898,000" and insert in lieu thereof "\$1,450,000,000".

Page 4, line 3, strike "391,000,000" and insert in lieu thereof "\$425,000,000".

Page 4, line 24, strike "\$29,730,000" and insert in lieu thereof "33,000,000".

By Mr. WILSON:

—Add the following section:

SEC. No funds appropriated by this Act shall be used to pay any salary or other expense for the purpose of putting into effect or enforcing any rule or order which requires any reduction in the total daily number of flights by (a) air carriers except air taxis, or (b) air taxis, at Washington National Airport below the number operated on July 31, 1981; except that this limitation shall not apply to Special Federal Aviation Regulation 44, amendments thereto or orders issued thereunder.

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed

under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the Congressional Record.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

REGISTRATIONS

The following registrations were submitted for the second calendar quarter 1981:

(Note.—The form used for report is reproduced below. In the interest of economy in the Record, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only,

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filling in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(M	lark of	ne squ	are or	nly)

Note on Item "A".—(a) In General. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm Isuch as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) Separate Reports. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

Note on Item "B" .- Reports by Agents or Employees. An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report-naming both persons as "employers"-is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

Note on Item "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the specific legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a ciff.)

(Answer items 1, 2, and 3 in the space below, Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

CONGRESSIONAL RECORD—HOUSE

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the second calendar quarter 1981:

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"Preliminary" Report ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

Note on Item "A".—(a) In General. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm Isuch as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

Note on Item "B" .- Reports by Agents or Employees. An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report-naming both persons as "employers"-is to be filed each quarter.

B. Employer. - State name, address, and nature of business. If there is no employer, write "None."

Note on Item "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House" = \$302(e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying

Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either

received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. bills.

2. State the general legislative interests of the person filing and set forth the specific legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quanti-ty distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a cift)

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."-(a) In General. The term "contribution" includes anything of value. When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribu--Section 302(a) of the Lobbying Act.

(b) If This Report Is for an Employer .- (i) In General. Item "D" is designed for the reporting of all receipts from which expendi-

tures are made, or will be made, in accordance with legislative interests.

(ii) Receipts of Business Firms and Individuals.—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation-will have no receipts to report, even though it does have expenditures to report.

(iii) Receipts of Multipurpose Organizations.—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts,

such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of \$500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) If This Report Is for an Agent or Employee.—(i) In General. In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) Employer as Contributor of \$500 or More.—When your contribution from your employer (in the form of salary, fee, etc.) amounts

to \$500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS).	
Fill in every blank. If the answer to any numbered item is "Non	e," write "None" in the space following the number.
Receipts (other than loans) 1. \$Dues and assessments 2. \$Gifts of money or anything of value	Contributors of \$500 or more (from Jan. 1 through this Quarter) 13. Have there been such contributors?
3. \$	Please answer "yes" or "no":
6. \$TOTAL for this Quarter (Add items "1" through "5")	loans) during the "period" from January 1 through the last days of this Quarter total \$500 or more:

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following reports for the first calendar quarter of 1981 were received too late to be included in the published reports for that quarter:

(Note.—The form used for report is reproduced below. In the interest of economy in the Record, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".-Reports by Agents or Employees. An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report-naming both persons as "employers"-is to be flied each quarter.

B. EMPLOYER.-State name, address, and nature of business. If there is no employer, write "None."

Note on Item "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"-§302(e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying

Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no

longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the specific legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and hills

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative indistributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below, Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 14

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

NOTE ON ITEM "D."-(a) In General. The term "contribution" includes anything of value. When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term contribution" includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribu--Section 302(a) of the Lobbying Act.

(b) If This Report Is for an Employer .- (i) In General Item "D" is designed for the reporting of all receipts from which expendi-

tures are made, or will be made, in accordance with legislative interests.

(ii) Receipts of Business Firms and Individuals.—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation-will have no receipts to report, even though it does have expenditures to report.

(iii) Receipts of Multipurpose Organizations.—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contribution of \$500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) If This Report Is for an Agent or Employee.—(i) In General. In the case of many employees, all receipts will come under thems

"D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests,

(ii) Employer as Contributor of \$500 or More. - When your contribution from your employer (in the form of salary, fee, etc.) amounts to \$500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

Contributors of \$500 or more

(from Jan. 1 through this Quarter)

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Receipts (other than loans)

1. \$.....Dues and assessments

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

2. \$Gifts of money or anything of value	13. Have there been such contributors?
3. \$Printed or duplicated matter received as a gift	
4. \$Receipts from sale of printed or duplicated matter	Please answer "yes" or "no":
5. \$Received for services (e.g., salary, fee, etc.)	14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last
6. \$Total for this Quarter (Add items "1" through "5")	days of this Quarter total \$500 or more:
7. \$Received during previous Quarters of calendar year	Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under under the headings "Amount" and
8. \$TOTAL from Jan. 1 through this Quarter (Add "6" and "7")	"Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following
Loans Received	example:
"The term 'contribution' includes a loan"—Sec. 302(a).	
9. \$Total now owed to others on account of loans	Amount Name and address of Contributor
10. \$Borrowed from others during this Quarter	("Period" from Jan. 1 through, 19)
11. \$Repaid to others during this Quarter	\$1,500.00 John Doe, 1621 Blank Bldg., New York, N.Y.
12. \$"Expense money" and Reimbursements received this	\$1,785.00 The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
Quarter And Reimodisements received this	\$3.285.00 TOTAL

Note on Item "E".-(a) In General. "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure" Section 302(b) of the Lobbying Act.

(b) If This Report Is for an Agent or Employee. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. Expenditures (Including Loans) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Loans Made to Others "The term 'expenditure' includes a loan"—Sec. 302(b). 12. \$	
15. Recipients of Expenditures of \$10 or More In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:	
Amount Date or Dates—Name and Address of Recipient—Purpose \$1,750.00 7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the	
"Marshbanks Bill."	
\$2,400.00 7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at \$800.00 per month.
